"AIPA Leads The Way"

May 6, 1957  
Page One

AIPA Bulletin--Published first week of each month, 12 issues per year.  
Membership--\$2.00 per year (entitles one to monthly bulletins, report forms, membership card & miscellaneous items). Payable to secretary.

Editorial....

By the time you read this, our E-skip season should have started as in previous years there were openings in late April or early May. Good openings should be forthcoming right along now, so the best of luck to all our active DX members! A few new stations (since last year) to be on the lookout for are: Ch2: KTVI2 St. Louis, Mo.; KVTI2 Santa Fe, N.M.; KDIX2 Dickenson, N.D.; KOTI2 Klamath Falls, Ore.; KTW02 Casper, Wyo.; KTC02 St. Paul, Minn.; Ch4: KPIC4 Roseburg, Ore.; Ch5: KNAC5 Ft. Smith, Ark.; WRAL5 Raleigh, N.C.; WCYB5 Bristol, Va.; CKMI5 Quebec, Canada; KAVE6 Carlsbad, N.M.; CFCL6 Timmins, Ontario; KTV06 Ensign, Kansas. Some of these are not on the air as yet, but should be sometime during the skip season this summer.

You will notice, with this month's bulletin, an "Equipment Compilation" sheet is enclosed. Please fill out this sheet to the best of your ability, and mail it in to me here in Dunkirk by May 26, 1957. With this info in our hands in a compiled form, it will be of great value and help in compiling articles concerning equipment (antennas, boosters, etc), to be published in future AIPA bulletins. Also, a detailed chart listing each AIPA DXer and his equipment, will be published either in the June or July bulletin. This should be of interest to all. There have been many requests for articles on equipment and we will try to fulfill your requests.

Starting next month, we will have a new "Western DX Editor". The new editor will be none other than Doris Johnson of Longview, Washington. She has offered her services, has been recommended by several and I'm sure she will do a fine job in the role of western editor. So, all reports, west of the Mississippi, go to Doris Johnson, 146 Maddock Place, Longview, Washington, starting in June issue (that is, all reports for June bulletin are to be in her hands no later than May 26, 1957--all future western reports to Doris! Don't forget!

Membership renewals of late: Norm Ernt; Don Middleton; Sam Brooks. New member in: William Grant, 315 A-Pleasant St., Worcester, Mass. A hearty welcome to all!

Deadlines for June bulletin are as follows: Longview, Wash (for western reports)--May 26; Buffalo (for FCC news), Temple, Austin, Shelbyville--May 27; Dunkirk (for eastern reports)--May 31st.

"Man-Made Cloud of Gas to Reflect TV, & Radio Waves"--Sometime in July American rocketeers will fire an Aerobee rocket from Holloman Air Development Center at Alamogordo, New Mexico. At top of flight (70 miles up) it will spew gas into the air. This is expected to cause reflection of TV and radar waves. (More on this next month)

In closing this month, may I congratulate all the newly elected AIPA officers and wish them the best of success in the coming year. Thanks also for all those who voted for, Yours Truly.

RS

Once we get our receiver in condition, the next problem is the antenna. Since the average "bursts" is of rather low strength, signal wise, we must have an antenna of high gain and good directional qualities. Separate units for the high and low bands would be the best system, i.e., two broadband yagis, one chs 2-6, the other chs 7-13. An antenna mounted booster would help very much as it would tend to amplify the signal direct from the antenna itself, and not the line noise such as a receiver top booster does.

Most important however is height. Now scatter can be noticed on rabbit ears, but if you want best results, your rig must be up high. A cheap antenna up fifty feet, will work better than a good installation up thirty feet, under most receiving conditions. The only problem with height is the fact it will improve your ground wave, thus bringing in some distant station to give your "bursts" competition. A dead channel is not so good either, so therefore you will have to experiment at different heights for the best balance.

Speaking on the dead channel, that is no signal of any kind being received, usually early in the morning before most stations sign on, you must point your antenna in the general direction you desire reception from. It must be pointed out here however that if for example your antenna is pointed west, and you notice a mystery test pattern, in most cases the pattern in question is not necessarily from that area. No matter how sharp your antenna is, this will happen frequently. The reason for the directional antenna is to "break through" the ground wave stations that may block out the weaker scatter signals, and the reason your antenna should be pointed in the area you desire reception from when the channel is dead, is the fact that this will deliver the most signal under these conditions the bulk of the time.

The ideal way to log scatter is to have one rather weak station operating on the channel you are about to monitor. Turn your antenna just near enough the "kicker" station so you receive enough of their signal to notice, but not enough to damage the scatter reception. Then watch things pick up. Even if your pointed away from the area you desire, your chances of a logging are much better using this method. You can also use the "kicker" to adjust your fine tuning which is very important.

You will find the bulk of your scatter will be from the general direction of your best tropo reception. Stations in the 500 to 1200 mile range will be the best, although you may notice scatter from a weak ground wave station as near as 100 miles.

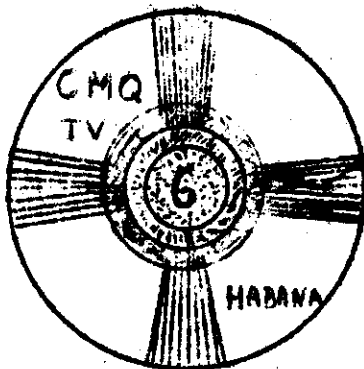

The best time for scatter here in western New York is 6:00 AM to 10:00 AM on average days. In your locality the time may be quite the opposite. When there is meteor showers or related conditions, keep your eyes open. Before and after E-skip is also very productive. You may obtain books on the subject of meteor showers etc., which will give you lots of information, but your best bet is to keep your eyes open and your set going!

If any of you want more info on the matter, write me and I will help you all I can. Next month (June) we will take up the problem of "Low Band Locals" in keeping with the skip season. 30

"MIS'L NEWS "

A formal request to Pres. Eisenhower from the Military is asking for use of channels 2 to 6 for Military purposes. Of course we (DXers) hope this does not happen.

- Ch 22 WDAU-TV Scranton, Pa. now using new call and 1,000,000 watts.
- Ch 29 WNYT-TV Buffalo has target date set for Aug. 1st.
- Ch 12 KVSO-TV Ardmore, Okla. had their 300' tower blown down-Tornado.
- Ch 7 KTBC-TV Austin, Tex. now going with their new 1,137' Tower.
- Ch 9 WSOC-TV Charlotte, N.C. now on the air.
- Ch 9 WROM-TV shifting from Rome Ga. to Chattanooga, Tenn.
- Ch 4 CFCR-TV Kamloops, B.C. Canada. went on the air April 1st.
- Ch 19 WTVI (TV) Pierce, Fla. tried for (Ed) on ch 3... Denied!
- Ch 8 WYES (TV) New Orleans, La. began April 1st. 50Kw. Vis.
- Ch 4 WBZ-TV Boston, Mass. now has the tallest man made structure in New England. 1,349 foot Tower above Sea Level.. as of Apr 14th.
- Ch 17 WBUF Buffalo, N.Y. will go up to 1,000,000 Watts by Aug. 1st.
- Ch 35 WJPB-TV Fairmont, W.VA. will be back on the air in late June.
- Ch 11 CRCH-TV Hamilton, Ont. Canada asking for power increase to 150Kw.
- Ch 5 CKSO-TV Sudbury, Ont. Canada asking for ~~satellite~~ satellite on ch 13
- CJDC Dawson Creek, B.C. applying for Ch 5 on Alaska Hgw 173.5 watts
- Terre Haute, Ind. has appli in for a ch 2 in that city.
- Beaumont, Texas is favored for a ch 6 in that city. (KRIC)

ABC-TV is transmitting test signals during actual programs, they are two vertical lines at top left and right corners. Thoses lines normally cannot be seen on the screen when set is in Vertical Sync,. Bring your Vettical blanking down on a ABC program and look for it.....(Could clear up some of our Mystries HI ! !

Art Collins

This month there been little or nothing come in for the "Rank" column. We have not heard from Frank and was wondering how things are shaping up for him. I see that our good friend Carl Lupton is doing a fine job on the "Meteor Scatter" Editing.

I must acknowledge and thank each and every one for the items of FCC News and clippings sent me for the Column, many members have sent in items and possibly has'nt seen it mentioned in the Bulletin, this is all due to the limited space which is confined to one page. We try to get the news of New Stations, Deleted, Applications, Call changes, shifts, power ups, Mis'l News such as Targets-dates, New towers up and those blown down etc.

My thanks to such fellows as Gene Webb, Clinton Day, Frank Wheeler, Carl Lupton and a few more who are regular in their efforts. Again this is appreciated.

We have word from Dorris Johnson of Longview, Washington that she is ~~negotiating~~ negotiating with KFAR-TV ch2 in Fairbanks, Ala. for a DX test and will let us know of time date etc. Here are few sign on and offs from Dorris: KMAU-3 & KGMB-9; on at 0900 and off at Midnite Hawaiian Standard time. KONA-2 & KULA-4; on at 1330 and off at midnite. Hawaii time is two hours earlier than Pacific Standard time. The new KTVI-2 St. Louis has been seen by Bob Scybold with test pattern and ID slide before 7:00 AM EST. Is now, Test patten on 1000 and programing at 1300. With the coming of Daylight Saving time this will change things around.

KSWs-TV ch 8 Roswell, New Mexico has the Worlds tallest Tower (TV) in operation, also the tallest man made structure in the world, 1610 feet high and located about 40 miles east of Roswell. ( the Empire State Bldg in New York is 1472 feet tall.) The Tower is the first prefabricated model to be built in the United States. It was constructed in 30 foot lengths or sections and hoisted into place section by section. It is designed to withstand winds up to 250 miles per hour. Thanks to Gene Webb for this info.  
Webb

Out in Palo Alto, Cal. American rocketeers soon will send up a gas cloud into the atmosphere 70 miles above the earth in a attempt revolutionize TV and radar communications. At the 70 mile height a rocket will spew the gas into the air. This gas will recat with it's high altitude ~~surroundings~~ to form nebulous mass of electricified particles capable of reflecting TV and radar waves. This test is expected to take place some time this July at Alamogordo, N.M. Results of this test will prove beneficial to the U.S. Forces in time of war or peace. (and I hope for us DXers, Hi!) Thanks to Frank Wheeler for this item.

May we conclude this with a happy thought !! Pull out that old Wallet with your cardsetc in there and check ~~up~~ your AIPA Member-ship Card as for expiration date !!!!! We do so dred to write you and tell you that your time is UP HI. Surely you Boys know that it's your dues that keeps the club in existance and with out it we just can't keep going.

Where oh where is the Skip?

Art Collins

## "Meteor Scatter Column" Conducted by Carl Lupton, Shelbyville, Ill.

Having little comment to make on the Lyrid Meteor Shower which is now on the wane, I find no marked increase in the report of reception as to pertaining to the following summary. Reception did seem to be above average, however. -- One worthwhile note I want to mention, is the verified letter of reception received by Doris Johnson, from the Islands of Hawaii, the only verification they have made Statewide-wise.

Art Collins, Buffalo, N.Y. - Apr 5, WRAL5, WCBS2, WCYB5, WCSC5, Apr 6, WTV2, WCBS2, WJBF6; Apr 7, WRCA4, WDSU6; Apr 8, WRAL5, WCTV6, Apr 11, KMTV3, WRAL5, WCYB5, WTVN6, WJBF6; Apr 12, WDBO6, WCTV6, WDSU6, Apr 16, WJBF6, WDBO6, WCTV6; Apr 20, WCBS2, WRCV3; Apr 21, KELLY4 was tentatively IDed on their Special Test at 0311. All other reception was seen in the early AM. (Before breakfast, Art?) Good report, tho.  
Doris Johnson, Longview, Wash. - Mar 24, KXLY4, (new), KVOI2, KVAL13; Mar 25, KOOK2; Mar 27, KUTV2, KVOI2; Mar 28, KBOI2, KREM2, KUTV2, KUTV2; Mar 31, KOTI2; Apr 1, KOTI2; Apr 10, KNXT2; Apr 13, KFAR2 (tentative ID), Apr 15, WSZ3, (new, and awaiting veris), WLW-04, (same) Apr 16, KOOK2, KUTV2. Times are varied, but mostly in AM. 3 new for the month, with 2,000 miles as best distance reported.

Bob Seybold, Dunkirk, N. Y. - Mar 23, WCYB5; Mar 25, WRAL5, KVOO2, KSD5, WBRZ2, WKR65, KMID2; Mar 26, WSB2, WCSC5, WKR65; Mar 27, WCBS2, WCYB5, WCSC5, WBBM2; Mar 28, WSB2, WCSC5, WBBM2, KSD5, WKR65, KCMO5, WMCT5, KRGV5; Mar 29, WPTV5, WCYB5, KSD5; Apr 1, WCSC5, KSD5, WKR65, WLAC5; Apr 2, WCSC5, WCYB5, WBBM2, KMID2, WKR65, KSD5, WAGA5; Apr 3, WCYB5, WCSC5, WRAL5; Apr 4, WCYB5, KSD5, KVOO2, WBRZ2, KFEQ2, KMID2, WMT2; Apr 5, WCSC5, WCYB5, WDSU6, WMT2, KSD5, WKR65; Apr 8, WAGA5, WCYB5, KYTV3; Apr 9, WAGA5, WCYB5, WPTV5, KSD5, WKR65; Apr 10, WCYB5, WCSC5, WDSU6, KSD5, KMID2, WKR65; Apr 11, WMLR2, WCYB5, WAGA5, KVOO2, WKR65, KMID2, KARD3; Apr 12, WCSC5, WCYB5, WBBM2, KVOO2, KARD3, KSD5, WKR65, Apr 14, WCYB5, WKR65; Apr 15, WCSC5, WCBS2, WTV2, WPTV5, KVOO2, WKR65, KOKT2, KTVI2 (new); Apr 16, WCBS2, WCSC5, WCYB5, WRAL5, WAGA5, WPTV5, KOTV6, KDAL3, KARD3, KDLO3, KYTV3; Apr 17, WCBS2, WCSC5, WCYB5, WPTV5, KARD3, KDAL3, KYTV3; Apr 18, WPTV5, WCYB5, WCSC5; Apr 19, WCBS2, WCSC5, WAGA5, WCYB5; Apr 22, WCBS2, WAGA5, WCSC5, WMCT5; Apr 23, WCBS2, WCYB5, WRGV3, WCSC5, KSD5, KDAL3, KMTV3, KYTV3, KDLO3, WAVE3; Apr 24, KARD3, WCIA3, KYTV3, KDAL3, KMTV3. A nice solid report, Bob. The times were all early AM, EST.

Billy Draeb, Kewaunee, Wis. - Mar 22, WMLR2, WKY4; Mar 27, WKY4; Mar 29, WMLR2; Apr 2, WCBS2, WAGA5; Apr 5, WAGA5; Apr 8, WMLR2; Apr 10, WCBS2, WMLR2, WFMY2; Apr 13, WKY4; Apr 15, WKY4; Apr 16, WCBS2; Apr 19, WCBS2; Apr 20, WKY4, WOC6; Apr 21, KRDL4, WKY4; Apr 22, WFMY2. Billie had many bursts of the same station on the same day, but space prohibited listing all. The times were very early AM. A nice report, anyway. Best distance was KRDL4 at 960 miles.

Jerry Don Burch, Hot Springs, Ark. - Mar 25, WBBM; Mar 26, WFMY; Mar 28, WBBM; Apr 1, WBBM; Apr 4, WBBM, WMLR; Apr 6, WBBM, WGR; Apr 8, WBBM, WUSN, WGR, WBAY, WFMY, WMLR, WJBK; Apr 9, WMT, WBBM, WJBK; Apr 10, WFMY; Apr 11, WBBM, WGR; Apr 12, WBBM, WBAY, WJBK; Apr 14, WBBM, WGR; Apr 16, WGR, WBAY, WBBM, WMLR, WJBK; Apr 17, WBBM, WBAY, WMT, WFMY, WGR; Apr 18, WMLR, WBBM, WMT, WFMY, WBAY; Apr 19, WMLR3, WBBM, WBAY, WMLR, WMT, WJBK; Apr 20, WGR, WBBM; Apr 21, WBBM, WMLR; Apr 22, WBBM, WBAY, WJBK, WMT; Apr 23, WUSN, WBAY, WJBK; Apr 24, WMLR, WMLR3, KYTV3, WBBM, WBAY, WFMY. Summary: 10 stations seen 67 times. All on Channel 2 unless indicated. Nice going, Jerry.

King Schafer, Kenmore, N. Y. - Apr 1, WCBS2, WCSC5, WRAL5; Apr 2, WCYB5, WCIA3; Apr 3, KYTV3; Apr 4, WMLR2, WCTV6; Apr 5, KARD3, KFEQ2, WMT2, WLBT3, WAVE3, WBTV3; Apr 8, KMTV3; Apr 9, WLW-D2; Apr 11, KVOO2.  
Continued next page.

## "Meteor Scatter Column, Continued"

Apr 14, WRC4, WBZ4; Apr 15, WDBO6, WRGP3, WBBM2; Apr 22, WEMY2; Apr 23, WLAC5, KCMO5. - King also reports a possible logging of KEDY-TV 4, on their Special DX Test, held early AM of the 21st of April.

Locally I spent a little more time in the wee morning hours before the locals came on and managed to log two new stations; am still await-verification. A strange coincidence on the part of Art Collins and myself, concerning the Special Test of KEDY-4, Big Springs, Tex. At 0309, EST, I saw an IHTP with unreadable call letters located at the top of the pattern, and wrote to the station for verification. I received a letter, denying they used an IHTP for the Test, and enclosed a drawing of the pattern that was used. Also an explanation stating that Collins had picked up the same TP at 0311, and had proceeded the same way as myself. Our mystery is, what did we see? - WGBS2 was seen a total of 18 times, followed by WGR2 9 times. WRC4 5 times, and others, total of 16 loggings, one or more times. Have letters out inquiring about a Channel 3 logging of a Canadian station.

Although not submitted as an official report, Barney Rauch of Peoria, Ill. now has a photo of a MS logging. He also reports verification of KTVR, Denver, Colo.

This seems to be all the reports for this month, so good luck for next month. C.F.Lupton

\*\*\*\*

\*\*\*\*

\*\*\*\*

\*\*\*\*

A late report in from our new Member Alan Livingston of Tulsa, Okla. Feb. Mar. & Apr. include stations as KSLA 12; KCMO 5, KRCY 13, XHTV 4, KARDZ KVSO 12, WIBW 13, KONA 12, WBAP 5, KTBC 7, KTVH 12, KFDX 3, KATV 7, KFEQ 2 All with signal strength fair to good and few excellent. Most in PM Hrs. Alan has log of 36 to this writing, Magnavox receiver, Clear beam sky sweep antenna. No Booster. Nice to hear from you and keep it up.

\*\*\*\*

\*\*\*\*

\*\*\*\*

\*\*\*\*

We heard from an old friend Hank Ward of Ponca City, Okla. and it was good to see that he is still at the TV. Hank had an opening on Apr 23rd GW--- KMID 2, KFDX 3, KRLD 4, WBAP 5, KCMO 5, KCEN 6, KSYD 6, KTBC 7, WFAA 8, KFJZ 11.

Word is received here today May 4th from Larry Vehorn of Speedway, Ind. that he has info of a new TV Station (received ?) in Budapest, Hungary 49.75 Mc vis. 50Kw. 56.25 Mc. Aur. 10Kw, WLWI ch 13 will go on the air the first week of Sept. 316 Kw. visual & 158 Kw aural. 1000 foot tower. WTTV ch 4 moving their tower and Xmttr to Trefalger (27 miles south of Speedway. will increase their tower height 300 feet. The owners (Sarkes Tarzian, Inc.) will pit WPTA, Roanoke, Ind. on the air sometime this fall. Thanks for the info Larry.

\*\*\*\*\*

\*\*\*\*\*

\*\*\*\*\*

\*\*\*\*\*

KOPO-TV ch 13 Tucson, Ariz. will change call to KOLD-TV on or about May 31. should be using this call now.

\*\*\*\*\*

\*\*\*\*\*

It's interesting to note that the MS reception has dropped off considerable here in Buffalo in the morning hours say from 6:00 AM on, the usual run on ch 2 5, 6, scarcely nothing but in the early AM hours from 1:30 AM EDST it has been good on 2, 3, 4, 5, 6 and I mean GOOD. the bursts are only seconds apart..... Art.

\*\*\*\*\*

\*\*\*\*\*

Skip hit here in Buffalo for a short spell Saturday morning just before noon and was from the north east on Ch 2 CKCW-TV and CBHT ch 3. The signal strength was strong but not long lived, about 3/4 hr. Sat May 3rd.....

Election Returns

The members of the A.I.P.A. elected to serve as officers for the period of May 1, 1957, to May 1, 1958, are as follows:

President-Robert Seybold, Bennett Road, Dunkirk, New York  
 Vice-President-Art Collins, 68 Amber Street, Buffalo 20, New York  
 Board Members-(listed in reverse alphabetical order)

1. Kingdon Schafer, 360 Zimmerman Boulevard, Kenmore 17, New York
2. Carl Lupton, Shelbyville, Illinois
3. Richard Lowry, 1204 South 31st, Temple, Texas
4. Frank Hill, Route 3, Box 168, Cardington, Ohio
5. Jerry Don Burch, 131 Liberty Hill, Hot Springs, Arkansas
6. Bedford Brown, Jr., 104 West Mineral Street, Hot Springs, Arkansas  
 (College address will be printed in bulletin.)

I would like to congratulate the winners and thank everybody who voted for me. I am very grateful and will certainly try to do my best.

Details of the Election-A rather small per centage of eligible voters exercised their rights as only 33.6% or about one-third voted. The President and vice-president were elected by huge majorities, but the board member voting was extremely close as it was in 1956.

Unidentified Programs(All time is E.S.T.)

Norris Doyle, 62 Water Street, Pittsburg, California

1. Mar.26 6:35pm ch.2 "Autrey \_\_\_\_\_" over the no. "2".
