

FM STATIONS...

This list of FM stations has been compiled from F. C. C. records and is correct as of July 1, 1938. Stations are listed alphabetically by state, and by cities within states.

C indicates a station assigned a construction permit. Such stations may be broadcasting under this permit. An asterisk (*) indicates an educational or noncommercial station.

ERP is effective radiated power in kilowatts, and indicates the relative power of the transmitter.

The FCC defines height (HT) in terms of the average height of the terrain within two to ten miles of the transmitter. Thus if the HT figure is a minus quantity, reception of that station may be difficult for those not living in the same valley.
