WORLDWIDE TV-FM DX ASSOCIATION

Serving the VHF-UHF Enthusiast

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION, DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: TOM BRYANT, GREG CONIGLIO, BRUCE HALL, DAVE JANOWIAK, AND BILL THOMPSON.

Editor/Publisher: Bill Thompson
Circulation: Mike Bugaj Comptroller: Dave Janowiak

Editorial Staff: Tom Bryant, Greg Coniglio, Victor Frank, George W. Jensen,
Jeff Kruszka, Keith McGinnis, Fred Nordquist, Matt Sittel, Doug Smith,
Thomas J. Yingling, Jr., John Zondlo

ANARC Rep: Jim Thomas Back Issues: Dave Nieman Original Cover Design: Harry Hayes

FROM THE STAFF:

BOISE: The dates for our 2001 convention in Boise, Idaho are set and we hope you'll incorporate the event into your vacation/travel schedule for next year. Frank Aden, who has previously hosted conventions in the "Gem State" for AM DXers, will welcome us July 27-29. This early notice is aimed primarily at those who must submit requests for 2001 vacation dates during the month of January. Idaho will be a new destination for a WTFDA convention and offers a special opportunity for members in the western U.S. and Canada to attend a club function closer to their homes. Details regarding this event are being finalized and will appear in this column when they are completed. At that time registration and reservations will be encouraged. We want to emphasize that our conventions are, in reality, informal get-togethers with a minimum of planned activities. This allows those who attend plenty of time to renew old acquaintances, meet new DXers, visit, look at DX video and photo collections, and even do some sightseeing on their own. ***This is the FM/TV DXer's event of the year. Don't miss out on the fun July 27-29.***

MAJOR TROPO EVENT: November 10 and 11 proved to be one of the better tropospheric openings of the year for a huge area from the midwest to the southeast. Exceptional loggings were reported by almost everyone who knew about the activity...and the word spread fast on both of WTFDA's on line outlets. The 112 member Topica bulletin board (reflector) was loaded with virtually instant update info on who was getting what; and because the opening occurred during the regular Friday night chat time on the Delphi site, live postings there were helpful in IDing stations being seen by members hundreds of miles away. If you're on line but not participating in these services, you're missing two outstanding sources of DXer information. Contact Mike Bugaj <mbugaj@snet.net> for information. It's easy, fun, and rewarding.

HAPPY HOLIDAYS

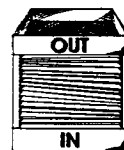

WTFDA MAILBOX

Mike Bugaj

[Mbugaj@snet.net](mailto:mbugaj@snet.net)

DECEMBER 2000 HAPPY HOLIDAYS TO ALL!

Welcome everyone to the Holiday edition of the Mailbox. I hope everyone has a super-fine holiday season! December can be an interesting DX month. You might see a little bit of E skip, perhaps into the FM band if you're lucky. Tropo is possible in the Southern states, and F2 has been an almost constant daytime visitor at my location since the middle of October. F2 from the CA Highway Patrol is common here on 42mhz, so turn on your scanner and see what you can hear.

DON'T YOU JUST LOVE THIS HOBBY?

I do, and I'm sure that the following folks who have renewed their membership for another year do also. Here they are: Dr. Joel Rosenberg (ON), Chester Jaffee(CA), Eric Nagel(SC), Jeff Kitsko(PA), Steve Branch(IL), Jim Renfrew(NY), Kurt Nelson(PA), Bob Seybold(NY), John Callerman(OK) and Keith Short(OH). Glad to have you all staying for another year!

This month we have lots of good comments from WTFDA members, so let's get started. Luis Franceschi in Ponce, PR sent an item from a local newspaper that mentioned that RAAD Broadcasting, owner of WXYX-FM ("LaX") in Bayamon, PR has submitted an application for a c.p. to build a booster on 100.7 in Juana Diaz City near Ponce. The booster will run with .014kw and will be located 6km northeast of Juana Diaz City.

Luis cut some logos out of his local newspaper and I have included two of them here. One is from WZMT-93.3 and WCTA-95.1, and the other is from WMEG Guayama-San Juan. As time goes on I will try to use the other three here. Luis would also like to see more DTV News here in the VUD. Well, Doug does an excellent job with DTV info and news and when something really important happens regarding DTV, you'll read it here in the VUD. To see how many WTFDA members feel about DTV, read *! Want My DTV?* In a recent VUD.

John Vervoort checks in from Brooklyn and asks: "Whatever happened when network affiliates used to advertise in the TV Guide or local newspapers? This seems to be a lost art. I have a collection of TV Guides from different markets in the US. Most of these are from the late '80s, however I

do have some from the '50s, '60s and '70s. Network affiliates used to run full or half-page ads, complete with station logos and photos of their news staff. I have even assembled an album of the network affiliates' ads. Most stations use a title alongside of their channel number and call signs. The most common of these being Eyewitness News, Action News, Newscenter and NewsChannel. In my opinion the best part, by a long shot, of TV DXing is viewing the local news on a major network affiliate. No two stations are exactly alike in how they present the news. It is far more exciting than watching the same network feeds you would see and hear on your local station. I find that the most fun and interesting stations to view are from medium-sized markets. Unlike stations in urban centers or very small locations, stations serving medium-sized markets have pleasant looking futuristic studios, nice theme music and an overall professional format".

Speaking of TV Guides, David Shapiro emails in from Little Rock and asks me to let you all know again that he's looking for mint copies of the VA-NC edition and Central VA editions of TV Guide from 1954-1957. He will take the best reasonable offer. Call Dave at 501-664-8673 weekday nights and weekends. David wants these so bad he'll be willing to pay you in pure plutonium.

John Callerman sent a renewal check and asked to be placed back on the WTFDA reflector again. John just completed a move from IL to Krum, TX. John writes "We're still bogged down in remodeling work at the new house. We got moved in 8/14, but the work that we'd contracted for three years ago still isn't done. Little bits and pieces, with two-week or more gaps between the next step. I'm remembered of "George Washington Slept Here", an old Broadway play which we did in the Pampa, TX Little Theatre 35 years ago. The basic play premise was all the problems found in a remodeling job". John, I'll have my old buddies Bob Villa and Norm Abrahms there in the morning to straighten things out. :)

Received another nice email from Jim Ayers in Atlanta, and Jim writes: "Read an article in Radio World yesterday about a gentleman who has conducted studies on how receivers' sensitivity falls off on the order of "several magnitudes" in areas of high signal concentration. His studies dealt with FM, which I can't DX here due to front end overload. End result, a capable receiver falls far short on distance results as it adjusts to the local RF. I assumed the reduced sensitivity works the same way on TV". Jim, this is news to me, but I hope others will write in or email me and comment on this.

Over 110 WTFDAers get the latest news via email!

David Sinclair reports from Vancouver that he has a new email address and wants you to know. You can reach David at davidasinclair@yahoo.com. Do you yahoo?

WTFDA MEMBERSHIP LIST

The complete WTFDA membership list is available for your viewing pleasure on the internet. I have removed street addresses from the list but have kept everything else intact. Tom has mentioned including a membership list with the VUD and

I'm sure he will when he has the time to do it. I would advise all of you who can get to a computer to check it out for any mistakes in your name or address. I have two URLs where the list can be found: <http://pages.cihome.net/fmdx/wtfda3.html> and <http://members.nbc.com/crccc/wtfda3.html>. Use whichever address works for you. The current list is dated Nov 5th. I'll probably update it around Jan. 1st and from then on every 3 months. The WTFDA membership stands today (11/11) at 275 people. This is the best shape the club has been in a while.

THE CONRAD RDS MANAGER

"Pat Dyer is owed a big recognition for what he has been doing with the Conrad RDS Manager and he hasn't even been tooting his horn about it. I counted his dx report totals in the November column...roughly 528 loggings (both new and relogs) in his report, with 121 of them being id'd with the RDS Manager. That converts to almost 23% of the stations he listed as loggings. That actually surprises me...up until reading his report, my sources have been saying that the U.S. is just a little over 10% in use of RDS, but not according to Pat's report".

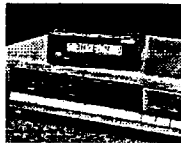

These words come from WTFDA member Jim Thomas of Milliken, CO. Jim pays attention to Pat Dyer's DX reports and he noticed something that the rest of us overlooked. He noticed that Pat is logging an awful lot of FM stations by their RDS IDs. Because of his observations, Jim himself bought a Conrad RDS Manager direct from the distributor in England. He tried it, and he loves it. And now the RDS Manager is HOT...very HOT!

If you are subscribed to the WTFDA email list, then you already know a little about this. But if you are not, here is the information. The RDS Manager is made in Europe, where most stations broadcast an RDS signal and are light-years ahead of the USA in that respect. Many tuners and receivers used in Europe already have RDS incorporated into their circuitry. Most European FM DXers rely on their RDS display to give them the IDs they need to log a station. With RDS starting to take hold in the United States, some DXers are beginning to take advantage of the benefits of RDS. The biggest benefit...an ID of the station on a LC display that stares at you.

The RDS Manager itself is a self-contained unit that sits besides, or on top of, your receiver or tuner. The Manager connects to one of your audio-out lines (A "T" connector is used to splice the unit into the audio line). The unit runs on 9-16 volts DC. Jim says

the unit is about the size of a small digital clock radio. Take a look at the picture below to see for yourself.

Jim has had good luck using the unit for meteor scatter Dxing. If the burst is long enough, it will trigger the RDS Manager to show an ID on the unit's display.

Needless to say, a unit like this may prove invaluable during next summer's E skip season and may be a valuable aid in IDing stations in the educational band that seem to play nothing but music or run nothing but NPR News. Now you'll be able to go there, get the ID and get out.

WTFDAer Rich Wertman has been in contact with the distributor in the UK to try to purchase some units, field test them and sell them in the United States. The unit itself is not expensive; if bought direct from the UK the price is around \$50.00.

I am one of those people standing in line to order their RDS Manager. I think it is an exciting product, a way to ID more stations...stations that normally would not ID ever. The only fly in the ointment is that the units are NOT available. They have been back-ordered by the manufacturer and Rich is unable to get any at this time. But sometime they will be available. Maybe I'll see you standing in line with me!

Thanks to Pat Dyer for using the RDS Manager, and thanks to Jim for noticing Pat's loggings, buying one for himself and then telling us about it.

HOW I STARTED DXING

This time from Bill Mitchell, Columbus OH

Back in the early to mid 1950s in Northern California there was no ch. 2. I came home from school one day to find a ch. 2 as clear as the SF stations 50 miles away. However, this was coming from Denver, CO. That was all it took.

As a kid I logged Vancouver, Calgary, Midland, TX and various other locales from my Santa Rosa location. KTVU came on the air on ch. 2 in the later 50s, spoiling some of my fun. However, being a good distance from San Francisco, the DX stations often would overwhelm KTVU and the other lo-band stations, resulting in some good IDs.

Now living in the Midwest, there are plenty of locals and near fringe stations on VHF and UHF to contend with, but I still love finding an elusive station, made easier at my deep fringe cabin location at Indian Lake. This is where skip can really cook with such locales as Cheyenne, WY and Miami, FL having been received there.

I see that co-channel interference and suddenly I am that 10 year old kid again, fascinated by that distant channel 2, 3 or 32.

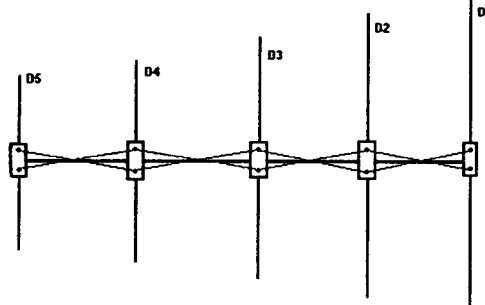

I love this hobby. It stimulates a very enduring curiosity.

LEAST, BUT NOT LAST

Thanks to everybody who contributed! So how did YOU get started? Write me a letter! Sign up for the WTFDA list and join our chat twice a week on Delphi. We are only as far away as your computer! Don't forget to write! -Mike

Build Your Own FM Antenna

Antenna plans from Alexeis Marreros Cruz

Here are some antenna plan submitted by Alex. He uses the FM antenna on the left to listen to two stations located at the Guantanamo Naval Base from his home.

This is a log periodic design. Elements are marked D1 through D5.

Lengths of each element is as follows. The length represents one half of the total length, or from the center to the end of the element.

Length of element D1 is 62.5 cm.
Length of element D2 is 58.5 cm.
Length of element D3 is 54.5 cm.
Length of element D4 is 50.5 cm.
Length of element D5 is 46.5 cm.

Spacing between elements is as follows.
From element D5 to D4 17cm; D4 to D3 18cm, D3 to D2 19cm and from D2 to D1 21cm. Impedance is 300 ohms and lead-in connects to element D5. Isolators may be made out of plastic with the mounting holes drilled 34cm apart. Lead-in/Balun connects to screws and wing nuts installed at element D5. Have fun with it!

I RECENTLY BOUGHT OUT A DISTRIBUTOR'S STOCK OF ANTENNAS AND AMPS AND WOULD LIKE TO PASS THESE SPECIALS ALONG TO CLUB MEMBERS:

WINEGARD:
PR-7042 VHF/UHF ANTENNA 150" BOOM 12 AVAILABLE \$ 79.00
PR-5020 VHF ANTENNA 96" BOOM 1 AVAILABLE \$ 59.00
PR-5030 VHF ANTENNA 120" BOOM 1 AVAILABLE \$ 69.00
PR-5040 VHF ANTENNA 175" BOOM 5 AVAILABLE NO LONGER MADE \$ 89.00
PR-9022 UHF YAGI/COR REFLECTOR 80" BOOM 5 AVAILABLE \$ 42.00
PR-9032 UHF YAGI/COR REFLECTOR 118" BOOM 6 AVAILABLE \$49.00
AMPS:
AP-3800 VHF 29DB GAIN 1.9 NOISE 75 IN/OUT 6 AVAILABLE \$ 49.00
GA-3700 VHF 17.5 DB GAIN 2.2 NOISE 300 IN 75 OUT 4 AVAILABLE \$ 39.00

CHANNEL MASTER:
AMPS:
OQ98C UHF QUANTUM CARTRIDGE AMP 23DB 2.5 NOISE 3 AVAILABLE \$ 39.00
ABOVE CAN BE USED ON ANY UHF ANTENNA W/ ENCLOSURE

ANTENNA-CRAFT:
P-7 PARABOLIC UHF DISH 7" NO LONGER MADE THIS IS IT!!! 1 AVAILABLE \$199.95
MXU-37 UHF CORNER REF/YAGI 80" BOOM 6 AVAILABLE \$39.95

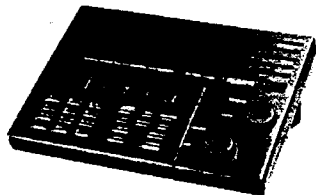

COAX CABLE SPECIALS:
RG-6U BELDON SATELLITE SWEEP TESTED CABLE
1000' BOX \$ 99.95 OR PER FT. @ .20'
RG-11U SATELLITE SWEEP TESTED CABLE
1000' SPOOL \$ 250.00 OR PER FT. @ .40'

LANCE ANTENNA
U-60 PASSIVE WAVE ANTENNA 60" BOOM \$59.95
U92 PASSIVE WAVE ANTENNA 92" BOOM \$ 79.95

"ABOVE PRICES DO NOT INCLUDE UPS SHIPPING"

FALL TROPO SPECIALS!

If you are interested in any items listed, or any not listed, contact me via email at rxantenna@aol.com or by phone at 716-433-0805 M-F 9 to 5, SAT 10-2 EST or write to Rich Wertman, 6150 Crosby Road, Lockport, NY 14094

WTFDA ScanLog 30-50mhz loggings!

F2 Skip Returns!

December 2000

JEFF KADET, MACOMB, IL

2-way FMn heard on these freqs. from South and Central America: 47.825, 48.425, 48.700 and 47.800. Also almost daily reception of some New Zealand on 45.24 to 45.26 MHz and Australia 46.171 MHz video buzz but usually extremely weak. This happens in the afternoons. Also, these stations I've worked on 6 meters the past few weeks:

00-10-31 1531z FR1GZ 50 ssb Reunion Island	00-11-06 1448 P43JB 50 cw 599Aruba

BILL NOLLMAN, FARMINGTON, CT

Here is my running list of actual IDed, known stuff... I have only been really trying to ID them for a short time... Equipment: Icom R-75 with CM Monitenna in the attic, sometimes 130 foot longwire in the woods.

Always In:

30.45 Fort Hood, Texas - Range Control - doing EVERY top of the hour radio checks of at least 20 bases around Ft. Hood and war game updates.
29.66 "From the Republic of Texas, this is the W5DFW repeater, Dallas, Fort Worth"

Other Regulars:

33.88 KMF447 - Houston, Texas FD
35.34 Spanish Paging
39.92 Spanish Paging, beep tone at the end of every tx.
37.18 Very southern accents (I call them VSA's) not sure if FD or PD yet

11/3/00

42.12 "H-20 Sacramento on the Gold"
42.20 Mobile units responding to same bus rollover as 42.12 base
42.08 "KAQ869" - Auberry, California State PD
42.08 Susanville (CA) mentioned VERY often in nearly every tx
42.54 Humboldt (county) mentioned often... "Dos Rios on 101"

(Bill Nollman's report continued)

39.60 WQHM438 and "in Spring Valley" - El Cajon, CA State PD

11/11/00

42.50 KCR935 and "Yuba County" mentioned often - Oroville, CA.

That's a very short list. Many, many more have been heard but not tracked too good in the log books so far. The CHP's usually run 2 or 3 on each frequency and usually are on around 12 or more frequencies in the 42MHz band. The 39's are also in use now and seem to suffer a lot worse from fading and multipath. The 42's also seem to have certain ones that have a very distinct hum in their audio. Not sure if that's caused by the propagation, or their equipment. I've started trying to ID them by the hum, especially when there are 2 on a freq and only one has the hum.

MIKE BUGAJ, ENFIELD, CT

The cops are back! First noted the CA Highway Patrol blasting in on 42mhz on Oct 14. Since that time they have been in almost every day. Fade in time seems to be around 11:30AM local time. Some openings cover southern CA and some favor central and northern CA. Here are new loggings for this fall:

10/21 1530 42.500 Chico	10/28 1410 42.560 Barstow
42.460 LA	1450 42.880 Madera Central Office
42.460 Sacramento WRG698	42.760 Mobile Units..Porterville ment.
42.600 Golden Gate	42.740 Mobile
42.560 Ukiah KDA712	42.700 Mobile
10/22 0900 35.460 Harmonic of Deutche Welle,	11/3 1635 42.080 Fresno
Antigua	11/5 1234 39.600 El Cajon
1245 42.560 Victorville	11/11 1155 Spanish on 33.35,33,375, 33.425 and
10/23 1800 42.500 Bakersfield	33.475. More mobile freqs on 42.720,
42.420 Golden Gate	42.700 and 42.760
42.500 Golden Gate	

Those of you who have computers can listen to a 5 minute sample of my CA F2 skip. I have a Realaudio file made and you can go to <http://members.nbci.com/crccc/ra.html> and listen to it anytime. Equipment: Bearcat BC860XLT and a Scantenna on the roof.

WILLIAM HEPBURN, BRAMPTON, ON

Nov 1 - 1005 EST - Chile 47.875, 47.90, 47.975 - Muzak-type stations.
Nov 1 - 1216 EST - unID video on ch E-2 on Samsung VCR.
Nov 8 - 1535 EST - unID video on ch NZ-1 (WNTV1 Wellington ?). Sig peaked @ S5 on Icom..sync bars and brief very weak video coincided with fade-ups on scanner.

Other new loggings Oct 27-Nov 12...

33.375 - "Control", SS station..also SS unIDs on NUMEROUS other freqs.
35.025, 35.0375, 35.05, etc up to 35.95 - FF stations (likely France). Most with musical tones between xmsns.
35.16 - Pacific Bell Maintenance, KDI-323, San Bernardino CA.
36.60 - "YSD dash" FM marker station. Likely San Salvador, El Salvador.
38.90 - "Range Control". UnID US or Canadian Army station.
39.14 - "Ontario", Ontario CA police. Plus other unID US police in 39/45 MHz bands.
42.48 - California Highway Patrol, WNXA-396, Colfax, CA.
42.50 - "Chico", CHP, KMH-963, Chico, CA. Plus several CHP relogs on new frequencies.
44.52 - OmniTrans, WNGJ-941, San Bernardino, CA.

(Bill's report continued)

47.55 - unID SS station, mentioned Cali, Colombia.

Eqmt -

Rx1 VCR - Samsung SV-5000W World TV Signal Rx

Rx2 TV - Panasonic PC-29XF40R (29")

Rx3 Audio - Icom IC-R100 com rx

Ant - CM VHF h. yagi @ 47' w/10 db RS VHF amp

BOB COOPER, MANGONUI, NEW ZEALAND

For easterners, there are various remote transmitters monitoring snow depth in the Rockies and Sierras, called Snotel, operating +/- 40.530. These are data burst modulated and there are many of them, serving as an MUF indicator. Equally, an Alaskan network on 40.69 with data bursts as well. 42 MHz +, some frequencies heard here and to watch: 42.120 and 42.160 appear to be Portuguese (language) repeaters but have no idea where they are from. Often when they are in, there is also a data burst transmitter on 42.240 from probably the same general area and sometimes 42.150 repeater as well - not English nor Spanish. Typically, if we have 42 MHz USA reception before 8AM local time - 1900 UTC - it is a good omen. From Asia, look to 41.960 (AM) and 42.740 (AM) and 43.030 (AM). Strongest, most frequent heard during first 2 weeks of November were from Missouri (42.120 KAB302 and KAB202), 42.380 (KAA203), far more often than closer CHP in same frequency region. Possible SW third harmonic on 44.525 AM.

Regards, Bob Cooper

G. W. Jensen
4604 Anntana Avenue
Baltimore, MD 21206-4220

Doing this column this month is a bit of a chore having spent 2 weeks in Johns Hopkins Hospital with a minor stroke and heart attack (this diabetes can really do some things to you). It could have been worse in that I only lost some left peripheral vision. NOW TO A BARRAGE OF CHANGES-----
Satcom C1 has been replaced by GE 7 - with a 15 year life and 20 watt transponder power (compared to the 8.5 watt power of the old C1). Daystar has been noted on XPDR 10 in addition to its home on GE4.

Satcom C4 -
Delete 2 - MSNBC, 16 - Infomercials and 8 TV Guide Channel

ADD -

400 - VH1 En Espanol

401 - MTV En Espanol

402 - CBS Telenoticias

403 - Discovery En Espanol

404 - Cine Latino

405 - TV Rio De La Plata - Buenos Aires

406 - Fox Americas

407 - CNN En Espanol

all of the above have been on Galaxy 4 - and can be deleted from there.

Galaxy 1 - add the following

751 - HBO Latino - East

752 - HBO Latino - West

Telstar 7

800 - Independent Music Channel is very occasional

Galaxy 5

xpdr 10 - back to infomercials

Satmex 5

805 - now carrying a radio service

810 - woman's face

811 - someone named Garcia's face

Anik E1 - 5 - Ku-band - Livestock auctions

Anik E2- 357 - Miracle Channel

GE1 - XPDR 19 - delete America's Voice

GE4 - add the following-

407 - Fox Sports South West 2

408 - Fox Sports Detroit

409 - Fox Sports Pittsburgh

410 - Fox Sports Rocky Mountain

411 - MSC

412 - MSC 2

413 - Home Team Sports

delete - 14 - Fox Sports Preview Channel

Galaxy 4 - delete 750 - 757 - Hispanic Channels to C4

- delete DMX 860 -867 - Spanish music channels to ????

Galaxy 11

XPDR 2 - Sunshine PPV???

18 - Fox News Channel in addition to 30

That's all for this month - I HOPE to have more next month. In the meantime - Merry Christmas, Happy Chanukah, and Happy New Year.

GWJ 11-12

KXVA [15]	Abilene, TX	new, Fox
KIDZ-LP [54]	Abilene, TX	to lose Fox to KXVA [15]. Maybe other KID- LPTVs too?
KAZH [57], KDBC [4], KXTX [39], KVVV-LP [53], KCCX-LP [50] & K55HW	Baytown, El Paso, Dallas, Houston, Corpus Christi, & Laredo, TX	TV Azteca

Forum & Other Stuff

Chip Kelley forwarded the information about new KXVA [15] Abilene, which appears in the North Texas Edition of *TV Guide*. Fox had been affiliated with several LPTVs in the area; presumably these LPTVs are now doing something else. Chip also reports WLDM [23] new to the air. That makes two stations & two LMAs operated by Sinclair in the Birmingham market - neither Chip nor myself thought the FCC allowed that! Except Tuscaloosa is technically a separate market from Birmingham...

Jeff Kadet noted an item in the *Macomb Sunday Journal* about WGEM-DT. This was news both to Jeff and to myself! He e-mailed WGEM's chief engineer, who replied that the station has in fact been on the air since July, with 1kw. Jeff can just barely tell the signal is present. Note that Harris, a major transmitter manufacturer, is located in Quincy. This would not be the first time that strange temporary operations have happened from Quincy, and it probably won't be the last.

Several Dxers noted powerful LPTV WDTA-LP [53] during a decent tropo opening in November. (I wasn't thinking & didn't bother trying to ID the strange signal on 53!) This station is listed as Columbus, but it is actually located in Atlanta. LPTVs can move around like that...

Dave Nieman notes WDTB-LP [39] Buffalo back on the air with religion. He also reports WIVB [4] has offered to buy WNEQ [23] and operate it as a commercial independent. This would require moving the non-commercial reservation from channel 23 to channel 17 - Buffalo's main PBS affiliate WNED operates on a channel that is not reserved.

Steven Scharff in Henderson, Nevada reports local channel 25 has changed calls to KTUD-LP. It's a UPN affiliate, and is finally on cable after many negotiations. Religious KYRK-LP [35] has also appeared with test transmissions.

Thanks to Dennis Smith for the California LPTV information. Also in California, XETV [6] Tijuana has begun a local newscast at 6am and 11pm. The Fox LPTVs in Bakersfield (KBFX-LP 58) and Santa Barbara (KKFX-LP 17) also have local news, at 10pm.

Nashville may be about to get its first DTV station. A new UHF antenna has appeared on WTVF [5]'s tower. No signals yet noted but I'm sure it's only a matter of time. I have had the opportunity to observe more DTV signals in the Atlanta area. (channels 10, 25, 37, and 39)

Note the new e-mail address and web URL above. Actually, these are redirects to the old ones - you can still use the old URL indefinitely. The old e-mail address will probably stop working in a few months. Too many spammers have stolen it, and I'm tired of wasting time downloading ads for casinos & pornography.

If you have a receiver capable of tuning the world between 30 and 50MHz, give it a spin. I've heard both African and New Zealand video carriers, along with various strange data signals, and almost contacted Malawi in southeast Africa on 50MHz in early November. Actually seeing video by F2 will be tough, but I'm sure one of our members will do it before the winter is over. Of course, we are also approaching the winter skip season. And those of us in the South can still look forward to winter tropo. Here's hoping everyone logs plenty of interesting December DX!

Here's hoping all our U.S. readers did get out and vote last month. Just think: the votes of the WTFDA membership could have decided the Presidency! (If we all lived in Florida...) I don't expect the new President, whoever he turns out to be, to have the clout to do anything drastic. Don't expect tough measures to speed the DTV rollout or anything like that. I'm most curious to find out what the changes in the makeup of Congress will do to the anti-LPFM bills.

A U. S. Television Chronology

 (Reprinted and edited, with permission, from data assembled by Jeff Miller. This and other historic broadcast-related items can be found at <http://members.aol.com/jeff560/jeff.html>.)

(This timeline of U. S. television broadcasting history is a work in progress. If you can suggest any improvements in this list, please send them to: <JeffM@sanctum.com>.)

1875. George R. Carey of Boston proposes a television system in which every picture element is transmitted simultaneously, each over a separate circuit.

1880. The principle of scanning an image is proposed, by E. E. Sawyer in the U. S., Maurice Leblanc in France, and others (approximate date).

1900. The term television is coined by Constantin Perskyi at the International Electricity Congress, part of the 1900 Paris Exhibition.

1921. Charles Francis Jenkins incorporates the Jenkins Laboratories in Washington for the sole purpose of "developing radio movies to be broadcast for entertainment in the home."

26

May 19, 1922. Charles Francis Jenkins achieves his first successful laboratory transmission.

Oct. 3, 1922. Jenkins first public demonstration, using Navy station NOF in Anacostia. He transmitted pictures, rather than television in the modern sense, by a telephone wire from his Washington office to NOF and they were then broadcast by wireless back to the Post Office in Washington.

June 14, 1923. Jenkins' first true television demonstration, using NOF. (He continued to use NOF until 1925. By 1925, the NOF transmissions were on 1875 kHz, using 48 lines.)

Dec. 29, 1923. Dr. Vladimir Zworykin applies for a patent for an all-electronic television system.

June 13, 1925. Charles Francis Jenkins achieves the first synchronized transmission of pictures and sound, using 48 lines, and a mechanical system. A 10 minute film of a miniature windmill in motion is sent from Anacostia to Washington, D. C., a distance of 5 miles. The images were viewed by representatives of the Bureau of Standards, the Navy, the Commerce Department, and others. Jenkins called this "the first public demonstration of radiovision" (although Baird had publicly demonstrated a working television set at Selfridge's Department Store in London two months earlier).

1926. Orrin Dunlap, radio editor of the New York Times, describes television as "an inventor's will-o'-the-wisp."

Aug. 18, 1926. A weather map is televised for the first time, sent from NAA Arlington to the Weather Bureau Office in Washington.

Dec. 1926. WGY's TV station, video 37.8 meters, sound 755 kHz begins operation in Schenectady, NY.

Apr. 7, 1927. An image of Commerce Secretary Hoover is transmitted in the first successful long distance demonstration of television using Bell Telephone Co. experimental station 3XN, Whippany NJ. 3XN used 1575 kHz video, 1450 kHz audio, 185 synch. AT&T had not previously announced its television research, which was being conducted by Herbert E. Ives and others.

May 23, 1927. The first demonstration of television before a large audience, about 600 members of the American Institute of Electrical Engineers and the Institute of Radio Engineers, at the Bell Telephone Building in New York.

Sept. 7, 1927. Philo T. Farnsworth demonstrates TV in San Francisco. His transmission was electronic, unlike the mechanical TV of Bell Labs, Jenkins, and others.

Jan. 13, 1928. Ernst Alexanderson demonstrates the GE system and announces the beginning of television broadcasting. The pictures were received on sets with 1.5 square inch screens in the homes of Alexanderson and two board members in Schenectady. (This is considered by some the first home reception of television in the U. S.) The picture, with 48 lines at 16 frames per second, was transmitted over 2XAF on 37.8 meters and the sound was transmitted over WGY radio station.

Feb. 25, 1928. FRC grants first TV license to Jenkins Laboratories for W3XX at 1519 Connecticut Ave. NW Washington. On air 7/2/28 (?) 6.42 MHz, 48 lines.

Apr. 1928. W2XBS New York, RCA, begins in the laboratory.

May 11, 1928. The first regular schedule of TV programming is begun by General Electric in Schenectady. Programs are transmitted Tuesday, Thursday, and

Friday afternoons from 1:30 to 3:30 p.m., using 24 lines.

July 1928. These stations are on the air on this date, according to John Ross: W2XBU Beacon, NY (Harold E. Smith); W2XBV New York (RCA); W2XBW Bound Brook, NJ (RCA); W2XAV East Pittsburgh (Westinghouse); W4XA Whitehaven, TN; W6XC Los Angeles.

July 2, 1928. Charles F. Jenkins begins broadcasting the first regular telecasts designed to be received by the general public.

July 12, 1928. First televised tennis match.

July 21, 1928. Boston Post reports W1XAY Lexington MA has been licensed.

Aug. 13, 1928. WRNY Coytesville NJ becomes the first standard radio station to transmit a television image (the face of Mrs. John Geloso). It was a 1.5 square inch image enlarged by a magnifying glass to three inches so it could be viewed by 500 persons at Philosophy Hall at New York University. (WRNY broadcast sight and sound alternately rather than simultaneously. Viewers would first see the face of a performer and a few seconds later would hear the voice.) The performances were designed to lure the radio audience into buying "televisor" sets from Pilot.

Aug. 22, 1928. WGY simulcasts on radio and TV (WGY, 2XAF and 2XAD) Al Smith accepting the Democratic presidential nomination. This was the first over-the-air remote pickup and the first TV news event.

(This extensive chronicle of the beginnings of television will continue next month here in "TV TIME TUNNEL".)

Eastern TV-DX

December 2000

Matthew C. Sittel
15013 Eureux Circle
Bellevue, NE 68123
76255.2171@Compuserve.com
Deadline: last day of month

Eastern TV-DX is for reporters from the following states: AL, CT, DE, FL, GA, IN, KY, MA, MD, ME, MI, NC, NH, NJ, NY, OH, PA, RI, SC, TN, VA, VT and WV, plus Washington, DC. Also for reporters from the following Canadian provinces: NB, NF, NS, ON, PEI and PQ. Foreign reports are also welcome!

Three reports this time... it's been a quiet month for tropo overall, but some Es and F2 has been noted!

All DX here is either from downtown Toronto (TD) or going mobile at (1) the Scarborough Bluffs (SB), which overlook Lake Ontario in the city's southeast corner and (2) Snowball (SN), a hamlet that is next to the town of Aurora, on the city's northwest outskirts. I use a 5" Amtel mini-TV that plugs into my car's cigarette lighter. For VHF I use the set's whip. For UHF I use a Radio Shack 2-bay antenna. Not exactly elaborate. I have Dxed FM mobile since the mid-1980s, and this new TV setup offers a whole new dimension to my favourite high hills and cliffs. I have already had a couple of tropo openings where FM wasn't affected, but UHF was. So, when I go out, the odds of returning empty-handed are greatly reduced! So far I rate this a poor to moderate fall tropo season. A few openings for me, but nothing spectacular.

Doug Smith, W9WI, Pleasant View, TN

0135 WYCC-20 IL Chicago, ID 380	0900 Z2-E2t ZIMBABWE? <2>

Notes:

- Locals WZTV-17 and WUXP-30 both off. Noted PBS on 16 (WUSI-IL, probably) and 30 (WTIU-IN, probably). Also, CCI on WJFB-66 (presumably WGBO, Joliet, IL) and an unID-17 with color bars, probably WAND-IL. Photo of WYCC-20 sent to Jeff Kruszka.
- For no good reason, I decided to check the 50MHz ham radio band this morning. I was surprised to hear a strong Morse Code signal on 50.106 MHz, and even more surprised to hear it give the callsign 7Q7RM (Malawi, southeast Africa). I was utterly ASTONISHED when the African operator heard me calling! (I was using 10 watts to a 132-foot wire antenna...) Also heard, for the first time ever, an E2 video carrier just above 48.25MHz, along with some of its sidebands near 48.23MHz.

A vast month-long desert of no DX 9/19-10/22, very untypical this time of year. F2 heating up late October with my first ever channel E2 video! Though signals way too weak to make anything out. Baby monitor QRM a real problem. Channel AU0 looks like the cleanest sub-A2 channel.

That's it for this year! I hope all of you have a safe and happy holiday season... and make sure you check for off-season skip around the holidays too! You never know what you might get. Support ETVDX!! 73s Matt.

PIRATE WATCH:

• WHEATFIELD, NY. 104.9, playing mostly classic rock, no talking. Horizontally polarized, as they get out about 4 mi. on the car radio, but up to 20 with an FM antenna. (This is just north of Buffalo)

WESTERN TV-DX

December 2000

Dennis Park Smith, 3605 San Remo Drive, Santa Barbara, CA 93105-2523 (805)687-7803

This report is for October 2000. Southern-CA coastal tropo to SanDiego/Tijuana up to 200 mi/ 315 km is falling off for the season, although there were some good periods now and then.

Sep 28-29: Very poor
 Sep 29-Oct 1: [Out of town, in Wasco]
 Oct 1 eve - 3 am: Poor+
 Oct 3 eve-6: None Possible very high-elev layer boundary again

Oct 6 eve-9aft: [Out of town again, in Wasco]
 Oct 9 aft-13 am: None Oct 10-11 stormy, some rain any layering was dispersed

Oct 13 aft-18: Good Layer return, lower perhaps.
 Oct 19-20: Fair, deteriorating, layer rising?
 Oct 21-23 am: None Cold wx front, some wind dispersing layers.

Oct 23 eve: Fair
 Oct 24-25 am: Poor
 Oct 26 am-31: None Cold wx fronts & rain Oct 25-29

Oct 1: KTSB-LP 43 Santa Barbara noted returned to air, with hse, Home Shopping Español DX noted in Wasco (Last time there was late Nov 1999): Noted Sep 28 & onward (new local since last Wasco visit. Upper right "35 KMCF" (KMCF-LP?) Programming 24 hours: hse, Home Shopping Español (Porterville?, 40 mi?) Noted Sep 29 & onward (regular): K100H Taft, new on air since last Wasco visit. Translator of strong local KNXT-49 Visalia. Consistent though very weak, very poor visual, no aural. Dual IDs with KNXT. Apx 40 mi. Sep 29: TBN (K56DZ Fresno) Fair Apx 90 mi. Starting Sep 29: Occasional tropo from KNSO Merced/Fresno "WB 51". Apx 150 mi.
 Oct 1: tropo from (KTXL Sacramento, Fox 40) Nice to see 40 Sacramento again, even if poor on this occasion. 215 mi. Near-local K40DQ Tulare (apx 80 mi) noted no longer on the air.

Best of DX to all. Dennis

This September has been a good trop month for
 me. September 13 brought another distant station in
 KNLC-24's null, this time WKYU. That makes six
 stations seen on 24 in KNLC's null. September 19
 brought local-like signals from WSBT-22 and WSJV-
 28. I even saw one of WSBT-22's morning news
 anchors hauled off to jail to raise money for charity!
 The South Bend opening finally brought some DX on
 Channel 69 with WMWB-LP. They were carrying
 separate cartoons from the St. Louis WB affiliate,
 KPLR-11. Now, I have at least one station seen on
 every channel, VHF and UHF.

73, Eric (N0UIH)

Another very quiet month here. Only a couple of
 days worth noting. The antennas were unhooked for
 four days straight at one point due to the constant
 threat of thunderstorms in a rather unusual weather
 pattern. But even when they were hooked up, there
 wasn't much to see!

K58AE isn't very far away, but given that I've
 seen 56 and 60 from Clarinda a few times and never
 58, I didn't think it was on the air! Thanks to Jeff
 Kadet for helping me ID 62 in Muscatine. Happy
 holidays to all! 73 Matt.

Note 1: I can't equate a Laramie CLTR to any station on 88.7. Didn't have the tape running, so I'm stuck with what I heard. Said "w/XLTR K282?? In Laramie", which puts awful close to a Laramie station, so I must have the XLTR freq. Wrong. It surprised me, so no tape rolling at the time.

87.9 has been the home of a few pirates in the area. One was welcoming everyone to the Mystic lake Casino in Shakopee MN. That's a casino run by an Indian tribe around 10 miles south of my location. Haven't been on lately. Another was described as "The Peoples Radio". Very poor audio quality. Only head them once.

John Eberling noted some Pirates in his area and I have a couple in my area one is ethnic pirate (some French, spanish, etc) signals are usually hashy and somewhat distorted. The other pirate calls itself EB (for East Boston) Radio and I'm only two miles from East Boston. The signal is very strong here and seems to get out about 5 or so miles. Plays lots of great music.

Buhenman continued

September's tropes mostly revolved around intrastate DX, except for the reception of WMC 99.7 on September 13. The station sales in St. Louis have been completed, with three stations involved in the sales changing format. Low rated aggressive hard rocker WXTM 104.1 signed off during the last week of September, becoming an '80s format as WMLL "The Mall." The second week of October brought two format changes, one as a result of a station sale. WKXK 106.5 flipped from hot country to smooth jazz on October 8, switching calls to WSSM. The format change was a result of Emmis selling the station to Bonneville Broadcasting. The loss of WKXK prompted KSD 93.7 to change from a hot AC format to hot country. Another rocker went off the air on October 16, when KXOK 97.1 switched from classic rock to hot talk. The change marked the return of Dr. Laura Schlessinger's radio show to St. Louis (Dr. Laura was last heard on WIBV 1260, now WSDZ). Two morning shows ended up switching stations: Steve and DC are now on classic hits-formatted KIHT 96.3 and Howard Stern switches to modern rock station KPNT 105.7. 73, Eric (NOUIH)

December 2000

And there were shepherds living out in the fields nearby, keeping watch over their flocks at night. An angel of the Lord appeared to them, and the glory of the Lord shone around them, and they were terrified. But the angel said to them, "Do not be afraid. I bring you good news of great joy that will be for all the people. Today in the town of David a Savior has been born to you; he is Christ the Lord.

Merry Christmas
The Zondlo family
John, Carol, Christy & Joel

A simple, efficient TV antenna Rick Matthews

A folded dipole is an efficient TV antenna that is easy to construct. It will not compete with a good high-gain directional antenna, but it sure beats rabbit ears.

This antenna is optimized for a single channel, though it will often work acceptably on others. Design it for the signal that is giving you the most trouble, and perhaps it will work well for the rest. If not, build another for the next channel — they are cheap.

Construction Strip the insulation off just enough of each end to be able to twist the conductor and solder. This is the "folded dipole" antenna.

The antenna is made from "300 ohm twin-lead" the brown or black ribbon-like TV line that we all used before the days of cable television. There are two conductors running along the edges of the ribbon. You need to know the frequency of the station, which you can find out by calling the station. For channels 2 - 6, the frequency is given by

$$f \text{ (in MHz)} = 47 + 6 \times (\text{channel number}).$$

For channels 7 -13, the frequency is

$$f \text{ (in MHz)} = 135 + 6 \times (\text{channel number}).$$

For channels 14 and above

$$f \text{ (in MHz)} = 387 + 6 \times (\text{channel number})$$

Cut off a piece of twin lead one-half wavelength, where

$$\text{wavelength (in meters)} = 300 / f \text{ (in MHz)}.$$

TV SCOREBOARD COLUMN DEFINITIONS: are as follows: Total = Total number of TV stations logged from DXer's location (All loggings should be received within 25 mile radius of this location to count. Frequency changes count as a station, call letter changes DO NOT count. Also count a station only once regardless if logged by different propagation modes. UHF = All stations logged from Channels 14 to 83. ES = Total number of stations logged by E-skip. MS = Total by meteor scatter. Au = Total via Aurora. USA = Total number of states and the "+" = Washington DC. CN = Number of Canadian provinces logged. MX = Number of Mexican states logged. PO = Number of foreign countries, but not Canada/Mexico. TPU (Total number of political units) = Sum of USA CN MX and FO. YB = The year you began Dxing from a specific DXer's location. Other groundrules for computing log totals are included in VUD issue 04/99 or at http://www.anarc.org/wtfdarecords_standards.htm

Note: Now is the time to update and submit your latest stats to keep up to date on the Scoreboard. Also submit any distance records, states stats and personal best statistics. Check <http://home.twcny.rr.com/nordquistsyn/> Statistics databases for complete records of DXers submitted over the years. Send via email (text or EXCEL files are okay) or by postal mail. 73....Fred.
