CONVENTION WRAP UP IN THIS ISSUE

TV and FM DXing was *never* so much fun!

THE WORLDWIDE TV-FM DX ASSOCIATION

Serving the UHF-VHF Enthusiast

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, GREG CONIGLIO, BRUCE HALL, DAVE JANOWIAK AND MIKE BUGAJ.

Editor and publisher: **Mike Bugaj**

Treasurer: **Dave Janowiak** Webmaster: **Tim McVey**

Editorial Staff: **Victor Frank, George W. Jensen, Jeff Kruszka**

Keith McGinnis, Fred Nordquist, Matt Sittel, Doug Smith,

Adam Rivers, Jason Koralja and John Zondlo,

Our website: www.anarc.org/wtfda

ANARC Rep: **Jim Thomas**, Back Issues: **Dave Nieman**,

First, the bad news: Adam Rivers' laptop died again. Now the good news: We do have FM News for you this month. And we have lots of convention coverage and we're not talking politics. We also hit our limit of 64 pages for the first time in a long time.

We're a tad late this month, but, like so many other good things, the VUD is worth the wait.

Due to some upcoming editorial changes we will need a new Eastern TV DX editor. *If you have a computer and email, we need you.*

Think about it! Have a great September.

LET EVERYONE KNOW THAT YOU'RE A PROUD WTFDA MEMBER!

This removable plastic cling sticks to glass but can be easily removed. It features the WTFDA emblem and our WTFDA website address. Get one for just \$2 each!

Send cash, check or money order payable to Dave Janowiak. Send your order to WTFDA, P.O. Box 501, Somersville, CT 06072. Specify *red* or *yellow*.

Great for your car!

PERMANENT DECALS ALSO AVAILABLE UPON REQUEST.

Just \$2.00 Each

The Mailbox

P.O. Box 501, Somersville, CT USA 06072
MIKE BUGAJ MBUGAJ@SNET.NET

If your VUD appears to be a bit late in the mail this month, don't worry because we planned it that way. The way the month of August turned out, we were faced with either an early VUD or one just a little bit late. We went with the latter this time around. As it is, the later choice turned out to be the better choice as a couple of our editors were on vacation the third week of August anyway.

August featured some Es early in the month and some tropo toward the end of the month. Traffic on the WTFDA list was downright slow some days. David Williams did have some tropo in excess of 300 miles at his home in Redmond, OR. I never associated Oregon with tropo until I read David's dx reports. Matt Sittel and Mike Hawk also saw some long haul tropo around the 20th of the month from their homes in NE.

A big thanks to Matt and Mike for hosting the convention this year! All indications were that the whole thing ran smoothly and was enjoyed by all. See our convention wrap-up appearing in this VUD. More about this later.

MEMBERS AND MORE

Once again we welcome two new members to the WTFDA and for all I know, they might even know each other. First we welcome **Vincent Perlingi** of West Chester, PA to the club. Next we also welcome **Gilbert Erhart** of Cranberry Twp, PA. Glad to have both of you with us and thanks for using Paypal to join, without a doubt the quickest and easiest way to join or renew your dues.

As of the 18th of August I have renewals from **Calvin Glover**(MD), **Frank Aden**(ID), **Guy Falsetti**(NY), **Rich Wertman**(NY) (you had me worried, Rich), **Curtis Sadowski**(IL), **Jeff Lehmann**(MA), **FJ Issard**(ON), **Rick Lewis**(AZ), **Robert Williams**(ID), **Wolfgang Schneider**(CA), **John Tudenham**(MO), **Glenn Boche**(MN), **Chip Kelley**(TX), **John Hourigan**(OH), **Ken Bedley**(ON), **Fred McCormack**(MN), **Keith McGinnis**(MA), **Ron Wing**(KS), **Randy Miltier**(OR), **Nick Lombardi**(GA), **William Eckberg**(IL), **John Vervoort**(NY), **Dennis Park Smith**(CA), **Howard Fountain**(GA), **Roosevelt Crawford**(KS) and **Bob Seaman**(PA). Thank you all for staying with the WTFDA for another year. Currently (as of the 22nd of August) we have 266 members in the WTFDA. A couple of

weeks ago I offered free August VUDs to the non WTFDA members on the WTFDA list and had a couple of takers. **Saul Chernos** posted my offer on the amfmtvdx and ODXC lists and somehow the offer found its way over to the IRCA list. The result was about 20 sample VUDs were sent out. Whether that offer will translate to any new members is anyone's guess, but at least the others know what we offer. Time will tell.

So far we've had 19 people send in for our **80s VUDs on CD** offer. The latest two are **Ken Bedley** (and yes, the VUD *does* rule, Ken) and **Bob Seaman**, who says "You are doing a great job on the current issues of the VUD". Thanks, Bob. My bill is in the mail.

Randy Miltier has moved to Phoenix. At first I thought he was sick of Oregon winters and heading for AZ, but then I noticed it was Phoenix, OR! Randy adds "Moving into another house so will be set up for next year. VUD looks good (TankU – mike). Work nights so don't get on chat." Yes, it's been a couple of years now, Randy. BTW...where's Al Tobia? Fire up mlRC sometime, Al!

A short note from **Dennis Smith** which says "A couple of comments (complaints?) (Uh oh! -Mike). Some regional DX columns accept scan reports (except summer season – understandable) and some do not. And some columns take reports only by Email which I do not have (or am I the only one)."

No, you are not the only one, but I did a quick check of the membership list and I have email addresses for 194 of 266 members, or 73% of the membership. That percentage will only continue to climb.

It doesn't matter to me if some editors allow bandscans in the off-season as long as they don't mind the typing. But I wouldn't require everybody to do that. Each editor knows how much time they have available to spend on their column, so what they allow is up to them.

If you or someone else without email wants to send a report to Weather DX, mail it to me and I will get it to Jason. Ken Onyschuk has done that once already and that is no trouble at all.

Here's part of an email from **Glen Boche**(MN) "TV dxing, last summer I thought that due to the lousy E season, was the answer as to why I didn't see any opening and one or two tropo days. Recently, a

translator station across the MN/WI border changed channels and I noticed it was very snowy. As I recall it was that way on the other channel. I went out and purchase a CM 4248 yagi and placed it on a temporary ground mounted pipe about 15 feet in the air and it now came in almost snow free. I then took the CM 4251 dish which was standing basically on the ground and tried that. The station is now snow free and I am getting ch 18 from Eau Claire, WI which is 80 miles away at 30 percent picture and 60 percent snow with the antenna on the ground. Could it be there was something wrong with the CM 1160 vhf/uhf yagi that is 40 feet in the air? I checked the resistance of 70 feet of RG6 with a new CM balun that is identical to the one up on top. It read 3.1 ohms. I then checked the 45 ft run of RG11 that has the same balun on it and it read 25.7 ohms. I don't think the fittings between the RG11 and the RG59 at the top has a crusty connection since it is the same rain or shine and they are sealed with coax duct seal. I think the balun is bad. The antenna is coming down the weekend of Aug 14th and we will replace the balun and the coax and install another CM 4248 about 5 feet above that. I think that should improve things a whole bunch. I thought at sometime the CM 4251 needed to be 50 feet in the air to make it work well. Since I live on top of a bluff overlooking the Miss. River I may not need to do that. Have you seen the Yagi antennas that are popping up in the US that are made by the Blake Company in the UK. They are 100 inches long and the elements are solid not hollow. They are spendy but have 16 - 18 db gain and 25 - 28 db of F/B gain, along with a very narrow bandwidth? There is a web site of a fellow out in CA that has a dual horiz setup with a tilter like the satellite setups for amateur radio that he is using to bring in DTV from long distances in the hills where he lives."

Rod O'Connor(ME) noticed my note in the last VUD and wrote back "Just got done reviewing the July VUD. Noted your comments about my renewal.

Yup, I spent many years in Alaska. 1977/78 at the true dank, dreary place called Adak, in the central Aleutians...but it wasn't that bad. That's where I got started with Armed Forces Radio. 890 and 101.1 there back then, along with Channel 8TV. Actually enjoyed my time there, and my ship did a lot of patrolling along the west coast of Alaska. And remember this was back in the height of the cold war, and the days of "detente".

My other 15 years in Alaska were at the more centrally located island of Kodiak, where I retired from the Coast Guard in 1990, then to spend another 9 years there working at the local Public Station KMXT 100.1FM. Did volunteer shifts, then hired on as Morning Edition Local Anchor/Host for Kodiak; then

added Program Director to my jobs there. Enjoyed that too. But after 15 years, time to move back east here.

Been here in SW Harbor, Maine (Mount Desert Island/Acadia National park area) for 5 years now. Not working in broadcast radio anymore, and really have no desire to get back into it. It is so de-personalized, automated and computerized, there's no fun left in it anymore. Instead I work for 2 local police departments as dispatcher. So I am still in radio, sorta....On the Public Service Bands. Sometimes I think more people listen to Police Scanners than commercial radios for entertainment around here!

Haven't been taking as much advantage of the DX as I should. I need to get a new tuner with some real DX possibility. My Cassette/CD Stereo just isn't up to it, although I often do get the Southern New England FMs up here during tropics wiping out the Bangor/Ellsworth locals. Always look forward to the VUDs. Hope to contribute again soon."

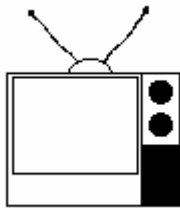

I don't know about you all, but I enjoy reading emails like Rods. More often than not we read about names in the VUD and those names just remain names. But behind a name is a story. And now you know the rest of Rod's story. And now I sound like Paul Harvey.

WHO IS IN THAT PHOTO??

We're talking about this month's VUD cover. I've met about half of the attendees. Matt filled in the blanks. Let's start in the front row and go from right to left. Bottom row: Ernie Wesolowski, John Ebeling, John Adams. Second row: David Sinclair, Frank Merrill and Bob Smolarek. Third row: Matt Sittel, Paul Swearingen, George Greene. Fourth row: John Lentz, Bill Eckberg, Daniel Bartek (aha!). Fifth row: Marv Shults, Tim McVey and John Zondlo. Sixth row: Rick Lucas, John Tudenham and Betty Joe Tudenham. Seventh row: Jeff Kruszka, Dave Janowiak and Dave Pomeroy. Fred McCormack is just above Dave J's head and Joe Gragg is in the striped shirt just above Jeff Kruszka's head. That smiling face standing next to Bob Smolarek is none other than Scott Fybush. Although the eVUD doesn't come with a cover, somehow I have to find a way to get this color photo into the evud. And thanks go to Mrs. Ebeling for snapping this great photo! You can do the photography when my daughter gets hitched.

Well, this is one of the quickest columns I've ever done. Wow ...finished already. Take care everyone and we'll see you next month. -Mike

Thanks to Matt Sittel and Frank Aden for information appearing elsewhere in this month's column.

Note the new DTV assignment on channel 3 in Florida.

WMAK in Knoxville is a DTV-only station. <http://www.avsforum.com> reports Knoxville viewers seeing this station testing; an article about the station in the local paper indicates they plan a general independent format with no network affiliation. They also plan to originate local programs in high definition, but no news. (they don't specify what kind of local programs they do plan. I'd be surprised if any local HD programs ever actually make it on the air.)

KAZA-DT in the L.A. area held a permit for a "flash cut" from analog operation on channel 54 to digital. That permit has been replaced by a permit for digital operation on channel 47, which will be allowed to operate simultaneously with the analog signal on channel 54.

Applications for new LPTV stations on most UHF channels in Anchorage and Fairbanks, Alaska have all been dismissed.

Also, applications to modify existing construction permits in Anchorage on channels 38, 45, 52, 53, 63, 64, 65, 67, and 68 have also been dismissed, and the permits apparently cancelled. (yes, I notice applications had been filed for new station on all of these channels! The party that filed the new-station applications is the same one that owned the cancelled permits...)

The University of North Carolina, petitioning to change WUND-2's city of license to Edenton, presents the novel argument that all of the Albemarle Sound region-including surrounding rural areas and southeastern Virginia – constitutes a single community. Thus, they claim there's no need to consider Columbia "deprived" of television service should the move be granted.

The University doesn't plan to move the station's

transmitter. They do tip their cards by stating that changing the city would bring the station in to the Norfolk-Portsmouth-Newport News market – and allow DBS satellite subscribers in that market to receive WUND's signal "off the bird".

The FCC says they don't believe a reallocation is justified. It would deny Columbia its only TV allotment, without replacing it with a new assignment. They have however agreed to accept public comments – it is possible the Commission can be convinced to change its mind.

KDTP-39 and KPHZ-11 in Arizona propose swapping channels. This is another proposal the FCC has agreed to hear – while suggesting they're inclined to deny it. KDTP is a religious station, licensed to a non-commercial reserved channel in Phoenix. KPHZ is a commercial Telemundo affiliate, licensed to Holbrook.

Normally, a move like this would be accomplished by the two stations buying each other's licenses. Such an exchange would require FCC approval, but such approval is almost always given.

However, in this case KDTP is on a "reserved" non-commercial channel. A commercial station would not be allowed on channel 39 in Phoenix. Even then, a swap would be allowed if a replacement non-commercial channel could be provided in Phoenix. KPHZ argues that channel 11 in Holbrook is that replacement channel.

The Commission isn't particularly convinced. Holbrook is some 200 miles north of Phoenix. Even if KPHZ were operated at maximum permissible power for a channel 11 station (it isn't) it wouldn't come anywhere near covering Arizona's capital.

KPHZ argues that they cannot be financially successful as a Holbrook station, that they require the extra revenue a Phoenix-based operation can produce. At the same time, they argue that KDTP can succeed in Holbrook, using the alternative sources of revenue available to non-commercial stations.

This argument also doesn't seem to hold much water with the Commission. They note channel 18 was allotted and reserved for non-commercial use at Holbrook for several decades – and nobody bothered to apply for the channel...

In a move that did get approved... KNTV-11 and their DTV on channel 12 have been approved to move from Loma Prieta to Mt. San Bruno. The move brings the stations to the same tower farm as the remaining San Francisco stations. When completed, it will end several years of difficulty in over-the-air reception of NBC in

San Francisco.

KNTV is licensed to San Jose. According to the FCC's original propagation estimation procedures, the proposed KNTV analog facilities on San Bruno would have covered only 32% of the land area within the San Jose city limits, and less than 28% of the city's population. Those figures wouldn't come anywhere near being acceptable under FCC policy for a San Jose station!

(the DTV station is not a problem as the city-grade signal requirements are MUCH looser for DTV)

NBC submitted figures calculated with an alternative propagation procedure, known as "Longley-Rice". They showed coverage of 80% of the land area and 94% of the population.

The FCC said even those figures are not adequate – but that NBC misapplied Longley-Rice. When Commission staff properly ran the program, they got figures that showed San Jose coverage acceptable to the Commission.

Four stations objected to KNTV's application: KRON-4, KTVU-2, KICU-36, and KRXI-11 in Reno, Nevada. (which is co-owned with KTVU) The California stations' basic argument was that KNTV on San Bruno would not provide adequate coverage over San Jose, their city of license. (KRON also complained about NBC yanking their affiliation, but such arguments don't hold much water with the FCC...) KRXI argued that San Bruno was 1.1km (about ¾ mile) too close to their transmitter.

(reading between the lines... the San Jose coverage argument was a valid one. The remaining complaints were in my opinion simply an attempt to harm the competition...)

The FCC has taken two steps to forward the DTV transition. First, effective August 3rd, a "freeze" has been placed on certain TV and DTV applications. Frozen are applications to:

- ✍ Change DTV channel assignments
- ✍ Add new DTV channels
- ✍ Swap in-core DTV & analog channels
- ✍ Swap DTV allotments between licensees
- ✍ Change analog channels
- ✍ Change cities-of-license
- ✍ Increase DTV service area (power and/or tower height increases)
- ✍ Class A station applications for new channels after being displaced by DTV

The next day, a Report and Order was issued. This

Order will:

- ✍ Establish a channel election process (more on this later)
- ✍ Establish deadlines for stations to increase power to the maximum permissible or lose interference protection at the fringes of their coverage areas
- ✍ Require transmission of full PSIP data, implementing closed-captioning, the V-chip, and channel mapping among other things
- ✍ Eliminate the analog/digital simulcast requirement (again, more on this below)
- ✍ Clarify closed-captioning rules for digital stations
- ✍ Require the V-chip in new DTV receivers
- ✍ Establish a proceeding on "distributed transmission", in which a single station uses multiple transmitters on the same channel

Digital/analog simulcast:

Currently, DTV stations are required to carry most (eventually, all) their analog programming on their digital channel. The Commission felt this would ensure popular programs would be available to DTV viewers.

However, this requirement has been waived in a number of cases for good reason. In several cities, two co-owned analog PBS affiliates exist. (for example, Milwaukee, with WMVS-10 and WMVT-36) Licensees have obtained waivers, allowing one of their associated DTV stations to carry the PBS high-definition feed, while the other simulcasts both analog stations.

A blanket waiver has been issued to NBC affiliates for the duration of the Olympics. NBC will provide a separate 24/7 HDTV feed of Olympic coverage.

Channel election process:

TV stations must choose a channel to use for their permanent DTV operation. The Commission has established an election process for this choice. The deadlines:

- ✍ August 3, 2004: FCC freezes new applications, to stabilize the database
- ✍ October 2004: Licensees are asked to ensure the accuracy of their entries in the FCC Engineering Database by the beginning of this month
- ✍ November 2004: stations are to certify the accuracy of the database, and certify intent to replicate, or exceed, their analog coverage
- ✍ December 2004: Round One of the election process. Stations with two "in-core" channels (channels between 2 and 51 inclusive) inform the FCC of their preferred choice for digital operation. Stations with one in-core and one out-of-core channel choose whether to use their in-core channel for digital. *They*

may choose not to – see below

- ✍ July 2005: Round Two. Stations whose analog and DTV channels are both outside core choose a DTV channel from those left available after Round One.
- ✍ January 2006: Round Three. Stations not yet assigned a digital channel, or assigned a low-band VHF channel 2-6, may choose a channel from those left available after Round Two.
- ✍ Spring 2006: The FCC will resolve any remaining assignment conflicts.
- ✍ August 2006: A new DTV Table of Allotments will be proposed and comments solicited.

Between each round, the FCC will announce which channels are "protected" (they don't explain what that means); which are in conflict; and which are available. Licensees whose channel is in "conflict" with another station may elect to keep that channel and accept interference, or move to the next round.

Replication & maximization:

Many DTV stations are operating under special temporary authority (STA) at powers and/or tower heights well below those specified on their regular permit. Other stations have DTV permits that specify powers/heights well below the maximum permissible for their channel, and below the level necessary to duplicate the station's analog coverage.

"Replication" means increasing a station's DTV power to a level adequate to achieve the same coverage as is obtained by their analog station.

"Maximization" is increasing DTV power to the maximum permitted by the FCC for that channel without causing interference to other stations.

Stations whose existing power levels do not meet the standards of replication or maximization may, by November, certify intent to increase power. (stations that certify, then fail to follow through, will be sanctioned)

Network-affiliated stations in the 100 largest markets will have until July 1, 2005 to construct a full-power facility. Smaller stations get an additional year.

Stations that fail to certify intent to increase power, or that certify but fail to complete construction in time, are not guaranteed a maximum coverage area. Other stations may be authorized to use channels and power levels that would preclude a later power increase.

Yikes. It's been a busy month at the Commission.

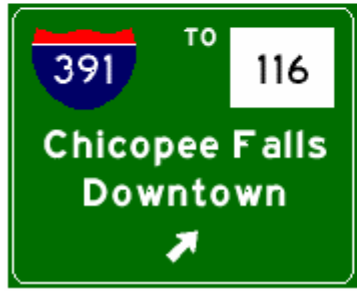

FM News

Editor: Adam Rivers

September 2004

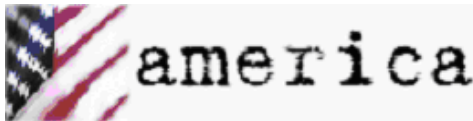

37 Carlton Avenue, Chicopee MA 01020
redsoxdxer417@hotmail.com

ABBREVIATIONS:

AF: applied for (a new station)
 AFA: American Family Association
 CC: call letter change
 CL: city of license change
 CX: a construction permit has been cancelled
 C1, C2, etc.: a change in status to that FM license class
 DA: directional antenna
 DE: station has been deleted
 FC: format change
 GA: granted amendment to the table of FM allocations
 GE: granted extension of construction permit
 GX: granted replacement of expired permit
 LC: license to cover filed (ready to come on the air)
 MC: multiple-city ID
 NC: no change yet on a reported change or permit
 ND: non directional antenna
 NO: not on the air
 NS: new station granted

NW: new station signs on
 OSA: one step application granted for change
 PA: proposed amendment change to FM allocation table
 PC: power change on the air (> = increase, < = decrease)
 PG: power change granted (> = increase, < = decrease)
 PR: power change requested
 QC: frequency change occurred
 QG: frequency change granted
 QR: channel change requested
 RA: silent stations returns to the air
 RE: station requests an extension on permit
 RX: station requests replacement of expired permit
 SC: slogan change or update
 SI: station is silent
 SOA: signed on air
 XA: dismissed amendment to FM allocations
 XC: transmitter site change occurred
 XG: transmitter site change granted

Some news and notes:

I apologize and feel bad that I didn't get to do the FM News column last month. It was tough being in Arizona with a laptop that decided what days it was gonna work and what days it wasn't. This column is pretty big. But that will happen.

KRMZ-103.5 is supposedly a move-in to the Oklahoma City market. But they had a pretty spotty signal throughout.

Canada FM News will be published next month.

Notes:

1. Newscast-style program, Castro speech. Havana is highest-powered ch. 2 in Cuba.
2. A real mystery. Promo for "azcentral.com" and KPNX logo in lower right corner. No full-power ch. 3 xltr relaying 12 (or 2, or 6 – KPNX has semi-satellites on both) in target area. Mexican xltr relaying KPNX programming (12/2/6) in error is most likely possibility.
3. WTLV-DT-13 in for over 30 minutes with perfect video and audio, no pixilation.

WESTERN TV DX

VICTOR FRANK
12450 SKYLINE BLVD.
WOODSIDE, CA 94062-4554
Victor.frank@sri.com

Dennis Park Smith, 3605 San Remo Drive, Santa Barbara, CA 93105-2523 (805)687-7803

This report is for July 2004. Overall on average, finally, southern-California coastal troop between Santa Barbara and San Diego/Tijuana (up to 200mi/ 320km) was better this month. A coworker at my job told me (her house is in mountains at approx 2500 feet elevation) that it had been cool at her place until July 10, when it turned hot. That means that the cool "marine layer" was at her location (high layer boundary, maybe 3000 feet or higher) until July 10, when the air boundary lowered to maybe 1500 feet or lower. Later on, though, after July 20, the boundary went back up some and not so hot at her home, with tropo not quite so good. (I'll pay more attention to her weather reports from now on...)

July 1-5: Poor
 July 5-10: Out of town, may have remained poor
 July 10 eve: Almost very good
 July 11-17 am: Good
 July 17-18: Out of town, may have remained good
 July 18 eve-20: Good
 July 21: Poor
 July 22-31: Variably poor to fair.

Some of the two out-of-town occasions were spent briefly at Wasco. There was one new station noted, KVVG-LP 31 Porterville, near-local regular at 40 miles. On July 5, testing only (color bars) with ID, and on July 17, programming from Almvision Hispanic Network (Spanish, religious).

Some Es was seen in Wasco on July 9 (no lds, perhaps Midwest), approx 1800-2015, chs. 2-4.

Best of DX to All. Dennis

Not much after the 17th, especially Es. Had to work

last week of month and will probably do the same to start August.

Notes:

1. The box; last time seen they were on ch. 8. Bevis & Butthead were insulting each other while tunes were being played which were interrupted occasionally by other commercials.
2. As with any intense Es opening as this was, I occasionally check ch. 7 to see if it made it that high. At 1754 I noticed some unusual slow fading beginning to start. Then I heard Jim Leherer (PBS) talking and I knew I had something interesting. The picture gradually got stronger and at 1759 I saw their I.D. slide. They were in and out for about a half hour.
3. After the ch. 7 I.D., I turned to ch. 8 and saw similar activity (slow fading) and a PBS station became snowfree. The program was "GPB" and the PBS logo. I concluded that it must be WGTV or WXGA (Georgia Public Broadcasting) but don't know which one. The station broke through the snow and was snowfree at least once in the three times it was seen over approx 1/2 hour. I tried to determine which it was by reading offsets, but results were inconclusive.
4. WFTV-9 was the easiest to identify. They broke above the snow at least 5 times and every time they did they showed their call during some kind of promo or the last time, during a thunderstorm watch. They were in for about twenty minutes. Not new here, previously seen via meteor scatter.
5. The activity (slow fading) on ch. 10 lasted for about 5 minutes, but I never was able to identify any of the programming. It was interesting in noting the difference in the rate of fading on the high band channels versus the low band channels. Also, the fewer number of stations involved per channel on the high band channels versus the "big mess" on the low band channels. This seems to indicate the frequency selectivity of the E layer. A small area reflecting the high band channels and a large area reflecting the low band channels. It also indicates the relatively small area it was coming from, Florida mostly. I checked chs 12 & 13 (local on 11) briefly, but didn't hang around there to see if anything would develop.
6. Probably Petosky MI. They used to be on ch. 17, but haven't seen them on that ch. in some time.

That's it! Of course, I was gone half the month on vacation (6/30-7/10 in CA, 7/29-8/1 in Omaha for the convention). I ran the VCR during my CA trip

and got KLBV-4, WDIV-4, and WNEM-5 ID's until the tape ran out. On 7/24, my local ch. 2 WBRZ was off for at least 4 hours in the morning, but of course, no E-skip came in.

A nice period of DX here! Highlights are logging WKYC-DT and KVBC-DT, the WNCT logging on July 6, and a bunch of new analogs and DTVs during July with some nice tropes. Log total now stands at 768 which includes 120 DTVs. 73s Matt.

Lightning did some damage to my ham station on June 17, so until repairs are made I will have more time for FM DXing. No damage to the Denon tuner or amp (though the color of my Sony TV was scrambled for a while).

Note #0: with promo for American Top 40, then into
easy listening music?!
Note #1: ex-WDBL-FM Springfield TN
Note #2: Normally on 93.7. Knocked off the air by
severe storms, and came back up on the wrong
frequency! **NOT** WEGI, as WEGI was mixing with
WFFI. Off by 0900, and back on 93.7 later this day.

At 1015 the DJ on WXFL 96.1 was heard hoping
the weather in Florence would clear up so the
atmospheric interference would go away!

This was my biggest E-skip opening ever (previous best was 18 on 7/19/91). Lots of class A stations. Thought I heard "KCBX" on 92.1, but can't find anything close listed. WI and IL are new states, #27 and #28. Most stations were in strong enough to override semi-locals without nulling. In many cases one station was overridden by another after a few seconds. Hope everyone got in on this one!

From the Editor

Good turnout this time around, despite the poor conditions. June was pretty much a washout here for Es, and July wasn't much better. Seems like whenever I take a summer vacation nothing happens. Guess I need to start vacationing in the fall. Great to see all of you who attended the convention in Omaha, and many thanks to Matt and Mike for putting on such a great event!

See y'all next month!

------	------	------	------------	----	-------------

Fewest Es openings ever in one season. But the July 6 event set a new record for numbers logged, new catches and MUF (channel 8 lded, CCI to 13). July 5 featured a rare Maritimes opening, mostly on TV. So this Es season manages to be memorable. Distinct lack of good tropo.

NOTE 1: The 90.5 pirate heard June 9 along the QEW highway between Burlington and Oakville ON is the same operator as one I heard a month earlier on 90.7 near Milton ON. I heard songs by Enya and the Beatles, and a re-mixed Mamas and Papas, but no talk this time. But Niel Wolfish heard "The X" slogan a few days later on 90.5, and this is the same slogan I heard earlier on 90.7.

NOTE 2: The CN Tower did maintenance on the nine FM transmitters atop the tower and was off between 0105 and 0440 for two weeks. Only very minor tropo during this time, and mostly dead conditions, but a couple new logs nevertheless. CBL 94.1, CJEZ 97.3, CHFI 98.1, CKFM 99.9, CHUM 104.5, CILQ 107.1 all used low-power auxiliaries (all 1000 watts in various locations except CBL which is 2000 watts). CJRT 91.1 and CHIN 100.7 were completely off. CFNY 102.1 was off almost all the nights, but the first and last.

Note 3: The CBC Radio Canada French //96.5 I heard on 103.7 might be the new Environment Canada weather station in Algonquin Park (Whitney ON) testing. Only heard this one time, and cx were dead. No other reasonable possibilities.

BR = Burnt River

TO = Toronto (Scarborough Bluffs in s.e., Snowball in n.w.)

Harry Hayes - Wilkes-Barre, PA

Equipment: Superadio II w/110khz filter, Bose Wave, FM-6 antenna in attic. New underlined

------	------	------	-----------	----	----------------

The opening of 7/6 was the most intense experienced since the early 80's. At times each channel on the FM was a least 5 deep. Actually it got so intense that it was impossible to hear anything with every channel sounding like an AM graveyard channel. Skip may have reached Channel 7 briefly. The 7/5 opening to Eastern New Brunswick and points eastward charted new territory for me. I have never heard FM from western Nova Scotia before. The distance to here is only about 500 miles and some change, I believe. I do not have a good map to measure the mileage.

Jeff Lehmann Hanson, MA Equipment: Tuner: Yamaha T-80 with modified IF filters and Conrad RDS manager. Antenna: Stereo Probe 9. @ = New Log.

July 4, 6 and August 4 were the 3 standout skip openings this year. August 4 was the most satisfying in terms of location, and finally getting CT and RI logged. Now to get Indiana to finish the lower 48! The distances were nice too, as was getting northern New England for more than a brief moment. Hearing Portland, Concord, and Nantucket were all a treat.

Some tropes here and there brought a few new stations too, but admittedly I spent more time on TV during those times. Still after the main part of the DX season my log total is now up to 972 so I can't complain... I'm still hoping to crack 1,000 this year though. 73s Matt.

Despite a below average year for Es, it's been quite an interesting summer for DX. Lots of 400+ mile tropo...already rivaling that noted in 1992. I never thought that Montana on tropo would be possible from here, given the lack of humidity out that way, and the Black Hills mountain range that is in the middle of that path. Also, finally grabbed Vermont in early August for state #48. Shortly before that, I hit the 1900 "milestone" from Omaha. I was thinking 2000 may be possible this summer, but the lackluster Es season limited that.

On August 7 I put together my two Antennacraft FM-10's into an FM-13 based on plans Doug Allen published several years ago in the VUD. I notice some improvement in nulls...I'm not sure if I could have received WMC 99.7 at 536 miles without it, given a 115 KW local on 99.9 and Kansas City on 99.7. That WMC logging marks my 115th 400+ mile tropo logging from Omaha.

WTFDA Convention 2004 Report

The annual WTFDA convention was held from July 30-August 1, 2004 at the Park Plaza Regency Lodge hotel in Omaha, Nebraska. A total of 25 DXers showed up for the event, co-hosted by Matthew Sittel and Michael Hawk. The full attendee list appears below, with each attendee's home state/province appearing in parentheses after his name.

John Adams (OR), Daniel Bartek (NE), Rick Dau (NE), John Ebeling (MN), Bill Eckberg (IL), Scott Fybush (NY), Joe Gragg (TX), George Greene (OH), Michael Hawk (NE), Dave Janowiak (WI), Jeff Kruszka (LA), John Lentz (WI), Rick Lucas (NY), Fred McCormack (MN), Tim McVey (VA), Frank Merrill (IL), Dave Pomeroy (KS), Marv Shults (IL), David Sinclair (BC), Matthew Sittel (NE), Bob Smolarek (NJ), Paul Swearingen (KS), John Tudenham (MO), Ernie Wesolowski (NE), John Zondlo (OK).

The weekend kicked off early on Thursday night with a cookout at the Sittel's house in nearby Bellevue. Sixteen of the 25 registered were able to make it for a meal of hamburgers, hot dogs, salad, potatoes and pie and ice cream for dessert! Matt's wife, Karen, received praise from the guests for her hard work in getting the meal together and ensuring everyone was fed. After dinner Matt offered a tour of his DX shack, including a demonstration of his WinTV-D computer card. Unfortunately it couldn't pick up anything but locals thanks to the lack of DX. The guests had to settle for a display of typical evening TV reception, which included Des Moines, Sioux City and Kansas City signals. The furthest channel seen was KWKB-20 in Iowa City, IA, 244 miles away. Folks headed back to the hotel between 9 and 11 pm; many had driven in that day and were ready for some shut-eye!

Matt's son Nathan draws door prizes

Friday's original plans had to be changed just days before the convention. Due to a family emergency, our tour host at KMTV-3 had to cancel our station tour, planned for Friday afternoon. Fortunately, Larry Thompson at KETV-7 saved the day by offering about 15 attendees a tour of Omaha's ABC affiliate on Friday morning. The highlight was a visit by the station's chief engineer, who expertly answered many questions about the station's previous, existing and future towers! KETV's "Super Doppler 7" radar was shown off too, thanks to a surprise line of storms which popped up just north of town during the tour. Luckily no one got too wet; the rain started just as the group left.

The weather caused a rain delay in getting the equipment set up at the hotel. Due to a scheduling mix-up by the hotel, the convention room reserved for the event was on the wrong side of the building for easy roof access. Luckily, the maintenance staff at Park Plaza offered their services to run our coax and rotator cables over the roof, and down into the 2nd floor meeting room through the window, a run of about 120 feet! While that took place, Matt, Mike and Jeff Kruszka set up the TV and FM antennas for the event on a concrete area near the roof with the heating and cooling system vents. Given our limited roof space, a modest 6-element FM and VHF/UHF combo, both from Radio Shack, were erected on tripods with a rotator for each. With decorative bricks Matt brought from his front yard, the setup was secured and stood tall without incident all weekend! Mike and Matt brought FM and TV equipment for the attendees to try their hand at DX, plains style, only the atmosphere had other plans. As a result very little reception of note took place during the afternoon.

Late Friday afternoon featured a group meal at Valentino's, a local Italian buffet across the street from KMTV-3, convenient to the original tour site. While there was a meeting room set aside for everyone, the restaurant was so crowded the staff insisted on seating non-DXers (gasp!) in the same room at the 2 tables we didn't use. We spared the non-DX folks from having to hear our business meeting, as a number of us suggested our hotel meeting area would be more comfortable for our post-meal discussion. So we all returned to Park Plaza.

Dave Janowiak presented a treasurer's report, stating that finances and membership were both in good shape. Discussions after the business portion of the meeting included Joe Gragg's impression

of IBOC and its subsequent reception issues. After the meeting, the rest of the evening was spent visiting, and checking out the DX system, which included two DTV set-top boxes, one brought by Tim McVey, the other from Dave Pomeroy. Mike closed up the meeting room for the night about 12:15 am.

On Saturday DX conditions improved a bit, as Sioux Falls made an appearance on channel 13 and stayed in for much of the late morning and early afternoon. Ogallala, NE on 106.5 highlighted the FM reception for the weekend at about 300 miles. The best DX seen during the day was that on videotape, as Matt Sittel and Jeff Kruszka both played TV DX videotapes throughout the day. The highlight for many DXers was seeing video of Tim Katlic's high band skip from July 6. The 15-minute CD of the catches left all viewers in amazement of Tim's outstanding feat!

There was plenty of activity in the Park Plaza during the weekend. Kids from an Illinois youth baseball team, a 25th high school reunion, and folks dressed up in uniforms like those 2 centuries ago for the Omaha area's commemoration of the 200th anniversary of Lewis and Clark's explorations were seen in the lobby and common areas. Speaking of common areas, the Park Plaza's indoor pool, computer room and breakfast area were popular with attendees looking for alternate activities between scheduled events.

The gang watches Hi band Es video

Saturday afternoon's first planned activity was the DX convention quiz. Many folks finished quickly, but admitted to having some difficulty with the material. The quiz was used as the qualifier for DX Jeopardy!, patterned after the famous TV game show. The seven highest scorers of the 18 test takers got to play in a single round of DX-themed questions, written and hosted by Matt Sittel. Matt kept the qualifiers a secret until game time, calling them out to take a seat before each game. The first game featured the 7th, 5th and 3rd place quiz finishers: Bob Smolarek, George Greene and John Zondlo, respectively. The game was a nail-biter, as all three had a chance to win with the very last question. Bob

Smolarek buzzed in, and his correct response vaulted him from third to first and the win. The second game was a battle among 6th, 4th and 2nd seeds Dave Pomeroy, John Adams and Frank Merrill. Frank started strong, and Dave caught up only to see Frank distance himself again at the finish. Bob and Dave moved on to the final against top seed Scott Fybush. Scott built a huge lead early on but a late rally by Frank pulled him to within 400 points of Scott. Unlike the first two single rounds, point values were doubled for the final and a Final Jeopardy question was asked. Serenaded by the WTFDA Singers, the think music for the final question was no problem for Frank and Scott who both answered the last question right, however Scott's wager was enough for the win. Matt presented the champion with his very own home game of DX Jeopardy!

Tim McVey performs tuner mods.

included KTWU-11 (thanks Dave Pomeroy) and KMTV-3 pencils.

The group photo was the next item of business. John Ebeling's wife, Ira, gathered the group on the stairs leading into the Park Plaza lobby for a photo. Ira stayed busy as a number of DXers passed their cameras to the front for photos! With about 20 minutes to wait before the banquet, door prizes were awarded. Thanks to Mike and Matt's wife, Karen, along with other gifts generously donated by Paul Mount, Scott Fybush and Mike Bugaj, everyone got a door prize. The hosts also thank Doug Smith and Grove Enterprises for arranging delivery of samples of Monitoring Times, as well as NASWA and NRC for providing samples of their club magazines. Other freebies

The banquet, a country barbecue cooked by the catering group at Park Plaza, featured ribs, chicken, corn on the cob, green and fruit salad, cole slaw, beans, potato salad, bread, iced tea and water. The staff even made up the room with hats, straw and colorful table decorations for a memorable meal. Mike Hawk presented a technical talk after dinner, sharing with the group a number of web sites with information of great use to the DXer, including weather, sunspot and ionospheric information as well as search engines for researching local ads. The rest of the evening was spent in the meeting room watching more DX videotapes, and hoping for some skip, which never was seen. Tim McVey stayed busy during the entire weekend, as he graciously offered his services for a tuner clinic. Both of the hosts were glad to have their tuners expertly improved, as were all the others who took Tim up on his offer.

Sunday morning saw most people leave before the hotel's 11 am check out time, but before leaving attendees got a chance to say goodbye before their travels home. The antennas were taken down in the late morning and by noon only an empty meeting room remained, but those who attended were full of memories of a special weekend in Omaha, highlighted by the renewal of old friendships and the forging of new friendships.

Here are some sample questions from the convention quiz and DX Jeopardy! See how YOU would have fared had you been in attendance... and if you're wishing you had been there, make sure next year that you include the WTFDA convention in your travel plans!

Bob, Frank and Scott play DX Jeopardy

1. A number of eastern DXers logged ZFB FM, a Bermuda station, this year via E-skip. On what frequency does this station operate?
A. 89.1 B. 94.9 C. 104.5 D. 106.1
2. What channel 4's transmitter is located at 39-15-09 N, 101-21-09 W?
A. KCNC, Denver, CO B. KLBY, Colby, KS
C. KSNB, Superior, NE D. KPRY, Pierre, SD
3. The calls of 106.5 in metro Kansas City are shared by what TV's network affiliate in the same market?
A. ABC B. CBS C. NBC D. FOX

4. What is the city and state of license of KMTH-98.7?
5. On what channel does KPIC, Roseburg, Oregon broadcast?

1. CELEBRITY BIRTHPLACES: Cher may have sung "I Got You Babe", but she also got "V" too when she watched KECY-9, licensed to this California desert city.
2. KNOW YOUR WTFDA: Little Rock's area code, or the PO Box number for WTFDA in Somersville, CT.
3. NEWSPAPERS: Watch out for the Avalanche, the newspaper serving this Texas city that's also home to "K-Mac" on channel 28.
4. WEATHER RADIO: Three of this state's transmitters are at Lake Bronson, Gun Flint Lake and Rabbit Lake – just 9997 lakes to go!
5. (The Final Jeopardy! Question) NATIVE AMERICAN TRIBES: In an alphabetized list of every city with an FM station, the last is this New Mexico city home to KSHI-90.9 and an Indian reservation of the same name.

Answers to Quiz: 1. B, 2. B, 3. D, 4. Maljamar, NM, 5. channel 4. Answers to DX Jeopardy!: 1. What is El Centro? 2. What is 501? 3. What is Lubbock? 4. What is Minnesota? 5. What is Zuni?

Our tour of KETV-7 included a stop in the Master Control room. Photo taken by John Zondlo.

DTV SET TOP BOXES

Bob Cooper

I mentioned last week some insider advice concerning the best (most sensitive, best error correction) digital set top box citing the LG-LST3100A as the holy grail for the moment. There are vast differences between these boxes - what one needs is something not yet on the retailer shelves. It is the FIFTH generation chip whereas the LG boxes currently on sale are 3rd and 4th generation

chips. The chips are routinely being upgraded with ever better weak signal coping capabilities but the model number is apparently static. For what it is worth - "Fifth generation" chips are only being Beta tested at this time and will not be available at retail level until the existing 3rd and 4th generation inventories are exhausted - possibly by November (a stocking stuffer for Christmas???).

We've discovered another source of UHF antennas on the internet at

www.hdtvantennas.net

They seem to have a large selection of well built antennas for UHF with very reasonable prices. The name and address is:

Antennas Direct; 1511 Windwood Hills Rd
Wildwood, Mo 63021

(877) 825-5572 Toll free

(Note: we are not endorsing either this website or antenna distributor. Please do your homework before buying.)

SATELLITE NEWS

GEORGE W. JENSEN
4604 ANTANNA AVE, Baltimore, MD 21206-4220
SCISATMAN@AOL.COM

Another month of adds and deletes. NASA is now noted on AMC7 (137 West) XPDR 18.. It is no longer on AMC9 SATCOM C4 is now named AMC 10 at 134 West. E Entertainment Television has appeared on XPDR 8 and Speed Channel on XPDR 11 will be going digital ????. New on IA7 (129 west) are the following - delete transponder 600 and add the following goodies - THE SET - 803 - Set 1 - Southern Gospel Music Videos, 804 - SET 2 - Bluegrass Videos, and 805 - SET 3 - Traditional Black Gospel Music.

GALAXY 13 add - 600 - Wealth TV
Galaxy 5 - XPDR 10 - on and off - CNN
Headline News for some reason // to 22
On XPDR 21 - Delete Lifetime - will be going to PowerVu system

XPDR 15 - WCPE subcarrier is now located here 5.6/6.2 from XPDR 7

AMC1 - All 3 Prime Time 24 feeds leaving this bird and migrating to AMC 3.
The KBEH 63 On AMC 1 was located in Los Angeles/Oxnard and just as quickly has disappeared.

Now to some of the Internationals on Telstar 5 Ku 11867V/22000 = Assyria Sat, TV Romania International, Payam, Iranian Cinema Channel, Horizon Armenian (USA), P E N, MaTV and others; 12122H/22000 - JSTV 1 and 2, CTS, Christian TV System and others; 12146V/22000 - Syria Satellite Channel, Sudan TV, Saudi Arabia 1, Abu

Dhabi, Al Manar, Oman Satellite TV, Qatar TV, Jamahiriya Satellite Channel; 12152H - American Farsi Network, Azadi TV, Abu Dhabi TV Europe, TapeST TV, Adjara TV, IRIB 2, and others; 12177V/23000 - Melli TV, Haiti Diaspo, Kuwait Space Channel America, TRT International, MRTV3 and VTV4 (Myanmar and VietNam share), Kurdistan TV, Thai TV Global Network, Maharishi, Samanyolu TV World and Kurd Sat

Gone from the Intelsat at 40W is the Bolivian clump. Also on Telstar 5 - C Band - 3757V/3686 - UATV - Urban America TV.
On Intersat Americas 6 93 WestPBSX now at XPDR 8Galaxy 11 at 91 West delete NBA channel at 400

New Prime Time 24 arrangement on AMC3 87 West is as follows -

5 - WNBC - Ch 4- New York NBC
19 - WKRN - Nashville, Tennessee - ABC
23 - WSEE - Erie, Pennsylvania - CBS
22 - ADD CNBC here

On the Intelsat at 40 West - Tele Caribe (DTV Digicipher) seems to be missing last few weeks.

Now that I've caught up, that's all for this go round. Hope to see you in 30 and may the skip continue, though in spurts that it is. "73"s

NORTHERN FM DX CONTINUES FROM PAGE 55

(Rick Shaftan's report continues...)

8/12/2004 Ms

2159 @KJFM 97.7 Augusta AR Reading Stations KBDD
91.9 Winfield-Wichita 253 993
2208 ???? 97.7 "...Family Worship Center in Brundidge" No listing for such place in Brundidge AL

8/13/2004 Ms

2215 ???? 97.7 AL "Auburn or Alabama Game"

8/14/2004 Ms

0210 @WBEI 101.7 Reform AL RDS PI 57BC 238 903

I find the antenna is especially sensitive to directionality. I've been working with the antenna pointed SW about 245 degrees over the past few days: First number at end is bearing. Note the consistency. Second # is mileage. @ are new, # are new prop mode. Total 2672. This was one of the better Persids seasons I recall.

Unfortunately, VHF suffered from terrible cable leakage in the hotel where I was staying, but upon return home I saw that there hadn't been any skip during these three days anyway.
