The Official Publication of the Worldwide TV-FM DX Association

NOVEMBER 2005

The Magazine for TV and FM DXers

The Big  
#20  
Is  
Ready!

## WTFDA CONVENTION DATES

August 11, 12, 13, 2006

Make Your Plans Now for Sparta, NJ

*TV and FM DXing was never so much fun!*

# THE WORLDWIDE TV-FM DX ASSOCIATION

*Serving the UHF-VHF Enthusiast*

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, GREG CONIGLIO, BRUCE HALL, KEITH MCGINNIS AND MIKE BUGAJ.

*Editor and publisher:* **Mike Bugaj**  
*Treasurer:* **Keith McGinnis** *Webmaster:* **Tim McVey**  
*Editorial Staff:* **Dave Williams, George W. Jensen, Jeff Kruszka**  
**Keith McGinnis, Fred Nordquist, Matt Sittel, Doug Smith,**  
**Peter Baskind and John Zondlo,**  
Our website: [www.anarc.org/wtfda](http://www.anarc.org/wtfda) Our forums: [www.wtfda.info](http://www.wtfda.info)

**NOVEMBER 2005**

Finally! For those of you online with an email address, we now offer a quick, convenient and secure way to join or renew your membership in the WTFDA from our page at:

<http://fmdx.usclargo.com/join.html>

Dues are \$25 if paid to our Paypal account. But of course you can always renew by check or money order for the usual price of just \$24. Either way, it's still a bargain!

## VUDS ON A CD!

Every VUD from Jan 1980 to December 1989 is on this disk. You'll need Adobe Reader to read them. Why have a box of old VUDs taking up space when you can have this. **It's yours for just \$8.00 per disk.** Send your check or money order for \$8.00 to WTFDA, P.O. 501, Somersville, CT 06072. Make it payable to **WTFDA.**

Editors/Submissions	46

I think just about everybody loves a good antenna article and this month Gary Hickerson supplied one. This article originally appeared in the May 1965 Popular Mechanics and cost you all of 35¢.

We've been looking for a new FM News editor and I think we've found one. He's an FM Dyer and has a nice looking website. One point this proves is that you don't have to be an old-timer to get an editorship here.

To all of our US members, have a great Thanksgiving and we'll see you in December!

## THE WTFDA FORUMS AT

<http://www.wtfda.info>

This is the newest addition to WTFDA on the internet. The forums consist of a series of public forums for all TV and FM Dyers *plus* two forums just for WTFDA members; the eVUD forum and the Members-Only Forum. Register yourself and go take a look. It costs you **nothing more!**

## THE WTFDA EMAIL LIST AT WTFDA.INFO

Due to popular demand, we've moved the list from Topica to the forums. The emails fly faster and you get subscribed faster! Just send an email to [tvfmdx-subscribe@wtfda.info](mailto:tvfmdx-subscribe@wtfda.info) to be added to the list quickly. If you've had problems with Topica before, try us now and come onboard. Read on the web or by emails. Your choice!

## TROPO!

Welcome back! I hope you were one of the lucky ones to snag a little bit of October tropo! Looking over the month of October, the northeast experienced tropo to NB and NS on the first of the month. **Mike Hawk** and **Matt Sittel** got some great dx to North Dakota and Manitoba on October 2<sup>nd</sup>. Then the tropo broke loose in the east from the 3<sup>rd</sup> to the 7<sup>th</sup>. October 8<sup>th</sup> to the 10<sup>th</sup> featured a few days of "Dixie Tropo" for the guys down in the southern states. On October 11<sup>th</sup>, **Girard Westerberg** saw channel 10 in Oklahoma via tropo. It's been a great month for many of you and let's hope the last half of the month is as good as the first half.

## MEMBERS AND MORE

Renewals are in this month from **Paul Sojka, Jr** (NJ), **Bill Smith** (MA), **Jim Renfrew** (NY), **Cliff Rames** (FL), **Charles Tumosa** (MD), **Scott Fybush** (NY), **Gary Olson** (FL), and **Roger Sabella** (IL). This list covers the period from 9/18 to 10/17. Thank you all for sticking with us for another year.

Here's another logo from Jesús Perez in Havana. He writes "Here is another logo from a local channel on the east part of the country. It is the new logo for Television Camaguey.

I would like to know if there was anyone else having RCTV on channel 3 on July 31<sup>st</sup> of this year. I did it and there was also another ch3 getting in at the same time that day. This one with a baseball game in Spanish, but with no commercials. They mentioned Venezuela at times on the

transmission but I would like to know which station it was?"

So, you folks down in Florida, check your logs and see if you got RCTV-3 on July 31<sup>st</sup>.

## MIDWEST GET-TOGETHER

**John Tudenham** tells us of the 2005 Midwest Get-Together scheduled for **November 11,12,13** in Lebanon, MO. Lebanon is 50 miles NE of Springfield and about 160 miles SW of St. Louis

The location is the Historic Route 66 Inn, formerly the Best Way Inn, located near exit 127 on I-44. This is 1710 W. Elm which is on the old highway 66, on the north side of I-44. John says he can get you a special low rate of \$33/night at this motel. It's in a good location, has cable TV and has plenty of places to eat within walking distance. He also mentions possible tours of KBNN-AM 750 and KJEL-FM 103.7.

In the area you'll also find a Route 66 museum plus Bennett Springs State Park.

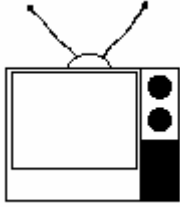

Reservations are probably not needed but you can call the motel at 417-532-3128 for more info or call John at 417-624-8058 or email him at [w0jrp@earthlink.net](mailto:w0jrp@earthlink.net).

## CAPE COD GET-TOGETHER

**Chris Black** is holding a Cape Cod DX get-together **Saturday, November 19<sup>th</sup>**. This is an all-band event, so if you are into FM or AM DXing, it should be interesting. Chris says there are some motels within a five minutes drive of his place and the rates are low! There will be drinks, snacks and a buffet type dinner "to maximize our time in the DX window." Try to RSVP by early to mid November so he can get a rough headcount. The address is Chris Black, 12 Cypress Point Way, S. Yarmouth, MA 02664 and the phone is 508-394-0528 or email chris at [n1cp@comcast.net](mailto:n1cp@comcast.net).

OK, you turkeys, that closes the mailbox for this month. Have a great Thanksgiving and we'll see you in Dec.

Thanks to Danny Oglethorpe, Dennis Smith, Curtis Sadowski, and Jeff Kruszka for information appearing elsewhere in this month's column...

The situation in Arizona is a bit unusual...

For many years, channel 39 has been allotted for non-commercial operation in Phoenix. Channel 11 has been allotted for commercial operation in Holbrook, Ariz. about 120 miles away.

Within the last few years, Daystar won the construction permit for a new non-commercial station, KDTP, on channel 39. As a religious outfit, non-commercial operation was acceptable to Daystar.

Within about the same time frame, Telemundo won the permit for a commercial station at Holbrook on channel 11. This station, KPHZ, has depended on "must-carry" protection within the Phoenix market for most of its coverage.

Telemundo found it difficult to compete with established Univision affiliate KTVW-33. KTVW is on South Mountain, along with the other Phoenix stations; KPHZ is over 100 miles away. KPHZ does have a translator – KDRX-LP channel 48 – on the mountain, but at 52 kilowatts vs. KTVW's nearly 2300 it's not much of a comparison. And it's bad enough that 20% of the Phoenix market still uses an antenna for their TV, but the figure among Telemundo's Hispanic audience is much higher.

But no other channel exists for construction of a new full-power commercial station in Phoenix. All channels are called for.

So Telemundo tried a new plan. They filed to swap channel assignments with Daystar. KDTP, the Daystar station on channel 39 in Phoenix, would move to Holbrook. They would change to channel 11 in the process. KPHZ, the Telemundo station on channel 11 in Holbrook, would move to Phoenix. They would change to channel 39.

The non-commercial reservation on channel 39 in Phoenix would be deleted, allowing KPHZ-39 to air commercials; while a non-commercial reservation would be added to channel 11 in Holbrook, precluding KDTP-11 from running ads. (something they didn't want to do anyway)

This is not just a sale. Usually when something like this happens, Telemundo buys the Phoenix station from Daystar, and changes the call letters and programming. In return, Daystar buys the Holbrook station from Telemundo, and makes the inverse change in call letters and programming.

In this case, the actual licenses are moving. No stations are being sold. From a legal standpoint, the Phoenix station is moving lock, stock, and barrel to Holbrook and vice-versa.

The 51 dismissed new-LPTV applications were all TBNs. My guess (and this is only a guess) is that this was related to the FCC finding that TBN colluded with National Minority TV in a LPTV spectrum auction.

I might also guess (and again this is only a

guess) that TBN will find a way out of this problem & these applications will be reinstated.

Note that WLNY-55 has been granted permission to shut down their analog transmitter and become DTV-only on channel 57.

As many of us know by now, the US government plans to close analog over-the-air TV by the end of 2009, going DTV-only. A concern in the transition has been the continued sale of analog-only TV sets; these sets will cease to work in four years unless connected to cable, satellite, or a VCR. There have been proposals to ban the sale of analog-only TVs, or at least require them to contain a warning sticker.

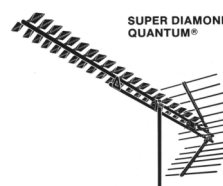

Japan plans a similar digital transition. Analog TV there will end on July 24, 2011. The Ministry of Internal Affairs and Communications there has printed 1,000,000 yellow stickers reading "Analog TV ends in 2011". They're to be attached to display model analog TVs in Japanese stores. The Ministry has the cooperation of major electronics retailers and their trade organizations, and the Japan Electronics and Information Technology Industries Association.

The Ministry also plans a public-relations campaign next June. (when many Japanese receive bonuses – and presumably spend much of that money on TV sets) *Mainichi-MSN* also reports plans to request industry cooperation in placing similar stickers on analog TVs that are sold, not just floor models.

Dennis sent some notes about TV in California. Some of them appear above. Also, he notes KSBT-LP (32) Santa Barbara has an "Excellent signal (among best on the band) when it is working right. Approximately 1/3 of the time it's a blank frame but can have sound."

With regard to KBAB-LP (51) Santa Barbara, a translator of KJLA-57 Ventura: "Ch. 57 direct pickup; sometimes picks up XHUA-57 Tijuana on tropo."

Good DX!

91.1 CFUT-FM (replaces temporary 10w station) (The two CKUE stations use directional antennas. CRTC characterizes the Chatham change as a power \*decrease\* to 36kw but that's averaged among all azimuths. I'm reporting the ERP in the direction of maximum radiation (as is the FCC's practice) and in that way, the Chatham station's power has actually increased. In Windsor the power has increased by either measurement, but the peak ERP of 6kw is considerably greater than the average of a bit less than 2kw.)

(In Sherbrooke, a license had been issued for a temporary "developmental" campus station. That station operated successfully, leading the licensee to apply for a long-term regular license - and to request increased power in the process. This is a fairly common situation for Canadian community and campus stations.)

November 2005

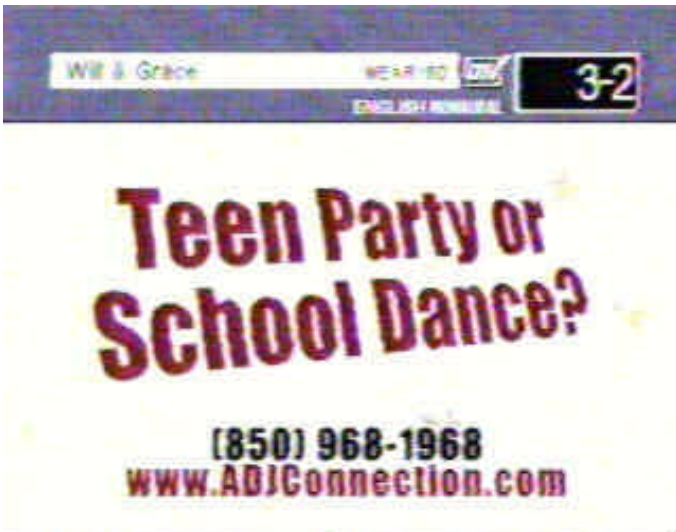

This month I toot my own horn, featuring some catches on the new toy, the Sylvania SRZ3000 STB:

**beansdad@bendcable.com (541) 420-4704**

Please note that handwritten or typed reports *may* be delayed to a future release. If I have time, I'll get them in right away. Thanks!

It's been awfully quiet here in Central Oregon on the TV side, other than a no-ID, brief Es session to MUF 5 on 10/19 and several small Tr openings to Seattle, Spokane, and Boise, but I'm still waiting for KOAB-3 to go off the air for their digital conversion – latest news is that the transmitter was delayed in shipping! We're now a year and a half beyond the original start date for KOAB-DT-11.

73's, and lets hope for some Winter Solstice Es!

## **Dennis Park Smith**

3605 San Remo Drive

Santa Barbara, CA 93105-2523

Telephone (805) 687-7803

This report is for September, 2005. As in August, the Southern California coastal tropo was mediocre for whatever reason (Santa Barbara to San Diego/Tijuana, up to 200 mi/320 km). I didn't even keep track of conditions this time. For September overall, signals were variably poor to fair, with maybe some very poor around the middle of the month. There was a bit of sub-tropical storminess that produced some rain around Sept. 19 and 27, but even that didn't affect the tropo one way or another. Sept. 28 and 29 were unusually hot days on the coast here, but with no DX change until Oct. 1, when the tropo was very good, but just for one day.

Wasco Report:

I was in Wasco (CA) briefly, overnights of Sep 15-16 and 18-19, with just enough time to check signals. Conditions were normal (no DX, only regulars). Two new ones were seen due to channel changes. KHSC-LP 38 Fresno (HSN) has moved to Channel 16 (85 miles). K67FS 67 Bakersfield (//PBS KCET-28 Los Angeles) has moved to Channel 46 (35 miles).

Best of DX to all, Dennis

The E-skip opening on July 28 was a brief one...ditto with the opening on August 2. The big surprise was CKCW 2 floating under KTVI; the CTV promos and local ads clinched it for me. On September 17, I purchased a Digital Stream HD3150 digital TV receiver. I had originally intended to purchase the receiver to monitor local DTV signals. Most of the locals have just one virtual channel; only KSDK-DT 35 (remapped to 5) and KETC-DT 39 (remapped to 9) have more than one virtual channel. KSDK-DT has two virtual channels; one for the main program (5-1), the other for NBC Weather Plus (5-2). KETC-DT has four virtual channels; 9-1 is PBS HD, 9-2 is PBS Kids, 9-3 is a simulcast of the analog signal, and 9-4 is PBS You. The weakest local DTV signal is KNLC-DT 14, given the fact their transmitter site is further south than the other St. Louis DTV stations. I was pleasantly surprised with the DX performance of the receiver; the first DX signals noted were close-in WICS-DT 42 and WSIU-DT 40. Within 24 hours, I also pulled in KRCG-DT 12, KOZK-DT 23 and KYTV-DT 44. KMBC-DT 7 was a pleasant surprise on September 22, the same with WSJV-DT 58 on October 1. When a distant signal is tuned in on the HD3150, the first virtual channel is usually received. For example, the first virtual channel of WSIU-DT 40 is a simulcast of the analog signal, while the first virtual channel of KMOS-DT 15 is PBS HD. Of course, I logged a pair of new analog signals from Little Rock on September 30. 73 and good DX from Eric (NØUIH)

June 2005 - TROPO portion

- 22 0550 Battle Creek 41,  
Fort Wayne 33 (now WISE),  
south bend 69 (no biggies)
- 24 0530 w68do (\*NEW\*) palatine IL tbn  
(displaced from 36)
- 27 0020 w51ct (\*NEW\*) bloomington IL  
tbn--wwto 35 (displaced from 64)  
0025 -??- 28 (3/4 color bars with  
"DELL @0600MSC" - WSJV?,  
PROMPTLY OFF)

July 2005 - TROPO portion

- 02 2047 WPXI 11 PA 557  
Ohio 53, 36  
2100 central/north WI atop or CCI on  
7, 48, 20, 28, 11, 12, etc.  
WEAU-13 way on top "but opening

- went nowhere"
- 05 0206 very strong Kansas City (250 miles)  
channel 4 and up
- 08 0330 both Indianas on 69 (south bend  
is LPTV) battle creek 41  
0445 WBND-LP-57 (\*NEW\*) IN south bend  
(snowfree by 0500, good trick with  
WEEK-DT supposedly there as well!)
- 0500 w24aw valparaiso IN  
World Harvest Television  
very heavy CCI 25 same direction...  
WMWB LP south bend really trying???
- 0505 WZZM 13 MI atop
- 0512 w65ee 65 (\*NEW\*) janesville WI  
tbn (displaced from 19)
- 0530 --??-- 44 America One TV I.D., a  
"w44..." or LP, WHAT'S THIS?
- 0530 --??-- 68 Also toward Rockford as 44  
was; Loretta Young Show, and a "bug" in  
lower right that looked like FJ, couldn't  
match up, WHAT'S THIS?

JULY 2005, Skip

- 10 kwgn-2 krma-6
- 11 an "xhgc" on 5  
"azteca 7" on 4 (only Colima, Oaxaca listed –  
HIGHLY doubtful!)

AUGUST 2005, Skip

- 02 wcbd, kprc, wpbt-2  
ktbs(!), wedu, wear-3

AUGUST 2005 (NOW HAVE Sylvania consumer-  
type DTV receiver) GW/TR

- 02 27 new DTV loggings to start, WQAD-DT-38  
was first, Rockford (on 16, 160 mi) farthest
- 03 6 more new DTV, Waterloo IA (160 miles,  
on 55) farthest
- 04 3 more new DTV, Chicago area 36/45/51  
(185 miles)
- 06 5 more new DTV, more Chicago  
+WSIL-DT-34 (220 miles)
- 08 1 more new DTV, KETC-DT-39
- 09 1 more new DTV, WICD-DT-41
- 10 0434 --??-- 33 (3/4 color bars toward  
Rockford IL - noticed a few times - what's  
this?)

SEPTEMBER 2005 TR

- 12 2110 WAND-DT-18 (\*NEW\*) IL finally
- 21 0511 KDIN-DT-50 (\*NEW\*) IA  
0517 KMTV-DT-45 (\*NEW\*) NE 304 miles,  
whee I broke the 300 mile barrier...  
0527 WOI-DT-59 IA (\*NEW\*)

Not much of a season, and I understand that even  
with a lot of traveling, I may not have missed all that  
much! If a year had to be "bad" I guess this was

the year, because traveling took up tons of time, as well as getting involved with "probably" having saved somebody's life, etc. This person, in turn, has gotten much into nutrition/wellness research, and after his sharing the findings with me, it's causing me to change my eating habits in a big way.

WEEK 25 Peoria, IL

A few new ones this time, but nothing real exciting. WFYI-20 from Indianapolis did sneak in with no other stations from that area. Signal week with much CCI which turned out to be WICS-TV from Springfield, Illinois. I had forgotten about the network switch in central Illinois and was surprised to find an ABC station on channel 20. WICS-20 was the first "distant" UHF station I ever received. That was back in the early 1960s and they were NBC then. Also strange to see NBC on WAND-17. WDAF-DT 34 from Kansas City is finally at full power so we can now watch Fox HDTV. That part is nice but channel 34 has probably been lost for DX. WDAF-DT has the strongest DT signal from KC.

---

OK, so guess what I acquired on Sep. 8? Thanks to Steve in Indianapolis for sending out the e-mail alert about the Radio Shack sale on the HDTV converter (\$89.98), which instantly gives me 15 new TV logs. I'll guess that smarter people than me will do some side-by-side comparisons of this unit. A nice feature is a signal strength meter, but the remapping is a bit confusing and the remote is a bit balky.

That's all for this month. If you've seen any good DX lately, please take a moment to report! 73s Matt.

WJZV 93.1 was the big surprise in the E-skip opening on July 28; this was mainly a low-band VHF TV opening. IBOC sidebands is not as big of a problem in St. Louis on FM as it is in the New York area, with only five FMs (three Clear Channel and two Bonneville FM properties) broadcasting in the unproven and spectrally inefficient format. KWMU 90.7 put on their IBOC on September 26; it was gone within 48 hours. The trop opening of September 30-October 1 was a pleasant surprise; I managed to pull in four new Arkansas stations, even KBCN 104.3 next to local WRDA 104.1. Speaking of WRDA, Emmis Communications has sold this to Radio One, and flipped the station to an Urban Contemporary format as "Hot 104.1", leaving St. Louis without an Adult Standards format. KESY 107.3 Cuba, MO is now on the air with a country format; it is Crawford County's second commercial FM; the other one is KNSX 93.3 in Steelville (although their transmitter is in Franklin County). 73, Eric (NØUIH)

Thanks to Tim in Penfield for announcing the great conditions, and for helping pin some of these down as it was happening.

Sadly, no hint of needed New Hampshire on 103.7 or 94.9. Bob-FM in Brockville and Ithaca NY killed 103.7 in that direction. 94.9 was too difficult with Oshawa and Frankfurt NY. No sign of Vermont on 96.9 or 92.9 due to Buffalo.

**Frank Merrill, p.o. box 669, macomb IL 61455 309-833-2661 fmerrilljr@yahoo.com  
Tandberg 3001 tuner (from 70s) or McIntosh MR-78. Channel Master 4408 (Stereo Probe 9)  
mounted 8 feet high for all Skip catches, unless noted.**

If phasing, Bolin phase box with two separate-tower 4408's each at about 45 feet high. If not phasing, one of these is used. \*\*calls\*\* are new stations

NOTES FROM THE ABOVE;

1. I happen to know the guy who \*owns\* this station. I called him up a couple days later and told him "I want to play a tape over the phone, and tell me if you recognize it." He did!
2. My first taste of "IBOC Hell." Stations from this region were stronger than closer stuff in the same direction (e.g. 105.5 St. Joseph over Moberly, 105.1 as strong as Quincy, 94.5 Topeka occasionally over KRXL). IBOC hash from 98.9 "ate" 98.7 (KMGO same direction) and 99.1; 98.1 "ate" 98.3 and 97.9; 96.5 put hash in KLBA 96.7; 93.1 might have had 93.3 hash but not sure; 104.9 destroyed by 105.1 hash; 106.5's hash briefly ate semi-local WPWQ. Interestingly, on 7/31 I was in Kansas City and I couldn't detect IBOC on the car radio at all. Apparently the hash on the adjacents is reduced by more dB than the poor adjacent-channel selectivity can detect.
3. faded up briefly to "...than any other station in the Tri-State area, all the hits..." A phone call to them confirmed that this was their own promo, made in-house, they recognized it!
4. another fade up: "...and on KUUZ, 95.9 FM, Lake Village AR..." I had been hearing religious teaching occasionally getting by dominating KJMO and WJBD. I couldn't find a human being at KDJR, so I called KUUZ and asked if they had an affiliate on 100.1 in their legal ID's - they said, yes, KDJR. SWEET!!! This had been my #2 or #1 most-wanted FM for plenty of years (became #1 when I finally bagged WCCW 107.5 several years ago). These two had to make it through torrential rains St. Louis and south (hurricane leftovers). I think WKAI may have been off to install their CP for more ERP? If so, this was just dumb luck, as I never listen to them...I noticed (I think) a somewhat stronger signal later once they had come back on.
5. Does anybody know if they also moved their tower when "moving in" from Kankakee? If the tower didn't also move, this won't be a new station for me.

E-skip was less than impressive this season, but there were a few decent openings to up the log totals. Similarly there were a few tropo openings, which thanks to the APS-9B, resulted in a lot of new catches, including some on local frequencies. The highlight for me was finally hearing Canada by tropo, with 97.9 Brandon. It came in briefly under Sioux City, long enough to hear a few cities and Celsius temperature, then faded out after being in maybe 15-20 seconds. I listened next hour to the CBC Radio 1 feed from Winnipeg on the internet and heard exactly the same forecast with cities in the same order, starting with Winnipeg and working west. Manitoba is a new province for my log as well. My log total has jumped to 1226, more than I've ever logged at any other QTH, surpassing my Tallahassee, FL total from the early 1990s.

N4LI@ARRL.net

Boy, you can sure tell that the Sporadic E Season is over, can't you?! September in Memphis has been uneventful, to say the least. Sure, there have been a couple of routine Sporadic-E openings on 6m, and a few interesting tropo contacts on 2m – including QSOs into KS, WI, and PA – but, there was nothing much to write home about. Since we have a clear break in the action, I thought it might be a good time to discuss what some call “the final courtesy of a contact,” the QSL.

I really enjoy collecting cards. There is something fundamental and tactile about being able to hold in one's hand a hard remembrance of an interesting contact. Still, many hams, especially those who have spent several years on H.F., no longer collect cards. But, those of us who frequent the VHF bands do almost universally. There are many awards and recognitions available for “confirming” contacts in various numbers of grids. Further, on 6m, working and confirming all states can bring a nice award that, since it is no easy task, is often pursued. Some even have worked all states on 2m with the help of bouncing from the moon!

If you spend any time on the VHF bands, it is important to keep some cards on hand. There are, obviously, stylistic differences among cards, but despite these differences, all cards should contain some basic information:

- The call of both stations,**
- The date of the contact,**
- The band or frequency of the contact,**
- The exact time of the contact (preferably in Universal Time),**
- The mode (e.g., SSB, FM, CW, etc.), and**
- A signal report.**

Beyond that, the sky is the limit. Many hams include awards they have won, memberships they hold, or even the occasional religious message. Oh, and please include your grid square!

QSL cards can be as varied as the hams who send them. Some cards are simple and straight forward, with little more than the required information. They are “plain vanilla.”

**WASHINGTON**

THE QSL MAN® / W4MPT

But, when you need a grid, a country, or a state, vanilla is a great flavor! Other cards are humorous, or artistic, or just plain fun to look at. Cards get particularly interesting when the operator has a flair for art or photography.

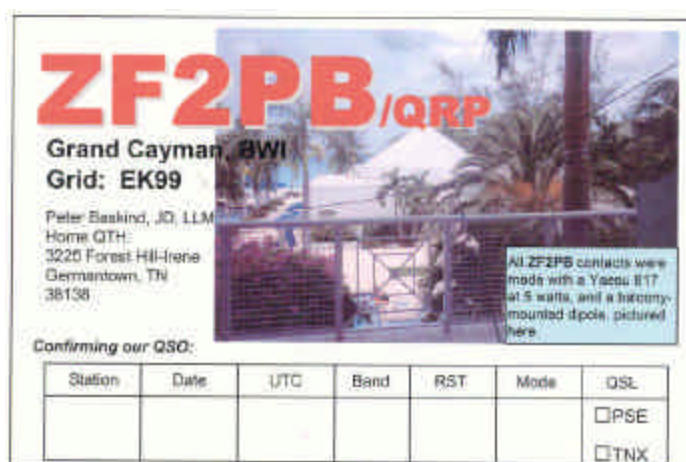

The fancier the card, the more expensive they can be. QSLs are often purchased in lots of a thousand or more. Bought in this bulk, full-color, two-sided cards like the one above can cost twelve to fifteen cents a card, often double what the more basic, single-color cards might cost.

Fortunately, for operators on a budget, or those who aren't active enough to justify a run of 1000 cards, there are options. There are a few programs available to make cards at home, one-by-one. Perhaps most popular is QSL Maker, downloadable at <http://hfradio.org/wb8rcr/>. The program makes a very serviceable card. The only downside is the cards all tend to look the same.

Of course, those who are even remotely computer savvy can make a very nice, custom-looking card anytime they might want, one-by-one. As with the high-priced slick cards, there is virtually no limit to what once can put on them. Here's one I quickly knocked out after returning from the Caribbean.

The most important thing to remember about QSLs when you're operating the VHF bands is *to have some*. VHF hams are almost always chasing something, so expect to receive some unsolicited cards on a regular basis. While the card may not be important to you – gosh, how many cards do I have from FN20, around Philadelphia? – it is likely important to be the guy requesting yours.

### Loggings

**Bill Smith, WA1NYV, 56 Locust Street, Douglas, MA 01516 FN42**

Not much this month. Finally finished computerizing my 6m log. Since November, 199, I have contacted 1553 stations in 480 grid squares. I have confirmed 448 squares in 81 countries.

5 Sep '05

Brief opening South, then shifted SW. Worked W9HBF/EM48 @ 2101 and KE5BYF/EM53 @ 2120.

There was some Transequatorial stuff showing on the Internet between South America and the Caribbean, but nothing much came of it.

9 Sep '05

This opening came during the VHF contest.

# GET ALL THE CHANNELS-

## ERECT A FRINGE-AREA ANTENNA

Tired of poor TV reception and stopped by the new antenna's price?

Do it yourself. It's not easy, but think of those bright new pictures

From POPULAR MECHANICS, MAY 1965 submitted by Gary Hickerson

TIRED OF SNOWDRIFTS obscuring your TV pictures? Annoyed with ghosts chasing each other across the screen? Suffering with weak and pale hard-to-watch viewing? Chances are you need a new roof antenna to put an end to these problems and bring back those stations you haven't been able to enjoy lately.

If you're more than 50 miles from the nearest TV transmitter, a simple antenna just won't do. For good reception you need a really sensitive highly-directive antenna mounted on a tall mast.

We tackled this problem recently at a summer home in Southampton, Long Island, about 100 miles from New York City in a relatively difficult reception area. Our solution was to erect a high-gain super directional antenna atop a 20-foot mast attached to a sloping roof some 32 feet above the ground. This gave us an actual antenna height of more than 50 feet.

First steps called for selecting an antenna and mounting hardware. We chose a Channel-Master Crossfire for the antenna and a combination of mounting hardware that included a two-section 20-foot mast, tripod mount and base mount, ground rod, standoff insulators, lightning arrester, turnbuckles, guy wire, ground wire and lead-in wire.

Our choice of mounting hardware was predicated by the location. Normally either the tripod mount or the base mount would be used to hold the mast in place. But because of the possibility of high winds we used both. A hurricane which hit just a few months later proved us right. Our installation held while many others in the area tumbled before the high winds.

We took as many basic steps as possible while still on the ground. The sloped roof would have made opening the antenna and hooking up guy wires rather difficult. If a flat roof had been the work area, all this would have been done on the roof. First we laid out all the parts, cut guy wires to size and tied one end of each guy wire to the appropriate ring on the antenna mast. Next we folded the antenna open and attached it to the mast. Then lead-in wire was connected to the antenna terminals and run through the standoffs we mounted on the mast.

Next it was time to climb the extension ladder to the roof to make our basic preparations there. We picked a site atop the roof peak and selected positions for the antenna mounts and guy wire tiedowns. The trick here is to make sure that the mounting screws go into something solid so they won't pull loose later. This means you have to locate the roof rafters. Also, once you make a hole in that roof you must seal it up after the screw or whatever has been put into place. If you don't, you'll be looking at water stains on your ceilings after the first good rain. The easy way to do this is with a tube of silicone rubber. Just make sure you use enough to completely surround every screw or eye.

Once the antenna mounting brackets were fastened in place with lag screws, it was time to haul the antenna up on the roof. When handling an assembled antenna you can't be too careful.

It's clumsy and slow work. Two men can make quick work of the job, however, if one guides the antenna around obstructions with a line tied to the mast and handled from the ground while another man pulls the antenna up.

When working with rooftop antennas, watch out for nearby electric cables. More than one antenna installer has been fatally injured when the antenna contacted a nearby live line.

With the antenna on the roof we extended the mast to its full length. Then we tied down one guy wire from the top mast section. Pick the side that faces into the prevailing wind. This will hold the antenna in place while you get to the other guys, and tie the antenna down properly. We used guy wires at two levels on the mast. There are three guys at each level separated by 120 degrees. This gives uniform support. Always set one guy to face into the prevailing winds—the direction the wind most commonly comes from—to provide maximum support. In an area subject to extremes of wind, snow and

**UNFOLDING THE ANTENNA** is a fast and reasonably easy task. Make sure all antenna elements are firmly locked open and straight. If possible, do this on the roof.

ice you may need six guys at each level.

Now we were ready to raise the antenna and insert it into the tripod mount. This again was a two-man job to keep the antenna from falling. With the mast in the mount, we then tied down the remaining guy wires. Using the turnbuckles, all the lines were tightened evenly. You can check this by watching the mast. It should remain straight and vertical.

Once the antenna was in place we attached the remaining standoff to the mast and ran the lead-in wire through it. Then came the lightning arrester which is fastened to the mast by its mounting strap. The lead-in runs through it too. Should lightning strike the antenna, the arrester will prevent the bolt of electricity from following the lead-in down to your set and possibly doing extensive damage. The arrester grounds to the mast, so we used our length of ground wire to connect the mast to a 10-foot copper ground post.

Some readers may question our use of flat ribbon-type lead-in. But as we were in a quiet, relatively noise-free (electrical noise) area it was possible.

All that was left was to run the lead-in down the side of the house to the set and hook it up to the antenna terminals. Then final alignment adjustments were made by turning the antenna for the best pictures on all channels. A handy way to simplify this procedure is to use a portable TV in the yard

where you can see it while rotating the antenna. If you've got a battery-powered TV, it can go right up on the roof with you. If you can't bring the TV out of the house, a "people chain" or CB radio can be used to relay instructions to the person rotating the mast.

In extreme fringe areas there are several accessories that can be added to the installation to make good reception possible. For example, in many areas you will want to receive TV programs that are originating from different cities located in different directions from your antenna site. An antenna rotator is the best bet here.

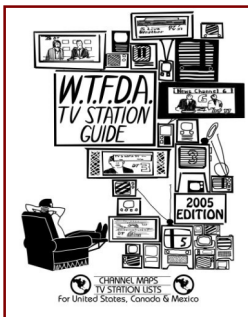

In some locations you may be too far from the TV station to get anything but snowy reception no matter what antenna you use. For greater sensitivity and less snow you can add a booster that will amplify the signal being received by your antenna to improve the picture.

Remember, no two antenna installations are exactly the same, but the general rules we have spelled out and the installation described here are typical and can be used as a guide for most installations. \* \* \*

**START MOUNTING BOLTS with a hammer. Be sure they are going into the rafters for a firm solid grip. Cover with silicone rubber or tar to prevent leaks.**
