

Vhf-Uhf DIGEST

The Official Publication of the Worldwide TV-FM DX Association

JUNE 2006

The Magazine for TV and FM DXers

KGAN (2) IA AS SEEN IN CT ON MAY 26th
SKIP GETS OFF TO A SURPRISINGLY GOOD START!

HE DOES IT AGAIN!

On May 30, 2003 he logged the first low band DTV station via E skip, and now... AT 2:55PM EDT ON MAY 26, 2006, GIRARD WESTERBERG BECAME THE FIRST FM DXER TO SUCCESSFULLY RECEIVE IBOC DIGITAL FROM KBCO (97.3) IN BOULDER, CO VIA Es AT THIS HOME IN KENTUCKY!

FM NEWS IS HUGE!

SEE IT ALL INSIDE!

TV and FM DXing was never so much fun!

THE WORLDWIDE TV-FM DX ASSOCIATION

Serving the UHF-VHF Enthusiast

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, GREG CONIGLIO, BRUCE HALL, KEITH MCGINNIS AND MIKE BUGAJ.

Editor and publisher: **Mike Bugaj**

Treasurer: **Keith McGinnis** Webmaster: **Tim McVey**

wtfda.info Site Administrator: **Chris Cervantez**

Editorial Staff: **Dave Williams, George W. Jensen, Jeff Kruszka**

Keith McGinnis, Fred Nordquist, Matt Sittel, Doug Smith,

Chris Kadlec, Peter Baskind and John Zondlo,

Our website: www.anarc.org/wtfda Our forums: www.wtfda.info

JUNE 2006

Finally! For those of you online with an email address, we now offer a quick, convenient and secure way to join or renew your membership in the WTFDA from our page at:

<http://fmdx.usclargo.com/join.html>

Dues are \$25 if paid to our Paypal account. But of course you can always renew by check or money order for the usual price of just \$24. Either way, it's still a bargain!

VUDS ON A CD!

Every VUD from Jan 1980 to December 1989 is on this disk. You'll need Adobe Reader to read them. Why have a box of old VUDs taking up space when you can have this. **It's yours for just \$8.00 per disk.** Send your check or money order for \$8.00 to WTFDA, P.O. 501, Somersville, CT 06072. Make it payable to **WTFDA.**

Some columns may not be available this month due to time constraints and lack of submissions.

And now... **eVUDS ON CD!**

All eVUDs from 09/01 through 12/05 are on this disc (except 8/02 which was not published). Follow the changes from day one to the present form. **You can have it for just \$6.00** (\$5.00 plus a dollar shipping). Use the same address as for VUDs on CD shown on the opposite column. Have a great month!

WTFDA CONVENTION 2006 AUGUST 11,12,13

Join us for WTFDA Convention 2006! This years convention hotel is the **Ledgewood Days Inn Lake Hopatcong 1691 Rt - 46 West, Ledgewood, NJ 07852, US.**

The hotel is conveniently located just off I-80 on New Jersey Route 46 West. We've reserved 8 rooms The room rate is \$99/night. AAA members should check for a AAA discount.

We will have a hospitality/meeting room with food and soft drinks available for those who attend. Directions will be available to the home of Rick Shaftan, our host, for those who want to spend time at Rick's DX setup in Sparta, NJ. Sparta is about 10-15 miles north of Ledgewood.

Visit the website: <http://fmdx.usclargo.com/wtfda2006/>

For info, email Rick at shaftan@earthlink.net

IMPORTANT!

If you plan on attending, please email Keith McGinnis at longwave@comcast.net so we can get a head count and reserve more rooms if necessary.

MIKE BUGAJ MBUGAJ@SNET.NET

THE SKIP SEASON IS ON

Welcome to the June Mailbox. Last time we told you skip was just around the corner and now it's here. It began to trickle in around the 12th of May and really took off around the 19th. Up here in the northeast we had at least two openings go into FM and other parts of North America did much better than we did. All in all we're off to a good start and we hope it keeps rolling in.

Fred Nordquist has some Cuban and Jamaican FM skip loggings. As a matter of fact, Cuba on TV has been fairly common so far this season. Tropo to Cuba has also happened a few times in May. Roy Barstow caught WKAQ-2 in Puerto Rico on ch2 on the evening of the 24th, and two of us in New England may have seen it at the same time Roy did.

Let's hope the rest of the skip season is as interesting as the beginning was.

MEMBERS AND MORE

We have one new member this time around and that person is **John Lochey** from Grass Lake, MI. John signed up for the eVUD. Glad to have you with us, John!

During the period 4/15 through 5/18 we received renewals from **Nick Langan** (NJ), **Eric Fader** (NY), **John Hanna** (IL), **Ken Onyschuk** (IL), **Fred Nordquist** (SC), **Milton C. Bay** (KY), **Randy Zerr** (FL), **Fritze Prentice** (AR), **Todd Sprinkman** (WI), **Jerry Bond** (NY), **James Montgomery** (IN), **Mike Lapinski** (NY), **Bob Garchak** (PA), **Sheryl Paszkiewicz** (WI), **Robert Ross** (ON), **Dan Oglethorpe** (LA) and **John Ebeling** (MN). We've had some members switching over to

the eVUD from paper (which is great if you find the print in the VUD a bit small). One or two put in a few extra dollars for our Buddy System, and we thank them! We've also had a couple of orders for Bob Cooper's book and Emisoras de FM. Since we get to keep a few pennies on the sale of these items, buying one is a good way to help out the club.

TV STATION DISAPPEARS!

Here's a really great letter that I want to share with you. It's from **Bob Garchak**. Bob joined a year ago and just renewed his membership. It goes like this: "Well, here it is, renewal time for me and believe me the info I got out of the VHF-UHF Digest was out of this world (yes, our sources do come from another solar system -Mike). I really look forward to the first part of the new month for my copy of the Digest.

I am able to receive WEMW-LP ch56 in Greensburg, PA on a daily 24 hr basis 7 days a week on an old portable black and white set with bowtie rabbit ears. I believe they are some 25-30 miles away. I also for years when they came on the air was able to get WLLS-CA ch49 Indiana, PA, which has to be in the 45-60 mile distance, then all of a sudden one day...nothing. Don't know if they made some kind of adjustment to their transmitter tower or something in my area blocked their signal. I even called WLLS-TV and I truly think they thought I was some kind of nut."

So Bob's problem got me to wondering. TV stations don't just disappear. I got out my trusty road atlas to find out where Bob's home of Jefferson Hills, PA is located. Then I found Greensburg, then Indiana.

Next I went to <http://w9wi.com> and began nosing around over there, looking for clues, and I found the answer to Bob's dilemma staring right at me. Bob is close to Pittsburgh, and so is Jeannette, PA. And Jeanette is the home of WNPA-DT, a UPN digital station with 437kw. When WNPA signed on, ch 49 went to snow. So the moral of the story is this: you just can't think analog anymore. DTV is here and in a couple of years analog won't be.

CONVENTION NEWS

Here's more convention news from your host, Rick Shaftan.

"We're looking at a bunch of station tours, perhaps a trip to the Meadowlands AM transmitter sites if I can get with Paul Mount to set that up, plus the Sussex County Fair all weekend so there's lots to do including High Point 45 minutes up on the other end of the county.

I have to charge some kind of registration fee. Usually that goes to pay for some pizza dinner. It doesn't work that way here. The grill will be hopping all weekend with all kinds of goodies: steaks, burgers, chops, sausages, dogs, chicken. We're getting a load of crawfish shipped in and be frying fish. Of course there will be lots of beer and soda. My wife will try to figure out what this will cost and some fee that makes sure I don't lose too much money on this.

If you're bringing wives or kids (and whose wife or kids isn't looking forward to this weekend?) let me know and I'll figure out a family rate. If there's anything left over, which is unlikely, it'll go to the club.

Other activities, besides eating and drinking, will include an attempt to string a K9AY (I know that's AM, but you guys will be around to help) and maybe some other antennas. Does anyone want to attempt a Channel 2 Rhombic aimed at Europe? Who would like to climb up and try to fix my UHF rotor ten feet over the top of the roof?

Is there any interest in inviting over my antenna installer...the last of a dying breed, to share his knowledge about how to put these things up?"

If you've read page two, you'll notice that we have a hotel picked for the convention. We'll have a place where you can hang out and relax if you want.

Rick tells us that if you don't mind "roughing it", camping out is permitted in his backyard.

Email Rick at shaftan@earthlink.net if you have any questions. Email Keith McGinnis at longwave@comcast.net and tell him you are going. We need to know how many will be there.

EVALUATING HD CAR RECEIVERS

By the way, on the evaluations of HD receivers that have appeared recently, it seems like two things are missing: what's the HD range compared to the analog range (and it would be nice to also get a comparison when medium and heavy tropo is going on as well as Es). And are the new Hd programming worth listening to or are just the S.O.S. (Same Old Stuff). Knowing what happens with broadcast radio, if it isn't S.O.S. now, it will be fairly soon. -Joe Fela

My experience with both the JVC KD-SHX900 and the JVC KD-HDR1 is that HD coverage is half or less the radius of decent analog. This holds true for both FM and AM.

The few Boston area HD2 signals I've heard are pretty much the same things. Nothing so far worth buying a radio for specifically. WWBB-101.5 in Providence just turned on HD2 in the past few days. Yesterday there was dead air for quite a while

on HD2, then it reverted to the main channel audio. I think the equipment was ready before the programming - or maybe the STL second channel. At the moment it's just dead air on HD2.

For what it's worth, the JVC KD-HDR1 is a good receiver on both FM and AM. And, if you search around, you can get it for as low as \$229. -Craig Healy

My experience with the JVC KD-HDR1 is that HD coverage is pretty dependent upon what other stations are adjacent to the main analog signal. On a trip to Indy from Chicago a few weeks ago, some of the HD signals dropped out pretty quickly as I got into northwest Indiana, but these are also stations that have first adjacents in that direction. By contrast, WJMK, which has lean adjacents in that direction, held on to I-65 mile marker 230, which is roughly the edge of the outer circle on that station's map on radio-locator.

The analog signal was very listenable for about another 20 miles and at east faintly there down to about mile marker 190.

I haven't had much chance to check with tropo and Es, but I'm looking forward to it. -Glen Hale

Programming is a mixed bag. Most of the HD2 channels I've heard are niche jukebox stations -- all 80s, classic country, all dance -- stuff like that.

I think the biggest negative to HD2 is bandwidth constraints. Generally, HD2s I've listened to sound like decent quality Internet audio streams and they pull bandwidth from HD1s too, negating the sound quality advantages that are clearly noticeable on stations that don't multicast.

I don't know if Ibiquty will do enhancements to the codec used, or if any current receivers can be updated if they do.

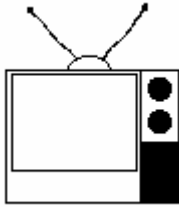

Also, Ibiquty is now offering \$25 off to people who purchase certain models of HD radio through the end of July. With some of the prices on the JVC, that will get you right around \$200. I think it's a great deal at that price.

<http://www.ibiquity.com/rebate/index.htm>

-Glen Hale

That's all for this time. We'll let you stare at this old WBBM test pattern for a while. -mike

Thanks to Fritze Prentice, Jeff Kitzko, and Brock Whaley for information appearing elsewhere in this month's column.

Note several applications for new full-license stations this month. Digital permits have been applied for in Colorado, Florida, and Kansas, with the Florida station to be on channel 3. Analog applications are for Colorado, Kansas, Minnesota, Mississippi, and Oregon.

One might expect some of these analog applicants to modify their permits to digital if granted. Also, the permittee for a new full-license station in Memphis has filed to replace their analog permit with a digital one.

Yes, there are permits for two different low-power stations on the same channel (20) in Flagstaff, Arizona. The stations are some distance apart; I would presume they use directional antennas to protect each other...

KDMI-DT is not adding MyNet to a subchannel. This Des Moines station is a standalone digital – with no existing analog signal – and will be running MyNet on their main program.

The filing window for LPTV digital “companion channels” has been rescheduled for the 19th through the 30th of this month. The freeze on LPTV changes and applications for new LPTVs was to run through May 12th; it has been extended to June 30th.

Companion channels will be allotted in Auction #85. Non-commercial LPTVs may bypass auction if they certify the station is owned & operated by a municipality and will be used to transmit only non-commercial, educational programs. However, the proposal must not be mutually-exclusive with any proposal from a commercial LPTV. Certified non-commercial applications that conflict with commercial applications will be returned as unacceptable for filing.

The protected contour of the DTV proposal must overlap the protected contour of the station's existing analog signal. It appears that companion channels above 51 will be acceptable if no 700MHz land-mobile licensees are affected. (however, these channels are still going away at some point, probably early 2009)

Again, this is only for those LPTVs that choose to operate analog and digital facilities simultaneously during the transition. Many LPTVs have already chosen instead to “flash-cut” - to, at some future point, shut off their analog signals and start a digital station on the same channel. You saw many of these applications in last month's *VUD*.

The FCC has released the 2nd round permanent DTV channel designations. Many of these involve

stations whose analog and interim DTV allotments were both “outside core”, or where one was outside core and the other low-band VHF, or both were low-band. Also involved were stations that were too new to receive an interim DTV assignment. And, two new DTV-only stations whose sole assignment is outside core.

* this is a DTV-only station with no analog channel.

Bill Draeb is seeing an announcement on WVCY-30 in which they're attempting to raise funds for their permanent digital transmitter. They're saying that they must have this transmitter on the air by the 30th of this month. Presumably that's when their DTV construction permit expires. WVCY is apparently operating under a special temporary authority for 2.5kw.

What happens if the DTV permit does expire?? Extensions are possible if extenuating circumstances exist, but lack of funds is generally not considered grounds for an extension. (zoning problems, bad weather preventing tower work, failure of suppliers to deliver equipment on time have been accepted. A FM station in Texas recently received an extension because their transmitter site was infested with killer bees!) An extension must be requested before the permit expires; it's very rare for the Commission to "resurrect" an expired permit.

If the permit expires unextended... well, I'm not 100% sure what happens. Definitely the FCC won't protect them from interference beyond the coverage area of the 2.54kw temporary facility. WVCY could presumably get their permit modified to specify the temporary facilities as permanent.

WVCY could take their chances this way. If no other station on or near channel 22 files for a power increase, it could be that WVCY could file for an increase later, once they had the resources to build it.

I don't know if the special temporary authority has any life after the underlying full-power permit expires. It is possible that, if that's allowed to happen, WVCY's authority to operate a DTV station could lapse altogether.

They could continue to operate the analog station on channel 30 until the February 2009 drop-dead date but would then be forced off the air. They could also file for a new DTV permit but if the original permit had expired, the new application would be on the same basis as any other new station applicant – VCY would almost certainly face several competing applications – and FCC action before the 2009 deadline is not likely.

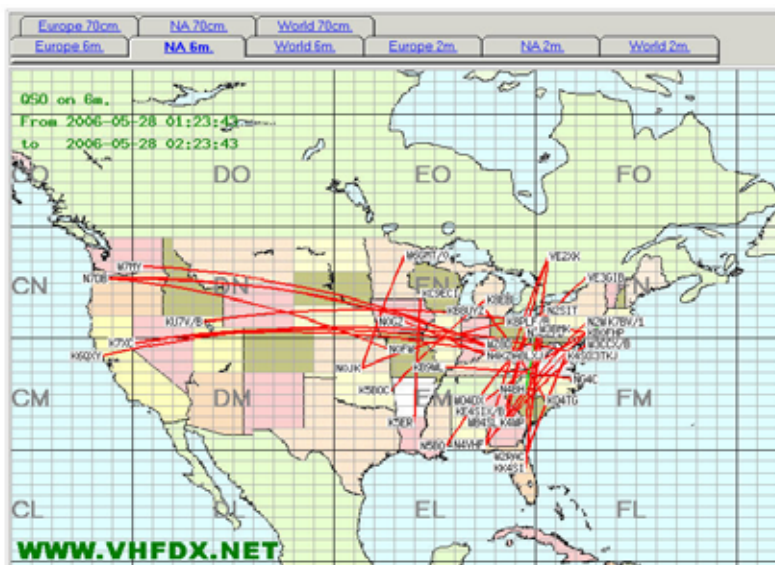

(I also would not rule out the possibility they're simply trying to scare their audience into thinking the station will go away if they don't donate – the possibility that there is in fact no financial crisis and no risk of not completing their 196kw facility.)

Bill also asked about the programming on the channel 61 station licensed to Rochelle, Illinois. (WCHU-LP) Again, this station is actually transmitting from the Sears Tower in Chicago. Last info I had was that WCHU was running a test pattern, but I've since heard rumors of programming without any indication of what kind of programming.

Steve Rich notes that WTTV-DT 48 in the Indianapolis area is currently installing their full-power permanent DTV transmitter. A crew is to install the permanent antenna by the beginning of this month.

I mentioned on the WTFDA Internet list that my local WUXP-DT 21 has added "The Tube", a music-video service on their 30-2 subchannel. John Lentz says WCGV-DT in Milwaukee has done the same, and a press release on the Sinclair website reports many other Sinclair stations are doing the same.

A bit of skip to start the season! Good DX...

including may 2006
JUN 2006

What? You thought just because there was no FM News last month that you would be without May's FM dial changes? Of course not. The following is a two-month combined edition of FM News. Both May and June are included here, separated. Flip ahead seven pages for June. In addition to the double issue, other changes this month include the separation of Canada's and the United States' news. The US will continue to include territories. If your state/province is not included in an issue, assume it simply has no changes for that month. Upon request, I am doing my best to include format changes in here. Please understand that not only is this a major hassle (in addition to the 15+ hours it took to complete this edition alone) but resources aren't always reliable, up-to-date, or in existence. Format changes and call letter changes are typically the most important to a DXer, especially with E-Skip in full swing... and stations sometimes drift toward another format *unofficially* without reporting it. Either way, I'll do my best to throw in anything I see or can find.

You may notice that this month, especially the June news, may contain some double postings and even some contradictions. My apologies. Organizing my raw data was like a stroll through a mine field this month.

For those who have Internet access: FM News has and always will have special formatting. City names are in bold, state/province headings are highlighted, sometimes in colour. The hard copy VUD has never shown this easier-to-read formatting; the online VUD version does. To uphold my formatting, I've had to make the font smaller than it has been in the past. The online version allows for the font to be shown as large as you wish.

INDEX OF ABBREVIATIONS

AF	applied for (a new station)	NS	new station granted
AFA	American Family Association	NW	new station signs on
Aux	Auxiliary antenna (backup)	OSA	one step application granted for change
CC	call letter change	PA	proposed amendment change to FM allocation table
CL	city of license change	PC	power change on the air (> = increase, < = decrease)
CX	a construction permit has been cancelled	PG	power change granted (> = increase, < = decrease)
C1-C5	change in status to that FM license class	PR	power change requested
DA	directional antenna	QC	frequency change occurred
DE	station has been deleted	QG	frequency change granted
FC	format change	QR	frequency change requested
GA	granted amendment to table of FM allocations	RA	silent station returns to the air
GE	granted extension of construction permit	RE	station requests an extension on permit
GX	granted replacement of expired permit	ROA	request of applicant
LC	license to cover filed (ready to come on air)	RX	station requests replacement of expired permit
MC	multiple-city ID	SC	slogan change or update
NC	no change yet on a reported change or permit	SI	station is silent
ND	non-directional antenna	SOA	signed on the air
NO	not on the air	XA	dismissed amendment to FM allocations
		XC	transmitter site change occurred
		XG	transmitter site change granted

Notes (Tennessee)

Tennessee and Kentucky allotment proposals had been dismissed because of a short-spacing between WWTN and WRJL-99.9 in Alabama. WWTN cleared the short-spacing by agreeing to dismiss an application to increase tower height to Class C status, and to remain at their current Class C0 facilities.

Notes (Manitoba and Saskatchewan)

1: The two applications for ethnic stations in Winnipeg were denied on financial grounds, that Winnipeg already has one ethnic station (CKJS 810 AM) and that

cities with similar ethnic populations (Calgary, Edmonton, Ottawa) are just barely able to financially support a single ethnic station.

2: In Moose Jaw, the 103.9 applicant is co-owned with the city's two existing commercial stations CHAB 800 AM and CILG 100.7. The 99.9 applicant is co-owned with two stations in nearby Regina. CRTC felt grant of the 103.9 application would better ensure the continued viability of CHAB and CILG.

The best tropo of the year so far and lucky our
two stations that have IBOC, 92.5 and 102.5, only
3 miles away, had IBOC turned off.

So nice to finally get something else on one of the channels with the KIXY catch above. Now I just have one frequency, 100.5, on which I've only heard my local station, KATT.

The February 2 Es opening to Mexico is one of the most intense I've ever had here. Mexico is quite common in these parts, but this was pretty incredible, with Spanish all over the dial.

From the Editor

Thanks to all who contributed this month. As of this writing folks on the east coast are getting some pretty incredible Es, so some long columns should be in order over the next few months. Now if only that stuff will make it's way west! See y'all next month!

Thanks to Neil Griffin, Danny Ogelthorpe, Doug Smith and Mike Bugaj for helping identify KMPX-DT 30 from Decatur, TX (Dallas). The PSIP only said STARZ. Still no ID on DTV skip but I don't know what else it could be other than KVBC-DT 2 from Las Vegas that lit up the Win TV-D on three boxes on May 20. One "burst" was about 10 seconds, but no PSIP.

Dennis Park Smith

3605 San Remo Drive
 Santa Barbara, CA 93105-2523
 Telephone (805) 687-7803

This report is for April 2006. The winter-season instability continued, with very little tropo conditions along the Southern California coast to San Diego/Tijuana (up to 200mi/320km). From about Apr 27 into early May, however, the Winter rains have stopped with summer-type fog stability setting in, but still no tropo. Maybe no definite atmospheric layering yet, I am guessing, and also, there is not much temperature difference yet which would be helpful (not very warm yet in upper air layers or inland away from the ocean).

Apr 1 am: None (unsettled since Mar 27)
 Apr 1 am – 2 aft: Out of town
 Apr 2 eve – 3 am: Poor (stabilizing)
 Apr 3 eve – 13 am: None (occasional rain)
 Apr 13 eve – 14 am: Fair (brief stability)
 Apr 14 eve – 18 am: None (Apr 14 rain)
 Apr 18 eve – 20: Variably poor (stable again)
 Apr 21 – 30 : None (unsettled; occasional showers)

Best of DX to all, Dennis

Note 1 *Str = SUPER TROPO! I first thought this was previously ID'ed Monterrey, but then I saw the supered ID upper right and my jaw hit the floor! A new tropo distance record, and UHF #500!

The Gulf was wide open the night of April 17th, and Bill Hepburn's maps showed pink from the LA coast down to Veracruz. I'm sure that other 7 XEW was also Las Lajas, but I never saw an ID. It was fading in and out and mixing heavily with XHAB. WPTV-DT was also a shock. I've gotten the analog by Es, but never tropo. I sent the engineer a note, but never got a reply. Didn't see previously logged WXEL-42 or any other E. coast stations, either. Totals up to 756.

So, who turned on the switch? The 2006 Sporadic-E Season seemed to come a bit late, much to everyone's chagrin. As I mentioned last month, 2005, a year of unspectacular conditions, brought the first opening of the Season April 27th. But, this year, the 27th came and went quietly. As April turned into May... still nothing. "Had the Season been cancelled," I often wondered. It wasn't until nearly mid-May – the 11th, to be exact – that the band finally opened up.

Here in Memphis, the first opening of the Season was not unusual. Just like last year, it brought in a few stray signals from the Phoenix area. It did give me a chance to shake out my new toy – the Icom PW-1 amplifier -- putting as much as 1 kilowatt at my fingertips. While I think that kind of power is a bit excessive, it's fun to let it "loaf" at 300 or 400 watts. It gives one a little extra punch, without getting silly. But, Boy Howdy... at 1 kW, folks will hear you!

Despite the late start of the Season, what has followed opening day has been pretty good, really. For me, two new grids were logged on the 14th, with an opening to the north. My first **EN47** contact came at 1716 UTC with KB0QS in Minnesota. Later at 1736, I logged **EN85** with W8KLM in Alpena, MI. While the openings in the following days were fairly routine, I did manage a couple of new grids with QSOs with VE5TLW in **DO70**, Saskatchewan, on the 18th UTC and XE2AT in **DL81** from Mexico on the 20th UTC.

Other WTFDA members have also been working the E-layer. This month we have short 6m reports from Doug Smith, W9WI, in metro-Nashville, and John Tudenham, W0JRP, from Missouri. We hope to hear from other WTFDA members soon, perhaps including the crop of newly-minted New Jersey hams who frequent our lists. Elsewhere across the country, 6 meter operators in the Northeast seem to be doing the best, with very good openings into the Caribbean basin and even Europe in May. May 23rd was particularly intense, with reports of strong North America to Europe contacts popping up all day. It's enough to make one want to move! The West, though, has been pretty quiet so far.

May has been fairly kind for tropo, too. You may have seen some of the jaw-dropping stuff that Randy Zerr, KW4RZ, in Fort Walton Beach, FL has been getting of late along the Gulf Coast. If I lived where Randy does, I am not sure I would ever get any work done! Fortunately, Memphis did get a nice taste of tropo Sunday morning, the 21st. I work up early (too early, really), and was greeted with amazing signals from Florida. After a quick CQ on 144.200, I was surprised to be answered by Sam, KD4ESV, south of Tampa, at 5 or 10 dB over S9. Yikes! I did manage a couple of new 2 meter (144 MHz) grids that I missed in the last big Florida opening. At 1035 UTC, I snagged **EL97** with KG4TBQ; and at 1115 UTC, KI4HRO in Tampa gave me **EL88**. Otherwise, I worked several others from Florida and Texas grids already in the log. Sadly, I had to leave for Sirius® at 8am Central, but other local operators tell me the opening just kept on going. As late as noon, Memphis-area hams were still hearing and working Raphael, XE2OR, in Northern Mexico – that's nearly 800 miles in the middle of the day. Wow. Meanwhile, Randy in Florida was working grids deep into Texas. It was quite an opening.

Contests

With the warm Summer weather and better VHF propagation, there are a few really fun contests coming up. Contests often bring new people to the bands, and often unheard grids – a great way to inch toward VUCC. They are also big fun.

June 10-12. ARRL VHF Contest. This is a HUGE contest. If the E_s heats up, 6 meters will be mass hysteria! Tropo on 2m, too, would create tremendous activity. Check the times and rules at:

<http://www.arrl.org/contests/rules/2006/june-vhf.html>

June 17-18. SMIRK QSO Party. This 6 meter-only contest is sponsored by the Six Meter International Radio Klub (OK, they're hams; they don't have to spell well!). While not as busy as the ARRL contest, the SMIRK contest, too, can be fun if the ionosphere cooperates. Full rules can be found at: www.smirk.org.

June 24-25. ARRL Field Day. For many hams, this is THE BIG ONE. Amateur operators will set up in parks, fields, parking lots, and the like to play with radios, cook out, swill beer, swat flies, get a sunburn, and just generally have a good time. This is an HF and VHF contest, but, many teams have found that the occasionally-neglected VHF frequencies can bring much-needed points. Good conditions bring lots of stations on VHF, often from interesting places. Even if you're not a ham, anyone interested in radio is welcome at Field Day sites. Stop by and meet local hams; they'll try to recruit you! Full rules are at:

<http://www.arrl.org/contests/rules/2006/rules-fd-2006.html>

Loggings

**Doug Smith, W9WI⁴, 1389 Old Clarksville Pike, Pleasant View, TN 37146
EM66**

- 5/20 ~1500z: While waiting for my roommate in front of the Guest Quarters Suites in Miamisburg, Ohio, (EM79 just south of Dayton) managed to work NL7AU/4 in the Florida Keys from the 6m mobile. He promptly faded & W9TOC had to settle for a 6m QSO with a local Hamvention attendee.<grin>

- 5/21:

2212z: AA1QD, FN43, New Hampshire

2226z: VE2TKH, FN36, Quebec

2233z: W2MJN, Warwick NY

2301z: VE1SKY, Digby NS

The first three on CW, the latter on SSB. The location for all four was mobile between Auburn and Guthrie, Kentucky (EM66). Checked for FM BCB skip, none noted. Mobile station is the same one depicted in the photo in the May VUD, using the Hamstick antenna on the driver's side.

John Tudenham, W0JRP, 2824 Missouri, Joplin, MO 64804 EM27

Finally caught a brief 6 meter E opening.

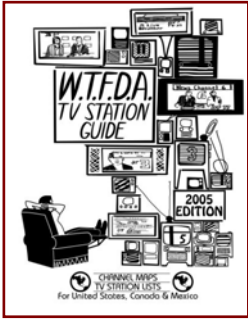

Around 1900 UTC W0JRP EM27 worked the following:

W2MMB NJ FM29

KF4PPF VA FM18

WA8LXJ EM88

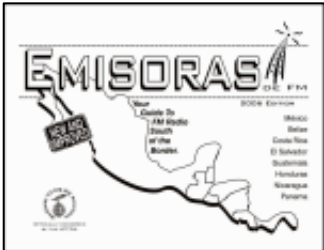

A GREAT COMBINATION FOR 2006!

WTFDA TV STATION GUIDE

To order your copy of the 2005 WTFDA TV Station Guide, send a check or a money order for **\$20.00** payable to WTFDA and send it to John Ebeling, 9209 Vincent Avenue S., Bloomington, MN 55431-2157 **STILL IN STOCK! GET YOURS NOW!**

(Yes, you can use Paypal. From the Paypal website, click on *send money* and send \$20 to mbugaj@snet.net.)

NEW!!! Emisoras de FM

To order your copy of the 2006 WTFDA Mexican/Central American FM Directory, send a check or money order for **\$16.50** payable to WTFDA and send it to Keith McGinnis, 6 Ritter Rd., Hingham, MA 02043. (For Paypal orders, send \$17.50 to mbugaj@snet.net. Use the comment box for any instructions.)

TELEVISION'S PIRATES: HIDING BEHIND YOUR PICTURE TUBE

BY BOB COOPER

What is a Television Pirate?

By Oxford definition, a pirate is "a person who infringes another's copyright or other business rights" and/or "someone who broadcasts without official authorization." Television programming carries copyright, television stations travel a years-long pathway seeking "official authorization" before broadcasting. Alas, not every television station has waited for, nor even sought, authorization, and it goes without saying, contacting those who's copyright might be violated by their transmissions. Many figures in recent history (Winston Churchill) met our definition.

Tens of thousand have been driven by their intense desire to have, for their own, access to television. Cable TV began as piracy. Satellite TV was driven by rampant piracy. And now the Internet is spooked by those who would "broadcast" with authorization. This is their story.

ORDER YOUR 928 PAGE COPY FROM BOB RIGHT NOW!

Send your check or money order for \$20 (payable to WTFDA) to WTFDA, P.O. Box 501, Somersville, CT 06072. **US ORDERS ONLY. ORDERS OUTSIDE USA PLEASE EMAIL US FOR POSTAL RATES BEFORE ORDERING.**

Paypal order are also accepted. Send \$21.50 (to cover Paypal fees, etc.) To mbugaj@snet.net. **ORDERS OUTSIDE THE USA PLEASE EMAIL US FOR SHIPPING!**
