

Vhf-Uhf DIGEST

The Official Publication of the Worldwide TV-FM DX Association

OCTOBER 2006

The Magazine for TV and FM DXers

He's Ready For Trop!
Roy Barstow's Crowded Roof
THINK TROPO!

68 PAGES!

TV and FM DXing was never so much fun!

THE WORLDWIDE TV-FM DX ASSOCIATION

Serving the UHF-VHF Enthusiast

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, GREG CONIGLIO, BRUCE HALL, KEITH MCGINNIS AND MIKE BUGAJ.

Editor and publisher: Mike Bugaj
Treasurer: Keith McGinnis Webmaster: **Tim McVey**
wtfda.info Site Administrator: **Chris Cervantez**
Editorial Staff: Dave Williams, George W. Jensen, Jeff Kruszka
Keith McGinnis, Fred Nordquist, Nick Langan, Doug Smith,
Chris Kadlec, Peter Baskind and John Zondlo,
Our website: www.anarc.org/wtfda Our forums: www.wtfda.info

OCTOBER 2006

Finally! For those of you online with an email address, we now offer a quick, convenient and secure way to join or renew your membership in the WTFDA from our page at:

<http://fmdx.usclargo.com/join.html>

Dues are \$25 if paid to our Paypal account. But of course you can always renew by check or money order for the usual price of just \$24. Either way, it's still a bargain!

VUDS ON A CD!

Every VUD from Jan 1980 to December 1989 is on this disk. You'll need Adobe Reader to read them. Why have a box of old VUDs taking up space when you can have this. **It's yours for just \$8.00 per disk.** Send your check or money order for \$8.00 to WTFDA, P.O. 501, Somersville, CT 06072. Make it payable to **WTFDA.**

68 BIG PAGES!

And now... eVUDS ON CD!

All eVUDs from 09/01 through 12/05 are on this disc (except 8/02 which was not published). Follow the changes from day one to the present form. **You can have it for just \$6.00** (\$5.00 plus a dollar shipping). Use the same address as for VUDs on CD shown on the opposite column. Have a great month!

NEW!!! Emisoras de FM

BY JIM THOMAS

Everything you needed to know about FM radio South of the Border!

To order your copy of the 2006 WTFDA Mexican/ Central American FM Directory, send a check or money order for **\$16.50** payable to WTFDA and send it to Keith McGinnis, 6 Ritter Rd., Hingham, MA 02043. (For Paypal orders, send \$17.50 to mbugaj@snet.net. Use the comment box for any instructions.)

See much more at
<http://fmdx.usclargo.com/emisorasdefm/>

The Mailbox

P.O. Box 501, Somersville, CT USA 06072
MIKE BUGAJ MBUGAJ@SNET.NET

FORGET ABOUT IT!

Yes, I guess we all can forget about E skip for a while. Those of us who live in eastern North America can concentrate on tropo for the time being.

Gasoline prices are beginning to drop and so are the daytime temperatures, and by the time you receive this, it'll be autumn.

As I type this (9/18), the northeast is experiencing trop to the Canadian Maritimes and DXers in the midwest are listening to tropo in the pouring rain while a cool front makes its way to the south. This is a great time of the year for tropo so be on the lookout for it!

MEMBERS AND MORE

This month we welcome **Al Putman** to the WTFDA. Al lives in St.Thomas, ON and was introduced to the club by **Rob Ross**. We're glad to have you here, Al!

We are now well past the peak mail months at PO Box 501. This month we have renewals from **FJ Issard** (ON), **Wolfgang Schneider** (CA), **Dennis Park Smith** (CA), **John Callarman** (TX), **Scott Fybush** (NY), **Roosevelt Crawford** (KS), **Bob Seaman** (PA), **Rich Wertman** (NY), **John Hourigan** (OH), **Chris Kadlec** (WI), **Larry Weil** (NH), **Bill Smith** (MA), and myself (no I don't get this for free!). That's this month's short list. Let us all thank each other for going another year!

DIGITAL SET TOP BOX DEAL!!

I have acquired approx 24 RCA ASTC-11 HDTV boxes. New in box – not refurb. Asking \$109.99 each or 2-5 99.95 each + shipping.

Also 1 C.M. Stereo Probe FM antenna 3025. Asking \$150.00 + shipping. Also: Rohn 25AG top tower sections approx 10 pieces. Call or e-mail for price.

Rich Wertman
Lockport, NY

rwantsat@verizon.net

GOT SOMETHING TO SELL?

If you're a WTFDA member and you have something to sell or trade, you can do it right here. It doesn't cost anything but a few minutes of your time and everyone in the club will see it. Just tell us and we'll give you space in the VUD.

THIS MONTH'S COVER

Our cover this month comes from Roy Barstow. It's such a joy to see a roof covered completely with antennas, and Roy has that roof. I thank Roy for the photos! I think we all realize that you can never, ever have too many antennas on your roof.

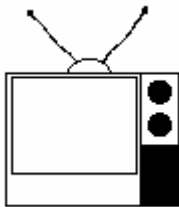

Now I have another photo of a pretty girl helping with an antenna installation. Someone here knows who it is, so maybe I'll run that picture next month. Stay tuned!

Isn't this a nice looking decal from Sao Paulo, Brazil? If you would like to trade these with a Brazilian Dixer, write him a note. His name is Jose Moura and he lives at Caixa Postal 42.423, Sao Paulo – SP, 04218-970, Brazil. He'd love to swap with you (and he has great handwriting!)

Well, after doing a four page Mailbox last month, I hope you folks don't mind if I just coast along with one page this month. We finished August with 248 members, up one from July; one small step in the right direction.

Be good and we'll see you next month!

Thanks to Jeff Kadet, Bill Draeb, Peter Baskind, and David Sinclair for information appearing elsewhere in this month's column.

The CW and My networks have now launched. I'll see if I can get affiliate lists typed up. Many of these networks' affiliates are on DTV subchannels of major-network affiliates.

Many of the LPTV applications for digital companion channels (AF DCC) are appearing this month. I expect many more next time. Again, these are digital low-power stations that will simulcast the associated analog LPTV. At the end of transition, the LPTV station will have to surrender either its current analog channel or its digital companion channel.

Note three new stations granted. (ch. 22 in Topeka; ch. 51 in Jackson, Miss.; and ch. 49 in Osage Beach, Mo., near Springfield) All three were granted as analog stations but I'd bet one or more will modify their permit for digital operation before going on the air.

Note also a new station (WBSF-46) on the air in Bay City, Mich.. This station did go on the air as analog. It will have to eventually flash-cut to digital operation on the same channel.

KTFL, channel 4 in Flagstaff, Ariz. has been deleted. Presumably this was at the request of the licensee. The license wouldn't have expired until the first of this month. I'm not aware of any enforcement proceedings against KTFL, and if any violations were outstanding that were severe enough to result in revocation of license, we'd have heard about them! As I read it, this deletion also affects the KTFL-DT permit on channel 18.

Speaking of channel 46 in Michigan... Bill noted a mystery channel 46 with WOOD-8 programming. He wrote WOOD and got a reply from their Director of Engineering that it was translator W46DD, 8 miles from Muskegon. There is no W46DD in the FCC Database.

However, I found several references on the Internet (especially on Michiguide.com) to such a translator. Included were links to FCC CDBS data on this station. (how they found it I have no idea, as I tried to find this in CDBS without success...)

W46DD is licensed under special temporary

authority. The FCC is not very good at reporting STAs.. WOOD has had serious problems in western parts of their coverage area with interference from WMVS-DT on the same channel across the lake in Milwaukee. Rumor has it W46DD is an answer to this interference.

Robert noted W09CG Findlay, Ohio apparently missing in mid-September. He suspects it was "bounced" by WLIO-DT on channel 8 – certainly possible. It has an application on file to move to channel 51.

He also asks a question about DTV power levels:

"I notice browsing the database that a lot of UHF DTVs are exactly 200 kW. Is this some kind of standard for a certain class of DTVS?"

Originally 200kw was the maximum power allowable for a UHF DTV. Fearing that wouldn't be enough to replicate the coverage of the analog, stations successfully petitioned for an increase in the limit to 1000kw.

However, stations didn't automatically get that increase; they had to file for "maximization", an increase in power from that originally assigned by the FCC's software. For that petition to succeed the station had to show there would be no interference with existing analogs or authorized digitals.

Often this required an expensive directional antenna, so some stations didn't bother. (probably also in cases where all they wanted was to get enough signal over the headend to be guaranteed carriage on cable...)

"Just how hard would it be for a DTV with less than the maximum 1000 kW to upgrade to full power in the future?"

It depends...

From a technical standpoint... an increase at a VHF station might be as simple as adding power modules to an existing transmitter. It could also be as difficult as completely replacing the transmitter, antenna, feedline, and tower. For the most part it depends on how powerful the smaller interim facility was built; also, on how well the tower was built.

From a regulatory standpoint... it depends on what other DTV stations are on the same or adjacent channels. After analog stations go away, DTV upgrades that aren't possible now may become possible; also, as a lot of DTV stations are moving to new channels after transition, upgrades may become possible.

"Also, considering markets where the stations have historically transmitted from widely seperated transmitter sites, e.g. WOOD and WWMT... (one southeast of Grand Rapids and the other north of town) Could WZZM eventually move their DTV to the Gun Lake tower farm if they found a channel where it would fit?"

Yes. The regulations are essentially the same as for analog: you must put a city-grade signal across your city-of-license, and you must not interfere with any other existing station. It might indeed be easier for digital, since the definition of a "city-grade" signal is a lot looser for DTV. A site that might be too far from the official city-of-license for analog may be close enough for digital.

WTFDA FM NEWS

Bringing you the most recent FM changes in the U.S. and Canada!

CHRIS KADLEC, EDITOR
3860 SHOREWOOD DR.
FREMONT, MI 49412-9604
beaglebass@beaglebass.com
www.beaglebass.com/dx_index.htm

OCT 2006

Featured this month: In last month's column, all *auxiliary transmitter* (aux) changes were moved to the end of the column. This will be a permanent change for FM News, so if you have interest in such changes, don't forget to take a quick look at the end of this column. Also this month is a full batch of *format changes* thanks to Bruce and Doug – a full thirty of them this month, which is the most in FM News in over a year. A backlog of *Canadian station changes* has snuck into this month's column, but please don't ask me which change comes first and what the current status of these stations are, because darn it, I haven't the slightest idea. And with the little extra boost of motivation I momentarily have, I have managed to throw in the latest FM ratings for the top six market areas. As always, popular *AM stations* manage to dominate the radio market in Chicago – WBBM, WGN, and WLS are all within the top 5 in the market area. However, this is *FM News*, isn't it? Of special interest this month: check out the *Oregon mess*, which includes a massive failed proposal based in Paisley, a multiple-station counterproposal in Athena and another in Monument. Most states, provinces, and even territories (listed under the United States) are included with *changes* – a full 220 more changes than September's FM News.

SUMMER 2006 FM RATINGS – Arbitron/BBM

#1 New York

WLTW 106.7	AC "Lite FM"	5.8
WSKQ 97.9	Tropical "La Mega"	5.7

INDEX OF ABBREVIATIONS

AF	applied for (a new station)
AFA	American Family Association
Aux	Auxiliary antenna (backup)
CC	call letter change
CL	city of license change
CX	a construction permit has been cancelled
C1-C5	change in status to that FM license class
DA	directional antenna
DE	station has been deleted
FC	format change
GA	granted amendment to table of FM allocations
GE	granted extension of construction permit
GX	granted replacement of expired permit
LC	license to cover filed (ready to come on air)
MC	multiple-city ID
NC	no change yet on a reported change or permit
ND	non-directional antenna
NO	not on the air

NS	new station granted
NW	new station signs on
OSA	one step application granted for change
PA	proposed amendment change to FM allocation table
PC	power change on the air (> = increase, < = decrease)
PG	power change granted (> = increase, < = decrease)
PR	power change requested
QC	frequency change occurred
QG	frequency change granted
QR	frequency change requested
RA	silent station returns to the air
RE	station requests an extension on permit
ROA	request of applicant
RX	station requests replacement of expired permit
SC	slogan change or update
SI	station is silent
SOA	signed on the air
XA	dismissed amendment to FM allocations
XC	transmitter site change occurred
XG	transmitter site change granted

October 2006

EVEN BETTER IN **COLOR!** CHECK OUT THE eVUD

Okay, it's time once again to feature yours truly. It's been a very active summer of E-skip for me, with some decent tropo mixed in as well. Hope you enjoy!

And now here's a way to clean up those grainy ID photos off your VCR tapes. It's a new freeware program called **DScaler** (<http://deinterlace.sourceforge.net/>). Designed as a "deinterlacer", it takes video input from a DVD player, VCR, game console, laserdisc, etc. and removes noise and artifacts to produce a superior image on your PC. A European DXer discovered this and also found that its noise reduction filter could be used to improve even poor DX images. Of course, you will need a video tuner/capture card such as the WinTV or ATI cards. I downloaded it and it automatically picked up my WinTV-D settings and assigned that as the source input. Then all I had to do was tweak the filter settings and I was in business! I can even watch live TV with it! If anybody has any questions, email me.

Now here's a couple of before and after photos. In this first photo of a newscast from WTOM-4, notice how much more detail comes out in the 2nd photo. The lady's lapels on her jacket are now visible, as well as more detail in her face and hair.

WTOM-4 Cheboygan, MI

E-skip gave way to trop as the month of August wore on; it went out with a bang on August 4 with one last opening to the west. The August 6 opening brought a much-wanted station in WTIU-DT 14; the station has three sub-channels; one for HDTV programming, the second as a simulcast of WTIU analog 30, and the third for instructional videos (IDing as "WTIU-2"). I also pulled in WNDY-DT 32 for my fourth from the Indianapolis area, and WICD-DT 41 for my first DTV from Champaign. The next night brought several analog stations from Sioux City; I came close to, but couldn't get any picture from, KPTH-DT 49. Des Moines was also in, along with WGEM-DT 54. The opening of August 9 was interesting because the only TV station logged west of the Columbia/Jefferson City area was KOAM 7. August 15 brought in television stations from Huntsville; but the signals were too weak to attempt to pull in DTV signals from the area. August 17 brought in stations from Illinois, Indiana and Kentucky; I managed to log a new one in WMYO-DT 51 (even with local KUMO-LP on the air). One lone Ohio station made it in: WSTR 64. WNIN 9 made it through local KETC, although I couldn't pull in WNIN-DT on channel 12. August 24 brought two new South Bend DTV signals in WNDU-DT 42 (even with WICS-DT on) and WHME-DT 48. Only the text was seen through local WRBU analog on 46; the DT signal was in for a few seconds at a time. On August 26, I finally logged KFVS-DT 57, even with local KMOV-DT on channel 56. On the local front, KPLR-DT 26 has added a second sub-channel, carrying the music video channel "The Tube". As of September 1, 2006, the total stands at 524, including 35 DTV signals. 73 and good DX, Eric (NØUIH)

Jeff Kruszka

Note 1 – Finally caught video on this one after only getting the PSIP a couple of times. See the photo in Photo News!

Note 2 – local LPTV off briefly; TBN underneath to west, must be New Iberia moved from ch. 49.

The Es season was over too fast! It was just getting fun. Oh well, now on to fall tropo!

I thought I had a new local in KMEG-14 as it was in with a good signal for several days. It is not uncommon to see, but I have never had it in so long. No new ones and no decent distance this time.

Dennis Park Smith

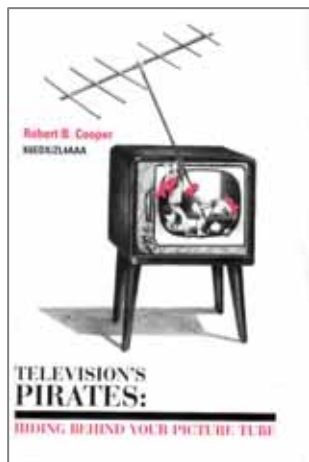

3605 San Remo Drive
Santa Barbara, CA 93105-2523
Telephone (805) 687-7803

This report is for August 2006. The cool temperatures along the ocean vicinity and hot inland continued steadily for much of the time, and so did Southern California tropo on TV-FM to San Diego/Tijuana up to 200mi/320km on my indoor whip and bow-tie Variations at times may not have been due to unsettled weather but rather variations in the elevation of the air-layer boundary. For example, the apparent Aug-9 peak may have been a lower-than-average boundary, closer to my elevation of approximately 250 feet.

Jul apx 27 – Aug 2: None
Aug 3-7: Poor
Aug 8 am: Fair
Aug 8 eve: Good
Aug 9: Very good (VHF almost excellent)
Aug 10-11: Good
Aug 12-15: Fair
Aug 16: Poor
Aug 17-20: Variably poor to fair
Aug 21-31: Good (and into September)

Best of DX to all, Dennis

The Editor's Note

Hello there! Well, things quieted down in the Eastern DX world as we moved into September, with a lot less tropo than we would have hoped for. In the past couple weeks though, things have grown a bit more busy trop opening wise, so let's hope this is a precursor to an active Fall!

Despite the overall quiet period, we have a couple of reports to see from Saul Chernos and Robert Grant, so let's get to it.

Saul Chernos 57 Berkeley St. Toronto Ontario M5A 2W5

Says Saul: "July 15 had Es with CCI briefly to 9, but noting ID'able. Only the second time in close to 30 years that Es has been noted this high in the band. Last time, two years ago, actually logged Alabama on 8 and had CCI to 13. Stuff like this is truly exciting."

Overall, lots of skip activity on TV this year. I would have appreciated some skip from the Maritimes, which does not happen often. I have never logged NF on TV, for example (I have had it a few times on FM). Tropo has been quite dry this year for TV."

Says Robert: "Trop did this year what skip had been doing the past several years (before this year), showing promise early on, then ending prematurely. Before leaving, however, it did take a turn for the weird, usually with very selective paths and favoring some channels over others. The 8/17 opening was almost strictly a VHF opening. KCRG came in with no sign of any other stations in that direction (Chicago came in a few hours later). When I noticed another minus offset station on 7 under WXYZ, I was "hoping" to ID it as Evansville. When I saw "Little Rock" in the image, I still thought it was Evansville, then looked at the database and realized WTVW was not a minus, I stuck with it and eventually saw the callsign KATV, my longest trop logging from any of my Dxing locales. KARK was discovered later. It had been in earlier, but I mistook it for WTTV, zero-offset, seen under WDIV almost every night in August. WTTV and KARK were both under WDIV, and KARK was stronger, even though they were in almost exactly (3 degs off) the same direction.

The opening that brought in WQAD and WDBJ was just as fickle. It was a little disappointing, however, when my GPS revealed that Roanoke was a lot closer than I would have guessed."

E-skip gave way to trop as the month of August went on; the opening of August 6 allowed me to hear WPCD for only the second time at this QTH. The directional pattern of WSIE is directed away from my QTH to protect KUMR 88.5 and KJLU 88.9, so I was able to reduce the signal enough to hear WPCD. WAZY 96.5 was also heard for only the second time at this location. The August 8 opening allowed me to log WVMG; the frequency was once occupied by a relay for WBNH 88.5 Pekin, IL. Illinois is, by far, my most productive DX state, with 163 heard from the Land of Lincoln. August 12 brought a new log through the digital sideband of KPNT 105.7; I was able to pull in KILJ 105.5 for a new Iowa station, number 43 from the Hawkeye State. The August 15 opening was primarily to the south into Alabama and Mississippi; pulling in WFTA 101.9 for my sixth station from the Magnolia State. August 17 brought a new Louisville station to the log in WVEZ 106.9; the 29th Kentuckian heard. Four new stations were added in the August 24 opening, including much-wanted WRIK 98.3. WIVR 101.7 was a big surprise with semi-local KLPW nulled; WUBU 106.3 also made it in, with WARH operating in analog format. WHIT 103.7 was another surprise for my tenth Michigander in the logbook. KYKY 98.1 and WARH 106.5 have turned off their digital exciters, at least temporarily, allowing DX to make it through on the adjacent channels. As of September 1, 2006, the total number of FM stations heard is 949. 73 and good DX, Eric (NØUIH)

The highlight of the season simply has to be logging KHPA 104.9 in Hope AR, via tropo, at an initial estimate of 1038 miles, on Aug 17 from my Snowball DX site just n.w. of Toronto. This beats my old record of 955, which was York NE, also on 104.9 and also at from the same DX site. Oddly, this was my only log, and it occurred on my car radio as I was arriving. It lasted for at least six minutes, and I checked other frequencies to no avail. Signal was fairly weak but clearly audible and easy to ID. This lone logging completely turns around what otherwise would be the absolute worst tropo season ever in close to 30 years of FM DXing. I have otherwise not logged a single FM station over 500 miles so far this year!

The Perseids, in my mind, were close to a dud, compared with what they have been the past few seasons. No hugely intense storming, and frequent periods where there was barely any activity at all.

NOTE 1: Aug 11 Perseids on 104.9 had a long burst promoting an event – the 11th annual something-or-other Fry, somehow affiliated with Princeton Football, on Friday Night Aug 18, at a County Fairgrounds, tickets possibly cost \$12 and available from any Band Booster, Sports Complex member, or station personnel. Possible mention of Grant Center Foods. I called WAVJ Princeton KY, but this is not them.

NOTE 2: Aug 13 Persieds on 107.3 had separate bursts mentioning “Brimley Healthcare of Arlin/Armin (Arlington?) ... for 30 years.” And, a few minutes later, “Jackson Street in Benton, Herman Street in Marion.”

John Jefferson

826 23rd St SE Box 203

Auburn, WA 98071-0203

Equipment: McIntosh MR80 tuner w/ 14 element antenna 15ft AGL (home)

It's been interesting reading about the great skip season. And I did get some of the fun, but mainly because I visited the Bend OR area in July. Either all of the excitement stopped short of the Puget Sound area, or it all happened while I was at work, as the following Auburn report should amply demonstrate. Since 2002 I've made Chinook Pass (about 45 miles

SE of here) & vicinity my alternate DX site here in the Puget Sound area. It provides an escape from the asininity of IBOC, which now has polluted 37 channels here. There the standard gear now is a good Pioneer radio. (That is also the equipment used at Paulina Peak, near Bend, which I've also designated now as an alternate site. I've visited it several times since 1993, since its 7984' elevation gives both a spectacular view and interesting DX'ing, even if there isn't skip. If I ever retire, I might move to that area - not to Bend itself, with its high-powered xmitters a mile or two west of town. Maybe Redmond, that now-famous hotbed for 2-hop ES.)

A road trip to Vancouver Island in May was fairly interesting! What follows was all done with the Pioneer car radio. And the Pioneer was then in my old '94 Sentra, with somewhat noisy ignition even with the engine off. (That was true also of all Paulina Peak loggings except the August catches, at which time the Pioneer had been transplanted to my new Honda Pilot.)

Definitely a place to check out if you visit the west coast of Vancouver Island. Radar Hill is the highest point along the coast between Tofino (some 5 miles north at the end of the road) and Ucluelet. There are only a few locals to contend with. Alas, one is on 102.7, where KYTE Newport OR is. With 64800 watts, they would be an easy catch on an open channel (KNCU is 3800 watts at about the same height). Another is on 107.3, which prevents one from fishing for KACW 107.3 North Bend. KACW has the Coos Bay market's most reliable signal at Cape Falcon, OR (165 miles north of Coos Bay), so would be an intriguing target on a good day. Vancouver and Victoria BC, by the way, are in and out due to the mountainous terrain, so aren't significant problems.

Eight stations from 1530 miles and up at Paulina Peak. In seven years here in Auburn, I have three from 1515 miles (and #4 for distance here is 1466 miles). And 1340 miles was the best in this year of the 2-hop. That's why I've made a formal log for Paulina Peak: that's just too much good stuff to have it submerged in the 5200+ entries on the master log! The trop catches from Spokane, this area, and Boise aren't too shabby, either, for using a car FM with whip antenna. Please note that KING 98.1 is adjacent to KTWS 98.3 Bend, 25 miles away, yet was clear! I've heard KTWS here (17 miles from KING), but only with my rooftop antenna and the MR-80's super adjacent-channel selectivity. If you visit the Bend area, I strongly recommend a drive up Paulina Peak (vehicle permitting: the 4-mile gravel road is off limits for vehicles over 25' or pulling a trailer, and the descent requires good brakes and a reliable low gear).

A note regarding WISG Fishers IN. The reference to Medford Shopping Center was not slopover from KTMT Medford OR on 93.7. The speaker didn't sound like a pop station's DJ, but somewhat older & more like a minister or suchlike. WISG couldn't confirm the reference for me, likely because it was a casual aside. But there are only three Medford Shopping Centers to be found via the internet – in Medford OR (which has no 93.9), in Medford MA (likewise), and in Carmel IN, next door to Fishers. And Dave Williams, from Redmond OR, had loggings from Vernon IN, Bowling Green OH, and Toledo OH in the same timeframe, neatly bracketing the Indianapolis market. So I feel the evidence strongly supports the logging of WISG, amazing as it is to have heard a 3000-watt station at that distance with a whip antenna.

Numerous other relogs to all of Atlantic Canada. While not as long as last October's opening it was just as strong.

CAR-BASED IPODS THREATEN TERRESTRIAL AND SATELLITE RADIO LISTENING

Competition for in-car radio listeners just got stiffer as Apple Computer has closed a deal with Ford, GM and Mazda to put iPods docks in their new vehicles.

Apple's new agreement with the car manufacturers means that by 2007, up to 70% of U.S. autos will have seamless iPod integration. GM sees potential in using the iPod as a marketing tool to attract younger consumers, and sales of iPods are expected to double by 2009. Sirius has made deals with Ford and Toyota in the past, but the proliferation of in-car iPods could create some serious competition between satellite radio and Apple.

While more in-car entertainment options takes away from both terrestrial and satellite radio, Jim Cramer of Real Money Radio says Sirius, in particular, is depending on the automobile industry for much of its growth business and could face a real challenge if new car buyers consider their personal iPod, which can hold the equivalent of thousands of CDs, sufficient for their in-car listening.

13th ANNUAL MADISON-MILWAUKEE DX GTG

Any DXer who thinks that thirteen is an unlucky number has never attended a Madison-Milwaukee DX Get-together, and certainly not the one just concluded.

The 13th annual Madison-Milwaukee Get-together for DXers and Radio Enthusiasts took place on Saturday, August 19, 2006, beginning at (of course) 1300 Central Daylight Time.

For those of you not familiar with the Madison-Milwaukee, it is a one-day, regional, all-band event for DXers that has been held every third Saturday in August since 1994. The first ten GTGs were held in Madison, Wisconsin, with Bill Dvorak and Tim Noonan alternating as hosts. After Tim moved to the Milwaukee area three years ago, the practice of alternating sites between Madison and Milwaukee began. This year's GTG was the second event held in the Milwaukee area.

Every year this event grows, both in number of attendees and in quality of the event itself. The first GTG had only eight attendees, and for the first several years until our growth took off, numbers remained in the teens. In contrast, attendance has topped 25 attendees a year for each of the past five years. Long gone are the days when we could hold it in someone's apartment or small house, and the challenge to find the proper venue has been a big one indeed. The previous two events were held in parks: in 2004 at Sheridan Park in Cudahy WI and last year at Burrows Park in Madison WI.

Conversation at Kaz's house

This year was another year of development for the Madison-Milwaukee. The site of this year's event was the northern home of Neil and Laura Kazaross near Grafton, Wisconsin, or about 20 miles north of Milwaukee. Tim Noonan did his usual outstanding job of organizing the Get-together, while Kaz and Laura were the event's hosts.

Unlucky 13? We were very fortunate to have such a beautiful facility to hold this year's event at, and such gracious hosts. Kaz's property is on a bluff overlooking Lake Michigan, and the view is spectacular! The property itself consists of both open lawn and wooded area, and there is plenty of room to put up antennas, or just to take a long pleasant walk. The house is both spacious and cozy, Kaz and Laura made all attendees feel so very welcome, and everyone at the GTG immediately felt at home.

If 13 were an unlucky number, we would have been up to our knees in bad weather. The day was cloudy, but the rains held off nicely. The temperatures were very comfortable, and there was no wind to speak of. Best of all, in the late afternoon when it was time to take the group pictures, the sun came out and smiled down on all attendees. The golden sun was our pot of gold!

The 13th Madison-Milwaukee will also long be remembered as the year the Get-together went international! We were honored by the presence of world-famous shortwave DXer Victor Goonetilleike from Sri Lanka! He was in the state to visit his son, who attends University of Wisconsin-Green Bay. Victor had seen publication for our event, and was kind enough to time his trip to coincide with our GTG. The meeting between him and another famous shortwave DXer, Gerry Dexter of Lake Geneva WI, was a first for the two of them.

Sri Lanka's Victor Goonetilleike, shown with Tim Noonan

This year's dinner was held at the Charcoal Grill in downtown Grafton. There we had exclusive use of an outside patio area. The sun was by now beginning its descent to the horizon, and the weather, the good service of the wait staff, the great food and pleasant company all made for an enjoyable dining experience.

After dinner came the door prizes. Once again this year, Universal Radio provided us with a good selection of radio related give-aways. Victor also brought some souvenirs from Sri Lanka (lucky charms, what else!), which became lucky possessions of the lucky winners!

For the evening session, we returned to Kaz and Laura's. There Kaz set up a demonstration of a Beverage on Ground (BOG) AM antenna. This one measured a monstrous 893 feet! Those that listened in were very impressed with the catches that the BOG pulled in.

There was a very light touch of cool weather in the air, but it only made the scene more pleasant. It was a cloudless night, and the stars twinkled in the sky. The 13th annual Madison-Milwaukee came to an end with attendees exchanging best wishes and promising to meet again next year.

Oh, by the way, attendance this year was 31 DXers. Let's see, 31 is 13 backwards, just like lucky is the opposite of unlucky!

Once again this year, participation by WTFDA members was outstanding! Ten members attended. They are pictured in the accompanying photo. Shown left-to-right: former long-time member Mike Condon (WI), Neil Kazaross (IL/WI), Bill Eckberg (IL), Marv Shults (IL), George Greene (OH), Frank Merrill (IL), John Lentz (WI), Bill Dvorak (WI), and Chris Kadlec (MI). Not pictured: Bill Draeb (WI), Ken Onyschuk (IL).

WTFDA members pose for a photo

Other attendees (all from WI except where noted): Jim Albrecht, Erik Berntsen, Bob Brossell, Dave DeRosier, Gerry Dexter, Jennifer Enright-Ford, Karl Forth (IL), Victor Goonetilleke (Sri Lanka), Mike Henke, Lester Kleidon (IL), Peggy Leifert (IL), Kevin McGill, Craig Menning, John Meyer, Kevin Mikell (IL), Tim Noonan, Mike Piering, Daniel Sampson, Mark Taylor, Roger Winsor (IN).

One of the things that makes this event special is that it draws together a great group of DXers with varying interests. Once again this year, we took pride in accomplishing what we strive for each year--to promote good will among and provide a good time for DXers. The Madison-Milwaukee is at its heart a social event. The DX talk and camaraderie, the exchange of ideas, the old friendships renewed and the new friendships made, in other words, those elements that make an event such as this such an enjoyable experience, were there for all to take. Thanks go to all those who attended!

The 14th annual Madison-Milwaukee Get-together for DXers and Radio Enthusiasts will be held on Saturday, August 18, 2007. The event returns to the Madison area, with Bill and Nina Dvorak as hosts. For more information, please contact Bill at dxerak@aol.com. We hope to see you next year!

MORE WTFDA Convention 2006: Tower tours

Many WTFDA members are interested in both kinds of DX – both FM and AM. That was a good thing at the 2006 Convention, as amplitude modulation trumped frequency modulation at the tower tours! I think it just happened to shake out that way; in any case, most interesting FM sites are in Manhattan where travel and parking are quite a bit more difficult, and with recent security scares one wonders if it would be possible to get into the normally-closed areas of the Empire State Building where the transmitters are.

On Friday afternoon, Scott Fybush arranged a tour of Clear Channel's northwest New Jersey facility in Newton. Chief Engineer Tony DeNicola (aka "Tony Dee", during his WNNJ-AM airshift) met us at the studios/offices. The facility is responsible for FM stations WSUS 102.3, WNNJ-FM 103.7, and WHCY 106.3, and AM station WNNJ 1360. As is the case at most stations these days, almost everything airs from computer. All four stations' studios, and several production rooms, share common storage. Tony was very proud of his wiring job; most of us (especially those of us who've worked in engineering) were in awe! We also received a detailed tour of each studio – and some excellent promo swag.

The abandoned WNNJ-1360/103.7 studio and transmitter building. There's a bunch of dead & obsolete stuff in here, and a bunch of bumper stickers.

you might expect at a radio station that was on the air in the 1970s, there were the obligatory doors covered in bumper stickers. I thought I knew my old radio stations, but about 10% of these stickers I couldn't identify...

Saturday noon we met Scott again at a motel in the Meadowlands, just across from Manhattan. Our first destination was a construction site, where we were to meet Tom Ray, quite possibly one of the most hated men in DXdom<grin>.¹ Tom's WOR-710 is losing its existing site to the construction, and he was there making some final adjustments on the new site. Many of us have seen cramped, dirty transmitter sites. WOR wasn't one of them. This was a large, clean facility with plenty of extra space. It's not everyday one sees a brand-new AM site.

Manhattan skyline, shot from WOR-710 transmitter site. WOR tower guy wires are visible in foreground.

huge copper-mesh cages, in a room with copper plates on several walls – and the floor. No

After about an hour at the studio, Tony guided us to the WNNJ-AM transmitter site a few miles away. It didn't surprise us to see an equally neat and clean facility here. WNNJ uses a directional antenna with three towers. A small FM transmitter and an antenna on one of the AM towers serve as a backup for the main FM transmitter elsewhere.

Probably more interesting, and less neat... was the abandoned WNNJ AM/FM studio/office building on the site. The musty smell was overwhelming, but the stacks of old equipment in various states of repair made it worthwhile. There was more promo stuff out here too. As

Most major NYC-area stations are in the Meadowlands, so we didn't have to drive too far to reach our next station, behind an oil facility. Joe Gregg is an old friend of WBBR-1130's chief engineer, and arranged this tour. WBBR is an older facility – it's been at its current site since 1969 when they left a site we'd see later a few miles to the north. It's also even better backed-up than WOR. Three transmitters, two remote controls, more audio paths than I could count. In case of problems at the WBBR studios on Manhattan, there are also two full studios at the transmitter. All programming and other information produced in Manhattan is also available over the computer network at the New Jersey transmitter. I suspect the most photos were taken of the directional-antenna phasing equipment: built in

¹ Tom is an early adopter, and a vocal proponent, of IBOC. He's also quite civil about his defense, which is more than you can say for some others in the industry!

problems with grounding here!

From WBBR we proceeded to an area motel, for photos of their neighbor WKDM-1380. There was nobody here for a tour (indeed, with the high grass it was difficult to even see the transmitter building) so the visit was relatively brief. This site is also used by the country's first expanded-band AM station, WWRU-1660.

We didn't expect to get in at the next station, WADO-1280, either. But it so happened that WADO's chief engineer was there, and knows Scott. So we managed a tour of this station as well. By now most of the layout was routine – clean, well-maintained transmitter room, satellite dishes, towers with large tuning units at the base. WADO was unique in the need to cross a small river (on a wooden bridge) to reach two of the four towers.

We love you, Erica.

It was probably more unique in that the towers were named. FCC regulations require any tower tall enough to require obstruction lighting (generally, taller than 200') must have a "FCC Registration Number", and that number must be posted. This number is pretty long and not very memorable. Two of the four WADO towers were tall enough to require registration, and all four had easier-to-remember single-digit numbers assigned. None of this was unusual. However, as we approached the first tower, we noted the sign read: 'TOWER #4 / FCC REGISTRATION # N/A / "ERICA"'. Who's Erica and why is a tower named after her?²

As we reached each other tower, we noted it, too, had a woman's name assigned. I can't remember them all, but #1 was "Jessica"...

From here we rode up the road a bit to the WMCA-570 site. WNYC-820 also transmits from this site. Again, there was nobody home. Decent photos of the towers were possible though. The "wmca 570" sign on the front of the building was somewhat more difficult to photograph, due to tall weeds. Apparently what we were doing – four carloads of DXers climbing on fences to take pictures of an unattended radio site – was not considered suspicious, as we weren't bothered by the passing Kearny police officers...

At our final stop, not only were there no station personnel present, but there was no station either. WNEW-1130 (now WBBR) had abandoned this site to the New Jersey Turnpike in 1969. Towers were still visible in the swamp, attracting the attention – and cameras -- of the assembled crowd.

It was now getting late, and with the promise of some interesting stuff on the grill, our stomachs were calling! Several different routes were used to return to Rick's place; Joe & I inadvertently found another AM station (WABC-770) just south of I-80 and just west of the Meadowlands.

Many thanks to Scott Fybush and Joe Gregg for arranging the tours, and to all the engineers involved (and the Kearny, NJ Police<grin>) for tolerating a gaggle of curious DXers!

And later, Friday evening on Rick's backyard deck...

Rick (center) cooks, Doug Smith eats and Frank Merrill supervises. The weather was perfect for a convention. The days were warm. The nights, however, tended to be on the chilly side. There was no DX, of course, but nobody cared.

² We never found out. Apparently someone else named the towers, as the chief engineer didn't know.

6 Meter/2 Meter Amateur DX

50 Mhz
The *Magic* Band

Peter Baskind, N4LI
3225 Forest Hill-Irene Rd
Germantown, TN 38138
N4LI@ARRL.net

We continue to plug along though the quiet early Fall. There have been a few scattered reports of sporadic-E popping briefly into 6m over the past couple of weeks, but, frankly, they didn't amount to much. Some of the openings were so inconsequential, I didn't even bother to connect the antennas.

Tropo is a different story. Monday, September 18th, brought what *appeared* to be a nice opening. I say "appeared" since my 13-element 2 meter antenna remains pointing northwest – which was not the direction the tropo was coming from here. I saw reports of contacts being made from as far as EN92 into EM64, so the opening was a healthy one. But, here in Memphis, I was relegated to just 144 MHz FM and APRS, plus TV DX with my shamefully sub-par Radio Shack antenna in the attic. I did manage to decode and watch DTV from Cincinnati – a new DTV state for me – so, I am sure 2m weak signal would have been active. That will have to wait until my tower project is completed.

On the subject of the tower project, it is moving forward nicely. On Wednesday, September 20th, ground was finally broken. I found it amazing just how much dirt actually needs to get moved to make room for a relatively small footprint.

The following day, the County Code Compliance Officer inspected the hole – confirming it was *indeed* a hole, I guess. That afternoon, concrete was poured, leaving me with five feet of Rohn 45 above ground.

There is still much to do. Heck, the antennas have yet to be delivered. But, it's moving forward. Still, as I had suspected, to do a project properly, even if it's a fairly modest tower, is a big, hairy, multi-faceted deal!

Last month, space was short, so loggings were shelved. We'll be catching up this month and next. We do welcome a new contributor, John Hanna, KC9HZC, from Illinois. John's fairly new to VHF hamming, but seemed to be sucked in. John's station once again illustrates a point I have made before – even a fairly modest station can be effective on 50 MHz. When the band really opens, it can get crazy!

Loggings

Bill Smith, W1OW, 56 Locust Street, Douglas, MA 01516 FN42

28 June '06

Brief opening east. Worked CU3EQ/HM68 @ 2240 and CU2AF/HM77 @ 2259.

29 June '06

Good opening to Caribbean/South. Several KP4s. After, the band went short for a bit, then SW and West.

5 July '06 Brief but fortunate opening to Caribbean brought in V25V/FK97 for country # 90.

11 July '06

Opening to East, South, & Midwest. Heard F8DBF in IN78, and worked YV5ESN/**FK80** @2231. Usual Midwest stations.

12 July '06

Heard bits and pieces of SV9CVY. He worked a few East Coasters with larger arrays. Skip then shortned.

18 July '06

Evening. Good to Midwest; very weak double-hop.

0130	KD7TJC	CN86	(Heard Only)
0235	KE7V	CN88	

John Hanna, KC9HZC, 201 Prairie Ave., Brookfield, IL 60513 EN61

I have a stacked pair of the KU4AB* loops at home about 35 feet up, and I'm impressed with them. I just installed an arrow 4-element beam (in horizontal polarity) right below the TV antenna on the rotatable mast (boo hoo I had to take down the FM-6 in order to do that, but to be honest FM is all but useless in my location, due to overcrowding and IBOC) and it outperforms the loops only by a bit.

ANYHOW.... Here's my 6 meter loggings from this, my first, E-skip season. All contacts were USB, and the equipment was my trusty Yaesu FT-726R 2-meter all-mode, driving a Tentec 2 to 6 meter transverter for a whopping 8 watts out! The antenna is a single KU4AB SQ-50 loop, about 25 feet up. Thanks in large part to fellow WTFDA'er Curtis Sadowski whose emails to the list were invaluable... I set up an email filter that parsed the Subject: header for "Es" and "IL" and when true, those messages were sent to my cell phone for instant notification. Worked like a champ!

* Editor's note: Phil Brazzell, KU4AB, is nearly a neighbor of mine. Phil lives just a few miles away in Collierville, and I talk with him quite frequently on 144 MHz SSB. He has made a nice cottage industry out of making HALO loops, and similar antennas, for 6 meters through 70 cm. They are inexpensive, and quite effective, for what they are. For those who are limited in space, funds, or both, they make a nice starter antenna. -pb

Tired of small print and lack of color?

Try the eVUD!

SIGN UP/Renewal form
