GET THAT TROPO!
Plenty available in October for parts
of the midwest, east and south.

TV and FM DXing was never so interesting!

THE WORLDWIDE TV-FM DX ASSOCIATION

Serving the UHF-VHF Enthusiast

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, GREG CONIGLIO, BRUCE HALL, KEITH MCGINNIS AND MIKE BUGAJ.

Editor and publisher: **Mike Bugaj**

Treasurer: **Keith McGinnis** wtfda.org Webmaster: **Tim McVey**

wtfda.info Site Administrator: **Chris Cervantez**

Editorial Staff: **Dave Williams, Jeff Kruszka, Keith McGinnis, Fred Nordquist, Nick Langan, Doug Smith, Peter Baskind, Bill Hale and John Zondlo,**

Our website: www.wtfda.org; Our forums: www.wtfda.info

OCTOBER 2008

Finally! For those of you online with an email address, we now offer a quick, convenient and secure way to join or renew your membership in the WTFDA from our page at:

<http://fmdx.usclargo.com/join.html>

You can now renew either paper VUD membership or your online eVUD membership at one convenient stop. Use the link above to either join the WTFDA or renew your membership in North America's only TV and DX organization.

TROPO SEASON

E-skip may be gone for the year but there has been a good amount of tropo out there to take its place, especially in the mid-west and the east coast from New England down to Florida. As I type this on the 26th, dxers are wrapping up another major tropo opening that began in the midwest and drifted east. Quite a few dxers ended up with some nice catches. The only ones who didn't are FM DXers who live in IBOC land.

Perhaps, if we're lucky, we'll have one or two more of these events before the weather turns colder.

We're beginning to see a few analog TV stations shutting down for good now. We're also beginning to see the FCC starting to become a bit nervous about the analog shut-down and there is a little bit of talk about allowing some stations to stay on for a while after shut-down. We will see what happens.

MEMBERS AND MORE STUFF

This month we have two new members: **Chris Hanley** in IL and **Mark Colombo** in VA. Chris gets the eVUD and Mark gets paper. Nobody gets plastic. Glad to have both of you with us!

Renewals received from the period 8/20 through 9/10 came in from **Wolfgang Schneider** (CA), **Jim Paige** (MI), **Roosevelt Crawford** (KS), **Jeff Lehmann** (MA), **Russel Lay**, **Bob Smolarek** (NJ), **Lee Freshwater** (FL), **Kevin Redding** (TN), **Chris Kadlec** (MI), **William Hein** (TN), **Scott Fybush** (NY), **Larry Weil** (NH), **Bob Seaman** (PA), **Bill Smith** (MA), **William Mitchell** (OH), **F.J. Issard** (ON), **Daniel Gillet** (MB), **George Greene** (OH) and **Melvin Dishong** (GA). Thank you all for your support of WTFDA!

Dennis Smith writes: "I read in the September VUD Mailbox the note about North Carolina Public TV doing a series of programs on digital television.

Here in California, my cousin in San Francisco told me that PBS KQED-9 recently did a one-time 1/2-hour local show about DTV that he said was very good, explaining hook-up and use of a DT converter box for those with antennas, and time for many answers to questions.

Just a few days ago, our nearby PBS station, KCET-28 Los Angeles, did a similar

one-time 1/2-hour local special, but it wasn't very good in my opinion. For one thing, they did it in English and translation into Spanish, which was good for Spanish viewers without SAP but which cut down on available time for questions and answers. And then, their illustration showed a box being connected only to a monitor-type analog TV with both the RCA video and audio wires and the RF coax to ch. 3-4 with no further explanation. Quite misleading.

I reported on the following initially in the August 2008 VUD. Here is an update on continuing comparisons of my (1) Radio Shack Accurian DTV box (manufactured Oct 2004) and (2) LG 20LS7D HD 20" flat-screen TV (DTV & analog) receiver (Feb 2008), in addition to a (3) Zenith[LG] DTT901 DTV converter box (May 2008). The LG and Zenith are about equal in signal sensitivity. The Accurian has less sensitivity, to the extent that it is not dramatically less, but rather is somewhat less in that it seems a bit 'sluggish' compared to the other two. To illustrate, the LG and Zenith will show full picture/sound on a marginal-strength DT station while the Accurian may show data only; and on a yet weaker DT signal, the Accurian will show nothing whereas the LG and Zenith will give at least data and possibly a series of still/frozen images. The LG has performed reasonably nicely on DT and analog tropo DX in California with nothing more than indoor rabbit ears and bowtie in Santa Barbara and with the same antennas on trips to Oakland and the Santa Cruz Mountains, and with modest outdoor antennas in Wasco (I didn't take Accurian or Zenith along) (see Western TV-DX reports in recent months through this VUD issue). I hope this further clarifies my general observations previously noted in the August VUD."

BEDFORD BROWN

If there's a Hall of Fame for TV DXers somewhere, Bedford probably should be there. This came from Morrie Goldman through the wtfda.org website: **BROWN Bedford P. Brown, Jr.**, 69, retired meteorologist for the New Orleans Weather Bureau, died June 6 in a Slidell hospital. A world traveling bird watcher, Brown grew up in Hot Springs, AR where he graduated as Validictorian of Hot Springs High School. He then earned a degree in meteorology from the University of Texas. He

worked for the U.S. Weather Service in Chicago and Puerto Rico before moving to Slidell. He is survived by five first cousins, Harley Bledsoe of Benton, AR; Tom Bledsoe (Terry) of Asheville, NC; Jim Bledsoe, Carolyn Hebert (Byron) and Penny Smothers (Brad) all of Hot Springs. He is also survived by a number of cousins across the U.S. and numerous friends around the world. He was preceded in death by both parents Bedford Philmore Brown, Sr. and Hazel Lois Bledsoe Brown. Services were private. Donations in his honor may be made to the American Diabetes Association.

Bob Cooper recalls “Morrie Goldman's forward of the obit for Bedford Brown brings back memories. Bedford was THE top TV DXer in the late 50s. A high school lad, his family had a pioneering (Dumont) receiver and a five element cut to channel (4) yagi on a hilltop just outside Hot Springs (Arkansas), with Alliance rotor. Their 'local' signals consisted of Oklahoma City, Memphis, Dallas - all in the 200+ range - this was pre-1953 when the new station freeze ended allowing new stations on the air. Bedford was an Es fanatic and one day received more than 60 stations on E skip. His loggings on Venezuela, Argentina were equally legendary. I last spoke with him in 2002 or thereabouts - had recently retired, fighting adult onset diabetes, still interested enough in TV DX to have an extensive VHF-UHF array on his roof in Slidell. It was, he told me, his interest in 'weather patterns' and their association with TV DX that caused him to become a meteorologist for the U.S Weather service.”

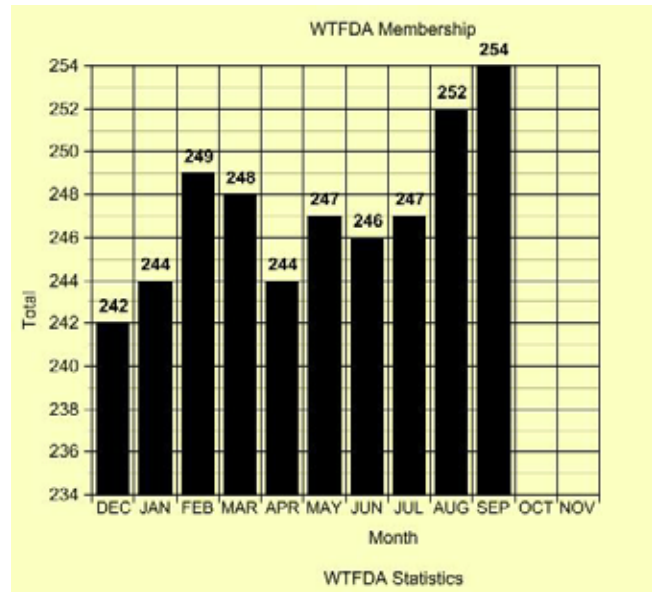

Gary Olson writes “Bedford lived in Chicago for awhile and as I remember we went together to the convention in Royal Oak, Michigan taking the Greyhound bus to get there. It must have been around 1964. He was a fascinating fellow in many ways and my trip with him revealed the non-DXer side of a very unique person. I used to see him on occasion after that while he was in Chicago. I recall getting together with him at the home of Tom Hidley and his wife on Chicago's north side on Canfield Avenue along with a couple of other DXers including Dave Swanson who lived in the quad cities for a long time. Another historic figure from the DXers of the early days has left us unfortunately.

For those of you old enough to remember the name of Morrie Goldman, Morrie is alive and well and living in Florida. He's glad the club is still around and doing well. And we thank him for thinking enough of us to send in the information on Bedford.

For those of you who may be interested, I've scanned two years worth of AIPA bulletins and they've been uploaded to wtfda.org. A couple of new pages have to be created there before you can get in to read the bulletins. The years 1960 and 1961 have been scanned.

We've got some bulletins from the mid 1950s but the quality of the print is really poor and those may never get scanned. 1962 and 1963 are the newest bulletins we have in this box sent in by Matt Sittel. If we can salvage anything else, we will sure try.

GOING UP?

Unlike the stock market and my 401k, WTFDA membership seems to be going against the grain. This month we hit 254 WTFDAers at the beginning of September and October will be over 260. I haven't seen numbers like this since 2002. It seems like people are noticing the WTFDA website (wtfda.org) and the WTFDA Forums (wtfda.info). And a number of new members have already taken advantage of our Paypal page, which lets you join or renew right at that page, which is something you could not do before with Paypal. Right now, about 20% of our membership receives just the eVUD every month (that's about 60 people, give or take a few).

Although I can't figure out why, the conversion of TV from analog to digital has benefited the club, at least in the short term. There seems to be a new interest in DXing the digital channels now, probably because the analogs have been Dxed to death and DXing the analogs is just plain boring while DXing the digitals is seen to be new, exciting and different. Whether it remains fresh, new and exciting remains to be seen and only time will tell if those who try it stick with it.

Now, here's a small picture of Sony's newest HD radio with iPod dock, the XDR-S10HDiP. See you all next month.

(FC): Flash-cut from analog to DTV on same channel.

My apologies for the lack of a September column. I was out of town and away from my files during deadline week .

Thanks to Glenn Hauser, Robert Ross, and Mike Bugaj for information elsewhere in this column.

Two applicants for non-commercial channel 43 in Sacramento were found equally qualified. Both have been named tentative permittees.

The FCC is encouraging them to reach a settlement, via which one applicant will voluntarily withdraw their application and the permit will be granted to the other one.

If no settlement is reached, both applications will be granted – and the licensees will be expected to share time on the channel. The Commission encourages them to reach a voluntary sharing agreement, but if one is not reached, one will be imposed by the FCC.

Regarding KTSC in Pueblo...

The station's current analog and interim digital (ch. 26) facilities are on Pikes Peak near Colorado Springs.

It holds a permit to move its digital facility to its current analog channel 8 but at their old analog site in Pueblo, at a power of 2,500 watts.

They then filed to increase permanent digital power to 22.5kw from their existing analog antenna in Colorado Springs.

Now, this application has been amended to stay at their Pueblo site but at a power of 105kw instead of 2.5kw.

KQTV-DT's application (St. Joseph, Missouri) is an amendment to an application for 100kw/87m which would have moved them to a new tower about 5km southeast of the existing tower. The new application will have the station stay on its existing tower.

KVIH-12's application to change their DTV assignment from channel 20 to channel 12 has been denied by the FCC. KVIH is the only TV station in Clovis, and to avoid mutual interference with some Texas stations, their DTV power level would be limited on channel 12. At the lower possible power, nearly 12% of the population within the station's current analog service area would lose service from KVIH – and since KVIH is the only station, they would lose all over-the-air TV service.

Note the application for a NYC low-power digital station to move to channel 2...

Good DX!

* - These three stations have been granted on a Special Temporary Authority (STA) basis to relay KSKY-660 Balch Springs, Texas (Dallas) in the station's primary service area due to interference at night caused by co-channel Mexican stations operating with 50 kw instead of their notified 1 kw. I spoke with the consulting engineer and he stated that no call signs have been assigned. - bh -

According to the FCC, there are the FM station totals as of June 30, 2008: 6382 commercial; 2964 educational; 6095 translators and booster stations; and 851 low power.

 Thanks to Shawn Axelrod, Deane McIntyre, Upper Midwest Broadcasting.com and Wisconsin Broadcasting.com for updates. If you hear any changes occur on your FM dial, share the news!

New Noises About DTV Transition; Push for 'Grace Period'

By Betsy Schiffman September 15, 2008

The digital television transition in Wilmington, N.C. was widely hailed as a success -- public awareness of the DTV switch was high, thousands of people bought converter boxes with government coupons, and a relatively small number of people called in with problems during the first day after the switch took place.

"We only found one person, out of everyone who called, who wasn't aware that there was going to be a transition to digital television," said Wilmington Mayor Bill Saffo, in a phone interview with Wired.com last week.

There was good reason for the transition to go smoothly -- the city was inundated with FCC staffers, who went to fairs, retirement homes and electronics stores to get the word out; there were tons of volunteers; and there was tremendous support from within the community.

But for a handful of people -- whose opinion matters -- the test didn't instill much confidence in the current game plan, under which all analog broadcast television will be shut off on Feb. 17, 2009.

FCC Commissioner Michael Copps reportedly called on the FCC late last week to figure out a way for broadcasters to extend analog broadcasts after the cutoff, according to a Broadcasting & Cable report. (Copps is out of the country and wasn't available to return our call.)

This came a couple days after Copps submitted a letter to FCC Chairman Kevin Martin suggesting that the hard deadline of Feb. 17 was a little severe.

"The February 17, 2009 deadline is a hard date. We have only once chance to get this right. We must be prepared -- as much as humanly possible -- for whatever occurs. There is no precedent for what we are about to do," wrote Copps, in the letter which included nine suggestions of how to ease the transition.

He's not alone, according to Broadcasting & Cable. Wade Hargrove, an attorney representing the North Carolina Association of Broadcasters also reportedly supports a 30-day grace period.

"It seems to me that Congress should give serious consideration to stations to continue to broadcast 30 days in analog carrying a slate like the Wilmington stations," he told Broadcasting & Cable.

It's a reasonable suggestion, and it's hard to imagine that there would be much resistance to it. Then again, the proposed grace period could require that some broadcasters absorb the costs of both digital and analog transmissions at once, which may not be insignificant.

In the meantime, we may be able to glean more from FCC Chairman Kevin Martin, who is scheduled to testify before the House Energy and Commerce Committee on the DTV transition tomorrow.

 E-mail: nickl@wtfd.org

The Editor's Note

Some very good tropo has been present throughout the Great Lakes, mid-Atlantic, and southeast during the past few weeks. Hopefully you have been able to find some. There may be a few more chances heading into October, but with the cooler weather of Fall comes of course the end of DX season in most places, so savor the last few opportunities to see analog tropo signals throughout your particular region.

Among the highlights of this month's column include Roy Barstow's 8/2 Es logging of WWAY-3 from Wilmington, NC, which completes a DX grand slam for Roy (WWAY by Es, Tr, Ms, and DTV).

6 Meter/2 Meter Amateur DX

50 Mhz
The *Magic* Band

Peter Baskind, N4LI
3225 Forest Hill-Irene Rd
Germantown, TN 38138
N4LI@ARRL.net

The Summer Sporadic-E Season has come to a screeching halt. By the second week in August, sporadic-E openings swiftly became rare and anemic. Now, as I write in September, VHF is deader than Wall Street investment banking. But, such is the nature of the world above 50 MHz.

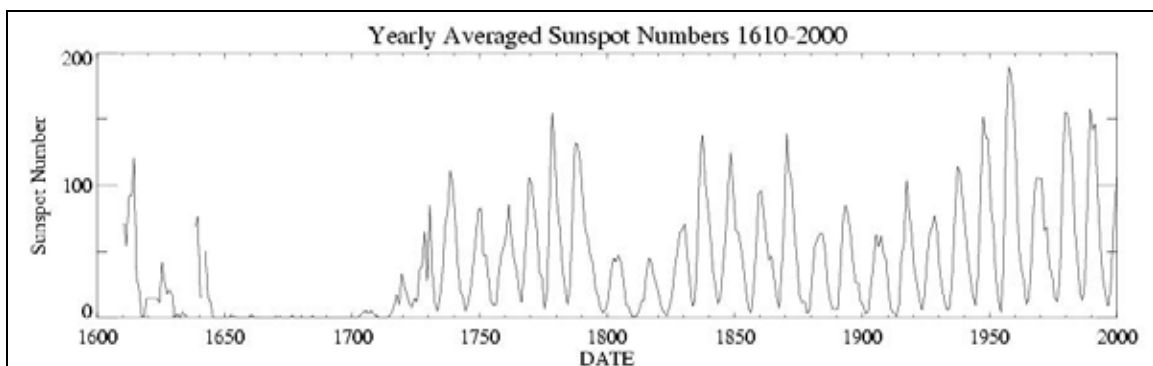

There have been a few scattered tropo openings that have broken up the monotony. August 4th brought Illinois, Ohio, and similar spots into Memphis on 2 meters (144 MHz). September 7th netted some nice contacts deep into Texas with paths to about 600 miles. Some operators were only running 50 Watts and still delivered nice signals.

* * *

Since we have an extended, though unwanted DX break, we can turn to more esoteric questions about the hobby. Much ink has been spilled lately about the Solar Cycle. As most of us know, the Sun is expected to live on an 11-year cycle with sunspots all but disappearing at the bottom of the Cycle, and liberally peppering the Sun at the Cycle's peak. With those spots, F2 layer maximum useable frequency ("MUF") rises, and on rare occasions, peaks into the 6m (50 MHz) band. We are at the bottom of Cycle 23 now, and await the ramping up of Cycle 24. But, we have been waiting a long time – longer than most expected.

Forecasting solar cycles is, to say the least, an inexact science. Depending on who one listens to, the bottom of the Cycle has been here for a year, or so, with little hint that new Cycle 24 has really gotten going yet. Recently, the Sun went an entire calendar month without a single spot, and according to NASA and the European Space Agency, the solar wind just reached a 50-year low. Some have even posited that we may be entering an extended period of solar inactivity, as the Sun takes a breather – generating few, if any, sunspots, and by extension, little chance of 50 MHz F2 propagation.

A long period of solar quiet is not unprecedented. For about 70 years in the 17th and 18th centuries, very little happened on the Sun's surface. This NASA chart clearly illustrates both the regular pattern, and the lack of activity in this historic break, know as the "Maunder Minimum."

It is way too early to label current solar activity as some abnormal pause. The Sun operates on its own schedule, and there is a lot we simply cannot understand. Further, the 11-year period is only an average. But, this period of solar minimum has been deep, indeed. Those of us who frequent 6 meters are

really, really looking forward to Cycle 24 getting its act together, and take some solace in the fact that a spot with proper location and polarity to be a Cycle 24 spot recently appeared on the Sun's face. Still, I haven't seen any 6m activity off the F2 layer since 2006. And, until we get a Solar Flux Index into triple digits, there is no reason to expect any. Fortunately, sporadic-E works independent of SFI. So, that's something.

Loggings

Bill Smith, W1OW, 56 Locust St., Douglas, MA 01516 FN42

August 1, 2008: Weak T/A opening. Worked EA8AK/IL18 (Canaries) @ 1105 and EB8CDX/IL18 @ 1121.

August 3, 2008 into the UTC morning of the 4th: Good double-hop to the west.

On June 21st I finally put up an APS-9B FM antenna I had purchased last winter in the place of my CM 4228 UHF bowtie, which I plan on re-installing (and therefore taking the APS-9B down) for a final analog tropo season, whenever that comes. I'm very impressed with the antenna's range. The regular reception zone seems to stretch eastward to Green Bay, Wisconsin, with 89.3 WPNE usually making it in, north to Thunder Bay (previously very rare) and Fort Frances, Ontario, west to Fargo and possibly Arthur, North Dakota, and south to near the Minnesota / Iowa border. Although I've managed to log a great variety of new stations via this mode, ones I couldn't before due to lack of directionality or gain, I have yet to hear any tropo beyond my 281 mile logging of KVMI Arthur, ND (on a relatively clear frequency). Even the unusually strong tri-state area (MN/WI/IA border) signals on the night of the 11th - 12th failed to produce anything from Des Moines, Sioux City, or even Waterloo / Cedar Rapids.

Jeff Kadet, K1MOD, Box 20, Macomb, IL 61455

In anticipation of being very bored next season i bought a Sangean HDT-1X to DX and photograph RDS-PI codes.

Everything below has been photographed. The photos are at:
<http://oldtvguides.com/RDS>
 Ant is a Stereo Probe 9 up 6 feet or 35 feet

A nice amount of tropo but no real distance openings yet.

2008 turned out to be one of the best FM skip seasons ever here with a greater number of skip sessions getting into the FM range than average. I count 20 days or sessions with FM skip so far and that's not counting sessions when the band closed and reopened later. 59 new stations added so far and the e skip may not be over yet for this year.

John Ebeling

beansdad@bendcable.com (541) 420-4704

Greetings,

Once again I have to say "so long" to editing this column – this will be my last. As you might have noticed, I missed submitting last month's column, and my work schedule just won't support the time it takes each month to pull this together.

Hopefully, you will see me on the wtfda website next spring yakking about how I've finally snagged KVBC-DT or another state on FM. In the meantime, please send your reports to **Nick Langan**:

1040 Riverview Drive
 Florence, NJ 08518
 E-mail: nickl@wtfda.org

Any additional reports sent to me will be manually forwarded on to Nick, so please send to him to avoid any delay. And thanks to Nick for taking this on!

Thanks to all of you for your reports over the past several years.

73 - Dave

 (floating under KSNT-27)

We spent some time in early August in the cool mountains of New Mexico and must have missed some pretty good skip and trop. Had a nice visit with Paul Mitschler in Albuquerque, however.

Dennis Park Smith
 3605 San Remo Drive
 Santa Barbara, CA 93105-2523
 Telephone (805) 687-7803

(July 2008)

This report is for July, 2008. Southern California coastal tropo (to San Diego/Tijuana, up to 200 mi/320 km) was quite steady this time with indoor antennas, and then a surprise later in the month.

Jul 1-8	Fair (stable inversion)
Jul 9-22 AM	Variably poor-fair (some wx change)
Jul 22 eve-25 AM	Variably good (bits of SD DTV Tropo)
Jul 25 eve	Very good (more DTV tropo, listed below)
Jul 26	Good (leftover SD DTV tropo), deteriorating
Jul 27-31	Variably poor

Earlier in the month, I got a new toy, a Zenith/[LG] Model DTT901 DTV converter box. Tropo improved on 22nd eve with KPBS-DT San Diego on Zenith with indoor 2-bay bowtie(!) on street floor and then peaked 25th eve with even more DTV tropo on 2nd floor, including better Los Angeles signal condx with 2 new loggings (!!), indoor bow-tie and ears. Mine is not as good a location as Done Voegel's and without his dish antenna (and I did see more stations at his place), but this was a surprise. San Diego tropo is over oean, but improved LA condx across hilly land such as this is rare. I played with Zenith box (manuf May-08) and LG TV (Feb-08), both similarly good; and Accurian box (Oct-04) with somewhat less sensitivity. Result was this at the peak:

July 25

A number of ANALOG stations, Los Angeles to San Diego/Tijuana (chs 2-69, 90 to 200 mi), as also seen in recent months at Don's place here, with nothing new except for a possible San Diego on 61. These DIGITAL stations were seen on this date:

KBEH-DT	24	Oxnard Spanish, MTV3	45 mi E
KTLA-DT	31	Los Angeles CW	90 mi E
KDOC-DT	32	Anaheim (data only)	90 mi E
KMEX-DT	35	Los Angeles Univision	90 mi E
KNBC-DT	36	Los Angeles NBC	90 mi E
<u>KAZA-DT</u>	47	Avalon (data only)	90 mi E
KOCE-DT	48	Huntington Beach PBS`	90 mi E
<u>KTTV-DT</u>	65	Los Angeles Fox	90 mi E
KUSI-DT	18	San Diego Independent	185 mi SE
KSWB-DT	19	San Deigo CW (Fox 8-1)	185 mi SE
KPBS-DT	30	San Diego PBS	185 mi SE
KNSD-DT	40	San Diego NBC	185 mi SE

(August 2008)

This report is for August, 2008. Southern California coastal tropo (to San Diego/Tijuana, up to 200 mi/320 km) again was mostly steady though not terrific.

Aug 1-11	Variably poor, occas, barely fair (continuing from July 27)
Aug 12	Good

Aug 13-18	Var. poor to fair
Aug 18-25	Out of town: OAKLAND, LAS CUMBRES, WASCO
Aug 25-27	Var. poor to fair
Aug 28-29	Very poor (passing southern wx front).
Aug 30-31	Var. poor

On Aug 9, I tried my LG HDTV & indoor antennas to look at regular signal conditions in the back yard of a musician friend who lives on a hill in Santa Barbara, but his terrain is irregular and signals were only slightly better than at my location. I did get one new DTV:

KCOP-DT 66 Los Angeles (My) 90 mi E
 & KTLA-DT 31 KOCE DT 48 KTTV DT 65

On Aug 12, there was another "rare" day of better Los Angeles tropo at my place, apx. 4-5+ PM PDT, with more DTV including another new logging and some longer tropo

<u>KABC-DT</u>	53	Los Angeles ABC	90 mi E
KMEX-DT	35	Los Angeles Univision	90 mi E
KGTV-DT	25	San Diego ABC	175 mi SE
KPBS-DT	30	San Diego PBS	185 mi SE

& more as seen as July in Santa Barbara

Both new ones were seen for only a few minutes each. Total Santa Barbara DTV is now 26 with 2 new.

I traveled around California with LG HDTV and indoor ants (rabbit ears and 2-bay bowtie). In OAKLAND at cousin's house Aug 18 (apx. 100 ft ASL), 19 DTV stations were seen, (18 were seen in Sep 2007) and many analogs, of Bay Area signals.

In LAS CUMBRES (Santa Cruz Mtns) with aunt & uncle Aug 19-23 (2580 ft ASL) with clear southern panoramic view, 15 DTV stations were seen (only 5 in Sep 2007 with Accurian box up to 50 mi and analogs up to 150 mi). There was some Tr DX this time to add to the fun, including these, with indoor antennas in picture window.

Aug 20 0600

KCOY-DT 12 Santa Maria, CBS 190 mi E

Aug 22 0400

<u>KAIL-DT</u>	7	Fresno, My	150 mi E
<u>KXTV-DT</u>	61	Sacramento, ABC	150 mi E
<u>KGPE-DT</u>	34	Fresno, CBS	80 mi NNE
<u>KFRE-DT</u>	36	Sanger, CW	150 mi E
<u>KFTV-DT</u>	20	Hanford, Uni	150 mi E

Aug 23 0130

<u>KMPH-DT</u>	28	Visalia, Fox	175 ESE
<u>KVPT-DT</u>	40	Fresno, PBS	150 mi E
<u>KSEE-DT</u>	38	Fresno, NBC	150 mi E

Aug 23 0600

<u>KAZA-TV</u>	54	Avalon, Azteca Amer.	300 mi SE
<u>KOCE-TV</u>	50	Huntington Beach, PBS	300 mi SE
<u>KCET</u>	28	Los Angeles, PBS	300 mi SE
<u>KMEX-TV</u>	7	Los Angeles, Uni.	300 mi SE

KTBN-TV 40 Santa Ana, TBN 300 mi SE
KNBC-DT 36 Los Angeles (data only) 300 mi SE

At our house in WASCO Aug 23-25, ground elev. 325 ASL, with outdoor antennas UHF 4-bay conical 16' AG & VHF 1-bay conical 10' AG, these new ones were seen:

Aug 23 eve

KJOI-LP 12 Caliente/Bakersfield tentative, Color bars, no ID, possibly new on air, 35 mi SE
K18HD-D 18 Bakersfield, DT translator of KVPT-DT 40 Fresno PBS, 35 mi SE (Low power DTV at 13 KW)

Aug 24 0830

KQCA-DT 46 Stockton/Sacramento, My 225 mi NNW, my first real Wasco DTV tropo.

Wasco DTV total (since 2005) is now 15 with 2 new. Wasco analog total (since approx. 1950) remains 221.

Best of DX to all, Dennis

 2055 WEHT 25 IN Evansville 165/266
 2059 WEEK 25 IL Peoria 140/225

This was quite a season! The first opening of 2008, on January 9, was mainly into Indiana and Illinois, with the usual stations. KOTA 3 was a big surprise on February 26. The skip season started with an opening into Texas and New Mexico on May 26. May 29 marked probably the last time I'll ever see WWAY before they flip to DTV-only on September

30. May 30's opening only reached channel 2, where WCBS made one of its final appearances before the big switch. The June 8 E-skip opening, using the VU-110 while I was doing work to my VU-210XR, netted two more catches on channel 6 in KSRE and KBJR. The latter was my first E-skip log from Wisconsin. The trop opening of June 14 was the shape of things to come, allowing me to add WDAF-DT 34 and KPTS 8. The period between July 31 and August 3 was when everything broke loose...adding two new DTV states in Iowa and Kansas. The big surprise of these openings was KWCH-DT 19; CBS programming made it through, even with a brief glimpse of KSPR-DT before that. I also pulled in my 50th and 60th DTV stations during this opening; #50 was KPXE-DT 51, while #60 turned out to be the aforementioned KWCH-DT. I also logged my 20th DTV from Missouri, in the form of KNLJ-DT 20. I virtually cleaned up on DTVs from Kansas City and Springfield, and also logged several new ones in Chicago before only my third DTV on VHF came through in the form of WNIN-DT 12 before Midnight on August 3. As of August 24, the totals now stand at 571, including 68 DTV stations. 73.

Some strong tropo finally allowed me to get some analogs over my local DTV's, including one from my former home-base of Baton Rouge.

73's, Jeff

John Ebeling

Alborn, MN

Here is the 2008 report from my cabin in Alborn, MN. It was sort of as normal season on TV, as I spent most of every Es opening on my FM tuner: TV reception took 'second fiddle'.

So ends 58 years of analog TV DXing. Started out in Duluth, MN in 1950, when test patterns were the common daytime afternoon programming. Made for easy identification, compared to today.

I did some digging through my records, and using the low band listings in the last WTFDA TV Guide, I came up with the following:

Channel	# of US stations	# that I IDed	% received
2	54	42	77.7%
3	52	17	32.7%
4	58	35	60.3%
5	53	23	43.4%
6	58	6	10.3%

I don't know if I'll try for digital stations, but, without US analog stations, it should be interesting for foreign analog stations. Been a good and very enjoyable ride these last 58 years.

8/25 Tr KSPR-DT-19 Springfield, MO (254) (NEW)

Got KSPR-DT early this morning over local WMEC-DT-21 overload. WMEC-DT has been staying on all night with programming, although their analog is being turned off around midnight. The same with WTVP-DT-46 Peoria. Both WMEC-DT and WTVP-DT appear to be 24/7.

8/27 0506 WADL-DT-39 Mount Clemens, MI (429 mi) NEW

0516 CJMT-69 Toronto Omni News. ; man, does this get out.

Lots of Es, little new.

WILX-DT-57 Onondaga, MI (349 mi) NEW

8/4 WFXW-DT-39 Terre Haute, IN (NEW)

Both WADL and WILX had to make it over Peoria stations. Pretty amazing.

FCC Drops FM Translators-For-AM Stations Item From Agenda

The FCC deleted consideration of the rule change that would formally allow FM translators to be used to rebroadcast AM stations from yesterday's open meeting agenda late Thursday (9/25), and the item does not appear on the tentative agenda for October

15th's open meeting, also released Thursday. The agenda for OCTOBER does not carry any radio items. Presently, FM translators are being approved for AM station rebroadcasts on an individual basis using Special Temporary Authority.

 Being far enough away from the area FM
 stations to pull DX in through the digital
 sidebands, I have had somewhat better luck.
 Even with WHHL 104.1's transmitter site still
 six miles away, despite the station's change
 from Jerseyville, IL to Hazelwood, I can still get
 through the digital sidebands during a strong
 opening, as was the case with my log of KBCN
 104.3. The openings of June 14 and August 2-
 3 brought in several new stations. I was at a
 loss who "House FM" was on 89.7 playing
 Contemporary Christian music, so I went to the
 Radio Locator site, and found out that it was in
 Ponca City, OK. KTWB was in with a local-like
 signal this time, much stronger than I had it
 when I first heard it in July 2003. Another Sioux
 Falls FM was added in the form of KKLS 104.7,
 also with a local-like signal. WGLT 89.1 was
 the surprise of the opening; KCLC was off for

maintenance at the time I logged WGLT. KTUI-FM is now officially on 102.1, having moved from 100.9, which had ACI from WMVN 101.1. Speaking of WMVN, it is rumored to be going all sports. As of August 24, 2008, 979 FM

stations have made it into the logbook. 73, Eric (NØUIH)

“TOWER SITE 2009 CALENDAR” ROLLS OFF PRESSES

Eighth Big Year For One Of America’s Most Unusual Calendars

CONTACT: Scott Fybush, 585-442-5411 (scott@fybush.com)

ROCHESTER, N.Y. – One of the world’s most unusual wall calendars returns for an eighth year, with the launch of the “Tower Site 2009 Calendar.”

The calendar, which features a monthly photo of a well-known broadcast transmitter site, is photographed and written by Scott Fybush, the creator of “Tower Site of the Week” (www.fybush.com/featuredsite.html) and “NorthEast Radio Watch” (www.fybush.com/nerw.html).

The full-color monthly calendar has become a tradition for many radio engineers and a curiosity for those who think all radio towers look alike.

“The 2008 calendar sold like gangbusters,” says Fybush. “Radio engineers often beg me to put their towers in the calendar, and I’m hoping to make some of them very happy with the 2009 edition.”

Once again, each month of the 2009 calendar features an 8”x11” color photograph of a broadcast transmitter site taken by Fybush during his travels around the U.S., Canada and beyond. The sites pictured on the 2009 calendar include many dramatic water photos:

- CKWS, Kingston, Ontario, by the Saint Lawrence River
- WNYM, Hackensack/New York, on the banks of the Hackensack River
- KNBR, at the edge of San Francisco Bay
- Chicago’s ESPN Radio 1000, WMVP, with the original Art Deco building from its days as WCFL
- KXEL, Iowa’s 50,000-watt voice of the Midwest
- WGY, Schenectady’s 623-foot Blaw-Knox tower
- The Blaw-Knox towers of KEX and KGW in Portland, Oregon
- WQEW, New York’s flagship for Radio Disney, in Queens
- The Crown Point tower farm in Omaha, Nebraska
- WDZK, Bloomfield, Connecticut, one of the Northeast’s newer directional arrays
- KSL’s 50,000-watt site on the south shore of the Great Salt Lake
- WRCE, a small station in the scenic Finger Lakes region of New York
- The “Telefarm” in Shoreview, northeast of Minneapolis

In addition to tower photos, the calendar’s monthly pages include significant dates in radio and television history, as well as civil and religious holidays.

The 2009 calendars cost \$18 each, postpaid (\$19.44 including sales tax for New York State residents), and can be purchased by check (payable to “Scott Fybush”) or money order to 92 Bonnie Brae Avenue, Rochester NY 14618. Orders can also be placed with major credit cards at www.fybush.com.

“I really enjoy traveling around the country, meeting engineers and visiting their stations,” says Fybush, who also edits The Radio Journal and the radio directory site 100000watts.com and anchors newscasts for NPR member station WXXI in Rochester, NY.
