TV and FM DXing was never so interesting!

THE WORLDWIDE TV-FM DX ASSOCIATION

Serving the UHF-VHF Enthusiast

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, GREG CONIGLIO, BRUCE HALL, KEITH MCGINNIS AND MIKE BUGAJ.

Editor and publisher: **Mike Bugaj**

Treasurer: **Keith McGinnis** wtfda.org Webmaster: **Tim McVey**

wtfda.info Site Administrator: **Chris Cervantez**

Editorial Staff: **Jeff Kruszka, Keith McGinnis, Fred Nordquist, Nick Langan, Doug Smith, Peter Baskind, Bill Hale and John Zondlo,**

Our website: www.wtfda.org; Our forums: www.wtfda.info

NOVEMBER 2008

Finally! For those of you online with an email address, we now offer a quick, convenient and secure way to join or renew your membership in the WTFDA from our page at:

<http://fmdx.usclargo.com/join.html>

You can now renew either paper VUD membership or your online eVUD membership at one convenient stop. Use the link above to either join the WTFDA or renew your membership in North America's only TV and DX organization.

SEASONS CHANGE

Welcome to the November VUD. Months change and seasons change and the amount of DX we notice in November takes a big hit, unless we are one of the lucky ones located on or near the gulf coast. The further south you live, the better your chances for DX. DXers like Randy Zerr can almost count of 12 full months of DX, either by tropo or E skip. Those of us up north can count of cold days with just a few short hours of daylight. At that point we're probably better off taking a nap, watching TV or doing some AM DXing instead.

But good tropo can happen up north this time of year. I remember one pre-IBOC year when I caught two tropo events from my location in CT to SC in December! Those are the exception to the rule, but at least I can say that it did happen. So, go take a nap but keep one eye open.

MEMBERS AND MORE

We have more new members this month. Say hello to **Carl Vollmer** (IL), **Eugene Hinton** (CA), **Ed MacDonald** (MO), **David Mackes** (MD), **George Vilican** (NC) and **Bryce Foster** (CA...LA area), plus a rejoin from **Vincent Ferme** (ON). David Mackes was doing a search on the internet when he found our website and decided to join. Ed MacDonald is into TV, FM and 6 meter DX. He also was vice president and past president of the KCDXC, the Kansas City DX club with the calls KR01A. For equipment he lists an Icom 7000, an R75, an Insignia STB and an Optimus and RCA FM receiver.

Renewals have been received during the period of 9/15 to 10/14 from **John Callarman** (TX), **James Snow** (GA), **Jim Renfrew** (NY), **Jeff Kadet** (IL), **Glenn Hauser** (OK), **Mike Bugaj** (CT), **Steve Branch** (IL), **Bill Hale** (TX), **Jefferson Lewis** (MO), **Joe Fela** (NJ), **Karl Zuk** (NY) and **Keith Short** (OH). Thank you everyone for supporting the club!

For those who are new and are wondering, I log in each check as it arrives. On or about the 15th of each month I mail them all to Keith McGinnis along with a check for the Paypal dues, and Keith then cashes them.

New member **Chris Hanley** (IL) writes: "With my kids almost grown up and digital TV coming up, I'm hoping to upgrade my equipment and get back into TV DXing." Well, Galesburg is not that far from Macomb. One look at Jeff Kadet's website should give you an indication of what he's logged and what could be possible from your location. Give it a try!

Member **Richard Gray** lives in New Orleans and writes: "The new addition is up and running as of this weekend. I would have gotten it up sooner but Gustav and Ike came to party and delayed me. A Channel Master 4251 atop the CM 3671. It

outperforms the 3671 in pickup and directionality. DXing forever!" Notice the flamingo on top of the dish. (I'm looking for an owl to put on top of my antenna...darned woodpeckers -Mike)

Another new WTFDAer is **Trip Ericson**, and Trip's labor of love is RabbitEars.info. Quite a few people here are probably familiar with the site. Trip writes "I invite you and your organization to use my site as much as you like. I can only hope the site will continue to be successful and operate into the future. And of course, I'm always glad to hear comments from users of my site and to receive information from those same users (especially if they have computer-based digital TV receivers, that type of data is extremely helpful). If there's anything I can do to make the site even more useful to WTFDA members or to the general public, please let me know." Trip lives in VA and attends the University of Charlottesville.

(FC): Flash-cut from analog to DTV on same channel.

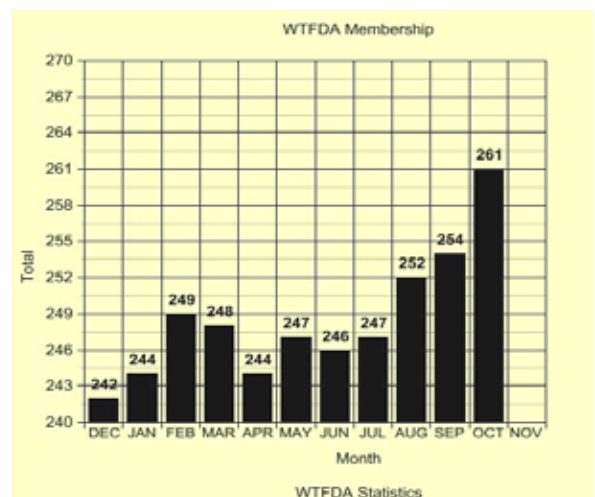

CBCB-TV-2 in British Columbia is a CBC-owned translator which had been relaying privately-owned CKPG-TV Prince George. The latter station has disaffiliated from the CBC, and the CBC has told the CRTC they do not intend to spend the money to arrange a new programming feed for this transmitter. They say the vast majority of viewers in the station's service area have cable or satellite and already receive CBC programming that way.

The previous of WFUP-45 in Michigan had informed the FCC they didn't plan to build a DTV facility for their station – they would allow WFUP to go dark in 2009. The station was later sold, and the new owners have a different idea. They've asked the FCC to assign the station's analog channel 45 as its permanent DTV channel and allow them to flash-cut from analog to digital operation on that channel.

The first three Nebraska Educational TV stations have converted early from analog operation to DTV on their existing high-band VHF channels. Winter weather would preclude doing necessary tower work in February, so they did it now. Expect KTNE-13 and KUON-12 to follow suit.

The Gainesville Sun is reporting WNBW-9 there has concluded a NBC affiliation contract and will begin programming with that network shortly after the first of 2009. This is a digital-only station; it was noticed on the air with an ID slide in early September.

Good DX!

Mexico Allowing Many AMs to Migrate to FM

The Mexican government is giving the majority of AM stations the opportunity to voluntarily migrate to the FM band, subject to the availability of frequencies. According to the decision by the Secretaría de Comunicaciones y Transportes, the agency that sets communications policy, those stations would have one year from the time of authorization to put their FM station on the air and another year to give up their AM frequency and turn in that license. There are 1,580 total radio stations in Mexico; 854 are AM and 726 are FM, according to the SCT decision, recently published in the Mexican version of the Federal Register. Perhaps 20% of AM stations may not be able to take advantage of this program because of the lack of available FM channels, particularly in Mexico City, Guadalajara, Monterrey and Tijuana. The Mexican government aims to give those AMs that move to the FM band the equivalent power level/coverage area. Perhaps our government can take a cue from Mexico as the FCC pores over all those proposals to re-purpose TV Channels 5 and 6 for AM and FM radio.

FCC and CRTC must coordinate databases

The FCC and its Canadian counterparts at the CRTC and Industry Canada try to make sure their databases stay in sync, but every once in a while they slip. That happened to CJRI, Fredericton, NB (94.7), which was caught by surprise when a station just across the Maine border, WBCQ-FM, Monticello, fired up a couple of months ago on the same channel. The CRTC has now given CJRI a temporary new frequency, 104.5, while it coordinates a permanent new home for the religious station.

Thanks to Shawn Axelrod, Eric Bueneman, Deane McIntyre, Upper Midwest Broadcasting.com and Wisconsin Broadcasting.com for updates. If you hear any changes occur on your FM dial, share the news!

FROM 100000WATTS.COM
 An email to Randy Zerr from Gene McKay Regarding Logins

Please share this with any radio club you wish...

The changes to 100000 watts.com were not done to hurt individual customers. There were many businesses that were subscribing to 100000watts.com and using our data to update their own database, then sell that data to clients. We had to find a way to limit the use by business clients.

But how? Since anyone can sign up for the low price, it is virtually impossible to distinguish a business user from a personal user – except by the number of logins. We’ve had one account register 20,000 times in one year!! Think that was just a hobbyist? So, while the restrictions will make some folks unhappy, this is, after all, a business. We’ve already converted some of those who were ‘cheating’ and have produced over \$32,000 in upgrade revenue since we redesigned the site. This is NOT an inexpensive business to operate. % of revenue to bottom line is single-digit.

If any true hobbyist sends me an email and tells me what they do and what club they belong to, their address and email address used for login, I’ll be glad to upgrade their \$89.95 (3 login) subscription to a Radio Enthusiast subscription with 10 logins (no book!).

I want people to enjoy the site without restrictions, but I hope you understand the dilemma. If anyone has a better idea on how to deal with our problem - please pass it along.

—Gene McKay, 100000watts.com

The Editor's Note

Hi there! I'll be handling the Western TV DX column duties now and it's a pleasure to take them over. Thanks to Dave Williams for the terrific job he did with the column over the years. The DX season is winding down but there still will be some chances for tropo in the plains and near the gulf coast, especially if some unseasonably warm weather comes about.

This month we feature reports from Danny Oglethorpe from August and September. Enjoy!

Danny Oglethorpe

Says Danny: "Note # 1: It is difficult to judge any UHF antenna when it is up only about 14 feet to feedpoint. Nevertheless, I'm back in the UHF DX business, and we will raise the antenna to higher level soon. The antenna, BTW, is a CM 4228 8-bay.

Comments: Thanks to Nick for taking over editorship of "Western TV DX," and thanks to Dave Williams for his excellent work over the years."

The Editor's Note

DX is quieting down as we head into November, but watch for sneaky tropo if we get any unusual weather, and hopefully the Winter E-Skip season might give us one more going away tour of the analog channels.

Says Brian: Going into the final season of NTSC tropo dxing, I was hoping to pull off one last 50+ TV station band scan. I had a few close calls in June and early July, but when my local WSAH-43 from Bridgeport went off in mid-July, I figured my chances were now becoming slim. My prospects remained dim for the next month with only mild tropo here and there. I was then very encouraged by the Hepburn map for the night of August 22nd. At 8 PM on the appointed night, I rushed upstairs to my TV hoping for some big time dx. Within a few minutes, as dusk turned to dark, I was getting a strong tropospheric opening along a narrow line extending northeast to Providence and Boston, and southwest to Philadelphia. Within an hour I had received 40 TV stations. The hard part was now picking off enough stations fighting to get in that were either miles off the heart of this duct, or that were experiencing co-channel interference. With patience, and the biggest workout my rotor has ever had, I eventually logged my 50th TV station of the night at 11 PM. Shortly afterward, with the conditions from the northeast starting to weaken, I called it a successful night. Sadly, this was likely the last 50+ station band scan I will ever accomplish, happening slightly more than 20 years after I first achieved the feat. Time has just seemed to fly by.

In September I bought a Zenith DTT-901 DTV converter box. During some mild tropo, I tested its dxing capabilities. Signals tended to keep decoding while the antenna was rotating (that is a plus), but when looking at a black screen with the signal meter showing a low reading, I am not able to tell whether it's because of a weak signal or some kind of interference (big minus). I hope to keep TV dxing in the future, but it's never going to be the same. 73."

Says Robert: "Trop continued to perform well into the autumn, with the 9/19-20 and 9-22-23 being the best openings in years, with yet another UHF temperance best DX, and a new DTV state (IL).

CKCO was my second channel 13 here (WTVG was the first).

DX was helped by Toledo stations going into silent breaks. WTOL and WTOL-DT have regular silent periods Saturday and Sunday mornings, about 0210-0445. WBTL-LP 34 has been silent for some time, and W22CO (channel 68!) happened to be silent during the Syracuse opening (and has been very weak when it is on for about a year now).

The October openings were a lot better than they may appear on my logs. I had already planned a family outing on 10-11, and was too tired to DX the nights before and after.

It won't be long before the Northwest wind blows the trop out of here until the Buffalo stations return in late April. The big question is if winter will bring it's "secondary season" E-skip. Will lowband analog television go out with a bang, or did WJXT-4 end on 8/15/2008 what WEDU-3 began on 5/22/1979? "

Jim says: "A good Es season lasting longer
than I've ever seen...hopefully December –
January brings more. Trops in August &
September very good with lots of new
loggings. Hope the rest of the year goes
well.

- Jim"

NOW AT WTFDA.ORG

Thanks to Matt Sittel we've scanned three years worth of AIPA Bulletins from 1960, 1961 and 1962.

See what a DX club could accomplish with just a mimeo machine and no computer. See how hard it was to erase mistakes!

LOGIN AND READ!

(available to WTFDA members only but you must be registered.)

6 Meter/2 Meter Amateur DX

50 Mhz
The *Magic* Band

Peter Baskind, N4LI
3225 Forest Hill-Irene Rd
Germantown, TN 38138
N4LI@ARRL.net

Well, there just isn't that much to report this month. Conditions on VHF have been very quiet, indeed. There have been a few scattered tropo openings along the Gulf and East Coast, but little unusual was reported.

Despite the sleep-inducing terrestrial conditions, Hams who follow the International Space Station ("ISS") have been enjoying themselves lately. The ISS, which has been virtually inactive on the ham bands over the past year or two, has started making some noise. Recent visitors, including a "space tourist," have turned the radios on (last I heard, they were using a Kenwood D700), operating in FM voice and even slow-scan TV. A ham here in the Memphis area caught this picture on 2 meters as the ISS passed overhead one recent Sunday.

Slow-scan, which passes single-framed images, can be heard from ISS on 145.80 MHz FM. Voice can be heard on the same frequency, with uplink at 144.49 MHz FM. All frequencies are +/- Doppler shift, which can occasionally make a noticeable difference.

If you're listening to ISS passes, you may be surprised how quick, but strong, signals can be. Signals (usually under call NA1SS) only last a few minutes as the vehicle, which is moving better than 17,000 miles per hour, remains within line-of-sight. But, on some passes, I have seen the ISS go full scale on my signal meter, which I find amazing, considering they are usually just running 5 Watts.

If you're lucky enough to catch the Space Station taking calls on FM voice, be prepared to work for your contact. The ISS's footprint covers much of the country on a good pass, and there will be lots of competition to get the QSO. I made many, many attempts before I finally made a contact in 2006.
