**ONE MORE MONTH!**

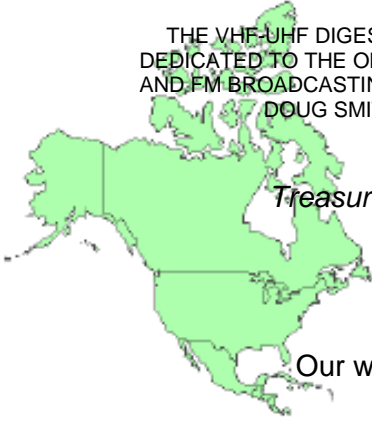

AND

**GULF TROPO HITS BIG TIME!**

# THE WORLDWIDE TV-FM DX ASSOCIATION

Serving the UHF-VHF Enthusiast

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, GREG CONIGLIO, BRUCE HALL, KEITH MCGINNIS AND MIKE BUGAJ.

Editor and publisher: **Mike Bugaj**

Treasurer: **Keith McGinnis** wtfda.org Webmaster: **Tim McVey**

wtfda.info Site Administrator: **Chris Cervantez**

Editorial Staff: **Jeff Kruszka, Keith McGinnis, Fred Nordquist, Nick Langan, Doug Smith, Peter Baskind, Bill Hale and John Zondlo,**

Our website: [www.wtfda.org](http://www.wtfda.org); Our forums: [www.wtfda.info](http://www.wtfda.info)

MAY 2009

Finally! For those of you online with an email address, we now offer a quick, convenient and secure way to join or renew your membership in the WTFDA from our page at:

<http://www.wtfda.org/join.html>

You can now renew either paper VUD membership or your online eVUD membership at one convenient stop. Use the link above to either join the WTFDA or renew your membership in North America's only TV and DX organization.

## IT'S SKIP SEASON ALREADY?

If you're Randy Zerr, it probably seems like it. As April makes its way into May, the days get longer and Randy sees more Es. Danny and Fritze both have also noticed it down south. Up north, we haven't noticed it at all.

And the Gulf of Mexico keeps bubbling with Florida to Texas tropo, something we up in the north haven't noticed either, although we have noticed that FM out to 250 miles isn't that hard to hear, now that the weather has turned a bit warmer.

May sometimes offers us Es well into the FM band during the month of May. One or two openings into FM are possible, so keep your ears open and watch ch2 for skip while there is still something to watch on ch2.

We keep moving towards June 12<sup>th</sup>. A few analog stations shut down in Mid April and more are scheduled to shut down in mid May. But there's lots of house cleaning to do and that will happen on June 12<sup>th</sup>. Check the wtfda website at wtfda.org for the FCC listing of those stations leaving the air on 6/12.

## MEMBERS AND MORE

We have one new WTFDA member this month. He's **Dan Novotny** from Phillips, WI. Dan Dxes TV, FM and the PS band and has a variety of receivers, scanners and antennas. Welcome Dan!

During the period of 3/16 to 4/13 we've had renewals from **Fred Newlin** (NY), **William Higgs** (CA), **Bob Garchak** (PA), **Tim Katic** (CA), **David Cox** (AL), **Pat Dyer** (TX), **Frank Merrill** (IL), **Aaron Mitterling** (IN), **Don Voegele** (WA), **Saul Chernos** (ON), **Larry Weisberg** (NH), **Bill Grant** (MA), **Bill Draeb** (WI) and **Jason Hustedt** (NJ). Thank you all for your support of the WTFDA! Without you, there is no WTFDA.

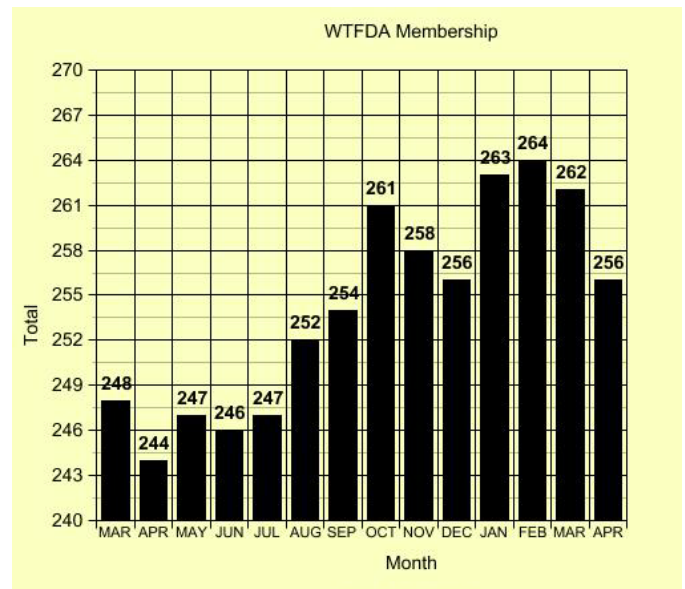

**Tim Katic** wrote: "Farewell East Coast! A couple of months ago I moved from Rochester, NY to Southern California – Beverly Hills to be exact. I graduated from college (in Maine) last year and have recently started working for an internet company located just south of LA International airport. Who knew I'd go from one coast to the other in such a short period of time."

Well, Tim, all I can say is that life is unpredictable. The same thing happened to me when I was 23. I drove (in January) from CT to Anaheim, CA in a '69 Ford Torino with a 428cu engine under the hood. But in my case, 6 months later, I ended up married. So...beware!

So, one moves in and one moves out. Tim is "in" and soon to be "out" is **Bryce Foster**, who currently lives in Whittier (LaHabra is right next door, if my memory is correct) and will be moving to Tennessee in a few months.

My problem with living in Southern CA was that living there made me forget about things like Es. Tropo was very predictable after a while and ch3 was the only lowband channel open in Orange County, and to be honest, going to the beach was more fun than waiting to see something on ch3! So I did.

As of 4/1/2009

Do I see a trend? Nah, can't be.

**Pat Dyer's** most vivid recollections of analog television skip include seeing the JFK motorcade in Mexico City live courtesy of XEW ch2 and some E Skip in June 1962, and then in May 1968 seeing live coverage of the Indy 500 (back when it was broadcast tape delayed in the US), again via E skip and XEW ch2. What's yours?

And speaking again of California, **Don Voegele** is back in the great state of Washington after spending the winter in CA. Don writes that two analog stations are now off in Bellingham, and that he visited the Best Buy store in Bellingham to find 14 Insignia STBs and over 20 Apex STBs in stock. Don says contact Best Buy if you are interested. So it appears that the boat from China has finally landed and unloaded its cargo of STBs.

And that's about it for May. Why don't we just skip May and go right into June. June is going to be an exciting month (hopefully). CU in 30.

## Abbreviations:

AF	Applied For (a new station)	NW	New station on the air
Aux	Auxiliary (backup) transmitter	PA	Proposed Amendment
CC	Callsign change	PC	Power (and/or tower height) change on the air
CL	City-of-license change	PG	Power change granted
DC	Converted to DTV	PR	Power change requested
DCC	Digital Companion Channel	RA	Returns to the air
NS DCC	Granted flash-cut to DTV	QC	Channel (frequency) change on the air
DE	License/permit deleted	QG	Channel change granted
DR	Requests flash-cut to DTV	QR	Channel change requested
FC	Programming (format) change	RE	Reinstated (previously-dismissed app.)
FTP	Failure to Prosecute	ROA	Request of Applicant
GA	Granted amendment (to table of channel allotments)	SI	Off the air (silent)
LC	License to Cover	STA	Special Temporary Authority
MX	Mutually Exclusive	XC	Transmitter site changed
NDA	Non-directional antenna	XG	Transmitter site change granted
NS	Permit granted for new station	XR	Transmitter site change requested

## News:

(full-power analog stations in **bold face**; LPTV and translators in regular type; full-power analog stations in **bold italics**; low-power analog stations in regular italics)

\* indicates this DTV facility replaces an analog facility on the same channel.

Thanks to Dennis Smith for information appearing elsewhere in this column.

Notes 1-4: These four pairs of stations have been granted power increases contingent upon resolving mutual interference issues within 30 days. This can be accomplished either by amending their applications or by agreeing to accept the interference. If agreements aren't reached between the two stations, both increases will be rescinded.

WBGN-LD's application to go digital on ch. 16 from their existing analog site is still pending. Their existing analog site is the same as the existing WQEX-16 analog site – and WQEX plans to use DTV channel 38 post-transition – so maybe WBGN plans to use WQEX's old antenna?

KDMI-DT will purchase facilities of pre-transition WHO-DT, instead of those of pre-transition KCCI-DT. (both WHO and KCCI

are returning to their analog channels - WHO has already done so. KDMI's pre-transition DTV channel is 56 so they have no choice but to move.)

KCBT-LP in California was a translator of KVPT-18 Fresno. The latter station has silenced its analog signal, though its digital signal is being translated by KVPT-LD, ironically on channel 18, in Fresno.

As a result, KCBT-LP is for lease. Indeed, according to Dennis that's precisely what it says on the screen:

KCBT-LP Channel 34  
This Channel for lease  
Call 559-435-7000

KVPT – Valley Public Television is now on digital channel 18.1 and on Bright House Networks channel 18.

Dennis also reports KVPT-DT's 18-1 main channel is now their main subchannel, but in HD. Previously they'd been running the PBS HD feed on 18-1 and their "normal" program stream in SD on 18-2. This is also reflected on the Bakersfield digital translator K18HD-D.

On KGMC-DT, 44-3 (which simulcasts KSDI-LP 33 analog) has switched from "The Sportsman's Channel" to "The Pursuit Channel". Dennis says the programming is similar and he suspects it may just be a new name for the same network.

KERO-DT 10 Bakersfield has added a new subchannel. Numbered 42-2 (as opposed to 23-1 for their main channel) this channel is simulcasting Azteca America affiliate KZKC-LP which is, as you might guess, analog channel 42.

Finally, KUVI-DT 55 has added two more subchannels to their My Network TV on 45-1. The new channels are numbered 31-1 and 39-1; as you might guess, they simulcast LPTVs. 31-1 is KBTF-CA (analog 31), Telefutera; 39-1 is KABE-LP (analog 39), Univision.

Dennis says KBTF 31-1 is the first

subchannel on the station but I suspect that **might** be just because it has the lowest major channel number. Actually, all programs carried on a DTV station are co-equal; the numbering scheme is a convenience for humans.

Each program does have a number, usually starting with 3. (why I don't know, but when we installed our equipment the manufacturer strongly advised us to start from 3 and every other station whose PSIP data I've seen has done likewise.) This program number is not normally visible to the viewer.

However, a number of DXers have noticed that if the PSIP data is missing, many DTVs will call up a program with the RF channel as the major channel number and the program number as the minor channel number. For example, WSMV-DT's first program, if the PSIP were missing, might be 10-3 instead of 4-1.

In connection with license renewal applications, two Quebec educational stations have pledged to build over-the-air digital transmitters by the end of August 2011. CFTU-TV is a local station serving only Montreal.

CIVM-TV also serves Montreal, but it has been feeding a network of eleven additional stations (and five relay transmitters) across Quebec. They too have pledged to build DTV transmitters. (the Montreal transmitter is already on)

CIVM has also asked permission to cancel their network license and convert all sixteen outlying stations to transmitters of the main Montreal signal. In other words, the stations outside Montreal will no longer be able to originate local programming – all transmitters will operate in parallel.

WDCN-LP in Fairfax, Virginia is the latest station to adopt a "radio on the TV" format. They'll be joining the "Pulse 87" network out of New York City, operating as a radio station carrying dance music and serving Washington, D.C.. Pulse has reportedly

signed affiliates in New York and Chicago as well. The presumed Chicago station, WLFM-LP, is already "playing radio" with a country format as "Chicago's L".

Equity Media Holdings has gone bankrupt and sold many of their stations at auction. Most went to Daystar – all the stations listed above as changing programming to Daystar are part of this purchase.

Other stations involved:

*To Mako Communications LLC:*

WYGA-CA 55 Atlanta, Ga.  
 KNBX-CA 31 Las Vegas, Nev.  
 KEGS-LP 30 Las Vegas, Nev.  
 KUSE-LP 58 Seattle, Wash.

(Editors note: Bill has decided to retire from editing FM News after doing a great job for almost two years. We are looking for a new editor to follow in Bill's footsteps. If you are interested in editing FM News, email your publisher at [mailbox@wtfda.org](mailto:mailbox@wtfda.org). Unless someone volunteers, this could be one of the final FM News columns in the VUD.)

**ANALOG DAYS CONTINUES FROM PAGE 40**

and brought forth DX made possible because several area DTV stations were very low power or not yet on the air.

I'm going to miss analog in some respects--the small and or distant stations that pop up out of nowhere, and the stew of Sporadic E signals that come forth every summer and most winters. I won't miss watching analog, but DXing won't be the same. Maybe with the changeover, I'll see some new DX from North/Central America previously not seen due to locals on ch 2, 4, and 5.

I also hope to see a real test pattern again on Switchover Day, like the ones I first saw nearly 40 years ago.

## **IT'S ALLENTOWN IN 2009!**

**Friday September 4 – 6**

This years NRC/WTFDA Convention will be held in the Lehigh Valley of Pennsylvania, in Allentown. It will again be a joint convention. Besides the regular events such as the auction, banquet, and quiz, the AAA Lehigh Valley Ironpigs minor league baseball team will be in town, in their last home stand of the season. The convention will be held at the Rodeway Inn 1151 Bulldog Drive, Allentown, PA 18104. This hotel is conveniently located near Routes 22, 309, and the Northeast Extension of the PA Turnpike. It is also close to the Lehigh Valley International Airport.

1). To reserve your room call the Rodeway Inn at 1-888-395-5200. Make sure to mention you are with the National Radio Club for the \$69 rate (before Taxes). Up to 4 people can stay in the room. You can get 1 king bed or 2 double beds. The website for the motel is [www.rodewayinnallentown.com](http://www.rodewayinnallentown.com). This motel was formerly known as the Days Inn Conference Center.

2). Convention registration is \$45. Make checks payable to "National Radio Club" and mail them to Bob Smolarek at 31 Mark Drive, High Bridge, NJ 08829. You can also send in your registration fee using Paypal from the NRC website at <http://www.nrcdxas.org>.

3). Send any auction items to 31 Mark Drive, High Bridge, NJ 08829

4. More details to follow concerning tower hunting, tours, and a guest speaker. So be in Allentown this Labor Day!

 Florence, NJ 08518  
 E-mail: wtvdx@wtfda.org

## The Editor's Note

The calendar has turned to May and the band conditions that come along with it have started to blossom, specifically in Texas and the rest of the gulf coast, where sporadic e-skip has popped up and excellent tropo occurred during the second to last week of April. Several instances of trans-gulf trop between Texas and Florida and Florida and Mexico took place. With the current analog TV situation, this promises to be a fun month once e-skip spreads, so enjoy it!

We have reports from William, Dennis, and Don inside this edition of WTVDX.

My Place – TV rxs with indoor antennas:

- 1<sup>st</sup> floor: Oldish 13" analog MGA/Mitsubishi CS1395, rabbit ears & bow-tie
- 2<sup>nd</sup> floor: Feb-2008 20" LG HD flat-screen 20LS7D, ears & 2-bay bow-tie

Don Voegelé's place – eqp with outdoor ants:

- 1981 13" Samsung analog CT 300 TM, Insignia/(LG) DTV box NS DXA1 APT, with VHF medium-range log antenna
- Finco UHF 5-ft dish antenna.
- My LG 20" flat-screen on occasion

This report is for March 2009. Here are March condx for southern-Calif coastal tropo Santa Barbara to San Diego/Tijuana 200mi/320km.

Warmest day was Mar 18 at 80 F, and then on 19<sup>th</sup> came month's tropo-ducting peak (not terrific) with inversion layering and fog and return to low 60s temps.

Feb 27 – Mar 2 am	Variably v poor/poor+
Mar 2 aft – Mar 13 aft	None (wx fronts- unsettled)
Mar 13 eve	Variably fair
Mar 14	Variably poor
Mar 16-18 (warm)	Var. poor/fair+
Mar 19	<u>Good</u> (low inversion, fog)
Mar 20	Very poor (higher inv. Layer)
Mar 21	None (higher yet, drizzly)
Mar 22-23 unsettled)	None (windy,
Mar 24-25 (warming)	Poor/barely fair
Mar 26	None (some wind)
Mar 27-28	Poor+
Mar 29-30 aft	None (wind again)
Mar 30 eve – 31	Poor/barely fair

All stns noted are southern CA & Tijuana BN.

Mar 7 eve: Don V. saw some tropo his place: KPBS15/DT30 San Diego (185 mi), nothing my place

Mar 10 2100+: Don saw good L.A., including: KABC-DT 53 Los Angeles(90mil), new for him. Nothing noted here (I saw KABC-DT once Aug '08).

Mar 13 eve: Don noted tr 1640. I saw KPBS-DT 30 SDiego much of evening. Also 1738, 3 min only for both: KGTV-DT 10 San Diego ABC 175 mi. SE KFMB-DT 8 SDiego CBS (ex-ch55) 175 SE (Analog KFMB-TV 8 **definitely off**) My SBarb DTV total is now 33 (1 new).

Mar 17 1200-1900: Some tr, together at Don's place, same stations as prev. WTV report & Mar. 13, plus these:

**DTV:**

KSCI-DT 61 Long Beach (Asian) 130 mi. E  
KRCA-DT 68 Riverside (Span-indep) 130 E

**Analog:** [Miles in brackets]

???? 17 (offset CCI u/KSBB-CA SBarb[5],  
maybe KBNT-CA SDiego [175])

???? 45 (offset CCI u/XHBJ Tijuana[200],  
maybe K45DU Ventura [40])

???? 63 (offset CCI u/KBEH Oxnard[45],  
maybe KBEH1 L.A.[90])

???? 67 (offset CCI u/KHTV-LP Inland  
Empire[130], maybe K67AM La Jolla[175])

???? 69 New tentative, weak, no audio (**not**  
KSWB SDiego-**definitely off**)

Don saw this 69 before in recent days,  
wondering if Mexico? (but see below)

Mar 19: Improving tr. The same 69: Don saw it better, with audio, Spanish infomercials, maybe K61GH National City now on 69 (185mi?); no ID yet (still tent.). Perhaps same as 61 MTV3 seen 1 yr ago(tent also). Dish E toward L.A.; signal poss SE. Also good XHTJB 3 Tijuana(Once[11]TV, 200mi).

Mar 27: Here since mid-Dec, with substantial house reconstruction and some DXing in between, Don & Julia departed for return drive to Bellingham WA.

Best of DX to all Dennis

**Don Voegele** e-mailed this report to WTVDX:

"Hi Nick, Happy spring. Dennis Smith sent in reports of our dx ing, Santa Barbara. I, we, are now back to the Pacific Northwest from Santa Barbara. Spring has "sprung" and I have cut grass for the first time. US 101 San Francisco to Crescent City, Calif, then US 199 to Grants Pass, Oregon, + finally I5 north is our favorite route (missing snow). When Julia is driving I use a 3" screen, electronic tuning, analog tv. Many analog stations were seen. with the electronic tuning and indicator line quick fade, channel numbers are only guesses.

As it has been written in the VUD, etc, I would like a similar small TV that receives both analog and digital.

Bellingham, Wash 2 analog tv stations are now off. My all channel antenna is pointed north to Vancouver, BC, Canada. Victoria CHEK ch 6 is still on and the new CBC radio one 88.1 mhz causes much sound interference on our Sanyo TV. With a recently bought Insignia digital converter I receive the 2 Bellingham DTV stations KVOS 35 (movies) and KBCB 19 (merchandise sales) + 3 Vancouver stations; CBUT 58, CHAN 22, CIVT 33. Interesting that all only have one video each or -1. This is in contrast to some Los Angeles tv stations that Dennis + I saw with 8 total videos each.

Today I was to the Bellingham Best Buy: 14 Insignia + 20 Apex digital converters in stock. If any WTFDA dxer who wants an Insignia DTV converter, contact them.

cheers, Don "V"

## 6 Meter/2 Meter Amateur DX

50 Mhz  
The *Magic* Band

**Peter Baskind, N4LI**  
**3225 Forest Hill-Irene Rd**  
**Germantown, TN 38138**  
**N4LI@ARRL.net**

---

Well, finally something to write about!

Both 6 meters (50 MHz) and 2 meters (144 MHz) have been really, really quiet. We're not just talking the usual late Winter/early Spring quiet – we're talking quieter than Britney Spears' legal team quiet. The bands have simply been empty.

Fortunately, in the past few days, that has begun to change. Right on cue, 6m is showing the first, early signs of sporadic-E ( $E_s$ ). As is normal, the first stations are from the south. Some 6m enthusiasts in my grid (EM55) have worked a few stations in Mexico via  $E_s$ . Mid-Summer, this isn't anything unusual. But, in April, one takes what one can get. Within the next couple of weeks, I expect the usual Eastern Seaboard and Florida stations to appear. Until then, we're standing by.

Tropospheric ducting also arrived. Deep on the Gulf Coast, the tropo started running on the 22<sup>nd</sup>. Stations in Florida made contacts across the Gulf into Texas, Mexico, and the Northern Gulf. One operator in Tallahassee (EM70) told me he worked as far south as EL03, his first Mexican contact on 2m ever.

On the morning of the 23<sup>rd</sup>, the band opened further north. Here in Memphis, I was surprised to find my home APRS station simply alight with signals. By the time the dust had cleared through the morning, I had worked 2m SSB into Orlando, New Orleans, Tampa, Tallahassee, and down into EL86, a nearly all-water grid just north of Ft. Myers, FL. I have been chasing that grid for a long time on 2 meters, and was happy to get N3LL/4 into the log.

\* \* \*

A couple of months ago, I wrote about low-priced, Chinese handheld 2m radios. I mentioned I intended to pick one up, just to try it. I did just that.

I purchased a Puxing 777+ from a supplier in Hong Kong. The \$68 purchase price included the nearly 3-week long trip from China, as well as a few accessories. I must say, I have been quite happy so far.

The HT is not perfect. Most notably, the number 6 button doesn't seem to work, which is annoying, but not a major issue. I am told the audio is good, and the 1200 mAh Li-Ion battery just keeps on going. More information on my new Puxing can be found here: <http://www.eham.net/reviews/review/79948>

Interestingly, we had our local hamfest in Memphis just last weekend. When I arrived, everyone wanted to see it. I guess we hams are a frugal bunch, and all were fascinated by the idea of a radio for such a low price. I clearly owned the most famous HT in West Tennessee!

The Puxing 777+, tuned to a popular Memphis repeater.

# ANALOG DAYS

As Analog TV Winds Down We Present these Remembrances of the analog years.  
More will follow in future issues.

---

## BILL ECKBERG REMEMBERS...

Every year I dxed, at least one logging remained memorable. I saw my first TV sets in early November 1949. WOC 5 had recently come on the air. Early one Sunday evening in a home nearby, I watched Hopalong Cassidy followed by Super Circus. Later I remember Howdy Doody, Lights Out and Captain Video. WHBF 4 came on the air the following year. My parents purchased a TV late in 1951. In the summer of 1952 I decided to watch the national presidential convention one day. I found what was happening on channel 2 much more interesting. I saw KPRC-2, KFEL-2, CBFT-2 and WMAR-2 that day. In retrospect, I'd seen nearly every station possible via E skip on channel 2 in one day on a conical antenna pointing west. Later I remember seeing semi-locals WTMJ 4, WBKB 4 and WKZO 3. In June of 1954 I saw a test pattern with KID on it late one day. Interference between WHBF 4 and WBKB 4 was bad in the summer months. Later a channel swap occurred one Sunday morning between Milwaukee, Chicago and the quad-cities.

A column in Radio-Electronics by Bob Cooper told me others were looking for these crazy signals. I joined the AIPA in the mid-fifties. My first convention was at Cardington, OH. I remember the host, Walter Spaulding, and meeting the New York dxers the first time. A later convention was at Speedway, IN. I went with Carl Lupton of Shelbyville, IL. I visited Barney Rauch of Peoria and BJ Bingham in Festus, MO briefly once too. The AIPA folded in July of 1963. I never dxed again for 20 years.

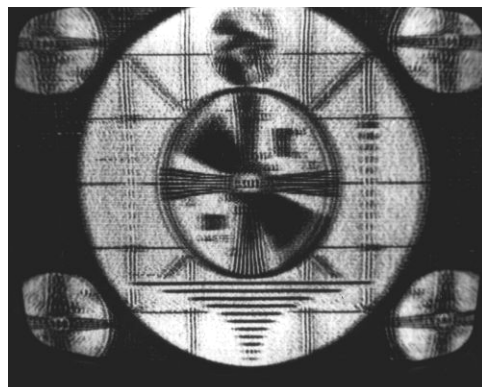

The first WTFDA convention was at a motel in Stegler, IL in late May of 1969. I remember meeting a young meteorologist by the name of Bedford Brown originally from Hot Springs, AR this one time. I've now mentioned most of the earliest Midwestern dxers I remember.

I installed a 30' tower, antenna and TV at my new farm home near Dixon, IL in 1983. The first time I looked for Es in 1984, YSR flashed across the screen for many long seconds. This Spanish station to the south had been battling WBRZ 2. The date and time was April 6, 1984 at 4:43pm CST.

On June 29, 1991 at 2:18pm CDT, I saw a strange Indian head test pattern with what appeared to be the head of a fighting cock pasted over the Indian. Years later a dxer in Louisiana helped solve the mystery by sending pictures he had taken. The fighting cock had evolved, but it was my old friend YSR 2 in El Salvador again. The fighting cock was simply a "2". These two loggings at 1960 miles are still my best. Other 2Es loggings were Los Angeles 2 and Seattle 5. All were shocking. Details would be too space consuming to relate.

The most shocking tropo ever was the night I received some Denver, CO stations plus Colorado translators and much in between, as the result of a hurricane. Earlier I'd seen snow-free reception into north Texas: Amarillo, etc and definitely a once in a lifetime opening. There were many openings into the Houston – 900 miles plus – area, usually due to frontal boundaries. I must not forget two Thanksgiving tropo openings to the east coast and more recent tropo to Pensacola, FL. All were shocking.

In later years I remember watching Ashville 33 many calm, clear nights in the fall. Not surprising, due to their elevation. In the dead of winter I'd look for the familiar Indian Head from CKTV 2 late at night via meteor scatter. It might still be there.

A few years ago Neal Kazaross of Barrington, IL came for a day and hooked his Icom into my sensitive system. It was a nice summer day with no tropo enhancement. The audio from many scatter signals – UHF's in Cincinnati, Minneapolis, Kansas City and Springfield MO were solid at 300-400 miles. I suggested trying for the impossible. How about Tuscaloosa, AL 33 at nearly 600 miles. They were always first to be seen during enhanced tropo to the southeast. Sure enough, while monitoring the open channel, the audio, ABC networks, slowly built up and faded out twice within an hour. Reception was brief and very weak. How was that possible? Was the signal reflecting off passing airliners?

I collect old radios and TVs now. I still have my 30 tube 1960 Mattison TV. I have the first mass produced TV, a 1946 RCA 630TS with a channel 1. A large 4 or 5 tube RCA UHF converter and some strange looking 1960 Philco TVs are included.

My prize is a tin fluorescent 20 inch by 30 inch black and yellow sign. An old TV camera and ABC logo are etched on its surface. It says KCRG 9. I went to the station in Cedar Rapids, IA and asked how such a sign ended up in an antique mall in Savanna, IL. A story for another time. The sign most likely hung in front of their early studios along the Cedar River. KCRG 9 went on the air October 15, 1952. I can vaguely remember someone in the old AIPA having an on-the-air picture of what is on that sign. Was it Seybold, Collins, Lupton, Bingham or Draeb?

I listed my most memorable and strangest of the strange analog loggings and events over the last 60 years. We might have one more opportunity for a return to the early wild west days after the changeover if the low band remains mostly open. YSR 2 or some other exotic station might appear again.

---

## AND FRITZE PRENTICE REMEMBERS WHEN

*I laid in the bed still running a fever and watching with rabbit ears the small B&W Zenith and changing the channel. I noticed a strong signal on ch3 that was running NBC programming just like KARK did--Days Of Our Lives soap opera. Then I heard and saw the station ID: "This is WLBT Channel 3, Jackson Mississippi".*

I grew up without cable until leaving home, thus I was exposed to OTA television at an early age and for many years. My first memories of television was when I was about 4-5 years old living in McGehee AR. We only got three stations clearly there at the time--KATV 7 Little Rock which had the big advantage of the Redfield transmitter closer to Southeastern Arkansas, KTVE 10 in El Dorado for NBC, and WABG 6 in Greenwood/Greenville MS another ABC station. I can only recall seeing CBS at my grandparents houses in DeWitt AR (KTHV 11 Little Rock), and the occasional trip to Berryville AR (KOLR 10). TV was an old B&W console, and the antenna was high on a tall pole pointed at Little Rock (I think).

We moved to Pine Bluff in late 1972, got color tv then for a year or so to North Little Rock in 1976 before moving to the Palmyra community near Star City in 1977. There was no cable service in the area then and even today. It was when we moved to Star City that I discovered tropo and E skip but didn't know what it was.

I had gotten my own small TV for Christmas in 1976 and never thought that anything outside of the area would come in. I had gotten sick and brought home. I laid in the bed still running a fever and watching with rabbit ears the small B&W Zenith and changing the channel. I noticed a strong signal on ch3 that was running NBC programming just like KARK did--Days Of Our Lives soap opera. Then I heard and saw the station ID: "This is WLBT Channel 3, Jackson Mississippi".

I was still sick from the flu, but that day stuck with me over 32 years later, as I witnessed my first TV DX.

I noticed from time to time when my parents changed channels on their TV (it was knob tuning, no remote) that there were occasionally stations between the stations--WREG and KTBS on ch3, WMC on channel 5, were the most common. I also "logged" my first DX stations on the rabbit ears and loop UHF antenna. Until 1983, there were no UHF stations in Central Arkansas and the closest ones were WPTY 24 Memphis and WXVT 15 Greenville MS which went on the air in the fall of 1980 (I still remember the radio advertising on some stations). The problem was that I never kept records of this and knew nothing about the WTFDA at the time. I managed to log St Louis's KDNL channel 30 once, but it was very snowy on that loop.

E's were discovered in about 1980 when I was home from school that summer between middle school and high school. This dubbed version of "The Incredible Hulk" in Spanish and the XEW Network ID came up on ch3. I also saw Cuban test patterns (the old style with the palm tree and "Cuba") and Canadian programming on ch3 both English and French.

I got into high school further and got more involved in other activities, including the usual ones. FM DX started to interest me more, but TV/FM DX in general got shoved into the back burner for many years.

In the following years I had cable and sat TV but still missed for some reason the antenna. I got one when moving back to Star City in 2005. I started keeping a log of my stations something I didn't do while in middle school/high school. Another thing that got me back in DX was DTV. My first "converter" was a US Digital HDTV receiver that I put in service with a HDTV monitor I purchased late in 2005. But for nearly a year, that USD box was my first converter box

(CONTINUED ON PAGE 19)

# KLEE-TV SEEN IN ENGLAND

As we rush headfirst into the Digital Age, Let's explore one of the most mysterious and unexplained events of the analog era. Most of you have heard about it. DX Horizons Volume 1 Issue 1 takes a look.

## STATION REPORT

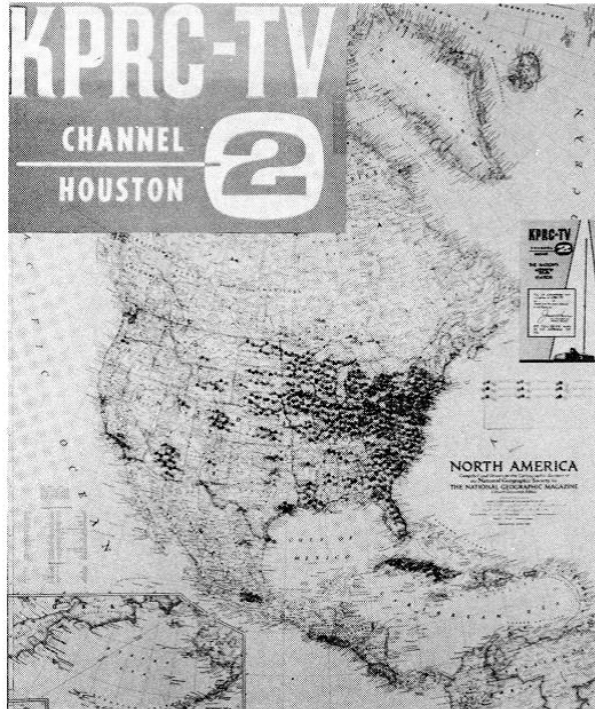

### KPRC-TV — Houston, Texas

One of the most intriguing chronic appearing DX stories involves the reception in England of an american channel 2 station . . . several years after the station had left the air. Actually the station remains on the air today, under a differing set of call letters, and new owner. That station today is KPRC-TV . . . that station in 1949 was KLEE-TV.

The story began in the mid 50's when an english experimenter fooling with some equipment he had modified for U.S. standards (although heaven knows for what purpose) astonished the world with a report he was watching Television Station KLEE-TV, Houston, Texas, from his London shop. The world of electronics was doubly astonished when it discovered KLEE-TV had been off the air several years. Immediately scientists, and psuedo scientists began working with their slide rules, to calculate how far the KLEE-TV signal had traveled (at the speed of light) before it came bounding back to earth from some stellar body, to be received in England. The figures told them nothing and everyone promptly forgot about the whole matter assuming a hoax. Everyone except the English experimenter who continued his dial twisting until in 1955 he did it again . . . so he reported. This unusual DV report has never been explained . . . nor verified. Nevertheless the station responsible (KPRC) nicknamed itself the NATION'S DX STATION. . . a phrase aptly backed up by several hundred DX reports it receives every year. For several years running, RADIO-ELECTRONICS TV DX column tabulations revealed KPRC-TV was being received by more DXers at more DX locations, from Maine to California than any other station in the country.

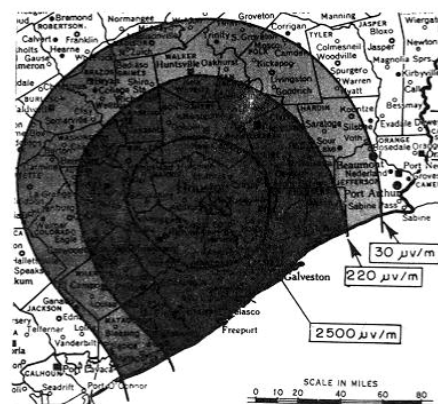

The engineering staff at KPRC-TV tabulated DX reports during each yearly period, 1951 to 1956. DXing HORIZONS has further tabulated this "Houston eye view of DX" for the years covered, and these are some of the highlights.

In the summer of 1951, KPRC was received 22 times in California, 106 times in Ohio, and 120 times in Pennsylvania! Whereas the next year, 1952, California did not report KPRC reception once, Ohio had but 20, and Pennsylvania a paltry 23 reports! Nor has Skip always favored the same areas for KPRC. Pennsylvania, Ohio and Michigan were hot spots for

KPRC Engineering Department TV DX Reporting Map

KPRC in the summer of 51 . . . while the summer of 53 saw Iowa (47 reports of reception) and Minnesota (42 reports) leading Ohio's 35 and Pennsylvania's 28 reports. Nor was 1954 like any of the previously mentioned periods. In 54 Iowa was the top state with 59 reports, followed by New York with 56 and Indiana with 47! Florida also showed strongly in 1954 with 44 reports. 1955 must have been a very poor year for E Skip all over because the leading state, Iowa, had only 17 reports . . . and normal front runner Pennsylvania a mere 7 reports! 1956, the last year this particular group of KPRC engineering reports covers, was also a very poor year for E Skip action. Michigan was the leader that year with a handful of reports . . . 11! While Pennsylvania had but one DX report. Compare this poor showing with the 120 reports received from Pennsylvania in 1951!

KPRC-TV FCC Contour Coverage Map

# BRUCE ELVING ON FM DXING

This is another article from DX Horizons, Volume 1, Issue 1. This issue is one of the most interesting DX magazines I've seen (aside from the VUD, and we're still in business). So take a look at a very young Bruce Elving and imagine what it was like to do FM DXing back then. Thanks to Bill Grant for sending it to us!

## FM Reporting

Edited and Prepared by  
Bruce Elving  
920 Laramie Street  
Manhattan, Kansas

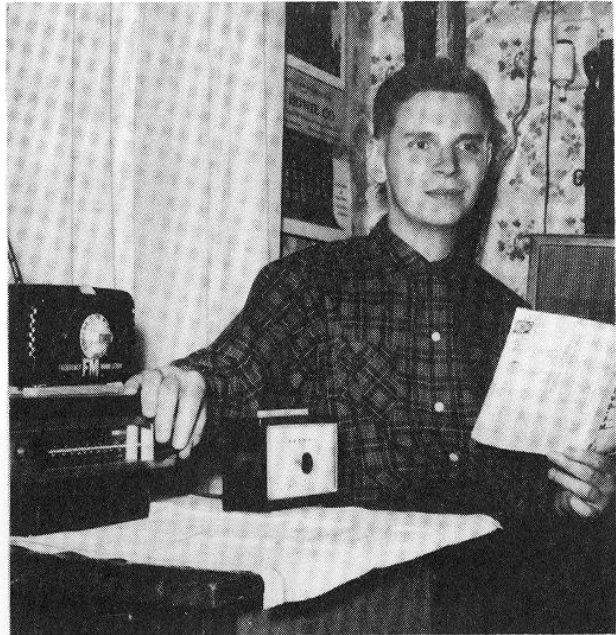

Just as the public's buying of FM receivers has risen sharply in the past few years in response to a demand for the better programs and high fidelity that FM radio offers, more and more people are discovering that the 88 to 108 megacycle FM band is a DXing paradise. All kinds of folks are enjoying the ever-changing thrills of long-distance reception of radio stations, or FM DX, as we prefer to call it.

The FM DX enthusiast may be the seasoned veteran of broadcast band or shortwave radio DXing. Or, he may have been attracted to FM radio through experiences with television DX reception, which enjoys similar reception characteristics to FM. Or, he may be one of the many persons who recently purchased his first high fidelity tuner or FM radio and, upon exploring the FM band, was fascinated by his set's ability to bring in distant stations. Whether old pros at the FM DX game, newcomers, or those who have yet to experience the thrills that this form of radio reception has to offer, all have a vital interest in this section of DXing HORIZONS, and can help it prosper. It's in response to a need we feel exists for a clearinghouse of information on the activities of FM DXers scattered around the world that this column came into being.

In order to make this an interesting column for all, it is important that we learn of your DXing exploits by means of our reports, mailed to Manhattan, Kansas. If you have been fairly active in FM DX, you could start the column rolling by sending a summary of your 1959 FM DX accomplishments. Perhaps you have found a particular type of antenna, receiver or other piece of apparatus that has been a boon to the quality of YOUR long-distance FM reception.

Thus, in addition to providing listings of the distant stations that are heard by the readers of DXing HORIZONS, will give tips on equipment that has proven successful for some of the nation's top FM DXers, and have reports on new technical developments that hold promise for better DX.

As editor of this section, I feel uniquely qualified to give hints and tips on FM reception, for I have been an FM DXer since 1948. In those eleven years, I have received stations from 33 states, the District of Columbia and Quebec from my permanent DX location of Duluth, Minnesota. To date, I have heard 346 FM stations in Duluth and have some 240 of these verified. Although I have spent the greater portion of the last two years in the states of Iowa and Kansas (I am on the faculty of Kansas State University), I have found it possible to continue adding to my Duluth FM listings on my occasional return trips there, especially during the summer. Situated on the side of a hill affording a clear view across Lake Superior and vast areas of northern Wisconsin, the location has proven to be an excellent one for long-distance FM reception, with regular reception possible at distances of from 250 to 300 miles. My receivers for FM DX have included a Zenith FM-AM table radio and Harman

FM Department Editor Bruce Elving with hand poised on the Harmon Kardon THEME Tuner at his Duluth DX Den

Kardon "Theme" tuner, which has been in use since 1956. Additional equipment includes a Jerrold FM-TV signal booster. The antenna used in Duluth is a rotatable, ten-element FM yagi.

No longer are the words of the manufacturer's instruction booklet for a 1949 FM radio, "Do not expect to receive other than your local FM stations," taken literally. If you are a comparative veteran at FM DXing, or if you are a person yet to tune in an FM station for the first time, you can now see that FM DX is a practical reality. It remains for YOU to join, within this FM DX section, the ranks of FM DXers the world over — and add to the development of one of the fastest-growing DX fields.

Several interesting FM DX reports on hand at the editorial office of DXing HORIZONS. Among these are reports from Dale Chote, Toronto, Ontario and Joseph Tibiletti, Victoria, Texas. FM DXer Chote is one of the rare few who got their start in FM DXing in FM itself . . . not TV or short wave. Dale uses a Sherwood Model S-3000 FM tuner, and two five-element yagis . . . one cut for 98 megs, the second for 108 megs. His total number of stations was pushed to 80 at 0037 on November 9th when he was listening to a weak station on 94.5 megs . . . and a three second BURST over the weak fringe station brought the call letters WHDH-FM, Boston, 455 miles over the mountains of upstate New York. This was probably a strange phenomena known as tropo bursting, which we hope to cover in a future issue of D-H.

Victor Tibiletti, a TV DXer from Victoria, Texas took a few spins on the FM dials June 28-29th and logged 46 FM DX stations from 200 to 1,400 miles distant. Stations in Florida, South Carolina, and up the coast to New York City and then west to Indiana, Illinois, Minnesota and Wisconsin and south to Kansas City were logged in the 24 hour period.

Deadline for FM DX reports for February issue is January 11 in Manhattan, Kansas.
