THE WORLDWIDE TV-FM DX ASSOCIATION

Serving the UHF-VHF Enthusiast

THE WHE JUHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, GREG CONIGLIO, BRUCE HALL, KEITH McGINNIS AND MIKE BUGAJ.

JUNE 2010

Finally! For those of you online with an email address, we now offer a quick, convenient and secure way to join or renew your membership in the WTFDA. Just logon to Paypal and send your dues to sales@wtfda.org.

Use the address above to either join the WTFDA or renew your membership in North America's only TV and DX organization.

Membership with Paper VUD: \$25/year Membership with eVUD (.pdf): \$11/year

Over 110 WTFDA members renew their club membership with Paypal. Why not join them?

SKIP SEASON!

Skip season seems to have started a little early this year for a lot of people. There was a big Es opening for eastern DXers on May 3rd and a major opening to NS/NF for northeastern FM Dxers on May 14th. Skip made it to FM for midwestern DXers on the 18th. And this is just the start of it!

Colombia and Venezuela both made it into Ontario on the 3rd and the proof is in the screengrabs on this month's cover taken by Bill Hepburn. These are simply amazing!

MEMBERZ AND MORE!

Let's welcome in three new WTFDA members this month. **Michael Ehrhardt**(NY) and **Steve West**(VA) are both old timers who have been in the club in ages past. Mike knows Bill Thompson and Dave Nieman. I know Steve from swapping tapes with him decades ago and I think he did a VUD article long ago regarding modifying a 7 foot dish and I think it is still in the archives. And lastly we we welcome **Jonathan Hamilton**. Jon is in St. Catherines, ON. Welcome to all three of you!

Renewals were received during the period of 4/24 to 5/10 from Timothy Clampit (IL), Steve Naetzker (AZ), Eric Sundius (AZ), Gray Fulk (NC), Larry Kenney (CA), Peter Baskind (TN), Robert Delaney (IL), Neil Griffin (SC), Dan Oetting (DE), Mike Glass (IN), David Sinclair (BC), Michael Beu (TX), Tim Alderman (CA), Fred Nordquist (SC), Jacob Norlund (MN), Nick Langan (NJ) and Jim Gill (FL). Here's a big thank you to all of you for supporting the club. Without you, there isn't any.

HEY I'VE BEEN CANCELLED

If you bothered to look at page two you might notice that the Paypal section has changed a little. We changed the email address you use to renew your memberships because Paypal was automatically billing because the Paypal account was set up to take subscriptions. That was a mistake and the automatic billing was creating problems and confusion. So, we've taken the subscription button off the WTFDA website and we want you to use the email address (sales@wtfda.org) that's on page two instead. Doing this makes our Paypal account work like a "normal" account.

As a result of this change, some of you will be receiving emails from Paypal that tell you that your subscription has been canceled. If you get one of those emails, ignore it. It's not true. Over the next few months there are around 50 of you who will find one in your inbox. Don't panic, just delete it. We have to get your email address out of the "recurring payment" list and when we do that, a cancellation email gets generated and we can't prevent it.

FM ATLAS #21 IS NOW AVAILABLE!

FM Atlas-21 has been printed and is ready to mail out. Price will be \$19.95 plus shipping, but Bruce Elving hasn't figured out what shipping will be, so people ordering from this notice can buy the 288-pages book for \$20 total. It is totally up to date, including computerized maps and directories showing FM stations, translators and low power FM stations of North America, including who is stereo and who suffers from the disease of being monophonic. Has HD, RDS and SCS information for each station. We have 900 of the books to sell; the printer did not quite supply all of the 1000 books we ordered, but they are ready now for the skip DX season! Payment by major credit cards, PayPal, at 1-800-605-2219, or check or money order to "FM Atlas," PO Box 336, Esko MN 55733-0336.

A WELL-DESERVED PROMOTION

WTFDA's Fred Vobbe has been promoted to Corporate Director of Engineering Block Communications of Toledo.

Chief Executive Officer of BCI, Allan Block, said, "Fred has earned this opportunity through hard work, imagination, resourcefulness and loyalty. He has seen our station(s) through transitions to stereo, digital, HD, and most recently our purchase of three other Lima(OH) stations." Way to go, Fred!

POWER MATTERS!

Darn right it does! This from **Cal Glover** down in NC: "I think that WSKY-DT's recent changes might show the way for the FCC to go regarding power allocations for high-band VHF DTV stations. Up until the first week in May, WSKY was operating on (real) Channel 4 at something like 12 kW. Here in Kill Devil Hills,

some 48 miles southeast of the tower, their signal was a very sometimes thing. In fact, it wasn't there most of the time. And when there was a signal, there was lots of pixilation and lock-up. But around May 10, the station moved to (real) Channel 9 and upped their power to around 70 kW. Now they provide a very reliable and stable picture.

Other high-band VHF DTV stations have upped their power, but I don't think that they've gone up to this power level. Maybe the magic number for real VHF replacement footprint coverage with ATSC hovers around 100 kW. With such power, these stations would be able to power through the curtain of electrical interference that tends to sap ATSC on VHF. I'm not sure, however, what kind of co-channel interference issues might arise with such power

levels or how they would manifest themselves on the screen.

With its new power, I would think that WSKY-DT might become a DX target on the east coast and beyond.

HAPPY ANNIVERSARY!

Solomon out on the Cape celebrated his 25th year of Radio Broadcasting on May 19th. Happy Anniversary, Steve! The first time I met Steve was at his apartment in East Hartford one evening after work when I showed him how to change filters in his receiver. Since then he's become extremely dangerous with a soldering iron.

CHANNEL 2 AND 3 E-SKIP MAPS

Courtesy of Bill Hepburn and offered as pdf files on the tvfmdx email list. You might remember these maps from the old 70s and 80s WTFDA TV Station Guides. Good things never go obsolete.

Thanks to Dennis Smith for information appearing elsewhere in this column.

amendments.

- Last month, you read the FCC has proposed to assign channel 4 to Atlantic City, New Jersey. Now, they have also assigned a VHF channel to Delaware; channel 5 will go, as proposed, to Seaford.

The proposal is supported by Sen. Kaufman of Delaware, who wanted FCC to assign a channel to a place where Wilmington residents can benefit.

The FCC ruled that Section 307(b) of the Communications Act requires an equitable distribution of services. Wilmington is already served by 14 full-power stations (most transmitting from Philadelphia) while Seaford is only served by four. The FCC feels it's required to allocate the new channel to Southern Delaware.

As with the Atlantic City proposal, PMCM supports the allocation of channel 5 to Seaford as long as the allocation doesn't preclude the move of a PMCM station from the West to Delaware. In this case, the PMCM station is KJWY-2 Jackson, Wyoming, and it wishes to move to Wilmington. (the transmitter would be in Philadelphia)

The FCC has denied the KJWY move, but PMCM's appeal is pending. The Commission states the channel 5 allotment won't preclude the move of KJWY if the courts overturn the FCC decision.

ABC objects to the allotment. They argue it would prevent a planned 2dB power increase for their WPVI-6 Philadelphia, as well as upgrades at other area stations.

The FCC decided to attach a condition to the new allotment. Anyone building a station on channel 5 will be required to accept interference from WPVI to up to 2% of the population within the service area of the new station. The Commission was not able to identify any other stations, besides WPVI, that would be affected.

Fox also objected. They claim that, since the new station has never had an analog facility, the PSIP rules would require the new station to use major channel 5. Fox's WTTG Washington, which was on analog channel 5, is required to use major channel 5 as well. And any new station in Seaford is likely to have significant coverage overlap with WTTG. Fox fears having two channel 5's will result in confusion, and in some viewers being unable to receive WTTG.

The FCC notes there's an "out" in the PSIP standard that allows assignment of other

^{*} Asterisks mark a number of applications for new LPTV stations in the West which have been amended to specify digital operation. Other changes – often including significant relocations – are included in these

major channels when necessary to avoid conflicts. They've indicated the new station will be required to use major channel **36**. This happens to be WTTG's *RF* channel assignment.

Finally, the "Broadcast Maximization Committee" objected on the grounds a new allocation on channel 5 would prejudice a proposal to reallocate channels 5 and 6 for FM radio.

Here, the FCC indicates if a decision is made to reallocate channel 5 to another service, the new Seaford station can be moved to a different channel. (reading between the lines, I suspect the Commission has no intention of reallocating any VHF TV channels to FM radio or any other service.)

- Yes, KSCE-38 El Paso has applied to reactivate their analog transmitter.....

From their STA request filing:

"The station has many indigent former viewers who have been unable to see the religious and non-religious programming offered by KSCE. We estimate there are as many as 500,000 analog receivers still in use in the market. The former analog viewers have been very vocal in contacting the station to say they can no longer receive the signal because they cannot afford either a digital receiver, or a cable or satellite subscription."

Then, referring to the well-publicized drug wars going on just across the border in Cd. Juarez, Chihuahua:

"The Commission is requested to take official notice of the news accounts pertaining to the drug wars that have infested portions of Mexico and particularly Juarez. Because of the rampant violence associated with the drug wars, American citizens in bordering El Paso need to be informed regarding potential dangers in traveling near the border or in crossing the border."

As Trip noted when he posted note of this on his http://www.rabbitears.info blog, an Act of Congress prohibits the FCC from granting this request. Congress can't keep the Commission's staff from getting a good laugh out of it though!

- Dennis forwards subchannel data for two Los Angeles-area stations:

KJLA Ventura (RF-49):

110 121 (01111111 (111 1 1)) .

- The fine for WFUN-LP Miami was, strangely enough, <u>not</u> for exceeding the power on the station's license. (though they <u>were</u>, in fact, running nearly three times authorized power) Rather, it was for exceeding the maximum power permissible for any digital LPTV. In this particular case, it happens licensed power was equal to the maximum permissible for a digital LPTV. WFUN was also fined \$8,000 for problems with EAS equipment.
- The CBC has applied to convert Frenchlanguage station CBLFT-25 Toronto back to a full originating station. It has been formally a relayer of CBOFT-9 Ottawa. (although it has been originating some local programming in Toronto)

Converting CBLFT back to a full station will allow it to solicit local advertising in Toronto and other areas served by the other Ottawa relayers that will be transferred to the Toronto licence. It will also establish a licencing requirement to originate local programming.

No technical changes are proposed.

- I believe KCPM-27 has been dark since their analog was required to sign off last year.

Good DX!

OTHERNEWS —

Corus is selling all their radio properties in Quebec to Cogeco Incorporated. The stations involved are CFQR-92.5, CKOI-96.9, CHMP-98.5 and CKAC-730 in Montreal; CFEL-102.1 and CFOM-102.9 in Quebec City; CKOY-104.5 and CHLT-107.7 in Sherbrooke, CIME-103.9 in Saint Jerome, CJRC-104.7 in Gatineau-Ottawa, and CHLN-106.9 in Trois Rivieres. It is unclear as to why CKRS 98.3 in Saguenay-Chicoutimi was not mentioned or whether the deal also includes the licenses for CINF-690 and CINW-940 which recently went dark. Cogeco will either have to apply for an exemption from the common ownership policy or flip some of these stations as they will now be over the allowable number of stations in Montreal, Quebec City, and Sherbrooke. The whole deal is subject to CRTC approval.

NEWS ITEM: <u>FM IBOC POWER INCREASE HAS TAKEN EFFECT</u> - Those FMs that want to increase IBOC power by 6 dB can now do so and simply notify the FCC by letter within 10 days.

That's because the notice procedures for implementing the power increase went into effect on Monday, May 10. Prior to that you needed special temporary authority.

There is a new electronic form on the way for e-filing digital notifications in the FCC's CDBS system. However that needs approval from the federal Office of Management and Budget. The new, simpler, form eventually would replace the formal notification letter in which you give the commission details like the date you raised power as well as your analog and digital ERP.

Stations still must file for an STA if they want to increase by the full 10 dB or if they are a superpowered FM. Those will be reviewed on a case-by-case basis.

As of May 12, 40 stations had been granted an STA. Another 10 were dismissed because they didn't provide enough information. Of the 40 that were okayed, most were for the 6 dB increase (to 14 dB below carrier) or less.

Examples of large-market approvals are KSCF, San Diego; KJAQ, Seattle and WRKS, New York. Increases in smaller markets include those at WQNY, Ithaca, New York, WGTD, Kenosha, Wisconsin and KUWC, Casper, Wyoming.

The FCC released the power increase order in late January. Nearly half of the applications were filed in February, with the rest divided between March and April filings. One, KDUR, Durango, Colorado was filed on May 4 and approved the next day.

NEWS ITEM: *FM Atlas-21* is available and ready for you to add to your DXing bookshelf. Price will be \$19.95 plus shipping, but Bruce Elving hasn't figured out what shipping will be. So if you order, and mention you read about it in FM News, you can buy the 288-page book for \$20 including postage!! *FM Atlas-21* is totally up-to-date, including computerized maps and directories showing FM stations, translators and low power FM stations of North America, including stereo and monophonic information, HD, RDS and SCS information for each station. Payment by major credit cards, PayPal, at 1-800-605-2219, or check or money order to "FM Atlas" PO Box 336, Esko MN 55733-0336.

NEWS ITEM: Back in the April issue we had word about two new Sangean portable AM and FM HD-capable radios. Since then, I have been attempting to obtain some updated information concerning these radios from the manufacturer. Finally, a local Sangean representative contacted me, but the news is not good. The original Sangean news item stated they were working on two models: one model called the DT-600 with basic features that was slated to be released in June; the second, named the DT-800, was to be a 'high-end' version with a few added features would be out in October. Word now is, that they have decided not to produce the cheaper model and go with the DT-800 only. But, the "DT-800 schedule of production has not been finalised, therefore no initial arrival date in the US is available as yet." I've been promised an update when Sangean finally decides to market this radio. If and when I do, I'll pass that information along.

Thanks to Shawn Axelrod, Bruce Elving, Deane McIntyre, Dave Schmidt, Bob Seaman, Radio World Online and Upper Midwest Broadcasting for news. If you hear any changes occur on your FM dial, share the news! 73

THE 2010 EMISORAS DE FM BY JIM THOMAS

This 100 page book is available as a PDF file ONLY and is free to anyone who has ever bought a book in the past. For new users the 2010 Emisoras is just \$10. Send \$10 via Paypal to sales@wtfda.org. Mention Emisoras de FM when you send money. In return you will receive a password to unlock the publication after you download it at http://www.wtfda.info. Checks/money orders also accepted to the club address. *Sorry, but no hard copy of this publication is available.*

Jeff Kruszka, Editor 1909 Lost Lake Place Pearland, TX 77581 jkruszka@sbcglobal.net

June 2010

We welcome new member and new contributor, Garth Jensen of Markham, ON. Garth uses a CM 4221HD antenna and a homemade pair of rabbit ears for VHF, both connected to a CM7777 preamp (mounted in the family sunroom!). Receiver is a Zenith DTT901 digital box and Panasonic TV (TH-50PZ77U).

The skip season is getting a real early start this year. April 24th is the earliest I've ever experienced any kind of Es by 4 days. Despite the skip and "DX Sherlock" showing double hops toward South America I saw absolutely nothing on the TV. Total logged to date: 1,258. The religious repeater station of KEAR from Scranton on 89.5 has been off the air for about 3 months. It finally came back on, on 5/4 with the same format just in time to block the channel again during skip season! Its repeater on 103.9 has been an open carrier all of these months and it still is now. Isn't this an awful waste of energy? Amazing.

Jeff Falconer, Clinton ON Radios: Sangean HDT-1X, Sony XDR-F1HD Antennas: APS 13 at 22', rabbit ears New = *, Time in ELT, Distances in miles

Can You Identify This Antenna?

Paul Mitschler found a picture of his very first TV antenna on a frame of old film (see left pictire) and created the photo at the right showing now it looked in more detail. The challenge now, for those of you who chose to accept it, is to discover what it's called, who made it and when. Good luck!

This magnified piece of film shows the lead-in wire, but does it attach where Paul thinks it does, or at another point on the antenna?

6 Meter/2 Meter Amateur DX

50 Mhz The *Magic*\Band

Peter Baskind, N4LI 3225 Forest Hill-Irene Rd Germantown, TN 38138 N4LI@ARRL.net

It's about time. The Summer sporadic-E season has arrived. If the usual pattern for the Summer follows, the first really big opening of the season could come any day now – and, indeed, may have come by the time this goes to press.

A few anemic openings have already occurred. On May 10, much of the southern tier of states was hearing something rare – Peru on 6 meters (50 MHz). Here in Memphis, OA4TT was peaking S5. That was a nice start to Summer 2010, to be sure. Outside my part of the country, it has been a bit slow. Paths between New England and Florida have been active, but that's not at all uncommon. Certainly, the coming weeks will get busier – fast.

Sporadic-E is already off to a strong start in Europe. Mid-May has brought a few 144 MHz (2 meter) openings. Europe does seem to have more intense and frequent high-MUF events. I am not sure why.

There has been a little tropo so far this Spring and Summer, but nothing terribly unusual. Here in my part of the country, the first week of April brought a nearly week-long event with some days quite active. For me, the high point must have been the 6th, with several nice contacts, most notably XE2MVS/DL95 in Monterrey at just over 900 miles. I hope I get a QSL.

* * *

It's contest time! The **ARRL VHF QSO** Party starts June 12. For many, this is the biggest VHF event of the year. Timing is not accidental. ARRL schedules this contest at the expected peak of the Season. When conditions are hot, 6 meters is incredible. Stations may be stacked up from 50.125 to 50.250, or even higher. Further, many folks become "rovers," moving about from grid to grid, some of which may be quite rare. A few years ago, I worked a rover in a Nevada grid so remote, one can barely find a named community anywhere on the map. That's fun.

The fourth weekend in June is always ARRL Field Day. This is the biggest date on the calendar for those who love dehydration, sunburn, and bug bites.

This year, the event begins midday on June 26th. Even if you're not a ham, you might enjoy visiting someone's site – visitors are always welcome. You might even get a chance to work a few stations.

Attention all ham radio operators and WTFDA members!

Peter needs your help, comments and contributions to keep this 6m column going! If you feel that this column is of interest, you can help by supplying Peter with whatever material you find fitting and proper. Email Peter with any ideas you might have for publication. Thanks —*The Management*

The Editor's Note

I think most would agree that we saw a solid start to the E-Skip season in May. In particular, strong openings occurred on the 3rd and 14th, giving pretty much everyone a taste. Notable receptions included Jim Pizzi's log from NY of WLBZ-DT 2 in Bangor, ME via Es on the 14th, at just 445 mi. The weather hasn't been too conducive for tropo, especially across the north, but we look for things to get more interesting in June.

One note of my own to keep an eye or ear out for---there was strong Es activity on the 3rd to South Florida here in the northeast. Both Jeff Lehmann in MA and I heard the audio from WEYS-LP 6 in Miami and saw that it was actually using RDS on its audio, with its PI code translating to the calls "KYTK". The station evidently gets out well, as I was able to aim around the monstrous hash my local WPVI-DT produces to hear it. One to look out for if you have strong E-Skip to the Miami area this season.

Says Robert: "Much of the spring I spent reading about great Es openings through the winter on the propagation logger and DX Sherlock (6m), with all the Es just a little too far South or when I was away from the TV. Only time will tell if the May 3 opening was an early start to a great season, or just an off-season fluke.

The Lake Erie tropo that had been around every spring to some degree or another was, for all intents and purposes, completely absent this year, save one catch of WJET 24 Erie I forgot to log.

The good tropo was back in January, when foggy weather and no wind covered a huge area of the interior Eastern US.

Not on temperance log: WUDT-CD 8 (Daystar) is on the air in Detroit, and it performs better than I expected."

The Editor's Note

Several good E-skip openings impacted parts of the west throughout the month of May, with reports from California, Arizona, Montana, and several other states during a few days throughout the month. Gulf of Mexico and plains tropo has been for the most part quiet, but our first widespread heatwave or two should change that. Enjoy the report from Steve N6NKS below, as well as correspondence from Dennis Park Smith and William Draeb.

Steve McGreevy N6NKS

Dear Nick,

By now, you've been hit with a lot of reports for the great day of 03 May, which I almost missed out on until about 5 p.m. local time here (reports by 6m hams said the Es opening(s) were going all day on that day, and a friend in NM (Mike, WB6EER, near Magdelena, NM) reported his car-radio filled with FM signals as far as Louisiana and possibly Puerto Rico, he says). Interestingly, the opening returned to 27-28 MHz as soon as it was first-light (dawn), and climbed into the low-band TV spectrum by 0830 PDT 04 May, 2010. I feel certain Es is caused by still-unknown emissions from the sun-why are these "outbreaks) global?? Not T-storms like some believe.

Attached are three photos, shot with a small Olympus camera in movie-mode, then screen shots made of a few decent parts of the movies. I used a small B&W Panasonic Ranger 515 set (very sensitive) and a large log-periodic antenna fed with 300-ohm twin-lead.

I have a growing web page of my own NTSC TV DX made in the Owens Valley of California's northern Mojave Desert region at: http://www.auroralchorus.com/tvdx.htm

We never have had any but very weak low-band signals via tropo or groundwave, so this area is great for TV DXing. Someday, I might get into DTV DXing, but it lacks the "funkyness" of NTSC DXing because I love the QSB, ghosting, negative images, distortion, CCI bars, etc., available with NTSC (I'm old fashioned for being just age 46 I guess). I showed my neighbor this DX and he was thrilled, as he loved old black and white video imagery from the 60's - it reminded him of old-fashioned rabbit-ear TV reception.

Very Best 73,

Steve McGreevy, N6NKS

Dennis Park Smith

3605 Sam Remo Drive Santa Barbara, CA 93105-2523

Tel: (805)687-7803 Times 24-hour PDT

This report is for April 2010, with sightings at my place. There was very little tropo, along So-Calif coast to San Diego/Tijuana up to 200 mi / 320 km.

Mar30-Apr5 None (windy-cooler, some rain)
Apr 6-8 Variably poor (mostly calm)

Apr 9-17 None (unsettled, rain)

Apr 18-19 Variably poor (calm) Apr 20-24 None (rainy & windy)

Apr 25-26 Poor (calm)

Apr 27-30 None (some rain, windy)

Apr 8 morning, local analog K28GY 28 SBarb/Goleta/etc at 15 mi W (xltr KCET d28 PBS Los Angeles) left the air. Apr 8 apx noon, silent nodata DTV-28 signal was noted.

Apr 23 evening, the 'new K28GY d28 data & pgmg was on & seen My SBarb DTV total is now 50 (1 new).

I bought a ATSC/NTSC Auvio 7" portable TV at Radio Shack. A disappointment. Both DTV and analog did not have much sensitivity on locals, let alone any distance, even on hilltops. Either defective or just not adequate technology yet. I returned it in 2 weeks.

Best of DX to All Dennis

NRC/WTFDA Convention 2010

The National Radio Club and the Worldwide TV/FM DX Association are coming to Rochester, New York for their joint 2010 convention!

The convention takes place Friday, August 27-Sunday, August 29 at the Brookwood Inn in Bushnell's Basin, a quaint village along the Erie Canal just east of Rochester.

For early arrivals Thursday night, we'll have an informal dinner and perhaps a Rochester Red Wings baseball game.

On Friday, it's a day full of station tours around Rochester, followed by a cookout at the home of club member Jim Renfrew - and a chance to play with his elaborate DX setup!

On Saturday, we'll have more station tours, followed by dinner, a speaker and the world-famous club auction. (Note: please - no children during the business meeting or speaker's presentation; hold all questions until after the speaker has finished.)

And on Sunday, it's the Quiz before we all go our separate ways. If you're thinking of a family vacation this summer, Lisa Fybush is organizing family activities for non-radio-geek spouses and children.

Please e-mail scott@fybush.com if you want more details.

--LODGING - Our host hotel is the Brookwood Inn, conveniently located just off I-490 and adjacent to the historic Erie Canal. Rooms are just \$65/night for up to four people, and breakfast is included.

To make your reservation, please call (585) 249-6000 and mention you're with the National Radio Club.

--REGISTRATION - Convention registration information will be announced in May ... for now, save the date, and please let your convention hosts know if you're thinking of attending so we can start to get a head count. Drop Scott a line at scott@fybush.com or 92 Bonnie Brae Ave, Rochester NY 14618. We'll have much more information as the convention gets closer...stay tuned!

Your 2010 Convention Committee: Scott and Lisa Fybush, Jerry Bond, Greg Coniglio, Rick Lucas, and Jim Renfrew

Weak Signal Video in Canada

REPRINTED FROM DX HORIZONS, OCTOBER 1960
"STILL-the home of the true DXer"

Television in Canada did not get underway until September 6, 1952, when CBFT signed on with French-English programming in Montreal. Two days later CBLT took to the airwaves in Toronto (on channel 9), and video had finally arrived for an estimated 10,000 set owners in the Toronto area, who had been struggling with fringe area installations for nearly four years, watching snowy but acceptable reception from WBEN-TV, channel 4 in Buffalo.

If one drove north from Toronto in the summer of 1952, only months prior to the inception of local television in Canada, it would have been an education in DX reception. This writer did so, and many details of the trip are still vivid.

For some unexplained sociological reason, Canadians in general, and Ontario residents in particular, wanted video reception in the worst way. '52, you may recall, was the year of the commercial birth of the long yagi. Eight, ten and even twelve element models quickly replaced the time honored four and five element arrays across the U.S. Going north from Toronto, the single and stacked fives, cut to channel 4, evolved into single tens, and then as you approached Barrie on Route 11, double tens. North of Barrie, still on Route 11, and approaching Orillia, double tens had addition. An antenna mounted pre-amplifier using the then new cascode 6BQ7 tube. Approaching Huntsville and the 200 mile point from WBEN-TV, the antennas thinned out, in quantity, but the quality continued to improve. Now double sets of stacked tens (forty elements) were common, with open wire low loss line and pre-amplifiers at both the antenna and receiver. From Huntsville to North Bay, which nestles on the eastern shore of Lake Nippissing, there are few homes and even fewer television antennas. People in this area tell you of trouble with AM radio reception, and television, they explain, "is just for the city folks" in Toronto.

As early readers to DXing Horizons recall, television continued north to North Bay in those years . . . 290 miles from WBEN-TV, North Bay resident Stan Hosken had television, but it took a 276 element antenna to do the job!

But the spirit of weak signal video reception, as evidenced by the early viewers in Ontario, had its effects on the Canadian Board of Broadcast Governors. Pushed by the enthusiastic reception given WBEN television by Toronto residents (all of whom were forced to pay exorbitant fees to import receivers from the U.S.), the BBG quickly OK'ed television for those areas already receiving American stations. It was a matter of pride, explained the

BBG. Canadians should be watching Canadian Television

TO THE NORTH ... FAR NORTH!

In 1954, the operator of the only radio and record shop in the Northwest Territory ordered a television receiver from Edmonton. The receiver, some yagi antennas, a booster and a few strands of wire were flown in, along with everything and everyone that came Yellowknife. Harold Glick was his name, and in the next three years, he was to make weak signal television history. Glick had been following with interest articles in magazine, which occasional DX reception. Assuming a "why not attitude," he installed the receiver, stacked the yagis, and sat back to await results. He had read of E skip reception, and trops. Calculating his nearest station to be CFRN-3, Edmonton, Alberta, 640 miles, he ruled out trops. But skip, he and many others were surprised to find, occurred on an average of eight nights per month . . . not just during the summer, but all year around! And some of his best openings occurred in the spring and fall, when E skip activity over Southern Canada and the United States is practically nil.

Several patterns soon evolved with Glick DX activity. Located on the northern shore of the Great Slave Lake, he was as far due east of Fairbanks, Alaska, (1,000 miles) as he was north of Great Falls, Montana. He was less than 300 miles south of the Arctic Circle, and Aurora Borealis displays were frequent and widespread. He first suspected his semiregular reception from such stations as KFAR-Fairbanks, Alaska, CBWT-4, Winnipeg, Manitoba, KXJB-4, Valley City, North Dakota and CKCK-2, Regina, Sask., was somehow associated with the aurora. He still believes so, although in the six years of experimentation Click has learned not all auroral displays bring DX reception. However, in six years of working with DX reception, Click has never seen more occasional burst before Mountain Standard Time, while DX often lasts until 0200 MST, when KFAR leaves the air for the night in Fairbanks. By southern standards,

WEAK SIGNAL VIDEO DX CONTINUES FROM PREVIOUS PAGE

his station total is not impressive, nor are his distances. Click's greatest distance has been WGR-2, in Buffalo, on several occasions, 2,000 miles. March and September are often the best DX months. May and June are usually the poorest.

Reception closely resembles E skip patterns in the states ... strong video and audio, deep fading, occasional ghosting. It is not aurora, in the sense of the garbled video and audio ... but most observers do believe it is a form of "cross aurora" skip, with the signal riding with and through the aurora laden E layer in much the same way a surf board rides over and with a heavy wave.

EXAMPLE ... TYPICAL SEPT., 1955 (Excerpts from the log of Harold Click, Yellowknife, N.W.T., Canada)

Sept. <u>2</u> 2100 MST - KFAR (Fairbanks) <u>3</u> 2100-2340 MST-KFAR, KXJB (Valley City, N.D.), CBWT (Winnipeg) <u>5</u> 2230-0100 (6th) -CHCT (Calgary, Alberta), CFRN (Edmonton, Alberta), KHQ-6 (Spokane), KOOK (Billings), KFAR-2
9 2300-2330-KFAR, CBWT 11 2300-2400 - KFAR
12 2100-2200-Channels 2-6
Active, KOOK, KHQ, KID-3 (Idaho Falls) identified.
17 2130-2330 -CKCK, CFRN, CBWT 18-29 Only bursts.

For a two-year period, until near Arctic ice and winds beat it down, Click experimented with a two bay rhombic array. His biggest complaint in six years of DXing? There are two: (1) "DX reception is so frequent up here that several dozen families have ordered TV receivers from Edmonton, and now I have to keep them going! We have a telephone network, and when DX appears, everyone is called so they won't miss any reception. (2) "Most reception occurs late at night ... I lose sleep, and usually only catch the tail end of movies. I've seen station sign-offs a hundred times ... but have never seen one sign-on!"
