If you only read one page of this  
VUD, read PAGE THREE!

# THE WORLDWIDE TV-FM DX ASSOCIATION

Serving the UHF-VHF Enthusiast

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, GREG CONIGLIO, BRUCE HALL, KEITH MCGINNIS AND MIKE BUGAJ.

Editor and publisher: **Mike Bugaj**

Treasurer: **Keith McGinnis** wtfda.org Webmaster: **Tim McVey**

wtfda.info Site Administrator: **Chris Cervantez**

Editorial Staff: **Jeff Kruszka, Keith McGinnis,**

**Fred Nordquist, Nick Langan, Doug Smith,**

**Peter Baskind, Bill Hale and John Zondlo,**

Our website: [www.wtfda.org](http://www.wtfda.org); Our forums: [www.wtfda.info](http://www.wtfda.info)

MAY 2011

Finally! For those of you online with an email address, we now offer a quick, convenient and secure way to join or renew your membership in the WTFDA. Just logon to Paypal and send your dues to [sales@wtfda.org](mailto:sales@wtfda.org).

Use the email address above to either join the WTFDA or renew your membership in North America's only TV and DX organization.

Membership with Paper VUD: \$24/year

Membership with eVUD (.pdf): \$10/year

# The Future of the VUD & WTFDA

This is a question to the entire WTFDA membership. What would happen to the WTFDA as a club if suddenly the VUD stopped being published? Would it matter? Would you want to keep the WTFDA going without it, even if that meant a WTFDA in a different form?

Here's why I ask. In two short months I will turn 65. I have already retired from my technician job back in August of 2010. I have been publishing the VUD for you all for the past ten years. At some point I will stop. I can't conceive of me publishing a paper VUD at age 70, or even 67. If I were ten years younger I would still be looking forward to doing the paper VUD, but not now.

Find another publisher, you might say. Some might remember that I took this job because no one else wanted it back then and my gut feeling is that even more so, nobody is going to want to publish both a paper VUD and an eZine.

I've already emailed the board about my future plans and they are supportive.

Almost everyone who joins WTFDA now takes the eVUD. It's been around since Sept. 2001 and has about 90 happy readers. Preparing the eVUD takes considerably less time each month than preparing the paper edition. I can continue publishing the eVUD as long as I stay healthy (you never know). But if I'm unable to do it for some reason, the information will be available on the WTFDA Forum site.

So effective immediately, I will no longer take **NEW** subscriptions for the paper VUD. The paper VUD is no longer an option for new members or re-joiners. Membership forms now reflect that change. I will return any \$24 checks I receive for new memberships and/or contact them about taking the eVUD instead.

WTFDA members who now receive the paper VUD **will** continue to receive the paper VUD until a time to be determined (12-18 months?). For members who, for one reason or another, have no access to a computer and internet, we will continue to mail you a printed edition. I would ask WTFDA members who are online (and that's all but about 40 of you) to *please* voluntarily change over to the eVUD at renewal time to help make this transition easier. Many of you already read both versions so switching should not be a problem.

The WTFDA Forums (wtfda.info) have just been upgraded to vBulletin 4.13 and ought to be more than just discussion forums. The Forums should be WTFDA HQ. The Members Area of the Forums is perfect for that purpose. The Members Area is ideal for WTFDA members interacting with each other, receiving news from the BoD and column editors, preparing your reports and reading your eVUD. You can now enter IRC Chat from the Forums.

## Give Us Your Input!

- |  |  |
|--|--|
| 1.Does the WTFDA really need a paper publication?  | Yes( <input type="checkbox"/> ) No( <input type="checkbox"/> ) |
| 2.Would a Forum site, website, eVUD and email list be of enough value to keep you as a dues paying WTFDA member? | Yes( <input type="checkbox"/> ) No( <input type="checkbox"/> ) |
| 3.Would a Forum site, website and email list be of enough value to keep you as a dues paying WTFDA member?       | Yes( <input type="checkbox"/> ) No( <input type="checkbox"/> ) |
| 4.Have you visited the WTFDA Forums (wtfda.info)at least once in the past three months?                          | Yes( <input type="checkbox"/> ) No( <input type="checkbox"/> ) |
| 5.Do you ever visit the WTFDA Website (wtfda.org)?   | Yes( <input type="checkbox"/> ) No( <input type="checkbox"/> ) |

If you checked no on #4 or #5, please explain briefly

---

---

---

The future of the WTFDA is up to you, not me. I've done my share the past ten years to help keep it going but it's you folks who will ultimately determine its fate. Perhaps somebody will emerge to keep publishing the paper VUD. But right now we cannot count on that happening.

Take our survey. Mail it back to PO Box 501 OR email your answers to the BOD or better yet, register at the WTFDA Forums and post your thoughts in the Members Area (I will also try to have this survey available there). We will print all comments in the VUD/eVUD. Please email any (or all) of the BoD. Tell us what you think. Please do it because apathy will also tell us volumes about the condition of the club. Don't rely on somebody else to do it. We need to hear from you. Thanks for reading.

## IS IT SPRING YET?

Weather-wise it's been pretty dismal for many of us. I think a few of us are pretty fed up with the month of April and looking forward to a little tropo and E skip in the next few months. I hope we can salvage what is left of spring.

I've actually resorted to monitoring the CB frequencies and 10 meters. How pathetic is that?

What's even more pathetic is looking out the kitchen window and seeing the thermometer read 35 degrees outside, which it has, two days in a row; great conditions for tropo, he said with some sarcasm!

And, as luck would have it, a fairly large Es opening occurred on April 27<sup>th</sup> that took in much of the eastern US and Canada. The MUF was up to at least 108mhz. A few DTVs were logged as well as Canadian analogs. See the WTFDA forums for more details.

## MEMBERS AND MORE

This month we add two new members. John Ramsey (CT) signed up for the eVUD and Rich Rose took the paper VUD. Rich just got in under the wire.

John Ramsey has been in CT radio for many years. He's CE of WCCC 106.9 and WWUH 91.3 in Hartford and the guy who took the IBOC off WCCC AM and FM. He'll always have a special place in our hearts for that.

Welcome to both of you!

Renewals were received from the period of 3/19 through 4/11 from **Dan Novotny** (WI), **Peter Taylor** (WA), **Joe Perge** (OH), **Aaron Mitterling** (IN), **Roger Gravelle** (ON), **James Brown** (VA), **Greg Barker** (IN), **Luis Franceschi** (PR), **Bill Higgs** (CA), **Jacob Norlund** (MN), **Ray Dees** (GA), **Ivan Silva** (Brazil), **Pat Dyer** (TX), **Barry Shinall** (VA), **David Legler** (MN) and **William Thompson** (MD). Thank you all for supporting the WTFDA!

## MORE...

It really seems that club conventions are things of the past. The only club having a convention this year is the IRCA. Here is the info from the IRCA website:

---

The 2011 IRCA convention will be held

Thursday, June 23 - Sunday, June 26, 2011 at Airport Value Inn & Suites, 6875 Space Village Avenue, Colorado Springs, CO, 80915.

From more information about accomodations, browse to <http://www.airportvalueinn.com>

Phone number for reservations and inquiries is 719-596-5588.

Special convention guest room rate will be \$69 per night, mention IRCA convention and host Bob Wien. Mike Sanburn will be playing co-host. Bob has set up a special address to accept registrations of \$30 per person, and any auction item donations etc...It is

Robert Wien

#106

2910 North Powers Blvd.

Colorado Springs, CO

80922-2801

We're planning the usual station tours on Friday, tower photo ops, business meeting, banquet, and auction on Saturday. We'll have much more information as it becomes available. Everybody who loves AM radio is invited ! For more info, contact Mike Sanburn.

---

## WTFDA WEBSITE

The WTFDA home page has four links or the 2011 Es and Tropo season. The links are for DX Sherlock, APRS tropo map, TV-FM Skip Log and the WTFDA Forum. Switch between them at will. You can't miss them.

## WTFDA IRC CHAT

You can now enter chat from the WTFDA Forums. There's a new forum called IRC Chat. Just click on that and you'll find yourself at the chat login screen. Enter as a guest, or use your name. Chat is great anytime but especially when skip is going on. It's a great way to add more stations to your log or to get those unids ID'ed very quickly.

I have lots of information for you this month including breaking news of a NRC/WTFDA convention, so enjoy it and see you next month. -Mike

Thanks to Dennis Smith (no relation) for information appearing elsewhere in this column.

The FCC has been canceling a large number of LPTV and translator licenses. They number well into the hundreds, far too many to reproduce here. In any case, I'm not convinced these stations are actually going away. Just about every LPTV licensed to the State of Alaska is involved – but the website of the organization responsible for these stations (ARCS) makes no mention of going out of business, and has posted program schedules through the end of April.

I suspect most of these are glitches in the renewal process.

That said, we probably should expect hundreds of translators to go away once the FCC mandates digital conversion. Many of these are converting, but others are likely to find it economically impossible.

Dennis has noted in the past that 1080p isn't an ATSC-defined resolution. He asks whether you could replace 1080i with 1080p?

It looks like I have partially misread the ATSC specification. 1080p is an acceptable resolution, but not at the 59.94 field rate. ("1080p60") The ATSC felt with available MPEG-2 compressors, a 1080p60 signal would have too many artifacts when stuffed into the available channel.

1080p at lower field rates – 23.976, 24, 29.97, 30 – are ATSC-acceptable. Not that I know of anyone using any of them.

Dennis has news of a programming change, probably spurred by the disaffiliation of KCET Los Angeles from PBS. KBAB-LD, which used to translate KJLA Ventura, is now relaying KOCE's four channels of programming from Huntington Beach.

As you probably remember, the FCC concluded last year that PMCM was correct in believing the law required the licensing of full-power VHF DTV stations in Delaware and New Jersey, the only two states currently lacking such stations.

Channels were allotted – 4 in Atlantic City, New Jersey; 5 in Seaford, Delaware – applications were solicited – an auction held – and the channels awarded.

The applications have now been filed for use of these channels.

The Atlantic City station will operate at 10kw/279m. (the highest power available for a channel 4 DTV in the Northeast) It will transmit from a tower near Berlin, New Jersey from which its official service contour will easily encompass Philadelphia.

The Seaford station will also operate at the maximum power of 10kw, but from a lower antenna, only 144m high. This antenna will be located near Wye Mills, Maryland. (it currently houses FM translator W241AO-96.1) Its official service contour will cover both Baltimore and Washington.

Official service contours for DTV are pretty generous. In fact, neither station is likely to be reliable indoor-antenna reception in any of the three cities – Philadelphia, Baltimore, Washington – mentioned. However, they will be entitled to cable and satellite carriage.

(they will also be excellent Es targets!

Good DX!

**C OTHERNEWS C**

BC 100 Mile House	103.3	-----	Application for new station dismissed [the market is not deemed large enough to support a second local station]
BC Prince Rupert	99.1	-----	Application for new station dismissed [due to poor economic conditions in the area]
ON Brantford	93.9	CFWC	Ownership change and change of specialty format status [because CRTC policy states the licensing of a new mainstream commercial radio station in a market such as Brantford should be the subject of a competitive process]
ON Prince Edward County	89.5	-----	Application for new station dismissed [due to the potential negative financial impact the station would have on existing stations in the Belleville-Trenton area]
ON Toronto	88.1	CKLN-FM	Is silent after a court denied an appeal of the CRTC's order revoking the station's license

QC Donnacona	89.5	-----	Application for new station dismissed [because the business plan and proposed programming were too vague]
SK Humboldt	107.5	-----	Application for new station dismissed [a competing application to successful Golden West proposal]

## The Editor's Note

It seems an early start to the E-Skip season may once again be upon us. An opening with MUF above 108 MHz. encompassed much of the eastern half of the U.S. during the day on April 27. DTV Es from the Midwest and plains into New York and Massachusetts was reported. Some light activity fired up in the Southwestern U.S. a few days prior. While in many seasons it takes till about mid-May for activity to fire up, I think the 2011 skip season can be declared open for business. Let's hope for some more widespread openings!

By popular demand, we are now including reports posted on the WTFDA.info message forums in the monthly TVDX column. If you normally post your DX reports in the forum and would like your report included in the column, just add a post in the "TV, FM & 6 Meters VUD DX Reports" subforum with your logs, and I'll include whatever you report before each month's column deadline. This month we're thrilled to have reports from Ed Phelps in Kentucky and Chris Dunne in Florida in the column. Together with the DX they receive they'll make sure this space is not empty for a long while! We're also honored have a report from DX pioneer Pat Dyer inside this month's edition. Enjoy and good DX!

### Ed Phelps (NN2E)

Benton, KY

#### 3-17-11

Good tropo from Alabama and Georgia this morning...

- WTJP 26/60 Gadsden, AL. 240 mi.
- WPCH 20/17 Atlanta, GA. 310 mi.
- WTVM 11/9 Columbus, GA. 365 mi.
- WBRC 50/6 Birmingham, AL. 250 mi.
- WTTO 28/21 Homewood, AL. 250 mi.
- WIAT 30/42 Birmingham, AL. 250 mi.
- WGNM 45 Macon, GA. 395 mi.
- WSB 39/2 Atlanta, GA. 310 mi.
- WGXA 16/24 Macon, GA. 395 mi.
- WUUG 48/34 Athens, GA. 325 mi.
- WATL 25/36 Atlanta, GA. 310 mi.
- WHSG 44/63 Monroe, GA. 340 mi.
- WUPA 43/69 Atlanta, GA. 310 mi.
- WGCL 19/46 Atlanta, GA. 310 mi.
- WRBL 15/3 Columbus, GA. 365 mi.
- WMGT 40/41 Macon, GA. 395 mi.
- WAGA 27/5 Atlanta, GA. 310 mi.
- WPXA 51/14 Rome, GA. 255 mi.
- WELF 16/23 Dalton, GA. 215 mi.
- WLTZ 35/38 Columbus, GA. 365 mi.
- WDSI 49/61 Chattanooga, TN. 210 mi.
- WANN-LD 29/32 Atlanta, GA. 310 mi.

And the new ones...

- #556 WMAZ 13 Macon, GA. 395 mi. CBS
- #557 WTBS-LD 30/26 Atlanta, GA. 310 mi. 10 sub-

chs

#558 WKTB-CD 47 Norcross, GA. 310 mi. Korean

Notes...

I started out looking for WPXH 45 Gadsden, AL. Is it really on the air? The FCC and Wiki seem to think so. I've been trying for this one for a long time and have yet to log it.

WANN-LD 29/32 Atlanta is a busy one. It maps out with the following sub-channels...

- 32-1 APGuide
- 32-2 MTVTR3S
- 32-3 THIS TV
- 32-4 PRISM
- 32-5 OLDIE
- 32-6 LATV
- 32-7 TUFF TV
- 32-8 LEGACY
- 32-9 JTV
- 32-10 NEWS24
- 32-21 WGST640
- 32-22 949BULL
- 32-23 PROJECT
- 32-24 WILD
- 32-25 WILD
- 32-26 PATRON
- 32-27 TBA
- 32-28 TBA
- 32-29 TBA
- 32-30 TBA

...Some of these are audio channels.

WTBS-LD is similar to WANN-LD but it "only" has 10 sub-channels. I usually don't bother writing down all of the sub-channel info while I'm DXing (gotta keep moving if you want to log new ones) but I found WANN-LD kind of amusing with it's 20 sub-channels.

### **Chris Dunne**

Pembroke Pines, FL

### 2/26 Tropo

2 new stations:

WOTF DT43, TOH ID & ad for Jose 98.1 FM! This overrode my LP local W43CB1.

WRDQ DT27, overriding semi local WXEL WPB

Also signal bar on 14...wish I knew what it was...Doug's site sez there's one in Daytona....maybe that was it.

Also

WDSC DT33....not easy anymore due to a local LPTV

WRBW DT41....ditto

WKCF DT17....ditto

Interference from likely DT23 WMFE to my local WLTV caused no signal bar at all.

WESH DT11 75% signal  
WKMG DT26 & WFTV DT39 at 95% signal!!

Too bad that so many ORL stations are co-channel with mine!!

3/20 Tropo

We went to The Pines Park in Key West, Mile Marker 2 on A1A there. I plugged my CECB into my power inverter & used battery TV, along w/ using rabbit ears, to get the following info, especially for those of you who are asking about WSBS DT3. This is all I could muster on digital---I forgot to check analog----

**DT3---\*\*\*\*nada\*\*\*\*. Nothing at all, not even a partial signal. \*If\* WSBS is using 3, it sure doesn't cover Key West.**

DT8---WGEN-DT, as much as 70% signal  
DT12---it looked like "WDLP-CD" or something (hard to read on a 5" B&W), supposed to relay WGEN, but I did not check.

DT36---no PSIP but likely WCAY "Key TV", as much as maybe 75%

3/26 Tropo

I did not expect all this.....

- 2, 4, 5, 11, 13 Tele Rebelde\*
- 3, 6, 9 Cubavision (6 o/u local WEYS)
- 4 Canal Educativo assumed---sign off around 12:15am
- 8 likely Cubavision, fuzzy
- 15, 44 Canal Educativo Dos
- 21, 26, 53, 60 Multivision
- 27, 38, 66 Canal Habana (27 despite DTV hash--- donde esta' el 66?)

\*with 15-inning baseball game, Cienfuegos beats La Habana 3-2 after a possible bad umpire call --- enjoyable game

3/26 - 3/27 Tropo

I am exhausted.

The owners of Harbor Lights Motel in Islamorada had the courtesy to put up with me one more time....this time, I got THE best room in all the Keys. Now.....This was THE BEST Cuba reception, hands down, ever. I know this looks like the old south Georgia/north Florida TV Guide edition, but whatever. Unless my Teknika tuner was off tuned, these are the channels I saw:

- 2, 4, 5, 8, 12, 13, 40, 54, 63, 67 Tele Rebelde
- 3, 7, 8, 9, 10, 11, 26, 34, 58, 61 Cubavision (6 likely too but I did not write down)
- 14, 15, 17, 18, 19, 28, 40, 49, 58 Canal Educativo
- 15, 21, 23, 24, 25, 32, 34, 46, 51, 68, 69 Canal Educativo Dos
- 21, 26, 42\*, 43, 44, 45, 49, 55, 56, 57, 58, 59, 60,

- 62, 65, 66\*, 68 Multivision
- 27, 38, 66 Canal Habana
- 20 only color bars

[\*On 42 & 66 were local channels:

- 42 Telemar (Santa Cruz del Sur)
- 66 Canal Azul (Google says Puerto Padre, Las Tunas)

These may have gone into Multivision programming later]]

In addition:

- 13 ZNS Nassau, Bahamas, decent picture!
- 43 LPTV Naples

4/17 Tropo

It was raining lightly yesterday, so I assumed there was no DX. Wrong, wrong, wrong! I got a few new stations....Many still in this morning.

- DT11 WYES New Orleans
- DT25 WFNA Gulf Shores AL
- DT26 WGNO New Orleans---75% at one point
- DT39 WLOX Biloxi MS
- DT42 No PSIP, Telemundo---can I safely say this is Hammond LA?

**Dennis Park Smith**

3605 San Remo Drive  
Santa Barbara CA 93105-2523  
Telephone (805)687-7803  
Times 24-hour PST

This report is for March 2011. The "bits of tropospheric ducting" between storms last month continued in this month. Here is So-Calif coastal tropo to San Diego/Tijuana up to 220 mi:

Fb28eve-Mar1	Poor	Calm, still cold
Mar 1 eve - 3	None	Unsettled, some rain
Mar 4 - 5	Poor	Calm, still cold
Mar 6 - 7	None	Unsettled, windy
Mar 8-10morn	Very poor	Uneasy calm
Mar 10-12aft	Out of town,	to WASCO
Mar 12aft - 14	None	Unsettled
Mar 15 - 17	Var.poor	Slight calming
Mar 18 - 28	None	Unsettled, rainy
<u>Mar 29 - 31</u>	<u>Good</u>	to fair Calm, warming

**Mar 10** Wasco sightings: What had been Bakersfield *analog* 19 KBBV-CA is now *DTV d19 KBBV-CD "19"* (still Estrella TV network) (45 mi). These Bak analogs are now off: 12 KJOI-LP 36 KBFK-LP 43 KPMC-LP & Caliente/Bak 41 KDBK-LP. Wasco DTV total is now 32 (1 new).

**Mar 13** SBarb apx 2000 with Don Voegele at his place, with his VHF ant raised a few feet & maybe good weather condx: Los Angeles d7 KABC-TV d9 KCAL-TV d11 KTTV d13 KCOP-TV (90 mi) were seen nicely, all unusually at the same time.

**Mar 29** SBarb apx 1230 at Don's place, good tropo, the peak of the Mar 29-31 tropo, with San

Diego CA / Tijuana BN stations as seen Feb 5 at my place, plus these two analogs.

57 XHUA Tijuana (excellent, XEW 2) 200 mi SE  
56 XHUA-relay Tecate (poor, XEW 2) 220 mi SE

I made errors in January report in March VUD, trips with Don. **Jan 15:** Our elevation at Signal Hill near Long Beach was correct at 340 feet ASL and nicely above surrounding terrain. **Jan 22:** I incorrectly typed elevation on Santa Ynez Mtns over SBarb as 400 ft. It was actually 4,000 ft. On those Mtns, we thought we heard a Santa Maria ch-6 LPTV, but there is no such stn on air. It was probably Los Angeles 6 KSFV-CA (90 mi).

Best of DX to All  
Dennis

Topeka, Kansas 66605-3505  
[davepomeroy@sbcglobal.net](mailto:davepomeroy@sbcglobal.net)

Hello Nick,  
It has been a very quiet spring so far DX wise.  
Only one decent tropo opening and it really wasn't much. However, I did pull in two new stations that morning from Oklahoma. I still have one mystery station from that morning with KMPX (virtual channel 29.1) on digital channel 47. KMPX (city of license: Decatur, TX) serves the Dallas area on digital channel 30. PSIP was channel 29.1. I wonder if they have a translator somewhere on channel 47. There were no Texas stations received that morning.

April 8, 2011  
0730 KOKI-22, KOTV-45, KTPX-28 Tulsa, OK  
KMPX-47 (see note)  
KDOR-17 Bartlesville, OK  
KQCW-20 Muskogee, OK  
0750 KWTW-39 KTBO-15 Oklahoma City, OK  
0835 K38---38\* Ponca City, OK (OETA)  
0840 KRSC-36 Claremore, OK  
KOZJ-25 Joplin, MO  
0845 KJRH-8 KTUL-10 Tulsa, OK  
1230 KOCO-7\* Oklahoma City, OK

My wife just got a job in Anchorage, AK for six months so I will spend the summer in Alaska. I was looking forward to some good skip. Most likely we will be stuck with cable in an apartment which will very much limit DX.

## Chris Dunne – Pembroke Pines, FL

### 3/23 Tr

Tropo to Cuba in the dead of afternoon today...

?? 104.7 CU ??, Radio Rebelde, \$, light IIRC  
?? 102.3 CU ??, Radio Enciclopedia, \$ pilot light but must be mono  
?? 103.1 CU ??, Radio Progreso, //AM 690, new, never heard before, even from the Keys  
104.7 I caught at home, but all 3 above were on the car radio on the way to work (I start at 3:30PM EST).  
102.3 was way o/WMBX, no easy trick.

### 3/24 Tr

CM?? 90.3 CU ??, Radio Ciudad del Mar, Cienfuegos province, new from home  
?? 106.5 BH Nassau, Star 106.5, with apparently Canada Calling (that show is still on?)  
?? 96.1 BH Freeport or Nassau (each has one), // web feed, first time heard from home in 12 Years  
?? 98.7 BH Nassau, new from home, // web feed to begin, DJ has a riddle

### 3/25-26 Tr

?? 90.3 CU ??, Radio Progreso with RDS  
?? 93.3 CU ??, Radio Taino assumed under IBOC hash  
?? 94.1 CU ??, Radio Enciclopedia over IBOC hash + RDS!  
?? 96.7 CU ??, Radio Rebelde assumed, under IBOC with baseball  
?? 102.3 CU ??, Radio Enciclopedia, in car  
?? 106.9 CU ??, Habana Radio, RDS "HABANA R," is RDS new?

### 3/27 Tr

?? 92.7 CU ??, Holguin, La Voz del Niguel (per fmlist site)  
unID 92.9 ?? ??, poss Taino  
unID 93.7 CU ??, // AM 590 CMBF  
?? 98.1 BH Nassau, Classical 98.1, IMO just as strong as any other Nassau station (dial position helps, 98.1 is good), it acts just like a public classical station, check for this one next Es opening my way! Other Nassau stations very strong Sunday night, as was TV 13 ZNS.

4/18 Tr

unID 88.7 ?? ??, must be KRVS LA with putumayo.com radio show....2 modes for this one now  
 WRXF 89.3 LA Baton Rouge, o/WRMB!  
 WTIX 94.3 LA Galliano, "Tix FM"  
 WHWY 98.1 FL Holt, "Highway 98"  
 WDGL 98.1 LA Baton Rouge, "Eagle"  
 WYLD 98.5 LA New Orleans  
 WCDV 103.3 LA Hammond, "Gen X 103.3," RDS "Gen X"  
 KSTE 104.1 LA Houma, o/IBOC

**Rory Francisco** – 3010 Quarter Creek Lane #28 – Richmond, VA 23294 –

4/26 Tr

0758 WQSR 102.7 MD Baltimore, "Jack" ID, slow fade over usual WJJX 129

**Peter Körner (Korner)** designed the FM19.3 Yagi array with fifteen elements on a 3.73-meter (147") boom. The FM15.11 uses five reflectors, a horizontal folded dipole, and a half wave coaxial balun. Unlike other high-performance designs, the FM15.11 has no phasing lines that can induce current in the boom and degrade the radiation pattern.

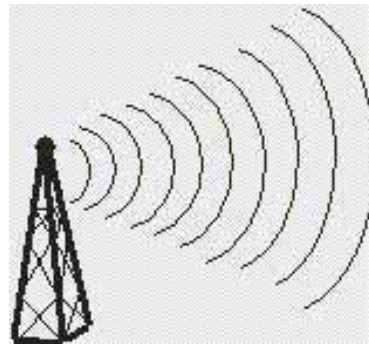

<http://www.vhftechnik.se/>

Frequency	88 MHz	98 MHz	108 MHz
Gain	7.8 dBd (10 dBi)	9.3 dBd (11,5 dBi)	7.7 dBd (9,9 dBi)
F/B	30 dB	35 dB	40 dB

Receiver (mostly): Pioneer Super Tuner 3D car radio built into a box, with dipole. Some nice Geminids and Quadrantids meteor scatter. Perseids less than ideal, largely due to strong enhancement from semi-locals. Summer and fall tropo largely a dud. An early end to an otherwise great 2010 Es season here.

# **DXing the NOAA Weather Radio Bands**

By Eric Bueneman (NØUIH)

Let's say you have bought a new scanner. After setting it up to monitor local first responders, railroad trains, airplanes, or even the local Amateur Radio repeaters, you check out the NOAA Weather Radio bands. You may find one or two local stations, maybe one or two semi-locals. Then, you find a distant station. This could spark a new band to DX: the NOAA Weather Radio bands.

## **Background**

The NOAA Weather Radio band consists of seven channels between 162.400 and 162.550 MHz. When NOAA Weather Radio first came on line in the mid-1970s, only three channels were available: 162.400, 162.475 and 162.550 MHz. Later on, the number of channels would be increased to seven with the addition of 162.425, 162.450, 162.500 and 162.525 MHz. Maximum power for NOAA Weather Radio stations is 1,000 watts ERP. Some stations get out as far as the 100 kW Class C FM stations.

At my QTH in Hazelwood, MO, I regularly receive three NOAA Weather Radio stations. In addition to my local, KDO89 St. Louis, MO on 162.550 MHz with 1,000 watts from the tower of KDNL 31, I can hear two 300-watt stations: KXI70 Jerseyville, IL on 162.450 MHz and KXI79 Hillsboro, IL on 162.425 MHz. On occasion, I can also hear KXI49 Salem, IL on 162.475 MHz, WWF75 Bourbon, MO on 162.525 MHz, and even KXI46 Shelbyville, IL on 162.500 MHz. If you were wondering if the NOAA Weather Radio bands are DXable, the answer is a definite "yes"!

## **Equipment**

You often ask yourself: "What equipment would I need to start DXing the NOAA Weather Radio bands?" Let's start with the scanner. Even a handheld scanner would be ideal for someone who is starting out with DXing the band between 162.400 and 162.550 MHz. A tabletop scanner is the type that is highly recommended for DXing the NOAA Weather Radio bands. I started in 2001 with a Radio Shack PRO-79 handheld scanner. I moved up to a Radio Shack PRO-2052 tabletop scanner in June 2004. More often than not, I'll use the PRO-2052 for my main DXing; I'll use the PRO-79 to monitor conditions on the band. I also have a Radio Shack PRO-2014 as a bedside scanner; I also use that to monitor band conditions. Even a VHF Amateur Radio transceiver can be used to receive NOAA Weather Radio DX; I've used this to null out KDO89 to hear DX on 162.550 MHz. When I hear a station with programming coming from a National Weather Service office other than the one in Weldon Spring, MO (which serves the St. Louis region), then I know that DX will be coming in on the band.

As for the antenna, the antenna provided with the scanner may be ideal if you just want to monitor the band for conditions. As far as DXing is concerned, you might be able to use a standard television antenna to pull in DX. For the first four years of my DXing NOAA Weather Radio, I used the Radio Shack VU-210XR I normally use for TV DXing. While it is a non-directional antenna, a discone antenna, preferably one that can be used on frequencies between 25 MHz and 1.3 GHz, may also be used. A Radio Shack discone is my main antenna for receiving NOAA Weather Radio stations nowadays. Another good antenna to use for DXing NOAA Weather Radio stations is a yagi antenna built for the 2 Meter (144-148 MHz) Amateur Radio band. On occasion, I'll use the Diamond A-144S5 five-element beam hooked to my Yaesu FT-2800M 2 Meter transceiver. While NOAA Weather Radio stations can be received with horizontal or vertical polarized antennas, a vertical polarized antenna (especially a yagi

designed for the 2 Meter Band) is ideal for this purpose, in addition to the non-directional discone antenna.

### **Propagation**

Like with the higher VHF and the UHF bands, tropospheric enhancement is the most common form of propagation on the NOAA Weather Radio bands. All but one of the 89 DX stations on the NOAA Weather Radio bands I've logged have been via this mode of propagation. Some have required nulling out a local or semi-local. An example of this is my reception of KIG76 Evansville, IN on 162.550 MHz at 1010 CDT on August 25, 2009. I used the beam and my Amateur Radio transceiver to null out local KDO89. On the channels where you have no locals, the DX possibilities are endless. The farthest station I've logged via this mode of propagation so far has been WNG525 Dighton, KS on 162.525 MHz at 2100 CDT on July 31, 2008; a distance of 545 miles (877 km).

E-skip is less common on the NOAA Weather Radio bands than on the low-band VHF Public Service radio band, the 6 Meter Amateur Radio band, television channels 2 through 6, or on the FM broadcast band (88-108 MHz). But, it has been received at my QTH. The only time I have received a station on the NOAA Weather Radio band via E-skip at my QTH took place at 1804 CDT on July 6, 2004. I pulled in KHB38 Atlantic City, NJ on 162.400 MHz, giving the marine forecast for Delaware Bay. The distance for this reception was 855 miles (1,376 km). Just listen for programming from an area different than the ones you are accustomed to.

### **Programming**

Programming for NOAA Weather Radio comes from the regional National Weather Service offices. Practically all the programming is automated, using three different digitally-synthesized voices. Two of these voices are male; one of which, "Paul", is heavily accented. The female voice is called "Donna". The National Weather Service office in Weldon Spring, MO, for example, programs eleven different transmitters throughout eastern Missouri and southwestern Illinois. An example of information provided by the Weldon Spring office includes the local or regional weather forecast, a sample of local and regional weather conditions, the hazardous weather outlook, and during certain morning and afternoon dayparts, the river levels and forecasts for the local area. The St. Louis station usually has the river levels for towns on the Mississippi, Missouri, Illinois, Meramec, Cuivre and Bourbeuse Rivers. Programming generally repeats every few minutes, so if you miss a station ID, you can stick around on the frequency and try it again, especially with several stations in on one frequency. Programming and voices vary from office to office; so the arrangement of the programs from the Weldon Spring, MO office may be different than those coming out of the NWS offices in Paducah, KY, Lincoln, IL or Springfield, MO.

### **Information**

The Web site for your nearest National Weather Service office has information on the stations programmed by that particular office. The listing for NOAA Weather Radio stations nationwide can be found at this URL:

<http://www.nws.noaa.gov/nwr/>

This is a great aid in identifying DX stations on the NOAA Weather Radio bands. Give NOAA Weather Radio DXing a try; you'll discover a whole new aspect of the hobby.

# RCA's Mobile DTV Receiver Put to the Test

From TV Technology

by Doug Lung 04.21.2011

Last week I mentioned that I'd ordered one of the new RCA Mobile DTV receivers from [RCAPortableTV.com](http://RCAPortableTV.com). When I arrived in Los Angeles from the NAB Show, my DMT335R was waiting for me. I had a chance to work with it over the weekend and see how it compared with other ATSC and ATSC MH receivers.

ATSC reception was as good as, or better, than that of any ATSC portable receiver I've tested, even though the antenna was shorter. As with all receivers using a monopole antenna, it worked much better with a ground plane--either in my hand or a sitting on a metal object.

I did a scan of Los Angeles channels, with most of the full power stations being received, but none of the low-power operations. Even KLCS, one of the lowest powered full-service stations on Mount Wilson, came in fine. I was very happy to see that the receiver—with its small whip antenna--found that one, and also could receive all four Los Angeles full-power DTV stations operating on VHF frequencies--channels 7, 9, 11 and 13.

CAPTRCA DMT335R Hybrid Portable TV/ION

The RCA receiver has a signal meter that works in both ATSC and ATSC Mobile DTV modes. It's handy for optimizing antenna position and length. I found that reception was possible if the indicator was anywhere in the yellow or green areas. As expected, orientation and positioning were more critical with conventional ATSC reception than with Mobile DTV, but I don't see non-technical viewers having a problem if they use the signal indicator display. It's available by pressing the "OK" button in the center of a set of four navigation buttons. The other controls are for volume and channel selection.

Unlike the handheld ATSC receivers without Mobile DTV capability that I've tested, this one includes a full EPG, as well as closed captioning. Aspect ratio can be set automatically or manually. Unfortunately the DMT335R has a 4:3 ratio display, so it goes to letterbox mode when viewing content in the ATSC A/153 16:9 standard format, unless it's set to 4:3 for a center cut. Zoom options in the menu make it possible to fill the screen regardless of content.

ATSC Mobile DTV channels have to be scanned and tuned separately. The modes are selected using the "Menu" button. I didn't find any VHF Mobile DTV channels on the air in Los Angeles, but had no problem locating the four UHF channels carrying Mobile DTV programs. After switching between Mobile DTV channels, I was surprised to see a "weak signal" message displayed when tuning to channels found in the scan. These were the ones that came in perfectly using the conventional ATSC tuner. There appears to be a bug in the receiver—I can't say if it affects all units—causing the receiver to fail to recognize Mobile DTV signals under many conditions. If any readers have these receivers, I'd be interested in [hearing](#) your comments.

I found a simple solution. If the mobile signal doesn't appear, then turn the receiver off, and then back on again. This will cause the Mobile DTV signal to lock up soon after power on. It doesn't take long. This does not appear to be signal level-related—stations showed "green" on the signal level menu after the power cycle. Nor does it appear to be related to the type of Mobile DTV transmission equipment the station is using. (The problem appeared on stations using Harris exciters/multiplexers, as well as those using the Rohde and Schwarz system).

Once the UHF DTV mobile signal was recovered by power cycling, it was rock stable. In the middle of a building in Burbank, far from any outside windows, the KNBC mobile signal never dropped out, even if the antenna was partially retracted and the receiver moved through different orientations.

Tuning issues aside, the RCA Mobile DTV sensitivity appears to be on par with, or perhaps a bit better, than the prototype Samsung Moment handset I've been using. As RCA includes conventional ATSC reception as well as Mobile DTV, the receiver will probably replace the Moment handset in my travel kit, even though it's a bit wider and about twice as thick (and if I can find room for yet another charger. The Moment was convenient as it uses the same charger as my Samsung wireless LTE hotspot and my Motorola Bluetooth earset.) With the RCA's strong performance on VHF ATSC, I suspect it will do better than the Moment on VHF Mobile DTV.

On an unrelated receiver topic, I discovered that the Samsung LTE (700 MHz) hotspot appeared to create interference to indoor conventional ATSC reception on Channel 48 when using my favorite USB DTV tuner, the Pinnacle (now the PCTV Model 801e "Pro stick"). The good news is that the prototype Hauppauge Aero-M tuner (which also provides Mobile DTV reception) had no interference problems.

Another of my other favorites, the Artec T19AD also performed well. The Hauppauge HVR950Q appeared to handle the 700 MHz interference better than the PCTV, but I did observe some hits. The Hauppauge Aero-M looks like a good tuner for conventional ATSC as well as Mobile DTV. I'll have more information this after testing it in more locations. Unfortunately, neither the Artec T19AD nor the Hauppauge Aero-M is supported in the current Linux kernel (2.6.38) libraries.

(H/T to Al Tobia for posting the link on the WTFDA Forums)

## An Appalachian Radio Voice Threatened From Afar

By [KATHARINE O. SEELYE](#)

WHITESBURG, Ky. — Rich Kirby, a part-time producer for WMMT (88.7), the community radio station here, was interviewing two local aid officials the other day about the effect of Washington's proposed budget cuts on this region, in the heart of Appalachia.

"We're in one of the poorest if not the poorest districts in the country," Ricky Baker, of the private Community Action Council, which receives 95 percent of its financing from the federal government, said into the microphone. Without that money, he added, "we'll have people either freeze to death, starve to death or die of a medical condition because they can't get appropriate health care."

Mr. Kirby refrained from chiming in that his own employer, [WMMT](#), is also imperiled by the same budget ax. As lawmakers seek to cut billions of dollars in federal spending, the Republican-controlled House voted in February to end financing for the [Corporation for Public Broadcasting](#) in 2013. While [President Obama](#) wants to continue financing the corporation, the current budget turmoil has left its long-term fate uncertain.

Juxtaposed against other hardships in Appalachia, the beaming of a radio signal might seem a luxury. But WMMT, which reaches across the mountains, coal fields and hollows of eastern Kentucky, southwestern Virginia and southern West Virginia, creates a connective tissue for its far-flung, geographically isolated listeners. It also offers respite from the daily grind. Like the redbud trees that are starting to burst forth in violet patches along the scrubby hillsides here, the sounds from the radio can be, if not essential, at least life-affirming.

"Whew, that young 'un has got a set of pipes on her," Andy Shepherd, a former federal marshal who is now a D.J. at the station, told listeners last week as he wrapped up his show with a tune by Ardetta Meade.

Mr. Shepherd and his wife, Cathy ("the Biscuit Burner"), share a three-hour program that features bluegrass, classic country and their own playful patter. Mrs. Shepherd talks off-air to several listeners, many of whom are homebound, just to buck them up.

Mayor James Wiley Craft, a Democrat, noted in an interview that the station also served vital communications functions. It alerted residents recently to an oil spill affecting their drinking water much more quickly than town officials could have.

"If that station were to be shut down for lack of funding, it would really, really hurt this town," Mr. Craft said.

Even a competitor has kind words for WMMT.

"They fill a void that commercial stations cannot fill," said G. C. Kincer, who once owned several such stations in the area but has downsized to one and who is also mayor of nearby Jenkins. Commercial operators are ruled by their advertisers, he said, while WMMT, not being able to afford listener surveys, goes on its hunches of what people want.

"I listen to them all the time," Mr. Kincer said.

The Corporation for Public Broadcasting distributed \$420 million last year to 1,300 public television and radio stations across the country. It gave WMMT, which is not affiliated with [National Public Radio](#) or a university, \$86,000, or one third of the station's \$256,000 budget.

Rural radio stations are far more dependent on federal money than their urban counterparts and more likely to go under if it is cut. Nearly two dozen rural stations, many of them on Indian reservations, rely on corporation financing for at least 50 percent of their revenue. (By contrast, grants from the corporation and other federal agencies supply about 2 percent of NPR's overall revenues.)

Rural stations face additional challenges. They need multiple transmitters to reach widely scattered areas. And their listeners are often on fixed incomes, with little or no discretionary money to donate, especially in a down economy.

“This is the worst threat we’ve ever had because the economic climate is so bad for everything else,” said Jim Webb, 65, who hosts “Appalachian Attitude,” featuring local and regional musicians.

WMMT is one of the few stations that still provide live, home-grown programs, both music and news, around the clock, except for the wee hours, when it repeats its hosts’ musical playlists. The station has four full-time and three part-time workers and more than 50 volunteers, many of whom host shows and carry in their own recordings.

The local congressman, Representative [Harold Rogers](#), a Republican first elected in 1980, is chairman of the House Appropriations Committee and in February proposed cutting billions from the budget plus eliminating money for the Corporation for Public Broadcasting. In a statement at the time, he said all of the cuts he proposed were “necessary to show that we are serious about returning our nation to a sustainable financial path.”

Mr. Rogers has been steeped in budget negotiations and was not available for an interview, his spokeswoman said. But in an interview last year with WKMS, an NPR affiliate at Murray State University in western Kentucky, Mr. Rogers said he was proud of the federal money he had long brought to his district, which has relied on federal dollars for decades. It was the destitution of this region that inspired President [Lyndon B. Johnson](#)’s War on Poverty in the 1960s, when the government expanded its role in social welfare programs.

“The second-poorest district in America,” Mr. Rogers told WKMS. “And a district that is terribly needy and has, by and large over the years, been neglected by the state government. So there’s no place else for our people to turn.”

But with the rise of the [Tea Party](#) and with anti-earmark, budget-cutting fervor gripping the nation’s capital, little of that sentiment is being expressed today, especially by Republicans. Advocates of ending financing for the Corporation for Public Broadcasting argue that government spending must be reined in and directed only toward essential services like national security.

Although WMMT broadcasts no NPR programming, which some critics say has a liberal bias, Mayor Craft said the station still had to battle a perception that it was “anti-coal,” which is the local equivalent of liberal. He said that perception was wrong.

“Some of the people who are there are associated with other groups” that oppose mountaintop mining, he said, “but those people at the station are intelligent enough to know which side of their bread is buttered. This area depends on coal 100 percent.”

In a fund-raising letter for the annual spring drive, Marcie Crim, the station’s general manager, did not mention the threat of federal cuts. Rather, she focused on the station’s ability to produce its own programming, “instead of airing shows produced in New York City.”

Ms. Crim said that without the federal financing, the station could go dark, though she worries that such assessments could become self-fulfilling and “scare people into thinking we might not make it.” David Fields, the station’s director of development, said that the mention of federal money in fund drives “makes people frown” and prompts some to harass the station for asking for donations when those people already pay taxes.

Random interviews with people in town found a positive response to WMMT. “You grow up hearing it and you think just old people are listening to it,” said Neil Perkins, 30, a radiology technician who was having his hair cut the other day. “But then you find yourself stopping on the same station.”

Rebecca Winterhoff, 28, who recently moved from Florida because her husband found a job here, said WMMT was a big selling point.

“It’s so local,” she said. “You get the sense that real people are involved, and it’s a community.”

Ms. Winterhoff said she had never donated to public radio because she lived paycheck to paycheck, but she said she intended to start doing so now. Her new station may need it more than ever.

# Espace Musique Extends RBDS Network

TV TECHNOLOGY

by James Careless, 03.17.2011

**MONTREAL** — Espace Musique, the music channel of Canadian francophone public-service broadcaster Radio-Canada, is outfitting its network of stations with RBDS data services.

Espace Musique has installed C02 RBDS encoders from manufacturer 2wcom at 39 stations in Canada, significantly expanding the network's use of RBDS "without making a major investment," according to Charles Rousseau, an engineer in the Radio-Canada Spectrum Engineering department.

The Radio Broadcast Data System, or RBDS, is the North American implementation of the FM Radio Data System, or RDS. Both systems use the 57 kHz subcarrier of an FM signal to carry a variety of data services.

Although the majority of Espace Musique outlets operate in Quebec, New Brunswick and Ontario, it has outlets in all 10 Canadian provinces. "The C02 with its multiport solution offers an extremely flexible concept," said 2wcom CEO Werner Drews. "Five different services can be managed by a single encoder via five independent IP ports, either TCP or UDP."

## Monitoring

For monitoring purposes, 2wcom A20 measuring and monitoring decoders have been installed within each of Radio-Canada station's signal footprints. The A20 is self-sufficient, said Drews. "If any irregularity occurs within the network, the A20 alerts and reports the problem immediately and automatically via SNMP before the audience even notices it."

The decoders connect back to Radio-Canada's engineering department via TCP/IP connections, and, said Drews, "Optional MP3 live streaming allows users to monitor the audio received by an A20 from anywhere for signal-quality checks."

Not surprisingly, Radio-Canada is using its new RBDS service to deliver artist and song names to its listeners' RBDS-enabled receivers. But the system also supports a Traffic Message Channel to provide listeners with on-screen traffic information, an emergency warning system for real-time weather and other alerts, as well as other forms of datacasting as they become available.

The system also supports PI codes, and each station on the network has its own. The code allows the RBDS receiver to "know" where it is getting its signal from. Besides providing this data, PI codes make it possible for RBDS-capable car radios to switch automatically from a fading Espace Musique signal to a stronger signal that is coming into range.

"As far as the listener is concerned, there is no switchover; it is seamless coverage," says Rousseau. "In reality, the receiver has made the switch in the background. For instance, if you are driving from Quebec City to Montreal, your car radio will tune to whichever of these two signals is more powerful."

By adding the 2wcom RBDS system to its Espace Musique network — "it only consumes a bit of bandwidth, but delivers a lot of value," Rousseau said — Radio-Canada hopes to give its listeners more reasons to tune in.

The inclusion of local real-time traffic news and emergency warnings should help Espace Musique network stations compete against local talk radio stations. No longer will listeners have to scan elsewhere to find out what's on the road ahead. Meanwhile, the A20 monitoring system allows Radio-Canada to keep an eye on its RBDS operations without spending more money on human engineers.

"The English equivalent of Espace Musique, CBC Radio 2, is considering adding this system to their transmitters," Rousseau said.

## FREAK TV RECEPTION PROVIDES INTERESTING VIDEO FARE

One of the interesting phenomena encountered by viewers is that of "freak reception." Theoretically, television reception should be limited to locations within "line of sight" of the transmitter, but this has not proven to be the case.

We have received an interesting report of television DXing from Burns J. Tobias of Millersburg, Pa., which seems to indicate that distance is no handicap to the video enthusiast.

The TV station nearest to Mr. Tobias' home town is WGAL in Lancaster, some 45 miles away. The terrain around Millersburg is hilly. He uses a Dumont 19" "Fairfield" mode 1 RA110 receiver, two Regency boosters, and a Taco antenna. The antenna is a three-section unit with the top Yagi array cut for Channel 4, the middle section (of 4 sets of rods) cut for the high band, while the bottom array is a Yagi cut for Channel 6. The entire unit is rotatable and is mounted 75 feet above the ground.

Mr. Tobias has compiled the accompanying table covering his DXing experiences. Needless to say, some of the distant stations provide good reception while others are mediocre but the fact that some of the stations are received at all is somewhat unusual. He reports that most of the extremely distant stations are only received at night although daytime reception of Miami (4), San Antonio (4), and Oklahoma City (4) are commonplace. Oklahoma City pops up on the screen most often and the reception is usually good.

STATION	CITY	DISTANCE	CHANNEL NO.	RECEPTION
WGAL	Lancaster	45	4	Good
WMAR	Baltimore	80	2	Fair
WBAL	Baltimore	80	11	Poor
WAAM	Baltimore	80	13	Poor
WJAC	Johnstown	100	13	Poor
WPTZ	Philadelphia	100	3	Fair
WFIL	Philadelphia	100	6	Very Good
WCAU	Philadelphia	100	10	Poor
WNBW	Washington	100	4	Poor
WATV	Newark	150	13	Fair
WDTV	Pittsburgh	164	3	Poor
WCBS	New York	165	2	Fair
WNBT	New York	165	4	Fair
WABD	New York	165	5	Poor
WJZ	New York	165	7	Poor
WOR	New York	165	9	Fair
WPIX	New York	165	11	Fair
WBEN	Buffalo	196	4	Poor
WOI	Ames	882	4	Good (at times)
WDAF	Kansas City	956	4	Fair
KOTV	Tulsa	1059	6	Poor
WTVJ	Miami	1127	4	Good (on occasion)
WKY	Oklahoma City	1157	4	Good (most often received)
KLEE	Houston	1408	2	Good
WOAI	San Antonio	1555	4	Poor

## Write Your Own VUD DX Report in the WTFDA Forums!

Build your own DX report. Do it all at once or assemble it a little at a time. At the end of the month your column editor will take your report for publication in the VUD. WTFDA members are already doing it. Here's how: Login to the Forums. Go to the Members area, [VUD DX Report](#) forum. Click on [Post New Thread](#). Add your loggings. Save it and exit. Later, go back and click on [Edit Post](#) and to it. Save it again. Repeat this process until you're done. We will be there to help you along so it goes smoothly. People read these reports. You may get a station IDed for you before the column even goes in the VUD. Give it a try. It's easy. So leave MS Word behind. Do it online!

\*\*\*\*\*

**NEWS ITEM:** Accident at WXXB radio tower kills two (4/13/2011)

Buck Creek, Ind. - Two contract workers from Texas are dead after an accident near Buck Creek, Indiana, where a crew of five was installing a radio tower [ in actuality, they were increasing the tower-s height ]. The two were working at a height of 340 feet when they fell, along with a piece of equipment being used to add another segment to the tower. The work crew was from ERI, Incorporated of Chandler, Indiana. The tower is used by WXXB-102.9 Delphi, Indiana. The Occupational Safety & Health Administration, OSHA, is investigating.

**NEWS ITEM:** As part of a movie promotion, Altoona, Pennsylvania changed its name to "POM Wonderful Presents: The Greatest Movie Ever Sold" at noon EDT on Wednesday April 27th. Does that mean that all broadcast stations licensed to Altoo . . . er, ah, I mean, POM Wonderful Presents: The Greatest Movie Ever Sold have to ID using that new city title? Not likely. So don't change your Logs to reflect the new xcity name". Oh, the promotion is only good for 60 days, but you still may hear a non-legal ID once or twice. It all depends if the broadcasters go along with the gag. Er . . . promotion.

\*\*\*\*\*

Thanks to Shawn Axelrod, Bruce Elving, Tom Jasinski, Tim Noonan, Ralph Strobel and RadioWorld Online for news.

If you hear any changes occur on your FM dial, share the news! 73
