# THE WORLDWIDE TV-FM DX ASSOCIATION

Serving the UHF-VHF Enthusiast

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, GREG CONIGLIO, BRUCE HALL, KEITH MCGINNIS AND MIKE BUGAJ.

Editor and publisher: **Mike Bugaj**

Treasurer: **Keith McGinnis** wtfda.org Webmaster: **Tim McVey**

wtfda.info Site Administrator: **Chris Cervantez**

Editorial Staff: **Jeff Kruszka, Keith McGinnis,**

**Fred Nordquist, Nick Langan, Doug Smith,**

**Peter Baskind, Bill Hale and John Zondlo,**

Our website: [www.wtfda.org](http://www.wtfda.org); Our forums: [www.wtfda.info](http://www.wtfda.info)

JULY 2011

Finally! For those of you online with an email address, we now offer a quick, convenient and secure way to join or renew your membership in the WTFDA. Just logon to Paypal and send your dues to [sales@wtfda.org](mailto:sales@wtfda.org).

Use the email address above to either join the WTFDA or renew your membership in North America's only TV and DX organization.

Or send your renewal check for \$10 by mail  
To WTFDA, PO Box 501, Somersville, CT  
06072

## ES SEASON – A VERY SLOW START.

Yes it's July and yes it's E-skip season. Somebody pinch me. I hope the second half turns out better than the first part because I don't think you'll find anyone who is really happy with it. Most of the openings here were just out of reach of us. Many struggled to move into FM and when they did, it was just for a few minutes. But – there were a few magic moments. Rob Ross hit the jackpot twice on May 31<sup>st</sup> when he logged XHCM 88.9 in Mexico City (1927mi) and XHOCA 89.7 Oaxaca, Mexico (2004 mi). Jeff Falconer caught double hop Es on FM from Mexico City into Ontario (1954 mi). Later that evening he also heard Cayman Islands at 1675 mi. And here's one more great log. On June 10 Steve Walko (K3PHL) heard KQRK 92.3 in Ronan, ID at 1972 mi). And here is one more I almost forgot. It's Russ Edmunds reception of XHGEO 91.5 Guadalajara, MX on May 31<sup>st</sup>. So, the quantity may not have been there but the quality was. Just ask those four guys.

Meanwhile, down in the land "down under", we have reports on the WTFDA Forums of at least four dates of intense winter E-skip (June 6,7,10,14) by Geoff, an FM Dixer in Numerella, NSW, Australia. We will try to include some of his loggings in this issue.

One beneficiary of skip so far this summer is the DXer in the Northwest. Some years they get practically nothing in the way TV and FM DX but this season they've done fairly well. In an area not known for tropo, finally they've been able to increase their totals.

## MEMBERS AND MORE STUFF

This time around we have all renewals. Dues received from the period of 5/16 through 6/14 from Dan Oglethorpe (LA), Fritze Prentice (AR), Michael Beu (TX), Richard Allen (OK), Jay Novello (NC), Jerry Bond (NY), Owen Wood (NY), James Montgomery (IN), Sheryl Paskiewicz (WI), Rick Lucas (NY), Benjamin Greenlaw (ME), Steve French (MN), Fred Laun (MD), John Griffiths (ON), Edward Ritchie (WI), Peter Giacobelli (NY), Stephen Naetzker (AZ), Mike Glass (IN), Joe Esser (NJ), Jeff Kruszka (TX), Stan Weisbeck (WA) and Al Tobia (CA). Thank you all for staying with the club and we really mean that. And a big thanks to those who switched over to the eVUD, if not reluctantly.

## 18<sup>TH</sup> ANNUAL MADISON-MILWAUKEE GTG

The 18th annual Madison-Milwaukee Get-Together will take place on Saturday, August 20, 2011, beginning at 1 p.m. This year's event is in the Milwaukee area, hosted by Tim Noonan and his family in south suburban Oak Creek. It is an all-band event, and anyone interested in the radio hobby is welcome. For more information, contact Tim at [DXing2@aol.com](mailto:DXing2@aol.com) or 414 762-2702.

## AND...

We've had a couple of requests to discontinue 2 column printing in the eVUD and it sounds like a good idea. The only negative right now is that we still have paper VUDs to deliver and we may not be able to convert 100% if the result is overly large paper VUDs. As we continue to transfer into an eZine only we'll be able to do things we never could do with the paper VUD. Stay tuned.

There's more member input coming up in this issue, so find out what other WTFDA members think. CU next month. -Mike

Thanks to Jeff Kitsko, Robert Seaman, Eric Buenemann & Ed Phelps for information appearing elsewhere in this column.

Eric reports KPTN-LD St. Louis having converted from analog on channel 7 to DTV on RF-36. (but virtual 7) The analog transmitter was running HSN. The digital is running the next best thing: four streams of color bars.....

It's been announced the "A" stations in Canada will be rebranded as "CTV two". This will affect five OTA stations:

- CKVR-3 (to convert to DTV RF-10)
- Barrie
- CFPL-10 (to convert to DTV RF-10)
- London
- CHRO-5 (presumably will not convert,

- Pembroke but most viewers watch on their ch. 43 relay in Ottawa which will convert)
- CHWI-16 (to convert to DTV RF-16, with Windsor relay on RF-26)
- Wheatley
- CIVI-53 (to convert to DTV RF-23, with Vancouver relay on RF-17)
- Victoria

CIAN-13 Calgary & CJAL-9 Edmonton are also part-time "A" stations, but have announced they'll drop their OTA signals this fall and go cable-only.

The Wheatley and Victoria stations and their relayers, and the Ottawa digital relay of CHRO, are essentially LPTVs. CHRO itself is a full-power analog station, and the Barrie and London DTVs will be full power as well.

Three more CBC stations operating above channel 51 have applied to reduce power and convert to an unprotected secondary service. Reducing power is a LOT less expensive than moving to a lower channel...

The two proposed relayers of CKVR-DT are intended to insure "simsub" protection of CKVR programs in the Hamilton/St. Catharines/Niagara Falls area.

Canadian TV stations are allowed to demand "simsubbing" in areas where their over-the-air signal reaches. This is the practice of requiring cable & satellite services to replace the signal of a U.S. station with that of a Canadian station if both stations are airing the same program at the same time. It greatly increases viewership of the Canadian station, and as a result, greatly increases advertising revenue.

Being licensed to – and having its transmitter located in – Barrie, well north of Toronto, CKVR's signal doesn't reach the populous "Golden Horseshoe" area south of Toronto. Thus, cable/satellite operators are not required to simsub the CKVR signal for viewers in these areas. Adding the two transmitters will change this situation.

It may be worth noting that simsubbing is rather unpopular among viewers. The exotic special commercials aired during the Super Bowl are generally not seen in Canada – as they're simsubbed with "regular" commercials aired by the Canadian station carrying the game. Switching errors and last-minute schedule changes also irk viewers.

The newly-licensed two-transmitter Distributed Transmission System for WTVE Reading, Penn. was already authorized & operating under Special Temporary Authority. This month's action "permanentizes" the WTVE DTS.

Good DX!

\*\*\*\*\*  
**NEWS ITEM: FM STEREO TURNS 50 - June 1 marked the golden anniversary of FM stereo broadcasting in the United States.**

It was on that date in 1961 that three stations in Schenectady, Chicago and Los Angeles lit up 38 kHz subcarriers at midnight (ending May 31) in their respective time zones, and rolled out the stereo broadcasting with equipment that had been given FCC type approval only hours before.  
The three stations C GE's WGFM in Schenectady; Zenith Radio's WEFM in Chicago, and Los Angeles-KMLA C became the first implementers of the backwards-compatible multiplex system for transmitting stereo signals, which was based on Zenith and General Electric inventions.  
The transmission methodology C in which left and right signals are summed together and sent along the main FM channel, and a left/right difference signal created and carried by a multiplexed subcarrier C had been winnowed down from more than a dozen systems vying for FCC approval.  
The early-morning June 1, 1961 FM stereo broadcasts lasted for only a few hours, but paved the way for a stereo transmission system that eventually gained global acceptance and even after 50 years no signs of fading away.

**NEWS ITEM: Mexico's spectrum regulating authority, COFETEL, has ruled allowing all AM and FM stations may broadcast in HD. In 2007, Mexico first OKed HD radio only for stations within 200 miles of the Mexican/U.S. border. But this allows the technology to be used on a voluntary basis by all stations anywhere in Mexico.**

**NEWS ITEM: Mark your calendars! On November 9 (a Wednesday) at 2 PM Eastern Standard Time (1 PM Central, etc), every broadcast station licensed by the FCC will be (read that 'should be') participating in the first nationwide Emergency Action System test. This means that no matter what station are listening to, you'll hear that famous 'message', which will last between 3 and 3-1/2 minutes. The Emergency Action Termination (EAT) code will not be used. The test will consist of the Emergency Action Notification (EAN) code followed by the audio message and finishing with the End of Message (EOM) code. Such a test was already conducted in Alaska which revealed a lot of faults in the system, and lessons were learned by both the stations and the government agencies involved (the FCC and FEMA). Each station must report to the FCC whether or not the test was run successfully, and the Feds indicated fines will be in order if the test is not complied with.**

VHFDX.info image shows 144 MHz. E-skip in the Southern US on June 22, including a double-hop contact from Nevada to Florida.

# Coast to Coast TV DX

Featuring reports from the entire United States and all of Canada.

Send reports by the 15<sup>th</sup> of each month to:

Nick Langan

1040 Riverview Drive

Florence, NJ 08518

E-mail: [nickl@wtfda.org](mailto:nickl@wtfda.org) (East) [wtvdx@wtfda.org](mailto:wtvdx@wtfda.org) (West)

## The Editor's Note

The E-skip season so far has brought us a mixed bag. There have been a handful of solid openings, including on June 10 and particularly June 22 to the southern and western U.S., with MUF into the VHF high-band. There has been much downtime in-between however, and some areas like the Pacific Northwest and New England haven't seen much activity at all. Several DXers have reported seeing much less in the way of DTV decodes via Es compared to in the 2010 season. Hopefully, this season will be the reverse of last year's, when most activity died out after July 4.

Just another reminder that you can now post your logs for the Coast to Coast TV DX column in the WTFDA.info forums. Just login and create a thread in the "VUD TV DX Reports" subforum, and I'll collect them each month right before the column deadline. Lots of good reports in this month's edition, so let's get to them!

Not nearly enough Es, but better than nothing.  
Seeing a "Foro TV" station on 4 made things  
interesting – as "4 Central", XHTV had no  
repeaters, and my 4 would have been Mexico City  
for sure, but, as Foro, there are some other stations  
carrying some of their programs.

XEFE came in three times, with May 22nd being  
the first time I ever logged this station. One  
wonders if XEFE has more power as they had in  
previous years.

Got CBLT just in time before it is affected by the  
Canadian analog shutoff in less than three months,  
but, alas, was not able to get any of the Toronto  
digital transmitters.

13:06 XHY 2 Merida, Yuc. "SIPSE" (analog)

Not too exciting after the tremendous tropo of the past few days. We've settled into <200 mile "tropo clutter" conditions with no "real" DX.  
Had a few other un-IDed Mexican stations.

**(NEW)** 15 KW

Some nice tropo openings again this past month.  
 We've overdue for a good Texas and  
 Pittsburgh/Erie opening. It seems as if both  
 occurred more often 10-15 years ago. Es has been  
 poor, so far, except for a few good openings. I'm  
 getting lazy listing the same Mexicans and  
 Canadians by Es in every report.

Channel 4 "telemayabeque" serves viewers who  
 live in the new Mayabeque Province, part of which  
 used to be Havana Province. It is to the west of  
 Havana. I suspect that this is the same station as  
 used to be the Havana educational one.

Analog 1926, DTVs 541.

73, Jeff

Some minor openings this month on tropo, as I  
 noted some changes on the sub-channels. WTHI  
 10 moved its weather radar to 10.3 to make room  
 for the pop music video channel The Cool TV on  
 10.2; this channel was also added by local KDNL  
 31, as well as WICD 41 and WYZZ 28. TCN, a  
 country music video channel, has been added by  
 WICS 42 in addition to KDNL 31. While there was a  
 major FM trop opening to the Gulf Coast on May  
 12, no new DTV stations or states were noted. The  
 first E-skip opening of the year came on May 22  
 into northern Mexico. On June 5, I noted that  
 KPTN-LP 7 had gone dark; the owners fired up  
 KPTN-LD 36, starting with four sub-channels of  
 color bars. On June 8, I noted 36.1 (which converts  
 to 7.1) carrying Home Shopping Network, which is  
 also aired on K38HD 38 (that one flash-cut to digital  
 on 38 1/1/2011). 36.2, 36.3 and 36.4 are still  
 transmitting color bars. On June 10, I noted the  
 local Daystar affiliate, KUMO-LP 51, had flash-cut  
 to digital on 51 as KUMO-LD. That leaves the two  
 TBN stations, K22HG 22 and K33GU 33, as well as  
 3ABN affiliate K49FC 49 and RTV affiliate KDTL-LP  
 16, as the sole remaining analog TV stations in  
 town. The E-skip opening on June 10 began in  
 Mexico before swinging around to the eastern  
 provinces of Canada, then to Manitoba and  
 Saskatchewan later. The June 11 opening went  
 mainly to Mexico and Cuba. DTV totals are at 126  
 as of June 11; analog TV totals now stand at 552.  
 73.

Times 24-hour PDT

This report is for May 2011. The "bits of tropospheric ducting" continued from early February until mid May, when it all disappeared. Most of May has been "nothing." A little rain showed up around May 15, and then dry & windy for remainder of month, except for May 31. Here is So-Calif coastal tropo to San Diego/Tijuana/Tecate up to 220 mi:

Apr27-May5	Variably poor	Calm
May 6	Fair	Warmer
May 7	Poor	
May 8 - 10	None	Windy
May 11 - 13	Var. poor	Calm
May 14 - 30	None	Rain, then wind
May 31	Poor	Calm

Best of DX to All Dennis

Kewaunee, WI 54216-1802

5/31/11

Not much to report. It looks like May is turning out to be a dud for both Es and tropo. With the exception of today Wx has been very unsettled with temps 15-28 degrees below normal during the month. Maybe June will be better.

## AUSTRALIAN WINTER OFF-SEASON E-SKIP

They're having a good off season and it's probably better than our in-season skip. This report taken from the FM DX Forum at wtfda.info. It was posted by a non-member, Geoff, from Numerella, NSW.

Big activity noted from 12:00PM local time (June 6<sup>th</sup>) & still going as I post this at 17:40 LT. Video carriers listed. S Meter strength in brackets. Es was like summer conditions.

**NZ**

45.24 Te Aroha (Assumed) (S4)  
 45.25 Wellington/Invercargill (S9) level  
 45.26 many carriers  
 45.273 Reefton weak bfo (low power translator)

55.24 Auckland weak bfo  
 55.25 Wharitie dominant+ other weak carriers (S5)  
 55.26 Dunedin dominant + other weak carriers (S6)

62.24 Christchurch (assumed) (S7)  
 62.25 weak bfo  
 62.26 Hedgehope strong (S9) w/ 67.76 audio in WFM

89.7 Concert FM Christchurch NZ

Invercargill NZ at 16:11 LT.  
 89.2 More-FM  
 90.0 Concert FM (& bits at 17:30).  
 90.8 The Rock  
 91.6 Breeze  
 92.4 Hokonui Gold

QLD (900 ~ 1500km)  
 46.172 RTQ0 Toowoomba (S8)  
 57.26 ABSQ1 Warwick (S3)  
 64.24 ABQ2 Brisbane - weak bfo heavy QSB

from 14:00 noted rare South Australia Es from west! roughly 900km.

89.9 5CCC-FM Pt Lincoln stereo "It's all about Hits" slogan but no actual ID (pathetic)  
 88.7 5CST Adelaide  
 89.3 5ENC/t  
 90.3 5SSA/t Adelaide Foothills  
 91.9 Nova 919 Adelaide  
 92.7 Fresh-FM Adelaide

64.26 ABS-2 Adelaide (S9+)  
 50.315 VK5RBV (S5)  
 52.438 VK3FGN Mildura (rarely heard in summer let

alone winter!)  
 52.45 VK5VF Adelaide  
 50.040 ZL3SIX Christchurch

**7 June Es**

More winter Es from New Zealand noted from 14:15 AEST. Powerline noise was extreme today also at S6 level(yuck). avg distance = 2200km.

FM faded out at 14:52 AEST.

89.0 Concert FM Palmerston North  
 90.6 ZM-FM Palmerston North  
 91.2 Concert FM Nelson  
 89.3 unid w/ talk (mono FM)  
 89.5 unid w/ ads (mono FM) seemed to be // with 89.3  
 90.9 unid w/ talk (mono FM)  
 91.4 Rhema Palmerston North  
 92.2 More-FM Palmerston North - ID "92.2 More FM Manuatu"  
 93.8 R.Live Palmerston North  
 94.3 Solid Gold Kapiti Coast  
 94.6 Solid Gold Palmerston North  
 89.8 unid w/ pop (assumed Palmerston North)  
 91.2 unid w/ pop - (Billy Idol's eyes without a face) song

Some kiwi's are unids as the re-packing of the FM band has thrown me into confusion as to who's on what freq now.

**10 June Es**

All south Is of NZ from 12:15 LT. Band 1 TV was also big peaking at 10dB/S9!

The opening on March 18 allowed me to note a pair of call letter changes on 97.7; Petersburg is on another set of calls; the second set since WLUJ moved to 89.7 in Springfield. West Frankfort dropped its longstanding WQUL calls, which it had since its "Cool" days in the early 1990s. When I started in the 1980s, this station was WFRX-FM. May 9 brought a new NOAA Weather Radio station in WXJ52; I also noted the city of license change of WDDD 107.3 from Marion to Johnston City, which is the city of license for their 250-watt AM station on 810. The opening of May 11-12 brought another NOAA Weather Radio station from Alabama, as well as the first one from Florida, KEC86 in Pensacola. I also noted my first tropo catch from Florida in the form of WKSM 99.5 at Fort Walton Beach. I previously noted the Pensacola area via E-skip in 1994 (WMEZ 94.1). I also bagged three ex-locals on this opening, including much-wanted stations WABE 90.1 and WSB 98.5. I finally bagged 99.7 in Atlanta after 19 years of trying; they were a similar format as WAPW when I was living in northwest Georgia from 1988 to 1992; I never heard them as WNNX. I actually went through WSB 98.5, along with its AM and TV sister stations, twice. They had annual Open Houses to connect with the local community. The E-skip opening allowed me to add 92.7 at South Padre Island; 92.7 is usually a mix of South Padre Island and Laredo when E-skip is going to the Rio Grande Valley. I also noted KKBA on their new frequency; I previously noted them on 92.5 in July 2009. June 5 was one of the more unusual openings; E-skip to the Rio Grande Valley in at the same time as tropo into the Ozarks. The opening of June 10 was a big surprise; I noted stations in English, Spanish and French on my car radio coming back to my QTH from a local Chinese restaurant. I had analog TV stations in from the Rio Grande Valley to start, later shifting to the Quebec and the Maritime provinces. In the space of two minutes, I noted my 35th FM from Quebec and my 10th FM station from New Brunswick. I noted my first FM station from Nova Scotia when CHFX 101.9 poked through WOZI with their call sign. On 92.7, I noted two New York stations, with WQTK carrying The Laura Ingraham Show (EWTN Global Catholic Radio's Raymond Arroyo was sitting in), while I pulled in Classic Rock from WXUR later on. Between my two New Yorkers on 92.7, I noted CBBK 92.9 for my 10th FM station from Ontario. Another milestone was reached in this opening when I logged CKLY 91.9 for my 1,100th FM station. I also noted an unidentified station on 107.3 when the opening shifted toward Manitoba and Saskatchewan; a relay station for CJME (AM) in Regina, broadcasting a sports talk show. No information on this station is available on any of the Internet sites. Before the opening faded from FM in the late night hours, I noted the call change on 92.9 Saskatoon (last hearing the station as CFQC in 2006). The opening on June 11 brought a new FM country when I heard Radio Progreso on 90.3 from Havana; I've heard this network on several Cuban AM stations. I also added a new Florida station in WKWR 90.1, and finally pulled KMCV on 89.9 through local WLCA. FM totals now at 1,105, NOAA Weather Radio totals now at 93. Makes me wonder which NOAA Weather Radio station will be #100 at this location. 73.

From the Editor

Thanks to all of our reporters this month! Good to see some folks are getting DX despite the lack of big openings thru mid-June.

If you haven't checked it out already, please go to [wfdm.info](http://wfdm.info) and see the VUD FM DX Reports on the homepage. Along with the more traditional ways of reporting, such as by mail or by an e-mail to the address at the top of the column, I'll be gathering the reports from that section for use in SFM. Be sure to keep the reports in a format similar to that used in SFM. Reports without dates or times will not be used, as those are obviously critical items in a DX report. Also, be sure to put your location in the report, and consider listing your DX equipment so we all know what you're using. The new Reports section is a great way to let everyone know what you've been hearing. Til next month.....

# 6 Meter/2 Meter Amateur DX

50 Mhz  
The *Magic* Band

Peter Baskind, N4LI  
3225 Forest Hill-Irene Rd  
Germantown, TN 38138  
N4LI@ARRL.net

We are almost half-way through the sporadic-E ( $E_s$ ) Season. While conditions have varied depending on one's location, for most folks, the Season has been a tad disappointing, as many operators have told me.

It's not that we have been without  $E_s$  so far. It's just that openings for the most part have been disappointing. Where I live near Memphis, there have been none of those all-day wall-to-wall openings we all love. The band will open; then it will close. Similarly, high-MUF events have been all but absent. 144 MHz  $E_s$  has only popped a couple of times, and it was very limited when it happened. Hopefully, that will change.

The big event of the Season for many is the June VHF Contest. Fortunately, conditions for that weekend, June 11-12, were really pretty good. On the heels of a very intense opening Friday with big signals from short distances (I easily worked a few guys in Atlanta while running just 5 Watts), the band opened early Saturday and stayed open almost all day. I was even able to nail down a couple of new 6 meter grids, including EL93 in Northern Cuba – a grid that I thought was all water. Who knew? Sadly, I still haven't been able to find a QSL route for the operator, CO0OM. Sunday was a bit quieter, but still active. Running mobile on a roundtrip to Jackson, MS, I worked several states with just 40W and a ¼ wave mag mount. Fun.

Spring tropo has similarly been a disappointment here mid-Continent. While I have enjoyed a few interesting openings into Florida on 144 MHz, none of the openings have been memorable or netted any of the three grids I still need in the Sunshine State on 2m. And, of course, I have heard Texas – a lot. That isn't uncommon, either. It was one of those Texas openings that bagged me thinly-populated EM01, my sole new 2m tropo grid of 2011.

As I type, many hams are preparing for Field Day. For some, this is the most important day on the ham calendar. With just a little luck, conditions this year will be better than last year's. I can hope so, anyway. If you haven't experienced Field Day, it is worth finding a local group that's participating. Some clubs go all out – multiple stations, big antennas, and constantly-tended BBQ grills. Then, there are guys like me – loners in parks with just their thoughts, small radios, batteries, and wire antennas. I would choose to visit the former, not the latter, if I were you.

## FUTURE OF THE VUD AND WTFDA

Here's part two of your comments concerning the end of the paper VUD and the status of the WTFDA in general.

---

### **Jon Hamilton (ON)**

First of all, thanks Mike and everyone else involved in the publication of the VUD, and in the maintaining of the e-mail list, website and forum.

1. I get the e-VUD, and have never received the VUD by mail. If necessary, I can just print articles from the e-VUD.

2. Yes.

3. I prefer receiving the e-VUD, as it contains interesting articles, and FCC/CRTC updates. It is especially useful for a newbie dxer like myself.

4. No. I've been on the forums since joining the WTFDA.

5. I check out the website once in a while for anything new.

---

### **Trip Erikson (VA):**

I'd really prefer that it had one. I'm graduating in the morning, but throughout my college career, the VUD has been great to carry with me to class and read on the bus while going to and from class. A lot of the information in the VUD is available online elsewhere, so I'm not sure I'd even read the VUD if it was electronic only.

2. Would a forum site, club website, eVUD and email list be of enough value to you to keep you as a dues paying WTFDA member?

3. Would a forum site, club website and email list (with no publication at all) be enough to keep you as a dues paying WTFDA member?

The mailing list is the primary reason that I'm a paying member, though I do love the printed VUD as well. If the printed VUD went away, I'd still pay so long as the mailing list remains.

4. Is this your first visit to the WTFDA Forums? If so, why haven't you been here before?

No, but it's the first time I've been here in a long time. Due to school, I've had neither the time nor setup to do any effective DXing. Also, I really hate the latest VBulletin software and avoid sites that use it.

5. Have you ever been to the club website (wtfda.org)? If not, why not?  
I have.

---

### **Dave Austun (SC)**

1. Does the WTFDA really need a paper publication?

No. Not in the year 2011 when we can really do everything we want to do online. Don't get me wrong. I'll miss the printed VUD. I have almost 30 years' worth and it's hard letting go. I like to be able to carry the VUD around and read it "like a real magazine". But we've probably reached the point where it's no longer viable. Higher postage costs, printing costs, and most of us (including myself) don't have the time to volunteer the labor that this takes. All I ask is that the VUD continue to be available as a PDF file. And I betray my ignorance of how all of this works, but does the eVUD get sent out to each member as an e-mail PDF attachment? And does it have the same basic look and feel of the paper edition? If so, I definitely vote for phasing out the paper.

2. Would a forum site, club website, eVUD and email list be of enough value to you to keep you as a dues paying WTFDA member?

Yes. Absolutely.

3. Would a forum site, club website and email list (with no publication at all) be enough to keep you as a dues paying WTFDA member?

I'd probably remain a member, as a club like this needs to exist, but I'd regret not having the eVUD. If there could be some kind of compilation, not necessarily in magazine format, that would be OK, just take a bit of getting used to.

4. Is this your first visit to the WTFDA Forums? If so, why haven't you been here before?

Was here a long time ago but lack of time, and easy availability of the paper VUD, generally keep me away. I am not actively DXing anymore, but if I stumble across Tr or Es "by accident", then I fire up what equipment I have. And yes, I do still have the 7-foot parabolic up in the backyard (elevating above the roof line would create an HOA war, we are monitored for the slightest infraction).

5. Have you ever been to the club website (wtfda.org)? If not, why not?

---

**Gray Fulk (NC) :**

Hello. Per the note in the May VUD, I want to respond that I would be OK to convert to EVUD only. While I do currently get the paper copy, it would be OK with me to do away with the paper copy, as I actually enjoy the color online!! If everyone agrees to drop paper right away, I am OK to forfeit the rest of the paper subscription to help out a bit!! Best of luck and keep WTFDA alive!!! Many thanks.

---

**Chris Ferland (QC)**

1. No, evud is perfect for me. i keep all the issues in my ebook reader and read it anywhere anytime :-)
2. Yes
3. Yes
4. No
5. Yes regulary

---

**Vincent Ferme (ON)**

Just read the June issue of the eVUD.

I agree with Allan Dunn's comment on page 19/20 about the 2 column eVUD display format. In my opinion this is the downside of any e-publication. The down and up routine on the computer screen is very tiring, more so now that I need bifocal/progressive lenses. (As one who also wears bi-focals, I do sympathize –Mike)

I realize that a print and online issues are not practical, but when only the eVUD is produced, please consider a single column format.

Thanks again for all the work you do on behalf of the club.

Regards,

Vince.

---

**Dan Novotny (WI):**

Let's keep WTFDA going even with eVUD!

---

**Jim Snow(GA):**

Used to receive paper – more convenient for me but I understand the need to convert and will do so on next renewal.

**Jerry Bond (NY):**

- 1.Limited amount only for members without internet access
- 2.Yes I have been a member since 1977
- 3.Yes But I would prefer to have a publication to summarize what happened during the last month
- 4.No
- 5.Yes

---

**Tim Noonan:**

1. Yes. I actively use the FM update sections, noting facts of interest to me into my notes, and I do this work away from any computer.
  2. Yes. It would be inconvenient, though, to have to print what I need each time, but I would rather do that than not have any source of FM updates, FMedia! having ceased.
  3. No. No VUD at all would wipe out my central reason for being a member.
  4. No.
  5. Yes, rarely.
- No on no. 4: My computer time is sufficiently limited that I focus on the main tasks at hand. Browsing in such material would take time that I don't really have (but reading a paper bulletin away from the computer poses no such problem).

---

**Larry Kenney (CA):**

- 1-No, but it's nice to have sometime to hang on to for historical purposes.
- 2-Yes
- 3-Probably not.
- 4-Yes, I visit the website several times a month.
- 5-Yes, same as #4.

---

**Russ Edmunds:**

I've never taken the paper VUD, so eVUD is fine, and losing the paper VUD wouldn't change anything for me.  
I use the e-list, Forums and website and like them all. I'm a member of 2 AM clubs also and take pdf versions of their bulletins as well.

---

**Fritze Prentice (AR):**

Question 1) I'm in favor of going eVUD only although I had subscribed in the beginning and last year to the paper version as well. Even when I had dialup only (DSL wasn't available in my area until July 2009!) the pdfs were small enough to download

Question 2) Yes. The email lists are what I use mostly, although I have started to use the forums more.

Question 3) Yes, although I would prefer having a monthly mag for a summary of the month's news and perhaps more articles.

Question 4) No, I've been coming here to the forums more, I did not use them for several years but it was the ability to post screenshots (tv and FM RDS/IBOC) and mp3 files of logs that made it enticing.

Question 5) Yes, but I'm here much more.

---

**Al Tobia (CA)**

Stop the paper VUD if you must , I prefer the paper VUD but I'll go along with the majority.  
If it makes the clubs volunteers jobs easier then do it.

A few things ,Mike mentioned in the June 2011 VUD in bold print on page 18 that he and other NRC members go to the DXAS website to download the DXNs

I assume Mike is talking about the National Radio Club and the DX NEWS.

If I'm wrong Mike please correct me.

I have been in the NRC since about 1975 and to this day receive the DX NEWS as a paper publiucation.

Yes it cost more then the e-DXN but it is still available as a paper publication with no body getting it for nothing.

The NRC e-DXN cost \$5 a year for present members and \$15 a year for new members.

The paper DX NEWS cost \$33 a year,for 30 issues.

These are U.S. address deliverly rates.

You have a choice,accordingly you pay extra for the paper version.

On the little ad for the e-VUD on page 33 in the June 2011 VUD it is pointed out that the e-VUD is not affected by postage increases or delivery delays.

Where is the WTFDA website maintained ?

That site can go down . . . that is kind of like a delivery delay.

I note that RocketTheme is behind the WTFDA website ,what happens when the club decides it is time to tweak the website or RocketTheme charges alittle more for what they do . . . again a club dues increase will be needed.

So there are cost increases associated with the e-VUD.

Yes maybe not as great as a postal increases but they can and will happen.

Many people look at the computer and the Internet as a panacea . . . they are not.

It can and will go down ( like postal delivery issues ) and it can cost more ( like postal increases ) as time goes on.

---

**Russ Edmunds:**

Just got through reading the summary in eVUD. Have some additional points for you for a subsequent discussion:

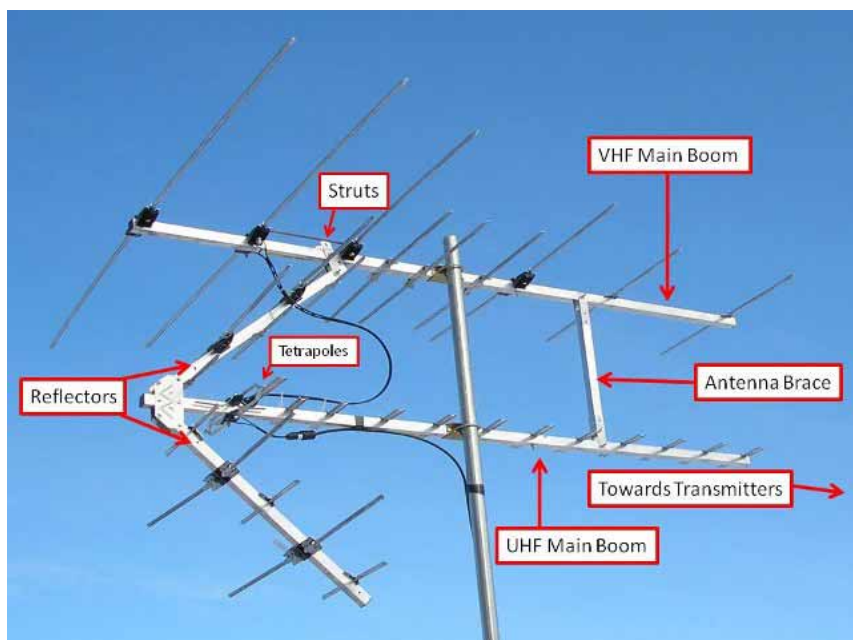

- 1) With the archive of eVUD's on wtfda.info, there's not need for someone to save all of their eVUD's and therefore no threat to their hard drive space.
- 2) If you really don't want to read it on the computer, then download the pdf and print it. That saves the club money.
- 3) I doubt that there are more than a handful of people who don't have direct computer access. And for them, there's the library as you pointed out. One or two people who might have to go to the library isn't enough to swing anything.
- 4) The emphasis on the greater immediacy of reports via eVUD if that's all we had cannot be overstated.
- 5) I wonder if some of these folks really understand that they'll pay a lot less in dues....

---

Good points, Russ. With every VUD and eVUD since January 1980 located at wtfda.org, there's really no reason for anyone to store them on their hard drive. If you must have them, then a 2 or 4GB thumb drive from Staples or Wally Mart will set you back around \$10.00 and hold thousands of them.

And lastly, for those who didn't reply, we will just assume you would be happy with either. Thank you all for taking the time to write or email.

# The Stacker

The following is an email conversation between WTFDAer Gary Hickerson and Denny Duplessis of Denny's TV Antenna Sales in regard to Denny's hot new hiband VHF/UHF combination antenna called the Stacker.

***My question is, How can a small antenna (EZ HD) beat the CM 2020. Look at the UHF section on the 2020. It looks as if the EZ should be rated for Suburban use, NOT 70 miles !***

Hi Gary,

What hurt the end score for the 2020 is poor VHF performance and little to no performance on UHF channels 38 and 51. The 2020 simply couldn't receive the VHF signals very well and failed completely on UHF channels 38 and 51. When my son our installer saw the 2020 antenna he was very excited about it. He was convinced it would perform well. Unfortunately many designers today are told to design an antenna that looks like it will perform well. They're told how the antenna looks is more important than how it performs just like chefs are told how the food looks is just as important as how it taste. It's hard to believe but consumers with no antenna background have a tendency to buy the antenna they think visually looks like it will perform well instead of the antenna that will perform well.

The 2020 like most antennas is designed to receive channels 14 through 69. Channels 52 through 69 no longer exist. To fully optimize the UHF performance of any antenna today's antennas should be designed for UHF channels 14 through 51. Any antenna that isn't (most aren't) is giving up 10% - 20% of potential performance.

One of the hardest things to do is to design an antenna that performs evenly well across the entire TV frequency spectrum and the 2020 fails to do so.

If we can assist you further, please don't hesitate to contact us.

***This is what he had to save about the Stacker ant. booms, being so close together! Seems to have done his homework ....***

When the two VHF and UHF booms are designed as a single unit you can actually tune each antenna so they compliment each other. The Stacker antenna spent about 6 weeks on the test range utilizing an analyzer and a computer program that allowed the actual technical engineer to tune each antenna so they phased with each other properly. These two antennas are tuned so painstakingly that the twin lead wire connecting the two antenna booms is cut to a specific exact length measured to within a tenth of an inch.

If you were to lay the two Stacker booms out end to end it would create an antenna that was about 144" long. When you think of it that way considering both antennas are tuned specifically to the digital frequencies in use it's not hard to see why the Stacker came out on top.

## It's Omaha Nebraska in 2011!

Thursday, October 13, 2011

Our 78<sup>th</sup> Anniversary-

National Radio Club, founded in 1933

Once again the "BIG-O-TEAM" rises again to host a Convention! They will host the National Radio Club/WTFDA Convention! The convention will be held at the Comfort Inn and Suites at 7007 Grover Street, Omaha Nebraska 68106. The Inn is located northeast of I-80 at the 72<sup>nd</sup> Street exit number 449.

We have ballroom "C", a hospitality room on the 3<sup>rd</sup> floor, an airport and bus shuttle, deluxe continental breakfast, guest laundry, 24 hour fitness room and business center and a large indoor pool.

Make your reservations directly with the hotel at 402 934-4900; *this is the only number to receive our convention rate!* You **MUST** mention the **NRC/WTFDA Convention Rate of \$75 plus tax = \$88.62 per night** which is for 1 to 4 persons per room. The Convention registration fee is only US \$45 per person; children (age 11 and under) US \$13. Please make checks payable to National Radio Club and mail them to Ernest J. Wesolowski, 13312 Westwood Lane, Omaha, NE 68144-3543 by October 1<sup>st</sup>.

Activities will begin at 3pm on Thursday, October 13 and will include tours which will be announced, as well as the ever popular auction. Please send auction items to Ernie. The Saturday night banquet is included in your registration fee and will feature a popular DX Audio Service editor as the guest speaker. Spouses and children are welcome and pets are allowed at the hotel, please inquire with the hotel for restrictions and any additional charges.

Come to OMAHA and see where the College Baseball World Series is held, the home of Warren Buffett, the TV/FM Antenna Farm and Clear Channel KFAB-1110. If you have any questions you may contact Ernie at his postal address above or via email at [neerniew@yahoo.com](mailto:neerniew@yahoo.com).

Your hosts,

Ernie Wesolowski and Carl Mann
