The Mailbox

SEPTEMBER 2011

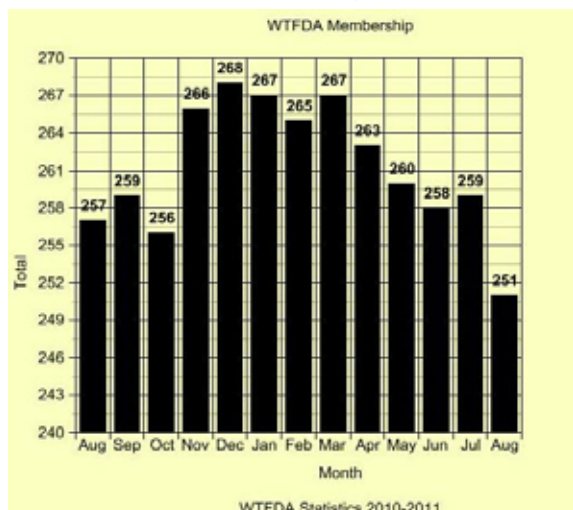

Welcome to the Mailbox for September. Big news this month is the passing of Dr. Bruce Elving. We've devoted our cover this month to Bruce and you'll read more about Bruce in this issue. One item that I've not seen reported anywhere is the fact that Bruce not only edited an FM column for DX Horizons magazine, but for many years was FM News editor for the WTFDA, and if you look at his old columns in the VUD you will see that he carried on the format into his FMedia newsletter. Bruce didn't just have a love for FM, it was more like a passion. I don't know if anyone with that passion exists anymore.

When I wrote last month that you could expect delays in receiving your paper VUDs, I wasn't thinking about hurricanes at the time. But Irene has her sights on Southern New England. My antennas are down and we're doing what we have to do to ride out the storm. I would imagine the power will go out at some point and we will be out of action for a while. Those members who read the eVUD will probably see their magazine long before our paper readers will.

This month we welcome **Johnny Rogers** to the club. John is N4JDR and lives in Silver Creek, GA. Welcome Johnny!

Renewals are in for the period of July 17 through August 12 from **Jeff Falconer** (ON), **Randy Miltier** (OR), **Nick Lombardi** (GA), **Steve Walko** (PA), **Eugene Hinton** (CA), **Roy Barstow** (MA), **Rich McVicar** (NY), **Bob Smolarek** (NY), **Ron Purdue** (MN), **Bob Hawkins** (IN), **Anders Akerlind** (Sweden), **Ron Rader** (IA), **Curtis Sadowski** (IL), **Bob Timmerman** (IN), **Ralph Strobel** (IN), **Fred MacCormack** (MN), **Jeff Lehmann** (MA), **Tommy Adair** (TN), **John Zondlo** (OK), **Steve Rich** (IN) and **William Lindsay** (WA). We're glad to see you come back for another year!

Ralph Strobel writes "This has been a pathetic E-skip season. Even though it's 100 degrees here now, no trop at all as in previous years. I was in Couer d'Alene, Idaho June 23-28 as my brother and his wife had a 50th wedding anniversary party. Andy Bolin said I didn't miss much..." Ralph also mentioned that he was gone from July 5 through the 10th and was told that there was no Es back in Indiana during those times.

Michael Levintow (D.C.) writes about the conversion from paper to electronic VUD. Michael says the club needs a paper publication but he would stay a member if we offer the eVUD. He makes some compelling arguments for keeping the paper VUD, some of which I agree with, believe it or not. However, reality returns and smacks us in the head. Publishing an online e-zine is not that much work. Publishing a paper magazine is work and we haven't had any serious volunteers to take on the job.

I really don't want to beat the horse to death here again. But I will say that some of the columns are printed in 8 point type or 9 point type to keep the formatting correct. I'm 65 with bi-focals and I have a tough time sometimes reading this stuff myself! If I blow up the eVUD to 115% then I can read anything easily. And my eyes thank me for doing it!

I will say that this column looks light-years better when viewed on a monitor than when attempting to read the paper version. Doug discovered the same about his column TV News when he began receiving the e-zine. There's no comparison. But some will never believe me. See you in 30!

Thanks to Ed Phelps and Bob Seaman for information appearing elsewhere in this column.

The FCC has placed a freeze on applications, for both full-power and LPTV stations, to use channel 51. They have also lifted the freeze on channel changes for existing full-power stations, if a full-power station on channel 51 wishes to move to a lower channel; and they have opened a 60-day window for LPTV stations with pending applications for use of channel 51 to amend those applications to move to a lower channel.

Cellular-phone interests requested the freeze, as well as a rulemaking to permanently prevent the licensing of new stations on this channel. They fear adjacent-channel interference to their operations above that channel.

At least at this time, the freeze is temporary, lasting for sixty days.

As you remember from last month, the FCC has increased the maximum power limit for VHF digital LPTV stations from 300 watts to 3,000 watts, matching the limit for analog LPTVs.

K13XD in Fairbanks, Alaska wasted no time in taking advantage of this change. They have become the first VHF LPDTV to request a power increase beyond 300 watts.

WHRO-TV (RF 16/virtual 15) has asked the FCC to change its city of license from Hampton-Norfolk, Virginia to Norfolk, Virginia – Elizabeth City, North Carolina.

No technical changes are planned. My bet is the idea is to obtain must-carry protection on cable systems in areas of northeastern North Carolina, just across the border from Norfolk.

For those who log their TV DX by transmitter site, note that WBUY-TV (virtual 40/RF 41) has moved across the state line, from Mississippi to Tennessee. The station now transmits from the WPTY-TV (virtual 24/RF 25) and WLMT-TV (virtual 30/RF 31) tower east of Memphis.

Canadian stations in so-called “mandatory markets” should have gone digital or gone dark a few days ago. Those operating above channel 51 should have either moved to lower channels or gone dark.

However...

The CBC filed a last-minute plea to allow some of their stations to continue in analog, and in some cases above channel 51. These applications have been granted, but only for one year. The stations involved:

AB	Forest-burg	CBXT-12*	52	3.8kw/96m
NB	Saint John	CBAT [1]	4	22kw/423m
NS	Digby	CBHT-7*	52	700w/237m
NS	Digby	CBHFT-6*	58	700w/237m
NS	Truro	CBHT-8*	55	1.2kw/141m
ON	Chatham	CBLN-TV-3*	55	1.1kw/194m
ON	Foymount	CBOT-1*	14	42.3kw/229m (from ch. 59)
ON	Kitchener	CBLFT-8	61	635w/198m
ON	London	CBLN-TV	23	24kw/263m (from ch. 40)
ON	London	CBLFT-9	53	340w/307m
ON	Paris	CBLN-TV-1	29	60kw/260m (from ch. 56 Kitchener)
ON	Sarnia	CBLFT-17*	17	27.2kw/98m (from ch. 68)
ON	Windsor	CBEFT	35	36kw/207m (from ch. 54)
QC	Lac-Etchemin	CBVT-4*	55	770w/259m
QC	Quebec	CBVE-TV [2]	11	84kw/500m
QC	Saguenay	CBJET	58	595w/184m
QC	Trois-Rivieres	CBMT-1 [3]	13	90kw/378m

* This change in facilities is permanent – not subject to the one year time limit.

[1] This is a significant power reduction; along with installation of a directional antenna, it will prevent this transmitter from covering Fredericton. Speaking of which, the separate digital transmitter to cover Fredericton has been approved. It will run 7.36kw/103m on channel 31. If call letters are assigned in sequence, this one will be CBAT-DT-7.

[2] English-language CBVE-TV will take over the analog transmitter formerly used by French-language CBVT. CBVT has gone to digital operation on channel 12.

[3] English-language CBMT-1 will take over the analog transmitter formerly used by French-language CKTM-TV. CKTM has gone to digital operation on CBMT-1's former analog channel 28. Despite the callsign, CKTM-TV is a CBC-owned station.

The 12-channel “wireless cable” operation at Tracadie, Nova Scotia has surrendered its license for cancellation. Channels used were 16, 30, 32, 42, 44, 46, 48, 52, 56, 58, 60, and 66.

Good DX!

NEWS ITEM: On August 4, we learned of the death of Dr. Bruce Elving, Publisher of the *FM Atlas*, backer of all things FM, and good friend. Our condolences to his family.

NEWS ITEM: Translators aren't just for filling in FM signal coverage gaps anymore. They have become a more important part of radio owners' spectrum strategy toolkit. Many commercial and noncommercial radio operators — both AM and FM — are using FM translators in ways previously unimagined, not only supplementing local signal coverage but leveraging them to gain a more lucrative footprint on the FM dial for content that originally airs on AM stations or FM HD2/HD3 channels.

Demand for translators also is increasing as broadcasters realize they effectively can create additional radio stations in markets by location-hopping and moving towards more heavily populated areas, according to several technical radio observers.

An FM translator retransmits the signal of an AM or FM radio station without significantly altering characteristics of the original other than its frequency and amplitude. FM translators historically have been used to fill in coverage where terrain blockage was an issue.

There were 6,141 licensed FM translators and boosters as of March 2011, according to the FCC. That compares to 3,897 in 2005 and 3,243 in 2000, according to commission data. FM boosters essentially are translators that operate on the same frequency as the primary station. The FCC doesn't distinguish between FM translators and boosters in its database.

Approximately 500 FM translators simulcast AM broadcast stations. That's a measure of the success of a rule change, adopted just two summers ago, allowing AMs to use existing FM translators in certain circumstances.

Observers say radio's evolving translator strategies simply take advantage of current translator rules. For instance, a broadcaster can add a fill-in translator with power up to 250 watts regardless of antenna height as long as it does not exceed the protected contour of the associated primary station.

Interestingly, the 60 dBu of a 250 watt fill-in translator at 2,000 feet height above average terrain presents the same coverage area as a Class B or C2 FM station, thus "creating fairly high-power entities," said Doug Vernier, president of broadcast engineering consulting firm V-Soft Communications.

This creative use of translators is a fairly recent phenomenon, Vernier said, as broadcasters have learned to recognize the opportunities.

"A fill-in at 250 watts in a small town could cover 10 miles. People have also figured out how they can move translators into AM coverage areas and the FCC seems more comfortable with that. The rules really haven't changed, but the benefits have," Vernier said.

NEWS ITEM: News Item: The FCC reported a "notable" drop in the number of complaints it received about radio and television in the third quarter compared to the prior three months. The complaint statistic tends to be volatile, based on factors such as the time of year new TV programs are introduced as well as the timing of coordinated campaigns by advocacy groups. The commission said radio/TV-related complaints decreased from 25,162 in the prior three months to 2,611, a drop of more than 89%. "This decrease appears to be attributable to a substantial volume of complaints received during the second quarter that were a product of campaigns against particular programs," it stated. The majority of complaints continue to be related to programming. The FCC reported that in the three-month period, it received the following number of complaints related to radio and TV:

- Interference: 127
- Digital TV: 288
- Programming General Criticisms: 288
- Other Programming: 950
- Programming: Indecency/Obscenity: 958

"Inquiries", which it tracks separately, also fell. The number of radio and television broadcasting inquiries decreased by about 29% from 4,883 to 3,490. More than half of those also pertained to broadcast programming. Overall, the number of complaints in the top four reported categories (which also include things like cable and satellite services and unsolicited faxes) fell some 30%.

Thanks to Shawn Axelrod, Deane McIntyre, Tim Noonan, Radio World Online and Upper Midwest Broadcasting for gnus.

September 2011

A mixed bag this month. First we start with record-setting DTV Dxe Ed Phelps, NN2E of Benton, KY. Ed recently surpassed 600 DTV logs and it looks like there's no stopping him.

WKNO-29 Memphis, TN
140 mi Tr seen 5-10-11

WMYO-51 Salem, IN
180 mi Tr seen 5-10-11

WDAM-7 Laurel, MS

WHBF-4 Rock Island, IL
335 mi Tr seen 6-7-11

WLOV-16 West Point, MS
212 mi Tr seen 6-20-11

WUWT-TV-26 Union City, TN
Local seen 5-10-11
"still analog, bogus calls"

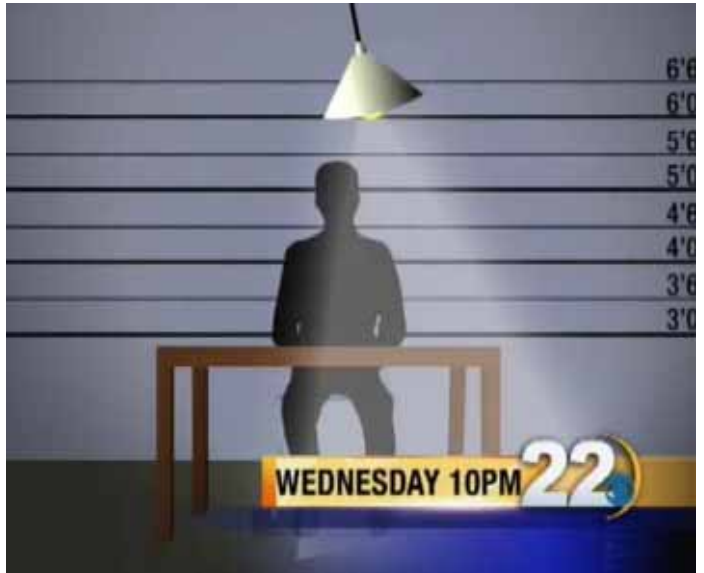

WBSN-32 Norton, VA
325 mi Tr seen 8-3-11

Ed comments: "Back in the days of analog (I'm sounding old, aren't I), WBSN ch 47 was a daily visitor here. This is the first time I've seen them since they moved to channel 32. One of my biggest local channel cloggers is WPSD 32/6 (906KW at 38 miles) to my northwest. This picture was taken while WPSD was on air! It is a very rare occurrence when another channel 32 can make it through WPSD."

Now we welcome Peter Baskind of Germantown (Memphis), TN. Peter uses an 8-bay UHF antenna in the attic and a CM 7777 amp, with a SiliconDust HD receiver fed to an iMac.

WYES-11 New Orleans, LA

73's, JEFF

Remembering Dr. Bruce Elving

BRUCE ELVING, PH.D.

Bruce F. Elving, Ph.D., 76, of Esko, died Sunday, July 24, 2011, in Loma Linda, California.

Bruce was born in Two Harbors April 19, 1935, to Fred and Mildred Elving. He graduated from Duluth Central High School in 1953, earned his M.A. from Iowa State University in 1957, and earned his Ph.D. from Syracuse University in 1970. He was a college professor, FM-radio enthusiast, and publisher of FM Atlas since 1971.

He was a member of the Duluth Seventh-day Adventist Church, Arrowhead Stamp Club, Duluth Coin Club, Swedish Cultural Society, and Mended Hearts Chapter 104.

He was preceded in death by his parents.

Bruce is survived by his wife of 41 years, Carol; daughters Kristine (David) Stuart, Karin (Daniel) Clements, and Kimberly Misson; and grandchildren Kyleigh, Timothy, Rachel, Bethany, Stephen, and Rebekah.

VISITATION: 12 noon until the 1 p.m. memorial service Monday, Aug. 8, in the Duluth Seventhday Adventist Church, 3210 Decker Road, Duluth.

My remembrance of Bruce Elving.

I first met Bruce at my home in Bloomington, MN in 1957. He had stopped by for some reason, I guess to meet a fellow DXer. The ironic part is that we both grew up in Duluth, MN, living some 6 or so blocks apart. The Duluth hillside, where we both lived, had an un-obstructed view for some 50 or so miles across Lake Superior: great for Dxing back then! Bruce was several years behind me in high school, so I never met him at school.

Back in the early days of the FM Atlas, around 1971 or so, when I was working at Control Data, I had keypunch operators punch a mess of cards for Bruce to use for his FM Atlas. I really don't recall how many cards were punched or how I got the girls to do it on company time, but it did get done. Somehow, I wish I had saved a card or two, as they would be antiques now.

Bruce was a person who tended to be frugal, and we co-subscribed to several magazines and would meet in Cloquet, MN, on the way home from our cabin, to exchange the magazines and converse. We also co-hosted a WTFDA convention many years ago at his home in Esko, MN.

Bruce & Carol had a 40th 'anniversary' get together last year at the Woman's Club in Duluth, as they weren't sure of reaching any more milestones in the future. My wife & I attended, and it was recorded on video along with a short speech I gave. We also attended a wedding or two when their daughters were married.

I guess he considered me one of his closest friends, as he confided many health issues with me. He was also fighting Prostate cancer, and he believed that the newer method of treatment, called "Proton Therapy", offered by a clinic (?) in Loma Linda, CA, would help. His hopes were high, as Dr's in Duluth gave him only 5-10 years to live. It turned out rather ironic! Talking with his wife, Carol, she said his heart gave out, although he never mentioned any heart problems to me. These Proton treatments were very expensive, and I tried to tell him that there are a lot of 'quack' treatments in California, and to be careful. But, he was bound and determined to go out there for, what would have been, a period of about 3 months for treatments.

Bruce was a very religious person, and I guess that he is looking down on Earth and getting a whole world full of FM signals in his present location in Heaven.

John Ebeling, Bloomington, MN August 19, 2011

Robert Ross, Ontario

That's a Real Shame.....an FM DX Legend and true Innovator in the Field of FM DXing!!! Exchanged many emails with Bruce over the years....he will be deeply missed....RIP Bruce!!

Russ Edmunds, Pennsylvania

I have known Bruce Elving since my days at Syracuse University in the mid-1960's, where he taught a couple of broadcasting classes I took. Our DX'ing bond became quite evident even then, when FM was still quite young. His interests at that time were FM and TV, mine mostly AM and some FM. We've corresponded sporadically over the years but I had not had any subsequent opportunity to see him face to face after 1968. I have always considered him as a friend, and I am saddened to hear of his passing. Our hobby owes him a great deal.

Bob Timmerman, Indiana

Very sad news. I started dxing 30 years ago when I was 13, and I always had a copy of the FM Atlas. It was an invaluable resource.

This is really sad news.

Saul Chernos, Toronto

It will be hard to pick up an FM Atlas, now, without thinking about Bruce. We e-mailed back and forth on occasion - he'd read a logging of mine and want to know more about the station, or I'd have a question about formats or a listing in the Atlas. In recent years I bought two books, as I have tended to ruin them through overuse. Pages are already falling out of the latest one, but now I think I'll avoid the better copy so it can remain as intact as possible. We met a couple of times at

WTFDA and ODXA conventions. At one of them, I purchased a radio he outfitted with an SCA adapter.

Really, Bruce is among a handful of DXers whose roots truly lie deep and who played a role in developing the hobby. He will be seriously missed.

Jim Renfrew, New York

Sad to hear this news about Bruce. I met him at least once that I can recall, maybe at wtfda in Syracuse. But his FM Atlas has been a constant companion since I found one for sale in an electronics shop around 1970, 2nd edition I think. The FMA was a LOT thinner then! In fact, I just sent Bruce a typo that I spotted in the most recent edition, so I was obviously eagerly awaiting a new edition. Thanks to the man who put Adolph on the map! Bruce will be missed.

Karl Zuk, New York

I am stunned by this news.
I was very privileged to know Bruce.
I admired him for his knowledge and passion for FM DXing and SCA.
He was talented in so many ways.
A true gentleman, he was always willing to help with questions.
We had some great conversations.
I had a long interview with him during my tenure as editor of Monitoring Times' American Bandscan.
I will miss him greatly.
He was old-school and a fine, fine friend.
My saddest condolences to Carol and Kristine.
I will always remember his kindness and warmth.
God bless Bruce.

Fred Nordquist, South Carolina

Shocked to see Bruce Elving untimely passing.
He came by my home to talk dx upon moving to Syracuse back in 1969, and we have corresponded many times on FM dx matters, & bought most of his FM Atlas booklets over the years. Yes he will be sorely missed!

Dave Pomeroy, Kansas

I think I met Bruce back in the 70s at an AIPA meeting in Buffalo. I have had correspondence with him off and on over the years and always enjoyed hearing from him. I am saddened by his passing, but glad that I met him and that he was a part of my DXing.

Gary Olson, Florida

So sorry to hear we have lost one of DXing's pioneers. I heard of Bruce's FM exploits around 1956 when I started TV DXing. I got a chance to meet him for the first time at the University of Wisconsin-Milwaukee in the late 60s. Bruce had worked there and I worked there for awhile after he left and he returned to meet with a group of us who were trying to expand WTFDA into a better club. Dave Janowiak, Morrie Goldman and a few others were involved. I communicated with Bruce from time to time over the intervening decades always marveling what he had done with an idea he had for what became the FM Guide he produced for so many years.

Yes, another one of us "old guys" is gone but fortunately the hobby lives on!

Jeff Kadet, Illinois

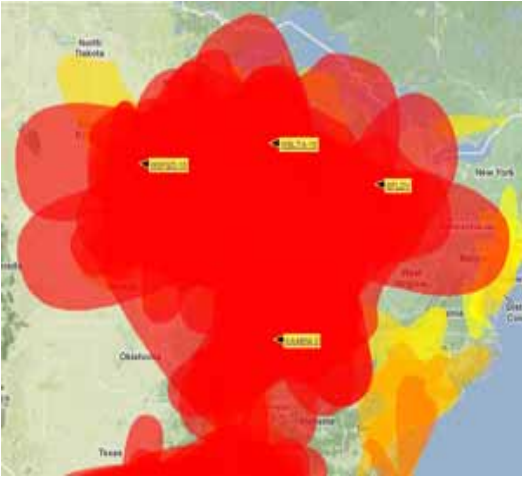

Brucey (as he liked to be called) was kind enough to let me visit him and Carol for 3 days a few years ago. I enjoyed looking at all his old FM veries plus the "famous" typewriter. He will be sorely missed

David Sinclair, Vancouver BC

I am sad to hear that Bruce passed away. I remember visiting with Bruce and Carol at our Convention at Omaha during July, 1994. Prior to this I corresponded with Bruce several times. My sympathies to Carol and family.

John Lentz, Wisconsin

My condolences. I was at the WTFDA convention he hosted in Esko. I can't recall offhand when that was 1987?. I recall meeting him not to long ago, perhaps at Bill Dvorak when he last hosted the Milwaukee-Madison GTG 3 years ago.

Coast to Coast TV DX

Florence, NJ 08518

E-mail: nickl@wtfda.org (East) wtvdx@wtfda.org (West)

A "big red blob" of tropo encompasses the Mountainlake APRS map on August 2, across the Plains and Midwest.

The Editor's Note

The first week of August brought some good tropo in the Plains, Midwest, and western Great Lakes. Conditions since then almost everywhere have been pretty quiet. That means it's time to take a look at reports from the past E-Skip season, and we have quite a few of them for you inside this edition of Coast to Coast TV DX.

We'd be remiss if we didn't acknowledge Ed Phelps' (NN2E) 600th DTV log, WGN-DT, which came on July 25. Ed is the first known DXer to log 600 DTVs. Way to go Ed, quite an achievement!

Chris Dunne

EDT

Some cities misspelled for space concerns.

All stations logged are ATSC digital
unless marked with system identifier.
A → NTSC analog, Americas channels
No "DT" suffixes shown as they have
been officially discarded.

BOLD is what I now use for NEW STATION
(includes new digital station formerly logged as
an analog station on same channel),
as it seems the new reporting scheme has no
provision for underlining the call sign

Bold state/country means new PU
(or new digital PU)

Bold distance means new personal best
distance for type (digital/analog) and band

(VHF or UHF)

flash-cut digital - Canada DTV #2!

Seems I haven't sent a report with so many new stations to the log in decades! 10 new stations in DTV alone (I had only 8 new DTV stations in the whole year of 2007!) The pre-dawn of 8/2 blew the lid off my DTV tropo bests (I had questioned whether I would ever get WHBF). Strange thing about this one is that Chicago seemed to be "locked out" despite being in the path. Perhaps the top of the Willis Tower was above the duct? Another Tr opening not to forget was the Ontario opening over the night of July 21 and 22 - just hours after Detroit's temperature hit 100° for the first time in 16 years, and just in time, as some of these stations will shut down at the end of August with Canada's digital transition. In this opening, stations tended to come and go, but this was good, as some stations only could be identified after others on the same channel faded out. The VX-5 also came in very handy when lowband channels had 4 stations coming in at the same time. Some new stations were actually not that far away at all. WCPO and WSYX recently moved to UHF channels. WSYX, WLLA and WFQX had to be strong enough to overcome strong local signals (WMNT-CA, WDIV and CICO32, respectively). Note that I've logged a "new" WFQX (DT) once before - but that was channel 47 from TL near Kalkaska, which is now WPBN. WFQX on 32 is another facility next door to WWTV near Cadillac. CKLT1 is one of those stations I know I've actually seen dozens of times before, but only this time, after I logged it with a local ad for an NB business, did I realize it was "new". I had always been content to log it as tentative, as CJCB is also CTV Atlantic and has a minus offset 3 in Nova Scotia.

Danny Oglethorpe
Shreveport, LA

Time used is Central Time

Only the first logging via Es of each station per reporting period is reported.

Mexico relay text IDs are generally displayed about five seconds.

Es season about over here--hope for a few more openings. This season seemed below average to me. 7-12 the best Es day here w/lots of Mexicans & a couple of new ones. 7-22 was best tropes, w/5 new DTVs logged. Let's hope the fall brings more tropes.

1211 WEHT 7 IN Evansville (7-2: local programming) 165/266

July 11's tropo opening, while it allowed me to log two new Illinois FM stations from the northern part of the state, only allowed me to have a relog of WGN 19, carrying the noon newscast cable viewers can also get via WGN America. I also noted the signal meter lighting up on 12, 27 and 29, but couldn't get any signals to decode. July 12 was mainly short tropo. The E-skip openings on July 19 and 24 were into Mexico. On one of the Mexican stations, I noted an ad for 97.7 Kiss FM, promoting a Classic Hits format. Looking at the FM Atlas, there's a 97.7 assigned to Merida in the state of Yucatan. If you see the ad for 97.7 Kiss FM on channel 2, you've pulled in XHY. The surprise of the opening of July 19 was XHDEH 6, running a public service announcement for the state of Chihuahua. On July 24, I added another new TV country with the log of Televiscentro on analog channel 2 from Nicaragua. They were carrying an aquatic event from California with Spanish language commentary, with promos mentioning Televiscentro. Again, short trop wrapped up the DX day on July 24. The next morning, I noted the

network switch in Evansville, as noted in Doug Smith's column in the August VUD. WTVW now identifies as "Local 7", while Fox has been noted on WEHT 7 is concerned, 7.2 airs primarily local programming; some of which is produced by WAZU 20. The July 27 opening brought one new DTV in WTTV 48; I only logged them once in analog days on channel 4 (that was with KMOV nulled). In the wee hours of the following morning, a long-wanted station was finally logged with the reception of WHBF 4. The signal wasn't strong enough to hold for an ID and video capture, but was lucky to catch it again three days later, and it held for an ID and video capture. The August 1 opening started in Indiana and Kentucky. I logged only my second low-power DTV outside St. Louis in that opening, with the log of WJTS-LD 18. That turned out to be my 35th Indiana DTV. I was also able to null WRBU 47 enough to log WAVE's main channel, but it didn't hold so I could determine what was on the sub-channels. The opening extended into Michigan later in the evening; the only new log was WZPX 44. Even a Canadian analog made it in on 32. After midnight, I was able to log several Illinois stations; WMAQ 29 was the only Chicago station that made it in. The opening finally faded by 1600 CDT, but not before I got another relog of WEHT 7. The analog TV log now stands at 554, with the digital count now at 137. 73.

 Times 24-hour PDT

This report is for July 2011. Much of month had high pressure here, allowing rather consistent tropo, though still not great conditions beyond its steadiness. Maybe warmer ocean water temperature helped. I hadn't thought of that as a factor. In June, our local ocean temp was 55F but by July 2 was 62F. Jul 3 up to 66, and San Diego reported 70. At mid-Jul down to 63 here, where it still is. So-Calif coastal tropo to SDiego/Tijuana/Tecate up to 220 mi SE:

Jn30/Jul 1-2	Poor	Calm, warmer
Jul 3 - 7	Fair-good	Warmer yet
Jul 8 - 12	Poor-fair	A bit cooler
Jul 13 - 15	None	
Jul 16 - 25	Poor-fair	Warmer
Jul 26	Good	
Jul 27 - 30	Poor	Unsettled

WEVV 45.2. I was able to null out KUMO-LD 51 to pull in WMYO. As far as the second channel of

My place with inside ants or Don Voegel's place with outside ants, all with my LG 20" flat screen. All analog except Jul 9 new local d32. New loggings are underlined.

Jul 4 Es at Don's place, apx 0900-1000, ID 0935 2 XEPM-TV Chihuahua, Chih Mexico, apx 1000 mi SE. This same "tu canal" was seen without ID in May 2010.

Jul 4 tropo also at Don's place, including such as 17 KDTF-CA San Diego (Univision) 175 mi SE (over local 17 KSBP-LP SBarb, and 35 K35DG La Jolla ("UCSD-TV" Univ of Calif San Diego) 175 mi. Otherwise, everything else seen from SDiego/Tijuana/Tecate on analog & DTV with usual signals as listed on Feb 4 (in Apr VUD) at Don's place.

Jul 7 Es at my place, 1900-1940 chs 2-4 Spanish; ch 3 ID 1924 XHQ-TV Culiacan, Sinaloa apx 1100 mi SE; ch 4 unID, XEW network.

Flash-cut local analog to DTV: Jul 5 32 KSBT-LP SBarb's last day on air. Jul 6 off. **Jul 9** 0145 noted on air as d32 "32" KSBT-LD SBarb, still as translator of KRCA d35 '62-1' Riverside.

Jul 10-11 tropo at my place, ch 2 unID, weak, at the same time as 3 XHTJB (Once TV) Tijuana BN, fair tropo at 200 mi SE. Both were also seen on other July dates. The Ch-2 showed only vague silhouettes and no sound, programming undetermined. New stn on air? It could be anywhere to SE along Calif coast or north Baja. Not seen at Don's place. His ant has no rotor for exact direction.

Jul 26 Don's place, 1100, 39 KZSD-LP San Diego (Azteca America) 175 mi.

SBarb partially reconstructed analog total is now 90 with 2 new in this report (109 including nearby mtn loggings). SBarb DTV total is now 54 with 1 new.

Best of DX to All Dennis

If there was a phrase to describe this report, it's "nothing short of amazing." The opening of July 11

brought numerous stations in from northern and central Illinois, adding two more with the logs of WSPY 107.1 and WALC 102.1. Semi-local WLCA 89.9 was off on July 16, allowing me to log WCBU and KHIS. I logged KHIS off the back side of the antenna. The E-skip opening into Mexico on July 19 brought new logs from Chihuahua (XHDI 88.5) and Coahuila (XHCTO 93.1). Tropo started to heat up on the evening of July 24 with an opening into KY and western MO. On the morning of July 25, I logged WJLT 105.3, which I last heard back in the '90s as WYNG. With semi-local WAOX on the frequency, that got to be a tough go. WVUB 91.1 was added to the log the same morning, nulling out WIBI to pull this one in. That same evening, I pulled in several stations from Chicago and northern Indiana, including that "Franken-FM" known as WLFM-LP. They are no longer using "The EI" as their slogan, but rather "Chicago's Smooth 87.7". The format sounded more like Smooth AC than Smooth Jazz. Another new Indiana FM was added before the midnight hour. WMYK 98.5 is the 47th FM logged from Indiana at my QTH. The next night, FM stations made it in from five different states; the opening pretty much went from Bloomington, IN and Henderson, KY in the east to Kansas City in the west, and north toward Chicago. Everything broke loose on July 31, August 1 and 2. The opening started with relogs of stations from northwestern MO, southeast NE and southwest IA on the evening of July 31. The opening extended through August 1, with new stations from IA, MO, NE and SD in the wee hours of the morning. KEXS 106.1 was noted for Missouri FM #159, and KHK 106.9 was noted for Iowa FM #59. One new NOAA Weather Radio station was added from Nebraska with the log of WXL73 in Bassett, in the north central part of the state. The programming originates from the National Weather Service office in North Platte; what gave it away was that times on the warnings and advisories were expressed in Central and Mountain Daylight times. That afternoon, I pulled in a new Wisconsin FM with the log of WWIB 103.7. A check of their Web site noted a link to the web site of WOGO (AM). This is because one of the ads in the cluster after *Family News in Focus* was voiced by syndicated financial talk show host Dave Ramsey. The action shifted to Illinois and Iowa in the early evening hours, before mid-evening brought in stations from Kentucky and Tennessee. The late night hours brought in 10 new Michigan FM stations. Two of the FM stations I logged were ones whose programming I also heard on AM: WBBL 107.3 (formerly on 1340 in Grand Rapids) and WOOD 106.9 (simulcast on 1300, also in Grand Rapids). Even with WHHL 104.1's transmitter site six miles north of my QTH, I logged WOMC 104.3 for my fifth Motown FM. Michigan was also added on NOAA Weather Radio with the log of KZZ33 on 162.525 from Mount Pleasant. The programming for this station originates from the National Weather Service office in Grand Rapids. Ohio was also added on NOAA Weather Radio with the log of WXL51 162.500 from Toledo. The programming for the Toledo station originates at the NWS office in Cleveland. The 100th NOAA Weather Radio station logged at this QTH was heard in the wee hours of August 2 with the log of WXK81 162.400 Onondaga, MI, a wide spot in the road near Lansing and Jackson. Like KZZ33, the programming originates at the NWS office in Grand Rapids. I came into the opening with just 11 Michigan FM stations logged...that number nearly doubled to 21 by the time it was over. An unusual situation I noted was with the translators for WARW 89.5 Dorsey, IL. The translator in Bellefontaine (north of Spanish Lake), K268BF on 101.5, was noted on July 25 relaying WXRT 93.1 Chicago (the pickup comes from W226BC 93.1 in Brighton, IL) and WIBC 93.1 Indianapolis. The situation repeated itself on August 1, when K268BF was noted relaying KKYA 93.1 Yankton, SD. I turned my radio to 93.1, and sure enough, KKYA was in on that frequency, too. W226BC, which picks up the Air 1 programming from WARW, was relaying WKPB Henderson, KY and KCFV Ferguson, MO instead of WARW in that same opening. KCFV is a local on 89.5, so I couldn't hear WKPB. That same evening, I was noting K268BF also relaying WKPB. Toward the end of the opening, I noted K268BF relaying WYDS 93.1 Decatur, IL. As of August 5, 2011, the FM total is now at 1,144, the NOAA Weather Radio total at 100. 73.

From the Editor

Good to get at least a little bit of DX this summer. Seems the last few years all I get is from the north and the east. Sure would be nice to get a good opening to the northeast of here!
 As you've seen elsewhere in this VUD the FM DX community lost a true giant recently in Bruce Elving. To say he will be sorely missed would be an understatement. I was very fortunate to get to spend time with him at many conventions, including the last one I hosted here back in 2002. My condolences go out to Carol and the family. I daresay there will never be another one quite like him.

Northern FM DX

Wow! What a month! I've been primarily FM DXing since 2008, when I replaced my CM 4228 with an APS-9B. The antenna situation here is difficult, not because of zoning restrictions but because of the way my roof is slanted; I bought an XG91 in the Spring of 2010, which I still have to put up (if it ever gets up!). I would have really liked to have had it for some of the tropo openings lately. July 2011 was my most successful DXing month ever, with 131 new stations received.

The last time I was actively FM DXing was in June 2010. On July 3, 2010, a house fire started in the bedroom across the hall from mine. None of my possessions were actually burnt, but many had a persistent smell of smoke on them, and we were out of the house for over a month. When we returned, only two rooms were habitable, and the entire upstairs was still under reconstruction. I really only moved back into my normal room after my trip to Mexico (April 1st), and bought a Y-RCA cable so I could use my XDR-F1HD with my Squeezebox on June 30th. I now have my nine year old desktop computer back in service and primarily use that as an "amplifier" for my XDR-F1HD, as well as for recording with Audacity.

On the evening of July 21st, I was without a working laptop charger, and the nearly two hours of inactivity between 2235 and 0025 were spent 1) (mostly) unsuccessfully trying for distant DTVs with my APS-9B plugged into a Voom receiver (my DTT900 is either lost or was stolen) and 2) dragging my desktop computer upstairs to supplant my laptop computer until I received my charger. I think I could have logged many new stations in that time interval.

Some time around the 23rd, local KUWS 91.3, a nearly 100,000 watt blowtorch some 9 miles away from me, turned off their IBOC. They never turned it back on. Stations which were very hard or impossible to get have now become regulars. Regular reception on 91.1 is KNOW Minneapolis, MN (124 miles, MPR News's flagship station) to the south, WGGL Houghton, MI (172 miles, a combination of MPR News and MPR Classical) to the east, and KCCM Moorhead, MN (205 miles, MPR Classical) to the west; on 91.5 it consists of CKPR Thunder Bay, ON (192 miles, a commercial sort of A/C station that announces their calls between every song!) to the north, KCFB (121 miles, affiliate of the MCBI Christian network) to the southwest, and a faint KQMN (219 miles, MPR Classical) to the northwest. Meanwhile, my laptop charger arrived in the mail, and was exactly the same as the original – except it generated a horrible, full-scale buzzing sound across the entire FM band!

The tropo on the evening of the 31st was remarkable, with almost the entire Omaha – Lincoln and Sioux City dials booming in like locals. Beyond those cities, I also received numerous stations from Kansas and Missouri, the farthest being KJCK Junction City, KS, which fought with KNXR and an enigmatic station interviewing a Christian rock group (Newsom?) for at least four hours, announcing themselves as "Power Hits 97.5" and matching their website's schedule. I tried for the next hour, unsuccessfully, to log more distant stations, perhaps from Wichita, but failed to do so. The next night brought excellent tropo too, with 55-watt WXPW Wausau coming in with 2 out of 3 bars on the XDR-F1HD and Grand Rapids, MI stations also being received.

The opening on August 4th started out as a near-repeat of the 31st, but soon spread east. The Mountainlake APRS map showed at least two stations from my area reporting ducting from my area to KY and even western NC, but no stations were to be found from near there.

I am currently up to 789 FM stations logged.

EARLY TELEVISION

MEXICO: TV activity, centering mainly around Mexico City with the capital's first station, XHTVNOVEDADES, licensed to publisher Romulo O'Farill's Television de Mexico, started in September.

With a 5 kw. RCA transmitter located atop the National Lottery Building, the station covers some 3,000,000 persons in the Mexico City area. XHTV has a three studio camera chain plus a mobile unit, and operates from 5:00 to 7:00 p. m. on weekdays and from 4:00 to 7:00 p. m. on Sundays.

The second Mexico City station, XEW-TV, owned by broadcaster/showman Emilio Azcarraga, is due on the air in the near future. Stations will use a GE transmitter to service a planned chain of large capacity TV theatres throughout the city so that video will be immediately available to the general public. Mexico has set a ceiling of 10,000 TV sets to be imported this year, though Azcarraga expects this quota to be raised to 60,000 in 1951. Meanwhile, RCA has shipped some 400 non-synchronous 10-inch sets that can be adjusted to work on the city's 50 cycle current.

Reports on a third station in the area, owned by inventor Gonzales Camarena, indicate that it has been on the air experimentally for many months with live and film transmissions both in black and white and color. Programs are said to originate at the National Stadium with a score of sets installed in department stores and at the city fairgrounds. Color system is alleged to be similar to that of CBS.

TV is also starting along the Mexican-U. S. border with the allocation of Channel 6 to the Jorge I. Rivera enterprises for station XEAC-TV in Tijuana. Engineering is reportedly completed for the transmitter whose signal is expected to cover 80 per cent of Southern California. The station uses RCA equipment and plans call for a seven day a week schedule, 6:00 p. m. to midnight, with 60 per cent of the time devoted to English broadcasts.

Plans are also said to be underway for TV outlets at Matmoras (Channel 7) and Nuevo Laredo, both owned by Compania Mexicano de Television headed by Texan Manuel Leal. In addition, Azcarraga is reported to be planning to establish some half dozen border stations in the next two years.

From Televisor November 1950

BRAZIL: TV station, RADIO TUPI (Channel 3), atop the Banco de Estado in Sao Paulo, is about ready to start regular operations. Owned by Brazil's radio network, Emissoras Associates which is headed by Dr. Assis Chateaubriand, the station employs the 525-line system, using RCA equipment including a 5 kw. transmitter, studio facilities and a mobile unit.

The second Brazilian station (also RADIO TUPI) is due to start soon in Rio de Janeiro with a 5 kw. GE transmitter located atop Sugar Loaf Mountain. The station is intended to service some 3,000 receivers, mostly in public places and GE has already shipped some 1,800 TV chassis (12 1/2 inches and 19 inches) to Rio for the TV debut.

OTHER SOUTH AMERICAN COUNTRIES: Argentina, Uruguay and several others are talking TV interestedly but no definite plans are yet indicated. Colombia reportedly is interested in receiving bids for U. S. station and receiver equipment and has already received British and Dutch bids for a transmitter and 500 initial sets for Bogota.

OTHER LATIN AMERICAN DEVELOPMENTS: Perhaps the first international TV circuit was organized last April as the PanAmerican Television Corporation headed by Mexico's Azcarraga and Frank Fouce of Hollywood, and including showmen in Cuba, Brazil and Argentina. The organization will handle all phases of production and televising, with Hollywood and New York branches acting as buying agencies for programs. In addition to purchasing U. S. telepix, to be dubbed in Spanish, the firm will produce its own TV films at Azcarraga's Mexico City studios. The group also plans to show its kinescopes in the U. S. and abroad.

There is also discussion of the formation of a Latin American TV film network to link outlets in Mexico, Cuba and Puerto Rico and eventually the rest of South America. The film network will feature news, special events, sports and documentaries produced in Spanish and prepared as packaged programs.

From Televisor November 1950

CONVENTION 2011 OMAHA, NE!

Thursday, October 13, 2011

Once again the "BIG-O-TEAM" rises again to host a Convention! They will host the National Radio Club/WTFDA Convention at the Comfort Inn and Suites, 7007 Grover Street, Omaha Nebraska 68106. The Inn is located northeast of I-80 at the 72nd Street exit number 449.

Make your reservations directly with the hotel at 402 934-4900; *this is the only number to receive our convention rate!* You **MUST** mention the **NRC/WTFDA Convention Rate of \$75 plus tax = \$88.62 per night** which is for 1 to 4 persons per room. The Convention registration fee is only US \$45 per person; children (age 11 and under) US \$13. Please make checks payable to National Radio Club and mail them to Ernest J. Wesolowski, 13312 Westwood Lane, Omaha, NE 68144-3543 by October 1st.

If you have any questions you may contact Ernie Wesolowski at his postal address above or via email at neerniew@yahoo.com.
