

We had a large VUD last month and this one is looking to be another huge one, so let's get started.

We added one new member last month and he is George Boulles from Griffith, Indiana. Welcome to the WTFDA, George!

During the period from August 8th through September 13th we received renewals from **Rod** Jorgenson (WI), Saul Chernos (ON), Frank Aden (ID), Howard Fountain (GA), Roosevelt Crawford (KS), Mark Colombo (VA), Larry Weil (NH), Glen Boche (MN), John Tudenham (MO), John Hourigan (CO), John Vervoort (MI), Glenn Haser (OK) and Lee Freshwater (FL). Thank you all for renewing and we're glad you're here!

A quick note from **John Tudenham** (MO) says "Would much rather have a mailed paper copy but will try this." Thanks, John, for trying the eVUD option. Let us know what you think a few months from now.

Ron Cesarek in Ocala (FL) sent me some pictures a while back and added "Though not an active member right now, I will continue to support the club in whatever form when my renewal comes up in October. I will miss the paper form but will grudgingly move further into the 21st century. Thanks again to you, the rest of the board for your efforts in keeping the club relative." Thanks for the comments, Ron, and I have the pictures, one in particular could make a neat VUD cover. Thanks!

Bob Hawkins (IN) sent this a while back: "I've been FM DXing off & on since the late 1960's and a little over a year ago, I kind of went into the transmitting business. In April 2010, WYGB 100.3 Edinburgh, IN began transmitting from my garage via a 240' tower. If you log this one, please mention it even if it's a re-log (so far it appears no one has logged it). Thanks & while I generally dislike eversions of anything, it works for me as the computer & tuner are both anchored at the same spot." If anyone heard WYGB this summer via Tr or Es, let us know here so Bob can find out about it.

Dave Nieman sent in this obituary for a WTFDA member many of you old timers may remember: Dr. Michael W. Lapinski, 62, of 44 Grandview Avenue, Lakewood, died Monday, July 25, 2011, in University of Pittsburgh Medical Center Mercy Hospital.

He was born December 4, 1948, in Trenton, NJ, a son of Michael and Vera Lapinski. Following graduation from Hopewell Valley Central School, he received his undergraduate degree from Seton Hall University and a medical degree from College of Medicine and Dentistry of New

Jersey, Newark, NJ. After completing his residency at SUNY Upstate Medical Center, Syracuse, he and his wife relocated to the Jamestown area where he was employed as a pathologist by WCA Hospital from 1978-2000 and Warren General Hospital from 1978 to the present. While serving Warren General Hospital he was also Medical Lab Director.

His hobbies are varied and include nature photography, Ham radio, model railroading and oil painting.

Those of us who attended WTFDA conventions in Jamestown will remember Mike and his house on top of that big hill.

A note from Bob Cooper: "Paul M's front covers are closer to "a work of art" than mere photos and congratulations for running them!" I second that! This month's cover is from Paul and I have a folder with many more for the upcoming months. When you live in a place like NM with no DX most of the year, you have time for doing stuff like this, and doing it well. Thanks Paul and thanks Bob for noticing.

Bob also has more on the late Bruce Elving and, as usual, it's really interesting: "Bruce while still attending the University of Kansas in Manhattan and as NNRC "FM DX" editor for that group was of course known to me. His support of the addition of FM to my Radio Electronics alternate month "TV DX Column" (thereafter "TV-FM DX Column"; 1958) was superb. FM DX was actually a "hobby" before television DXing; it started in the late 30s when FM was in the 42 MHz band. Radio Electronics was edited by the well known scientific mind of Hugo Gernsback. "How FM was added" to the TV DX column is not so well known. Hugo's son Harvey had a seashore home in NJ and one day when he was fiddling with an FM receiver there he stumbled across some Es from Iowa. A light went on in his mind and I was "told" "you will add FM to the TV coverage". I did that. Bruce's agreement to do a FM DX Column for DXing Horizons was a natural fit; from his NNRC work. His interest in subcarrier (SCA) decoding was equally natural for Bruce and he was incensed when FM broadcasters pressured the FCC to "outlaw SCA adaptors" from FM sets then being sold. But his most vivid memory to me was his no-holds-barred/no-exceptions "personal rule". Before he would add a new catch to his growing log list, he insisted that he hear the station's "legal ID" (which varied in FCC requirements over the years but in 1960 had to include (1) call letters, (2) frequency, (3) city of license). You can but imagine how many "stations" he really heard in his lifetime which did not "measure up" to his required identification rules!" (75%? –Mike)

I have more on Bruce that may be included in this VUD or just the eVUD where I have no size restrictions. I have sent Carol Elving two editions of the FM Atlas that she didn't have and will be sending her three copies of the September VUD for her daughters.

They say that a picture is worth a thousand words. These two say volumes and are enough to bring tears to your eyes, especially when one of the antennas involved is an APS-13. **Chuck Rippel** posts on wtfda.info: "A Nor'easter dropped my FM and TV antenna tower destroying among other things, my APS-13. I'd like to replace it but it appears to be no long made.

Mine is in the picture below. You can see it sort of pressed into the wood pile. The big beam is an M2 6M9 KHW.

Actually, that was 60' of Rohn 25G bracketed to the building and also one set of guys. One of the guys failed and over it went. The mast is (was) a 21'

piece of 2" steel water pipe. No damage to the roof."

And that's it for this month. I hope everyone who gets to Omaha this month has a really great time! Don't forget to find Matt Sittel and ask for an autograph! See you all next month.

NEWS ITEM: Heathkit Will Make Kits Again - Sending a pleasant shudder up the backbone of many a hobbyist and ham, Heathkit says it is back in the kit business. "The first kit will be a Garage Parking Assistant," the company states on its website. "The Garage Parking assistant kit lets you build your own system that uses ultrasonic sound waves to locate your (FM NEWS CONTINUES ON PAGE 36)

Thanks to Fritze Prentice Jr. for information appearing elsewhere in this column.

The distributed transmission system described for KRBK, Osage Beach, Missouri last month has been approved by the FCC.

CJON-DT St. John's, Newfoundland has applied to launch what I believe would be the only DTV subchannel in Canada. Actually, the subchannel is already on the air.

The studios of CHOZ-FM 94.7 and CJON-TV are co-located; so are the two stations' transmitters. In analog, the CHOZ-FM audio had been delivered to the transmitter site on two spare audio subcarriers of the TV studio-to-transmitter microwave link.

When CJON-TV went digital, they installed a digital studio-transmitter link – and configured the link to also digitally pass the FM radio audio.

The method they used... ended up making the FM link audio available to TV viewers, as virtual channel 21.2. The station was not immediately able to determine how to hide the link audio from TV viewers.

Now, they're not so sure they want to. It seems a number of TV viewers have noticed the FM audio, and asked the station to leave it on the air.

Also in Canada, we have our first request for a VHF DTV station to move to UHF... CBVT-DT Quebec City was assigned to DTV channel 12 with 2.45kW. Working with my rather feeble French, it seems the station didn't feel it had any problems with its VHF digital signal – until the analog transmitter was shut off on September 1st. Then, the complaints came in. They seek 291kW on channel 25.

K51JF, San Antonio's database record also shows the station moving to San Antonio, Virginia. I think you can reasonably assume that's a typo. The listed coordinates are still safely within the borders of Texas; and at least according to Wikipedia, there is no San Antonio in Virginia...

Good DX!

Jeff Kruszka, Editor 1909 Lost Lake Place Pearland, TX 77581 jkruszka@sbcglobal.net

Another mixed bag this month. We hear again from Jeff Kadet of Macomb, IL.

WDKY-31 Danville, KY 383 mi Tr seen 5-29-11

WLMT-31 Memphis, TN 361 mi Tr seen 5-30-11

WLOX-39 Biloxi, MS 700 mi Tr seen 5-30-11 And now we welcome Rich McVicar of Navarino, NY (south of Syracuse). Rich uses a CM3671 deepest fringe all-band antenna and a Magnavox 19" TV.

CKXT-20 Ottawa, ON 178 mi Tr seen 6-7-11

WOPX-48 Melbourne, FL

1100 mi Tr seen 5/26/11

@2130 ET

CJCN-4 Grand Falls, NF 1089 mi Es seen 6-4-11 "change to DTV PSA"

Thanks, Rich. And now more record-setting tropo from Ol' Roy Barstow in Teaticket, MA:

73's, JEFF

By Bruce F. Elving

Thirty Years an FM DXer

The following is an article written on the 30th anniversary of the FM DXing career of the late Dr. Bruce Elving and published by Dr. Elving in the October 1978 VHF-UHF Digest.

Long before FM radio became accepted as a medium for musical enjoyment, stereo and lack of static, I decided to try my luck at FM DXing. Being adequately warned when I first bought an FM radio with paper route earnings at the age of 13 in October, 1945, by the literature that accompanied the new Zenith table radio that, although FM stations are sometimes heard at great distances, do not expect to tune in other than your local stations. Choosing to defy these words, I did dial my radio until one night I managed to receive WMIN-FM 99.5 St. Paul MN. A whole winter went by with similar receptions from stations up to 300 km south of me - in the direction favored by the hillside location for which Duluth, Minnesota, where I began my DXing career, is noted.

In the spring - May 15, 1949, to be exact - my first skip, WJAX-FM 95. 1 Jacksonville FL, was received. Not recognized as skip at the time. I kept tuning near that dial spot until later a weak signal from WWCF 94.9 Greenfield Township (Baraboo) WI was heard. This southern Wisconsin station would for many years remain as an indicator station to me when tropospheric conditions were building. By concentrating on WWCF and WTMJ-FM 93.3 Milwaukee, a super-powered station that was to leave the air in 1950 (and later come back on with lower power on 94.5), attention to improving my receiving set-up could be done. Not being a technical person, I worked on improving the linecord placement of my receiver's antenna, later graduating to a turnstile (all-directional) FM antenna mounted on the roof of the house where I grew up. In 1952 I had graduated to an FM yagi, having ordered two five-element yagi JFD antennas from Lafayette Radio, an order that took months to deliver, probably because the antennas had to be specially made, demand for FM receiving gear being so low at the time. These antennas were double stacked and non-rotatable. I used this system for about four years, with lightning finally hitting it, destroying the twin-lead and some of the home appliances. Finally, it was replaced with single-stacked yagi antennas, both horizontally and vertically polarized atop rotators. During the period 1954 to 1960 I was FM DX editor of the Newark News Radio Club, and in 1960 FM editor of "DXing Horizons," published by Bob Cooper.

Almost from the start I collected verifications from the skip stations I received, beginning with WJAX-FM, and invariably asking each station heard if this report from Duluth represents the most distance that they knew of at which their FM signal has been heard - a question that I continue to ask of all stations I receive, even stations less than 100 km away. In most cases, stations replying state that Duluth is the most distant point from which they have heard. I am well-known as a constitutional DXer, believing in following a set of rigid and inflexible rules that exist as a pre-condition to hearing and counting DX. Thus my log is devoid of "tentatives," and I refuse to count as new stations those that have changed frequency, call letters or city of license.

My log of stations has grown to 1450, with 1335 verified. Actually, it is not an impressive log at all, considering that I have added to it from one location for over 30 years, with each of those years accounting for new stations, despite the fact that for some of the time I was living away from "home." Yet, vacations provided an ample opportunity to make new leggings, and my antennas remained (and remain) in place.

I have antennas in place at my mother's Duluth house on the eastern hillside, at my own residence near downtown, and at my father-in-law's in suburban Hermantown (near Adolph). I DX with two receivers, so you can see that when moving from one DXing spot to another a certain amount of tuner or receiver moving must also be done. The biggest antennae are at my mother's, and the system where I live is barely adequate, enabling some excellent DX to come through, but hampered by less than the best (actually, junk) antennas to be used and considerable local station overload interference to be experienced. At my father-in-law's, local station interference is at a minimum, and the handicap of not being able to receive stations well to the north and west, because of being behind a hill at the in-town receiving locations, is eliminated. However, a receiving site in town, close to myriads of 100 kw FM and maximum power VHF TV signals does give the opportunity to test traps and receivers for interference suppressing qualities, even though subjecting the human organism to unknown deleterious effects from radiation - a subject that is receiving increasing popular and scientific scrutiny.

Despite 30 years' experience in FM DXing, there are gaping holes in what I have heard compared to what a seasoned DXer would expect I would have heard. For instance, very little of my new station logging activity has included meteor shower and auroral DX, as a glance at the Statistics column will show. From Canada only the provinces of Manitoba, Ontario and Quebec have been heard; this contrasted with every state east of the Mississippi in the U. S., and the majority of the states in the west. Tropo does continue to be strong here, despite a proliferation of new stations in the area. Indeed, it is this very proliferation that has accounted for a major part of my new loggings - and, may I add, a welcome part of my loggings, for I am as interested in building totals in my log as I am in quality of loggings.

The above may seem strange for a DXer to say, but I lived through the lean period of 1949 through 1956 when established FM stations were leaving the air and deleting. Thus, when stations began to return to the air - a trend that has continued for 23 years - I was enormously pleased, because it meant not only new FM stations to receive by DXing, but new FM stations to listen to for programming, and an assurance of FM's continued viability. I have to this date encouraged broadcasters to take up FM, increase power, and find channels for allocation and application. A DXer should not be selfish and hope for the "good old days," with a wide-open 88 to 108 MHz band for DXing, but instead she or he should be on the lookout for new DX through the barriers of new educational and commercial stations and FM translators.

Since 1964 I have made tapes of most of my new receptions, and have combined the best of these into an "FM DX Demonstration Tape." Tape editing is fun, but very time-consuming, especially when you have over two-year's worth of unedited tape sitting around on several reels and cassettes awaiting editing and re-editing, so that only the significant remains and the rest can be bulk-erased, permitting new DX to be recorded on the same tapes. Such is the status of my tape work now.

While I look to the development of main-channel FM as a healthy thing, I see a bright future in subcarrier FM, or SCA. Here is a truly unexploited region for the development of creative, new programming services. In order for SCA to fully develop, however, I look for long legal battles with entrenched special interests who will fight to keep SCA away from the ordinary consumer. And I see myself in the center of this controversy, just as I doggedly refused to admit in 1948 that FM DX was not possible. If I can make any lasting contribution to my fellow man it will be in liberating SCA from its present bondage, and thus opening new channels of information, education and entertainment to the masses. SCA I look upon as superior to extending the AM broadcast band, opening up longwave broadcasting in North America, resorting to cable radio, or translators for local station origination. It is an energy-efficient use of the spectrum, resulting in the need for creation of no new stations, and it is static and interference free, like FM itself is. It is as reliable a form of communication as your local FM station is. The only problems I see, outside the legal sphere, lie in the reluctance of many FM broadcasters to allow the development of a subcarrier, for fear that their main channel modulation and/or coverage will be reduced, and competition from non-music and non-talking forms of communications, such as teleprinter devices, for available SCA channels that could better be devoted to aural communications with the public.

I am confidently looking forward to another 30 years of FM DXing, even though my publication and interest in SCA has taken away some of the interest I had in going after DX for the sake of DX. And I hope to continue to add to my log from the Duluth, Minnesota, area where I began, even if I should at times take hiatii from the area. While I am probably no longer the leading FM DXer in the club from point of view of number of stations received at one location, give me time and I will hope to regain the lead from those who are unable or unwilling to DX from one area for 30 to 60 or more years! I do count it significant that I was named "Man of the Year" by the Association of North American Radio Clubs in 1973, and that I continue to enjoy support for my column in the World Wide TV-FM DX Association's digest, "FCC-FM."

We've long since passed the point where the "experts" no longer think of FM as having no DX possibilities - skip, trops and meteor scatter are well-known, at least in certain circles. Yet, for personnel at many stations getting a report of reception at a farther-than-normal point, is still a novelty and a source of joy, resulting in interesting and informative letters of verification. Offsetting the trend toward more stations and restricted DX opportunities is improved receiver technology, plus more widespread use of FM antennas. Thus, the entire radio-listening segment of the stereo and hi-fi industries stands to become FM DXers. So what we have learned about DXing we can pass on to our children, our friends, and our neighbors. The hobby will surely grow - and we won't have to be individualists who are willing to "buck the crowd" to prove the point that FM DX is indeed possible. It will prove to be a worthwhile hobby in its own right, at a time when Americans are increasingly faced with the problems brought on by more and more leisure time.

WTFDA PARTNERS WITH FMLIST.ORG ON NORTH AMERICAN DATABASE

With the FM Atlas no longer published, FM DXers and listeners will need an updated, current database of North American FM station information. The FCC database at FMList.org is a logical choice. The FMList database is a fully searchable, fully customizable database of commercial, translator and LPFM stations in the US and Canada. The entire database or part of it can be downloaded to your computer and/or printed.

WTFDA has agreed to work with FMList, org to maintain and update the US and Canadian databases.

* The FCC database has already been updated and is current.

- We will need info on format switches, slogan changes and any updated RDS data such as station additions, deletions, changes in PS/radiotext data or bogus PI codes.
- WTFDA is currently looking for editors. An editor would be responsible for updating a region, or a state or perhaps just a city. Editors would receive updates from users to FMList, or from other contributors. They would then update the database with that information.
- Editors will have to be registered at <u>http://www.fmlist.org</u>. Editors do not need to be WTFDA members to be FMList editors. Email us for more info.
- Editor requirements: 1. A desire to want to help make the FMList North American database the most complete, up to date FM resource for DXers and FM listeners in our part of the world. 2. A few minutes of your time. We need editors for the midwest, upper midwest and Pacific northwest, as well as SoCal and some other areas.
- If you are interested, email us and tell us what area you'd like to manage.

NEW ADDITIONS TO WTFDA.ORG

Scanned VUDs from 1978 and 1979. All .pdf files for reading or download by DSL or Cable.

UHF Yagi Stack vs. Parabolic

REPOSTED FROM A THREAD ON WWW.WTFDA.INFO BY STEVE RICH

I located a new (still in the box) Finco P-7 (7 ft. parabolic), which had been discontinued a number of years ago, in August 2010. I used a Channel Master 4250 (6 ft. parabolic) back in the 1970s and I had wondered what it would be like to DX DTV with a parabolic. So I couldn't resist the temptation but I really didn't do much with it until recently.

In July, I took my P-7 down to Mike G., a DXer on the southeast side of Indy, where we mounted it on the end of his house, up around 30 ft., just enough to clear his roofline. In comparing reception between his Yagi stacks (wideband) at 40 ft. and the parabolic at around 30 ft., the parabolic delivered a stronger signal for almost every station. He used the Winegard HDP-269 preamp on each setup and used the same DTT900 for the tests. He even hooked the lines through his signal meter and it showed stronger signals from the P-7. The only exceptions I saw while at his house were on the very low UHF channels, like WTIU, Bloomington and WREP, Martinsville. That was pretty much expected. Then after three weeks, we took it down and I moved it back to my house, approximately 14 miles NNW of Mike's.

Prior to taking it to Mike's house, I had played around with it on a temporary mast up around 25 ft., which didn't even clear my neighbor's houses. So after seeing the difference in reception at Mike's I had to take the plunge. On Aug. 1, I lowered the crank-up tower and took off the mast and the two Triax Yagi stacks (wideband and Band A). I didn't reuse any of the original masting parts because I wanted to be able to put everything back as it was if I wasn't happy with the P-7. So now after over a month of testing the P-7, I like it but I don't see much of a difference with it, at least from my less-than-prime location for DTV DXing. I've been trying to get used to the different null locations. The F/B ratio is fairly similar to what I got used to with the Band A stack, where more signal gets in from the rear than with the wideband stack. BTW, I do have approx. 2/3 of the parabolic screened with chicken wire. The top of the parabolic is close to 40 ft. AGL and I'm using the Winegard HDP-269 preamp.

The biggest pro I've noticed so far with the P-7 is that it does seem to work better than the Yagi stacks when I aim it towards the Indy antenna farm (3-5 miles to the SW). WTWO and WAWV, Terre Haute, IN @ 84 miles are much easier to receive and the azimuth reading is the correct heading for Farmersburg, IN, the transmitter site. With the Yagis I almost always had to misaim one way or another to receive them. And a few weeks ago I logged two DTVs from Paducah, KY which I had never seen before. The aim for Paducah is right at the antenna farm. Otherwise, reception in other directions doesn't seem to be much different. I do think the P-7 has a little more gain than the wideband stack on channels above 40.

The first picture shows the antenna setup prior to Aug. 1, with two Triax Unix 100 wideband antennas horizontally stacked on the top, with two Triax Unix 100 Band A (ch. 14-38) antennas horizontally stacked just below those antennas, and then a single Funke 1922 VHF high-band antenna at the bottom of the mast. The second picture shows the latest setup as of Aug. 1 with the Finco P-7 on the top and the Funke 1922 below it. -Steve

Magnavox MDR515H/F7 500GB HDD and

DVD-R with Digital Tuner

BY STEVE RICH

http://www.walmart.com/ip/Magnavox-M...uner/15080509?

A friend ordered this unit last week and I helped set it up a few days ago. It was ordered from Walmart's online site (not available in stores) and arrived at the front door in less than 48 hours for a 97 cent delivery charge. Talk about recording time for potential DX material. When recording at the slowest speed (six speeds to choose from) via the HDD (hard disk drive) it will record up to 620 HOURS!! Wow, and no subscription fees, service charges, etc. on a monthly basis with this unit. For HDTV viewers, this unit DOES NOT record in HD, but rather SD (standard definition) but it does upconvert to 1080p. If your old VCR is dead, this sure could be a great replacement unit that would record potential DX for days or weeks at a time.

Don't be misled by the incorrect description info at the Walmart website. The built-in tuner DOES include both NTSC and ATSC. I took along a Zenith DTT900 to see how well the tuner in the Magnavox would compare. The Magnavox and Zenith tuners were virtually identical in receiving/decoding weak signals. The Magnavox has an "RF in" coaxial terminal on the back and an "RF out" coaxial terminal to continue the RF signal to another receiver.

The built-in ATSC tuner in the Magnavox is not as DXer friendly as the Zenith. I only got to play around with it for a short time, but I could not get it to accept an RF channel manually untill AFTER I allowed it to perform part of an auto scan/search for channels. To do this, it first scanned for NTSC stations and then scanned for ATSC stations. To allow for manual entry of a DTV RF channel number along with a subchannel number, I stopped the auto scan just after it started scanning for DTV channels, like around channel 2 or 3. At this point, the Magnavox allowed manual entry of a DTV RF channel number. But as a comparison, the tuner in the Magnavox works somewhat like the old RCA ATSC11 set-top-box. Once the tuner decodes a station, it lists and remembers the station's virtual channel info. So if you later enter the RF channel number for a station that is the same as the virtual channel number of something the Magnavox has already found and listed, the tuner will return to that previously found station, not the new one you are attempting. So just as we had to do with the old RCA ATSC11, and some of the other older as well as the newer tuners, you need to rescan to remove and delete those previous stations from its memory. Then the tuner is clean and ready to start over. I didn't see any optional scan that allows you to simply "add" channels.

It seems like a pretty sweet unit for the price. I did see this unit listed at Amazon but at a slightly higher price. There are a few units out there virtually the same but with smaller hard disk drives. This one has the big one at 500GB. This Magnavox unit seems to be about the only unit of its kind. It's made by Funai.

Any other info, experience, ownership, etc. of this unit?

Coast to Coast TV DX

Featuring reports from the entire United States and all of Canada.

The Editor's Note

Much of the eastern half of the U.S. has been gripped by an unsettled weather pattern, intertwined with a couple tropical systems, causing the month of September to be poor for tropo. The middle of the month did feature some longer tropo paths in the deep south fueled by the Gulf of Mexico, and that should occur even more as we head into fall. Most notable this past month were a couple of off-season E-skip flare-ups, with MUF well into FM on the 4th and 13th, mainly across the east.

Generally October is the last chance for the northern half of the U.S. to sneak in some good tropo before the dead of winter sets in. Let's hope it makes up for a pretty uneventful September. Another nice-sized C2CTVDX report this month, including some fascinating hilltop DTV loggings from Bob Seybold.

In August one is accustomed to seeing VHF/UHF conditions, especially sporadic-E, level off, but this August transition was particularly abrupt. Trop became rare as our "typical Dallas summer" suddenly gave way to "typical Sudbury September". At least I have my HF stuff and the sunspots are back. CBC has done its strange "transition", moving CBEFT to a temporary analog transmitter on channel 35. Anyone but me remember watching CBEFT on channel **78**? They moved to 54 on or just before 9/29/1982, and now to 35. Coincidentally, another station that has twice changed to a lower channel also used channel 35 for decades (WLOK/WIMA/WLIO Lima, 73=>35=>DTV 8).

CBCP3 was an interesting addition to the logbook. I finally got *BOTH* of the CBKT repeaters (showing CBC Saskatchewan Weather) at the same time.

That's all so far this year. The NYC opening on 7/15 was enjoyable with pictures for several minutes. This is a tough path with the Pocono mountains in the direction added to the fact that I am located in a valley, in the lowest part of that valley yet. No luck with digital Es this year despite seeing a few "yellow progress bars". Log total is up to 13 DTV's after 3 years of Dxing these stations. Pathetic, I know, but I blame this on the fact that there was not one really decent tropo opening here in 3 years. Tonight, 9/3, I have the dish aimed at Albany and NH and there's something on 21. I don't know what that could be. Jeff Kadet, K1MOD Box 20, Macomb, IL 61455 jkadet@macomb.com http://www.oldtvguides.com/DXPhotos/

A pretty poor month for new tropo catches. It was good to see WDAY-DT-21 again for the third month in a row. Of 73 new DTVs this year I've only missed one photo: WPXL-DT-50. The Sony's freeze frame helps. I treat every picture as a "QSL card". 73, Jeff

I noted yet another so-called "Franken FM" in WPGF-LP 6 from Memphis. This one simulcasts the conservative talk format of WMPS 1210 in nearby Bartlett. A new DTV state was added when I

pulled in the "VTN" PSIP from KVTJ 48. VTN is a statewide Christian network in Arkansas. Finally pulled in KOMU in digital on channel 8 on August 7; WSIU has been a pest on channel 8 since their digital operation moved there from channel 40 in 2009. KOMU's signal didn't hold long enough to see what was on 8.2. A DTV-only opening on August 28 wrapped up the month; I noted WNDY 32 for only the second time. They're one of several stations that put the pop music video channel "The Cool TV" on one of their sub-channels. WRTV 25 has made their second channel more than just a weather channel; they're carrying 24 hours of local news and sports as well. WRTV 25.2 also goes by the initials "HTSN". I stayed up long enough to watch WTHI 10 run an interesting program called "100 Years in the Wabash Valley". That particular segment focused on the 1950s and 1960s; one of the events included was the 1963 dedication of the Red Skelton Bridge in Vincennes, IN. WTHI produced the show in 2000. The DTV log as of 9/7/2011 stands at 139; analog totals now at 556. 73.

Bob Seybold

1865 W. Main Rd. Silver Creek, NY 14136

It has been a long time since I sent in a report so I will condense this report as much as possible. Since I run a business with not much time to check TV I do a lot of spot checking.

Best E-skip days were: June 22, 23, 26; July 2, 7, 8, 12, 13, 19; August 3, 7. Mexicans were seen several times, 3 or 4 good Canadian openings up to channel 6, Cubans on a couple occasions, WLBZ-2 on all Canadian openings, Alabama, Florida on 2 occasions.

As for trops best days were: July 22 – many analog Canadians, DTV Rochester NY all, Watertown 50, WCAX 22, WNYT 12, WXYZ 41, WJRT 12, WDIV 45, WEYI 25 & 30, WEWS 13, WLAJ 51, WMYD 21; July 25 – WCPO 22, Dayton 16 30 50, Columbus 48, WHIZ 40; August 2 – WLWT 35, South Bend 28

Recent openings August 27 to Sept 2 - Some of this was done at old hillsite where I DXed many years ago. I had little spare time and set up 20 ft. pole next to old farm tractor, ran 200 ft. electric cord from farmer's barn. Parked my van on top of hill 1200' above sea level. Used small 15" TV with DTV converter box in my van. Conditions were up. Was up there two evenings and one early morning 0500-0830 AM. Observed the following: Many Canadian analogs, London DTV 19, Detroit 21 41 44 45, all Toledo DTVs, Pittsburgh 25 & 51, WLMT 31 Memphis (farthest DTV yet), WSMH 16 Flint, WLIO 8 Lima, WZZM 13 Grand Rapids, WMSN 48 Madison (most distant west to date), WDCQ 15 Bad Axe, Ann Arbor 31, WLMB 5 Toledo (overpowered Toronto 5), many weaker ones not decoding.

Also at home site several low power Canadian analogs on 2 (3), one CTV on 3, 2 on 4 (Global and CTV), CTV on 5, 2 on 8 one of them Wingham, one on 10 (London off), 2 on 12 one CHEX, 2 on 29 (one Kitchener CBC). Also on DTV: Toronto 19, Kitchener 13, Paris 6, Hamilton 15, Omni 1+2 47 and 51. Also Detroit DTV's, Flint & Saginaw, Lansing and many weak not decoding on virtually all channels. Some stations locked in all day on

couple days with local quality.

Today Sept. 5 all back to normal with only activity on channel 2 and little on channel 4. Last days of Canadian analogs were rather interesting.

73's Bob

Dennis Park Smith 3605 San Remo Dr Santa Barbara, CA 93105-2523 Telephone (805) 687-7803 Times 24-hour PDT

This report is for August and into September 2011. High pressure was again dominant for the entire time. Quite calm overall. And again, our coastal tropo was consistent and steady, even steadier than last month, but still not great conditions. Ocean-water temp was steady in the low 60s F, but early September down into 50s. I tend to think that summer water temp up to low 70s in history resulted in better tropo. So-Calif coastal tropo to San Diego/Tijuana/Tecate up to 220 mi:

Aug 1	Poor
Aug 2	Good
Aug 3-25	Poor
Aug 26-28	Fair
Aug 29-Sept 2	Poor
Sept 3-4	Fair
Sept 5-6	Poor

Aug 2 my place, 0700 (local d32 KSBT-LD SBarb 4 mi NE temp off air), d32 XEWT-DT "12" Tijuana in, 200 mi, SE, showing off its new local HD ("alta definicion")

Sep 4 Don Voegele's place, 1030, unID weak analog ch 46 Telefutura.

I figured out what my mystery analog ch-2 station is. Seen weak on different days in July, and also at times since then, program home shopping. It is nothing more than "CATV" leak" --- radiation from our local cable system, only on that one channel. That's the way it goes.

Best of DX to All

Dennis

Wrapping up the tropo season (for now), I had one more opening into the Memphis area. WPGF-LP is just my second "Franken-FM" at this location. This one simulcasts the conservative talk format of WMPS 1210 Bartlett, TN. I can occasionally hear the station at sunset, as long as the digital sideband from WOAI 1200 doesn't spoil it. Yet another station was heard being relayed by K268BF and W226BC, this one being WJSO 90.1 in eastern Kentucky. I checked 90.1, but that frequency was dominated by WKNP. I don't know if they were trying to relay WTSG 90.1 Carlinville, IL with WARW 89.5 Dorsey, IL (which the two translators usually relay) apparently off the air. I noted KMJK 107.3 for the first time from their new city of license of North Kansas City. The station was often the first I would hear from the Kansas City area when it was licensed to Lexington. Including city of license changes, KMJK's new city of license makes it my 160th Missouri FM. The only other tropo opening in August was a DTV-only opening on August 28. FM totals now at 1,146, NOAA Weather Radio totals holding at an even 100. 73.

car as it enters the garage. The system signals to the driver using LED lights mounted on the wall when the car is detected and in the perfect spot for parking." The kit consists of two assemblies, an LED display in kit form and a pre-assembled ultrasonic range module. "The kit will include everything you need to complete the project except a soldering iron and hand tools." The second planned item is a Wireless Swimming Pool Monitor kit, "followed by many more," specifically including amateur radio kits. Heathkit asked that users submit suggestions for future sets. The Heathkit mail-order catalog was distributed by Edward B. Heath in 1926. According to a 2009 article in Electronic Design, later owners of the company included Zenith Corp. and Schlumberger. The kit business was phased out in the early 1990s. Successor Heathkit Educational Systems was launched in the 1970s to develop training materials for schools and corporations. HES is based in Benton Harbor, Mich. Visit the Heathkit Museum at <u>http://www.heathkit-museum.com/</u> [Break out the soldering iron!]

					·····, ·····

There it is. It was somewhat of a lackluster season with no real high points. I'm not expecting much tropo this year unless the weather becomes a little less unsettled.

SC RDS PS: WNSC / PI: WNSC / PTYI: Public

Keith McGinnis Hingham MA Equipement : Perseus SDR / Dientonik 80-120 mhz downconverter / WRPlus v1.05 software MD-10 and APS9B antennas / Bolin Phase Box

The following is a combination of both live and recorded dx using the Perseus SDR / Dientronik FM downconverter setup. The recorded segments were 2mhz wide and roughly 7-10 minutes for each segment. As opposed to previous reports only NEW logs are included here. Also on the September 4 opening over 120 were noted.

All times are EDT

I was in Europe June 14 to July 14, so missed whatever DX there was, then. By the general sound of it, I don't think I missed much. I'd rate 2011 here as unspectacular for Es, with a handful of moderately good openings. Maybe a C- grade. A couple really good tropo openings, but nothing at all thus far in August. August is usually the most productive month, so overall it gets a B grade thus far. The Perseid meteor shower yielded lots of stations, but I've had years with bigger, more frequent bursts. Maybe a B- grade for that one. What can I say – let's hope for some good late summer and fall tropo. 73, Saul

THE ULTIMATE UHF ANTENNA?

Mike Glass, Indianapolis

Remember that 2009 picture of my 10 ft dish that I converted to a uhf antenna? I finally put it up on the tower to try it out. It looks cool, but I still need to do some fine tuning to perfect it. I thought you might like the picture.

A short time ago wildfires swept through Arizona. The smoke drifted into New Mexico creating nighttime conditions in the middle of the day. This is the sky over Albuquerque and Paul Mitscher's house on June 6th. That faint ball of light is the sun.

CONVENTION 2011 OMAHA, NE!

Thursday, October 13, 2011

Once again the "BIG-O-TEAM" rises again to host a Convention! They will host the National Radio Club/WTFDA Convention at the Comfort Inn and Suites, 7007 Grover Street, Omaha Nebraska 68106. The Inn is located northeast of I-80 at the 72nd Street exit number 449.

Make your reservations directly with the hotel at 402 934-4900; this is the only number to receive our convention rate! You MUST mention the NRC/WTFDA Convention Rate of \$75 plus tax = \$88.62 per night which is for 1 to 4 persons per room. The Convention registration fee is only US \$45 per person; children (age 11 and under) US \$13. Please make checks payable to National Radio Club and mail them to Ernest J. Wesolowski, 13312 Westwood Lane, Omaha, NE 68144-3543 by October 1st.

If you have any questions you may contact Ernie Wesolowski at his postal address above or via email at neerniew@yahoo.com.

WTFDAer Matt Sittel is planning a patio party at his home and a TV demonstration in the back parking lot of the hotel during the convention.
