JANUARY 2013

Welcome to the January VUD! This issue marks the 45th anniversary of the WTFDA! TV and FM Dxing has changed considerably since the club began in 1968. DXing is much harder now but we've got more tools than ever to help deal with it. Let's hope that OTA television stays around for at least ten more years and that IBOC becomes less plentiful in the urban and suburban areas where many of us live.

all members. Some WTFDA members who use neither the email list nor the forum site use Facebook instead.

The Facebook group is here to stay along with the email lists and the WTFDA Forums, so participate in whatever form you want. It's all good.

MEMBERS AND MORE

This month we have renewals from **Marv Shults, Randall Trapp, Ed MacDonald, Matt Sittel, Bill Nollman, Richard Nelson, Russel Lay, Juan Gualda, Gary Olson, John Rieger, Lewis Kruger, Adam Rivers, Rick Shaftan, John Jefferson, Chris Lucas, Tom Bryant and Ed Norris**. Thank you all for staying with the WTFDA! Every one of you counts!

AND OTHER STUFF

Lewis Kruger writes "I really enjoy the VUD. I contemplated not continuing a subscription but I just love it so much. It also helps that you do work with me the way you do."

Thanks, Lewis! I've never had a problem bending the rules a little to accommodate our members and if you really want to be here, we'll do what it takes to see that you are here.

Juan Gualda rejoins after a short absence. He's active with AM and FM radio, DTV and holds the ham callsign of KBOGXM. Welcome back!

John Demmitt writes "You've got a great publication that is packed with interesting information. My enthusiasm for the hobby has grown greatly thanks to WTFDA."

And thank you John!

That's it for January. Happy New Year everybody and we'll go over the club stats and finances next month. See you then. -Mike

WTFDA ON FACEBOOK!

Since December 1st the WTFDA now has a group on Facebook! It's an interesting group and all WTFDA members with Facebook accounts are invited to join. Login to your Facebook account and type WTFDA (all upper case) in the search box and our group will appear. Then just click "join group". It's a closed group just for WTFDA members and currently we are approaching 55 members.

Like it or not, there are quite a few DXers using Facebook. Facebook groups combine the best features of email lists and forum software with the ability to place photos, audio files and links on a page visible to all members along with email notification of all new posts to

We have a rarity this month: a completely new full-power station! I doubt it will be very widely DXed though; Kalispell, Montana is not the center of tropo country, and on channel 46 we're not going to be seeing KUKL-TV via Es or meteor scatter...

KSNB-4 has been reported mostly dark for some time. They filed some paperwork with the FCC suggesting carriage of the 3ABN religious network, but I don't think anyone actually saw 3ABN programming. That may have been due to operation under Special Temporary Authority with only 216 watts to a 17-foot tower. (?) Or it may have been due to VERY intermittent operation.

Anyway, the station now has received a license-to-cover to move to the KTMX-FM tower near York, with 23.5kw/271m.

KGIN-11/KOLN-10's owners have an agreement to purchase KSNB. However, this purchase would not normally be permitted by FCC rules. (there are not enough separately-owned stations in the Lincoln market to allow common control of two stations) A waiver has been requested, on the grounds that KSNB is a failing station that cannot survive economically on its own. I would be surprised if the waiver is denied.

Wikipedia reports KSNB is currently carrying Antenna TV on both 4.1 and 4.2. Rumor has it the My Network TV programming currently airing on KOLN 10.2 will move to KSNB 4.1 once the FCC approves transfer of the KSNB license.

Channel 4 is gradually getting crowded again(grin). I now count six DTV stations on the channel – KSNB, WHBF (Rock Island, Ill.), CITL (Lloydminster, Sask.), and CHFD. (Thunder Bay, Ont.)

Teletec wins Tijuana set-top box tender

Nov 26, 2012 — Mexico's Comisión Federal de Telecomunicaciones (COFETEL) has announced that Teletec has won the tender to provide set-top boxes for the roll-out of digital terrestrial TV in Tijuana, Mexico's first city to have the service. The objective is to be able to switch off the analogue TV service in Tijuana by April 16th, 2013.

Satellite adds another 369,000 subscribers in Mexico in 3Q 2012

Nov 26, 2012 — According to Mexico's Telecommunications Sector Production Index, at the end of the third quarter of 2012 there were 6.655 million DTH subscribers in the country, an increase of 22.9% versus Q3 2011. Cable TV lost 49 thousand subscribers in the quarter.

Tijuana to be first city in Mexico to have digital television

Oct 11, 2012 — At the opening of the Tijuana Innovadora, Mexico's president announced that Tijuana would be the first city in Mexico to have digital television, and that the conversion there would begin in 2013. He said the conversion would be complete by the end of 2015 and the government would subsidize converter boxes for those with older TVs that do not support a digital signal

— NEWS ITEMS —

FCC Acts on LPFM, FM Translators

The commission has relaxed the criteria for LPFMs seeking a waiver for second-adjacent channel spacing requirement; it bumped up the national cap on pending FM translator apps; and it has targeted October 2013 to open an LPFM application window. The agency bumped up the national cap on pending FM translator applications that one entity can pursue from 50 to 70, as long as no more than 50 are in the top 150 markets. It relaxed the local cap of one application per entity to up to three applications one company can pursue in more rural markets.

The agency also relaxed the criteria for LPFMs seeking a waiver for second-adjacent channel spacing requirement in order to locate a new LPFM, something NAB and NPR had urged the commission to avoid except in very narrow circumstances. The agency is releasing mapping tools for LPFMs to help them find open channels, and for the first time, releasing the source code. The commission passed a compromise that adds a main studio requirement for LPFMs and retains the eight-hour-per-week program requirement. It did not act on the LP250 watt proposal.

FCC Chairman Julius Genachowski said the decisions today will help the creation of "thousands" of local community stations and the decision allows LPFM and FM translator services to complement each other. The chairman revealed that he had been a nighttime DJ at his college station, who went by "The Midnight Rambler." He pledged the commission would make the process of applying for an LPFM as easy as possible.

The Prometheus Radio Project, which led the grassroots coalition that pushed Congress to pass the Local Community Radio Act of 2010, said the new rules will mean LPFMs can be located in urban areas for the first time. Prometheus urged those who want to apply for a station to start preparing now.

Ozcat Owner Says Vandals Hit Him Again

[timesheraldonline.com]

Ozcat Radio (KZCT 89.5 Vallejo, California) has been hit by vandalism for the third time since August, forcing the FM station to go off the air at least for a month, its owner said Sunday. "I definitely think this is personal," founder and owner David Martin said. "They did not take much, but did a lot of damage."

Martin said he and a group of people went up to the station's hilltop transmission facility on Saint John's Mine Road on Sunday morning to fix the battery problems that arose from the first two incidents of vandalism. Minutes before arriving, Martin said he received a phone call from the alarm company informing him that a hiker reported seeing a large hole in the wall of the shack that houses the equipment.

The security system was installed on the shack's door after of the previous vandalism incidents. Inside, Martin said he saw snipped off wires and some equipment missing. However, the suspect, or suspects, took no copper or more expensive items, Martin said.

"With the first incident I thought it was a random act," Martin said. "But now, I know we are targeted. I don't know why they did it, and I might never know why." He said all the vandalism this year could cost the radio station about \$8,000.

 Thanks to: Tim Noonan, Dan Sys, Radio Insight, Radio World Online and Upper Midwest Broadcasting for news.
 If you hear any changes occur on your FM dial, share the news!
 73 and Happy New Year from the entire staff at FM NEWS

255 mi Tr seen 6-28-12

Thanks, Eric. Two more channels in the Houston area were lost to digital station in October (KUVM-LD-22 and KUVM-CD-34). Down to 14 open channels on UHF. Whoopee! KVVV-LD-15 continues to show a continuous loop of Harry Pappas (Pappas Telecasting) giving a commencement speech at CSU Stanislaus in 2007. What a waste.

73's, JEFF

WTFDA/NRC/IRCA/MN DX CLUB CONVENTION

August 1 Thru 4, 2013

The site of this year's convention of the Minnesota DX Club, the NRC, IRCA and WTFDA is Minneapolis, MN.

The Editor's Note

We hope you had a wonderful Christmas, and here's to a great 2013! The month of December started out quite mild in the temperature department across most of the U.S. but has since turned much more seasonal, with a large swath of the country getting the chance to see a white Christmas. The colder weather subsequently diminished chances for any tropo opportunities in most areas, with the usual exceptions around the Gulf of Mexico.

Inside this edition of C2CTV DX, Danny Oglethorpe checks in with some DX he received in Louisiana in December, Bob Seybold summarizes the autumn band conditions in Western New York, and Dennis Smith keeps us up to date on the DX happenings in Southern California.

Danny Oglethorpe

Nick:

A short report as there was some DX in October and November.

10/17/12

Trops – all Erie digital
Cleveland 3 and 5 (WKYC/WEWS) all evening
Canadian tropo 40, 44, 47, 13, 31, 28, 67
(repeating CHCH 11), CKVR 3 Barrie, also now 35-1 (repeating CKVP), also London 10, Wingham 8

10/18/12
all Erie, WEWS 5

10/19/12(AM)
Erie, Cleveland 3 and 34 very strong, WEWS 5 weak

November
Detroit, Toledo often on different days, also Flint, Ann Arbor, Saginaw on a couple occasions, Canadians good on many days. No super openings. Had meteor shower openings, no ID's, but considerable activity.

Dennis Park Smith
3605 San Remo Dr
Santa Barbara, CA 93105-2523
Telephone [\(805\) 687-7803](tel:8056877803)
Times 24-hour PDT

This report is for November 2012. Early month had high temperature and reasonable tropo, but changed with cooling and rain after that, with tropo backing off. Air temp started month in 60sF, then up to 90, then back to the 60s where it has been since. Ocean water temp started month at 64F and at end was 61. So-Calif tropo to San Diego/Tijuana/Tecate up to 220 mi:

Nov 1	Very poor	Cold fronts, cooling
Nov 2	None	
Nov 3-5	Var. poor	Hi-pressure, warm
Nov 6	<u>Fair+</u>	Kinda hot
Nov 7	Poor	Cooling
Nov 8-11	None	Cold fronts, cooler, windy
Nov 12-15	Poor-fair warmer	Calm, slightly
Nov 16-19	None	Rain
Nov 20-22	Very poor	Calm, still cool
Nov 23-24	Poor+	Slightly warmer
Nov 25-27	Very poor	Cooling
Nov 28-Dec 3	None	Rain

Seen at Don Voegelé's place, with his outdoor antennas:

Nov 6 tropo 1230 PST SDiego/Tijuana/Tecate, with new on-air d25 "17" K??-CD? SDiego Univision 175 mi SE
Simulcast with analog 17 (still KDTF-CA?) San Diego (both San Diego advertising). Both are low-power, but presently uncertain of calls.

With this 1 new, Santa Barbara in-town DTV total is now 58, or if DTVs seen up in local mountains are included, the total is 62.

Best of DX to all Dennis

2013 Tower Calendar Highlights:

- **The Sandia Peak TV/FM antenna farm high above Albuquerque, New Mexico.** At more than 10,000 feet above sea level, this is the highest-elevation site ever featured in the calendar.
- **WFXJ (formerly WJAX), Jacksonville, Florida.** This historic site, built in the 1930s, sits amidst the greens of a golf course.
- **KWAL, Wallace, Idaho.** This unique site features two towers split down the middle by a busy coast-to-coast highway, Interstate 90, as it threads through a narrow valley.
- **WVJS, Owensboro, Kentucky.** A reminder of the impermanence of broadcast infrastructure, this calendar photo features three towers that were

dismantled in 2011 after 65 years at the same site.

- **WXXI-TV, Rochester, New York.** A dramatic night photo showing a massive crane in action, removing an analog TV antenna from its 400-foot-high perch after the digital television transition made it obsolete.

In addition to tower photos, the calendar's monthly pages include significant dates in radio and television history, as well as civil and religious holidays.

The 2013 calendars cost \$18.50 each (\$19.98 including sales tax for New York State residents) and can be purchased by check (payable to "Fybush Media") or money order to 92 Bonnie Brae Avenue, Rochester NY 14618. Orders can also be placed with major credit cards, or online at www.fybush.com.

johnj@petersoncheese.com

Equipment: McIntosh MR-80 tuner with CM antenna @ 20' with rotor (city regs say that's the max). DX'ing away from Auburn done with Pioneer FM/AM & antenna embedded in left rear passenger window of the 2006 Honda Pilot. For traveling I also have a cheap Yamaha FM/AM tuner with rabbit ears. @ = new.

Not a lot to report this year. If KXOT 91.7 Tacoma hadn't vanished at the end of June (they're still off), the skip season would have been horrendous. Anyway, here it is (@ for new):

-------	-------	------	---------	----	-------------

In assessing what the year would have looked like with KXOT on, realize that they're only some 10 miles from here and demolish both 91.5 and 91.9 with their IBOC, also compromising 92.1 at times despite the fact that the MR80 should exclude them completely beyond 92.0. And they aren't alone in slopping digital junk all over. Multiple commercial stations have been heard with analog spurs to either side of their IBOC only when running the IBOC. And the general noise level on most of the band is ridiculous since the IBOC appeared. How the FCC could allow IBOC given that the process doesn't operate properly one can only guess, but I now refer to them as the F*** Communications Commission.

My frustrations vented, the September 22 DX from Chinook Pass was quite exciting. I think it was ducting, as the weather map that morning showed a cold front moving west to east near the Chinook area and stretching well south into Oregon. The main issue with logging KKMK and KJCH was realizing that the signals were far too good to be any of the familiar stations! KMNT 104.3 Chehalis is barely receivable where I was parked at the 4500' level and they're country. KVTI 90.9 Tacoma and KRBM 90.9 Pendleton are marginally usable at best, and both are NPR stations, not religious. Once KJCH was identified, it was fairly easy to dig out KOOZ and KBDN, which are co-sited with KJCH on a mountain ese of Bandon. KOOS is about 5 miles north and much lower, accounting for their marginal signal despite higher power. No station has ever gotten through KJAQ before anywhere around here, and only mighty KMYI San Diego has ever penetrated KMPS (also at Chinook).

2012 will go down as one of the quietest Es season for me. Just a few openings that were fairly productive. No tropes this Fall so far. Best of DX to all.

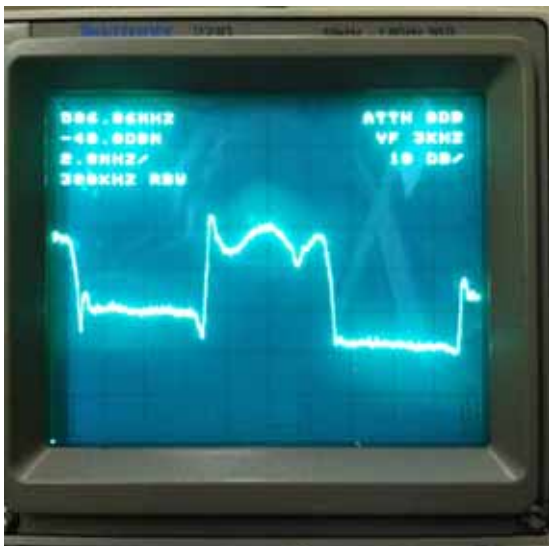

Granny Box Mystery...Solved!

Karl Zuk N2KZ

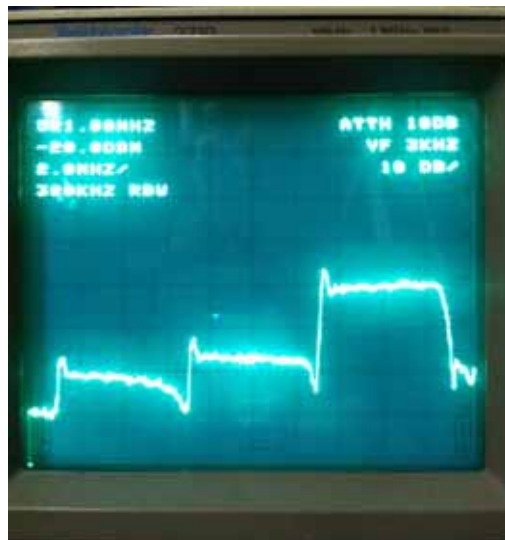

Are over-the-air ATSC digital-to-analog converter boxes now failing with age? Maybe...maybe not!

At work, I oversee over a dozen granny boxes used to receive and convert local over-the-air digital TV channels for viewing on our in-house analog cable TV system. Reception of three channels was problematic, often locking up and freezing at will. The models we use are the most inexpensive available marketed under the brand names 'Micro Gem' and 'Access HD' sold for around \$29.95. I tried swapping converters, testing converters for input sensitivity and analyzing the output of the wall-wart power supplies grasping for any clue. What was making decoding these specific channels so unreliable?

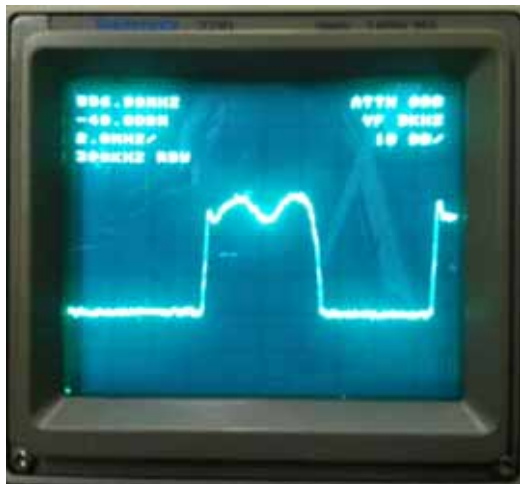

WCBS-33 New York

WCBS-28 Long Island

I discovered that these converters run fairly hot, especially when perched upon other pieces of gear in equipment racks. One tiny electrolytic capacitor, directly adjacent to the bright metal tuner module, sometimes dries out and limits the sensitivity of the converters. I have replaced a few of those under-rated caps, with good results, but this fix did not cure my endless lock-ups. A listing in The Worldwide TV-FM DX Association's bulletin, VHF-UHF Digest, showed a new WCBS translator on the air on RF Channel 22 from Plainview, Long Island. I could easily see this signal, so I changed antennas and switched to Channel 22 instead of 33. The results were immediately fruitful: WCBS became stable as a rock. Still, the mystery continued!

WNBC-28 New York

My troublesome channels are all in the New York City market: WNBC (RF channel 28,) WCBS (RF channel 33,) and WWOR (RF channel 38.) All three broadcast from the iconic Empire State Building and all three broadcast two virtual channels per transmitter. After some pondering and research, I decided to take a look at these transmissions with a spectrum analyzer. All three signals had a distinct and horrifying signature. A competent digital TV signal should have a nice square waveform with an obvious pilot carrier on the leading edge. My troublemakers looked like black diamond ski slopes! Obviously, these would be pretty challenging for my granny boxes, too!

FCC Mulls How Spectrum Auction Will Work

By Jack Messmer

TVNewsCheck, December 3, 2012 5:13 PM EST

The first “incentive auction” to clear some broadcast TV spectrum for sale to wireless operators is on the fast-track, but there are still important details to be worked out on just how the process will work so that enough broadcasters are willing to participate. FCC officials spelled out some of the financial options in a PricewaterhouseCoopers LLP (PwC) webcast Monday and urged listeners to file comments as the commission works to write rules for the auction.

Just how the price to be paid to broadcasters willing to go off the air, relocate from UHF to VHF or possibly accept additional interference (a possibility still up for consideration) will be set is key to making the auction process work. Speaking on the PwC webcast, William Lake, chief of the FCC's Media Bureau, spelled out two options.

First is the possibility of conducting a single round auction using sealed bids. Each broadcaster would set a price for vacating its spectrum and the FCC would accept the lowest (cheapest) bids which collectively cleared enough spectrum to meet the demand by spectrum buyers in that market. Even there, though, there's a question yet to ponder. Would each seller get the price they offered their spectrum for, or would all get the same amount — the highest price of any bid accepted to get the FCC to the amount of spectrum needed in the market?

The other possibility is a multi-round auction, described as a “descending clock auction.”

“Rather than have the broadcasters give us a price, the commission would set a price. We would start with a very high price in a particular market,” Lake explained, picking some random numbers to illustrate.

“Who's willing to contribute their spectrum for 100? If we pick that opening price high, we should get a lot of offers. Then, we'd say, that's more spectrum than we need. Who would be still willing for 90? And presumably as we ticked the clock down individual broadcasters would compare that price to what they think their station is worth and one-by-one they would drop out of the auction. We would stop the auction when we have ... the right number of continuing offers,” Lane said.

All TV channel allocations are 6 MHz, but not all broadcast allocations are equal, so there may have to be weighting in the auction process. Lane said the FCC will consider whether to give higher priority to broadcasters willing to sell who serve a larger service area and would contribute more to the goal of spectrum clearing.

The complexity of the auction process explains why the FCC has extended the deadline for comments on its Notice of Proposed Rulemaking to Jan. 25, with reply comments due March 26.

Representing NAB on the PwC webcast, Rick Kaplan, EVP strategic planning, noted that dollars alone may not be what broadcasters look at in deciding whether to participate in the auction. He said a station owner in Los Angeles might look at the station's value to their community in evaluating whether they wanted to cash out.

Such non-economic analyses could limit broadcaster participation. Lane had earlier shown a slide which claimed that 83 stations in the top 10 DMAs account for less than 5% of TV industry ad revenues.

Rebecca Hanson, senior adviser-broadcast spectrum, FCC, emphasized that going off the air isn't the only option being offered to broadcasters in the auction.

“Many broadcasters are dedicated to the public service that they provide to their communities. So it was very important to us to offer ways to participate in the auction that allowed them to stay on the air at the same time. How a broadcaster would value any of those options — one way to look at that is what the opportunity cost is. Going off the air — people sell stations all the time. There are valuation experts and M&A contacts. You can figure out that valuation. But with, for example, channel sharing, I think a broadcaster could say, well am I programming my multicast streams? If I'm not, then what would be the opportunity cost of me not being able to program those in the future? Put a dollar amount on that and that could be the basis for a bid,” Hanson said.

“With the example of moving from UHF to VHF — with that example the broadcaster wouldn't give up capacity, but they'd be giving up some coverage,” she added. So the broadcaster could put a value

on the losing some over-the-air viewers, but still having its cable/satellite distribution. And she noted difficulties with doing mobile TV in the VHF band. The FCC is hoping broadcasters will put a price tag on such moves and participate in the auction process.

With so much of the auction process and nationwide repacking of the TV band to clear spectrum hinging on a few key markets, TVNewsCheck asked whether it was possible that the FCC would be willing to lose money in a specific market to buy back enough spectrum to make the repacking work — and presumably still return a nationwide profit to the U.S. Treasury from the auction.

“We have not read the statute to confine our break-even or cost coverage to be on a market-by-market basis,” Hanson replied.

Just how much spectrum the FCC will clear will be determined by market demand. The objective is to have a nationwide swath of downlink spectrum beginning at ch. 36 and moving downward by whatever amount is cleared by the auction. That would allow for nationwide use by consumer devices. The uplink spectrum for wireless operators would begin at ch. 51 and work down, but the width of the vacated spectrum could vary by region.

The FCC’s engineers have their work cut out for them in repacking the remaining TV spectrum and even in dividing up the cleared spectrum for auction. The TV channels are 6 MHz, but wireless spectrum is typically auctioned in 5 MHz blocks. The FCC also has to decide on geographic areas for the auction to wireless operators.

Hanson and Lake repeated the FCC’s timetable of completing the auction rules in 2013 and conducting the auctions in 2014. Many observers expect those targets to slip. As for when the TV repacking will take place, Hanson noted that the law gives the commission three years to distribute funds allocated to pay for the channel relocation of broadcasters who don’t participate in the auction.

GRANNY BOX MYSTERY...SOLVED CONTINUES FROM PAGE 36

What is the common thread? WNBC, WCBS and WWOR share a master antenna mounted high atop the Empire State Building. A friend described the design as "a bunch of panel antennas strung together with Heliak jumpers." Since I don't have access or design knowledge of this installation, it's very hard for me to comment. One thing for sure, the result is a mess! I can only wonder why no one has reacted to such an anomaly. (WNYW, New York's Fox affiliate, on RF Channel 44, looks crispy and nice using their own antenna also mounted on ESB.)

This is an interesting case. Thinking out loud, I know that ATSC transmitters have sample loops that monitor various aspects of their broadcast signals. The transmitters themselves are most likely producing competent waveforms but, in this case, the antenna system is wildly altering the linearity of the signal equalization presented to the public. Digital TV transmitters pre-distort themselves to insure output signals are tight and square. Obviously, nothing compensates for severe antenna problems. It would take an enormous amount of EQ to correct these bumps! You would think that a glaring problem like this would cause warning flags due to excessive reflected power and lowered efficiency. Maybe not?

Although I have cured my WCBS reception by reverting to receiving another transmitter, I have no recourse for WNBC and WWOR. The closest alternative NBC broadcaster is WVIT Hartford which also uses Channel 33. WWOR is a MyTV affiliate. It features local content, most notably New York sports coverage that cannot be replicated by another station. I guess I will just have to live with the signals available. My granny boxes are not malfunctioning! I just can't resolve rollercoaster digital TV! Is anyone watching? - Karl Zuk N2KZ in FN31eh.

SIGN UP/Renewal form

YEARLY DUES \$10.00 USD for Monthly VUD eZine

Name _____

Address _____ Apt # _____

City _____ State/Prov _____ Zip _____

Country _____ Interests: TV () FM () 30-50() Weather()

email address _____

Sign me up/renew me for: 1 year () 2 years () More ()

I have no computer or access to one. Please send a paper VUD(\$24) ()
Please, 12 month renewals only for paper VUDs. Thank you.

Yearly dues **Mail your dues to: WTFDA, P.O. Box 501, Somersville, CT USA 06072**

Make your checks/money orders payable to: WTFDA

And *thanks* for your support of the WTFDA!

Return this form with your dues or make a copy of it and return that.
