FEBRUARY!

What a month February was. We in the Northeast had our blizzard. You in the Midwest had your foot or more of snow and down Arkansas way you had your snow and ice. Great weather for Dxing, isn't it? That's probably why this VUD is so thin this month.

We could use contributors and contributions to the VUD. Without contributors, there's no VUD. John Z. hasn't had any reports for months and sometimes forgets that he's an editor. I think Peter has already.

We'll take DX reports. We'll take articles. But if we take the DX out of the VUD then there's no reason for the VUD. The other stuff (TV News, FM News, Facilities, etc) could all be put up on a website every month instead.

We have WTFDAers who are also NRC members. The NRC has always had a Musings column where members could talk about anything. That might be interesting reading.

As a matter of fact, I'll ask a question. What are you thoughts about the NRC/IRCA finally doing a convention together? How many of you would have preferred a WTFDA-only convention?? Does it make any difference?

MEMBERS AND MORE

We have a new member this month. He's **Bill Malona** and lives in Colorado. And he's the only person I've ever known who has built his own Probe 9 for FM DXing. It's on the cover this month. Bill got the specifications from those on my own website (fmdx.usclargo.com) and from Brian Beezley's website. The aluminum came from other antennas. I'm happy that my site could play some part in all this. Nice going, Bill!

During the period from Jan 18th through Feb 13th we had renewals come in from **David** Wurl, Ronald Ehlke, Girard Westerberg, Bryce Foster, Carlon Howington, Kaimbridge on the North Shore, Barry Bauer, Dave Pomeroy, George Rogers and Eldon Geiman. A big thank you goes out to all of you!

From a post on the WTFDA Forums, Chris Dunne writes: "Trying for Bahamas on 104.5 down here just got 500% tougher. I learned today that there is a regional Mexican pirate called "La Equis" (La X) which has quite a swath of coverage....I heard it in south Dade down to that bridge on MM 108 (the best spot for Bahamas FM, where Bahamas barely overrode X*). On the way back, I started hearing it at MM 104, up to about MM 23 on the Turnpike! (That's about a 45-mile ride.) They advertised being at a flea market in Princeton soon. (* Freeport's 104.5 did appear around MM 36.) *DXers look out for this one!*

There are also pirates in Homestead & Fla City on 94.5, 104.7 & 107.3 (horrible audio). There was a change or two from last trips: Radio Ciudad de la Habana (//AM 820) moved from 94.9 to 94.7. Radio Taino uses 94.7 as well. R Ciudad has ST light on; Taino doesn't. And there is also Radio Marti on 94.7 from 7 to 9:30 pm, erratically. They were on air tonight.

Even though this is an FM thread, it looks like one Canal Habana station moved from ch 38 to ch 40, but I cannot be 100% sure.

And now from Building 19, here's their little FM radio, just right for Dxing your locals. I bet they didn't know it's "tiniest", not "tinyest". Well, what do you want for a buck.

That's it. See you next month! -Mike

MORE SOFTWARE FOR RTL 2832 DONGLES

Up until recently the only program designed to interface with the RTL 2832 E4000 USB dongles was a program called SDR# (sharp). Recently though, the developer of SDR Radio Console has developed a new version of his program that does support the dongles. It's a little more difficult to setup since it's designed to work with SDR receivers that tune from longwave through 30 mhz and it takes a longer learning curve, but this software is definitely worth checking out. On FM it will show 1mhz of spectrum. The dongle can be tuned directly from the VFO Tuning window. RF gain can be adjusted without going into any sub menus. Here is a screenshot:

NEWS ITEM: FM Translator Applications

Around 3000 FM translator applications have been formally dismissed by the FCC. Some have been on the books for up to ten years. Translator stations are those used only to rebroadcast (translate) a full-power station and are limited to 250 Watts. After looking at the list, most are requested by religious or educational organizations. Many dismissed applications failed to provide necessary data, or exceeded the number limits per applicant.

NEWS ITEM: FCC Doesn't Believe Repeat Pirate's Claims

Back in 2011, Whisler Fleurinor succeeded in claiming poverty and getting the FCC to knock down a \$25,000 fine for operating a pirate station to \$500.

Now he's trying the same argument, with no admission of guilt, to whittle down a new fine for operating an unauthorized station on 99.5 MHz in Fort Lauderdale, Fla. However this time the commission is declining that offer and the penalty has progressed to a forfeiture order. Fleurinor has been cited by the Enforcement Bureau for operating unlicensed stations several times since 2008.

The FCC says Enforcement Bureau agents traced the transmissions to a commercial property Fleurinor owns. He admitted operating the station, but told the FCC he stopped and the only remnant of equipment is a roof antenna. He again argues he can't pay the fine.

The agency said in its decision it doesn't find him credible "given the more reliable record evidence adduced by the Miami Office over a period of several months, and in view of Mr. Fleurinor's past history of repeated noncompliance despite promises to comply."

He is being offered the chance to pay the fine in installments; the agency wants its money within 30 days.

NEWS ITEM: Saltsprings Island's Only Radio Station Is Sold

SALTSPRING ISLAND, BC – Saltspring Island's only community radio station has been sold. CFSI-FM now belongs to Radio Punjab. The sale came as a shock to workers of the station. For years the station on 107.9 MHz has been the sole local community voice and now there is fear that a possible format change could silence that.

Gary Brooks started the radio station three years ago. He says it's time to move on. "The station was put with a brokerage and it was advertised on the internet to see if some professional person could take community radio to where I couldn't," says Brooks.

The station was sold for a little over \$200,000. The sudden sale came as a shock to disk jockey Jamie Alexander.

The new owner of the station, Sukhdave Singh Dhillon is a major player in Indo-Canadian Media. His network Radio Punjab operates in Alberta and throughout the lower mainland. "Well, I have a station near Edmonton in Alberta and I want to change the format in Alberta to the same format we have here in Saltspring Island to a specialty channel," says Dhillon.

Many fear that Dhillon will change the station's tune to cater the Indo-Canadian Community in the Cowichan Valley. "That fear shouldn't exist I don't plan to do that. As you know there is not much Punjabi community here so I don't need to go that way," says Dhillon.

The Saltspring Island community is well represented on the airwaves and Dhillon expects to keep it that way.

The CRTC has already approved the sale and Radio Punjab will get the keys to the station in March.

Thanks to Shawn Axelrod, Ron Cesarek, Tim Noonan, Ralph Strobel, Dan Sys, Radio World Online and Upper Midwest Broadcasting for news.

If you hear any changes occur on your FM dial, share the news! 73

Send reports by the 15th of each month to: Nick Langan 1040 Riverview Drive Florence, NJ 08518 E-mail: <u>nickl@wtfda.org</u>

The Editor's Note

For most of us, March might be the least appealing month on the DX calendar. Any remnants from the winter E-Skip season have already ceased, and it falls much too early for any early Es outbreaks the summer season has to offer. Meanwhile, the weather in most of the country is usually in too much of a transitional stage to support any tropo openings, with the exception of (as always) areas near the Gulf of Mexico. And if you're really delving deep for signals, there aren't any meteor showers of note within the month either. On the bright side, spring and the promise of active DX conditions are right around the corner.

Bob Seybold checks in with a winter western New York update inside this edition of C2CTVDX, highlighted by some E-Skip he logged from Mexico and Central America, and Dennis Smith gives us the latest from SoCal, where he also viewed some Mexican Es.

Robert Seybold

1865 W. Main Road Silver Creek, NY 14136

Dear Nick:

Normally there is little or no DX this time of year, but did have an opening today (2-10-13) so I will report it before I forget. Did have some E-Skip during the holidays so I will report that too.

2/10/13 Tropo

CKNX 8 Wingham strong (analog); Bancroft 2; following all digital: WDIV 45; WWJ 44; WXYZ 41; WGTE 30; TVO 28; CITY TV 31; WBNF 15 (Buffalo low power digital); CFPL 10; also Saginaw 25; Flint 28; Ann Arbor 31; all Erie; Canadians 22, 51, 18, 35, 42, 48, 47, 13; Paris 6, plus regular Toronto, Hamilton with super signals (opening lasted several hours)

E-Skip opening 12/28-29/12 WUVM 4 (new); WUVF 2; WEYS 6 (new); WDVZ 3 (new); XHLS 6; XHBC 3 (new); XEFB 2; TGV 3 (new); XHPN 3; VTV 2 Honduras (new) Cubans on 2, 3, 5 Canadians on 2, 3 (E-Skip) Brief digital 3 (unid'd) south

Nice openings 2 days in a row same time period 1700-1900. Band quite heavy especially Channels 2 and 3 (Canadians battling Mexicans and Cubans and Florida and Georgia) Also Jan 15-16 E-Skip, several Mexicans 1700-1800 PM

A few other trop openings brief and not logged, mainly Toledo, Detroit, and Canadians.

73's

Bob

Dennis Park Smith

3605 San Remo Dr Santa Barbara, CA 93105-2523 Telephone (805) 687-7803 Times 24-hour PST

This report is for January 2013. Since Dec. end, high temps barely 60F, lows in mid 30s. Jan 10, high 55 low 35, Jan 13-15 55 & 30. Coldest of the season. Ocean temp 55F, Jan 16 to 53F, then back up to 55. Stable & calm since Jan 30, air temp to 70. So-Calif tropo to San Diego/Tijuana/Tecate up to 220 mi:

Dec22-Jan2 Jan2eve-5 cold		Rainy, more cooling Stable, still kinda
Jan 6 Jan 7 – 9	None Poor	Some rain Stable/calm, still
cold Jan 10 – 15	None	Wx front, colder

Stable, slight

Rain, unsettled, cool Stable, some Don Voegele has been here since mid Dec. He then bought a new LG 24" flat screen. It got the signals okay, but its menu had changed since I got

UADALUPE RADIO NETWORK

RADIO FOR YOUR SOUL!

mine 6 years ago and it isn't as straight-forward as my LG or his Insignia[/LG] converter box. He took the TV back to the store.

Sporadic-E DX seen at my place on LG 20" flat screen & bunny ears:

Jan 18 *Es* Noted 1810 to apx 1935 PST analog ch 2-6 Spanish. Ch 3 1900+ local nx, upper right "3" in elliptical circle. WTFDA link to Danny Oglethorpe's logos showed likely XHQ-TV 3 Culiacan, Sinaloa, Mexico, 1100 mi. (XHQ seen before in May 2010 and July 2011)

Feb 1 *Es* Noted 1655 to 1715 PST analog ch 2-4 Spanish. Ch 3 1700 ID XHQ again. Ch 4 1700+ maybe XEW net, otherwise no ID.

Jan 21 Don & I went to local Santa Ynez Mtns over SBarb up to 4,000 ft ASL once again to look for signals. As before (last time was Feb 25, 2012), equipment was house-current inverter, LG 20" flat-screen TV, VHF bunny ears, UHF 4-bay conical. We also tried two booster-included bunny ears, but they did not do well. We don't know if their boosters were operating normally or not, as they have been 'well-used' over the years. Our *ordinary* ears antenna did better. Here is what we saw, analog & DTV. <u>Underlined</u> are new signals not previously seen, either in mtns or twon.

San Diego/Tijuana tropo SE apx 200 mi was mediocre.

Los Angeles area, E, 90 mi Many L.A. DTV stns, same as seen in town, plus these: 6 KSFV-CA L.A. (ex Almavision) Now Guadalupe TV-radio (Spanish gospel) (On car FM 87.7 & also on TV this time) d18 KSCI Long Beach "18" Asian d25 KNET-CD L.A. "25" HSN"

Santa Maria analogs, NW, 45 mi 30 KDFS-CA S.M. Azteca America 35 Spanish (not sure about this one) 51 K51GB S.M. TBN (d19 KCOY-TV *not yet ever seen*)

San Luis Obispo, NW, 85 mi d15 KSBY S.L.O. "6" NBC

Fresno area, N, indicated miles 15 KFVD-LP Porterville Daystar 115 16 KHSC-LP Fresno HSN 160 d20 KFTV-DT Hanford "21" Uni 180 d30 KFSN-TV Fresno "30" ABC 180

(From analog days on battery TVs back to year 1965 up to now, many Fresno signals have been noted as regulars in these SBarb mtns, even at that distance.)

Analog: SBarb in-town partially reconstructed total remains at 90, with 1 new seen up in local mtns included, the partially reconstructed total is 113.

DTV: SBarb in-town total is still 58, and with 1 new seen up in local mtns included, total is 63.

Best of DX to all Dennis

Minneapolis, Minnesota 2013 ! August 1st thru 4th, 2013

DX Clubs Announce Minneapolis Convention

The National Radio Club and the International Radio Club of America, in conjunction with the Minnesota DX Club and the Worldwide TV-FM DX Association take great pleasure in announcing their joint "DXer" convention will be held in Minneapolis, August 1st through the 4th, 2013.

Called LEARNING AND SHARING: 2013, the conference will combine formal tutorials and technical sessions, gab gatherings, a DX'pedition and ideas on how to enhance radio listening. Show-and-tell, new antenna designs and DX stories will be combined with information on receiver improvements and propagation.

The highlight of the convention will be one of its venues: The Museum of Broadcasting. There we'll see firsthand more than a century's worth of communications artifacts, operate a live Spark-Gap transmitter, learn about the history behind our hobby and see how broadcasts were made from the Museum's vintage radio studio.

The combined auction is going to be a big one this year; the Museum and others will be auctioning some nice communications gear.

Optional tours during the three-day Convention include area radio stations and the Mall of America.

The hotel selected for the 2013 Convention is the Holiday Inn Bloomington South Airport Mall in Minneapolis. The hotel provides free transportation to and from the airport and the Mall of America and will host the Saturday night joint banquet. All hotel rooms have microwave and refrigerator and HD cable. Free WiFi and a Business Center are available. There's a great pool area where we'll have a Hospitality room. Breakfast is provided each morning and there's a Green Mill Restaurant and bar area.

Make your hotel reservations right now to get the special convention rate. call the Holiday Inn at 952-884-8211. Use the registration code "NRC" to obtain the special convention rate of \$79.00 per night. This rate includes tax.

Cost for convention registration is \$45.00. This includes breakfast each day and the Saturday night banquet as well as the amenities at the Museum of Broadcasting and the Friday evening "Pizza-fest" at the Museum.

Your check or Money Order should be payable to: "The National Radio Club". Send it to Skip Dabelstein at 8008 North Iron Ridge Dr., Tucson, AZ 85743-1065. You can contact Skip Dabelstein via email at ckdabel@comcast.net. Once you are registered, we'll send you an information form so we can learn about your special needs and interests. PLEASE register early so we can include you on pre-convention information.

You can also register for the Convention on-line using PayPal. Please note, there is a \$1.00 PayPal fee.

Auction items as well as anything else you wish to send ahead of your arrival should be sent to: Steve Raymer, Museum of Broadcasting, 3517 Raleigh Ave, St. Louis Park, MN 55416-2625. Please put "HOLD FOR DX CONVENTION" on your packages.

If you have questions please contact Host Mark Durenberger at www.durenberger.com.

Major-market stations join to sell spectrum at FCC auction Broadcast Engineering

So far, 39 broadcasters have stated their interest to sell out, and even more will sign on if the FCC makes its offer a bit more attractive, the group said. Fri, 2013-01-25 11:56 Michael Grotticelli

A new group of broadcasters — calling themselves the Expanding Opportunities for Broadcasters Coalition — have told the FCC they have 39 stations in the top 12 markets that will participate in the upcoming wireless spectrum auctions.

"We believe there will be enough broadcasters to meet the goal of the FCC's national broadband plan," Preston Padden, a former top Fox and Disney executive and head of the coalition, told Adweek. "We're not yet there, but we're getting close."

Padden told the advertising publication that not all of his stations are selling out completely, though he said knows of public stations looking for a complete sale.

More broadcasters will sign on if the FCC makes its offer a bit more attractive, Padden said.

"We told the FCC that they should think about what they're going to pay these willing stations," he said. "They should think about the value of the spectrum for the wireless, not the broadcasting, business."

The number of stations to participate in the auction was revealed in a filing on the framework of the auctions by the coalition to the FCC. The group wants the FCC to reclaim at least 120MHz of spectrum and to make the auction as attractive as possible by not limiting wireless bidders or to name who specific stations can share spectrum with.

To honor the confidentiality requirements of the Spectrum Act and the confidentiality discussion in the FCC's rulemaking procedures, the coalition would not disclose the identity of its members.

"These are ongoing broadcast businesses with employees, advertisers and viewers," Padden said. "The need for confidentiality is obvious."

The coalition is a substitute for the NAB, the primary representative of broadcasters. The NAB has focused on protecting existing broadcasters seeking to remain in business. The coalition is focused on helping broadcasters participate in the auction.

"The Coalition not only believes that the Commission should reallocate 120MHz of broadcast spectrum for wireless broadband; the Coalition believes that the FCC can," the broadcasters said in their filing. "The Coalition not only believes that the Commission should raise billions of dollars in surplus funds for the construction of a national public safety broadband network; the Coalition believes that the FCC can. And, the Coalition not only believes that the FCC can."

The coalition wants the FCC to calculate the auction closing conditions on a national basis, meaning that payments to broadcasters in the largest markets could exceed revenues from resale of that spectrum.

"Payments to stations in the very largest markets add value to the spectrum in all the other markets and are the key to generating wireless auction revenue nationwide," the filing said.

The groups asked the FCC to get rid of a proposed requirement that spectrum-sharers have to come from the same market. Doing this, they said, will encourage more stations to opt in for sharing.

The value of stations, the coalition said, should to be determined by how removing a station impacts the FCC's ability to clear spectrum for wireless services, rather than enterprise value, signal strength or other factors. In that case, a small, independent station would be just as valuable as that of a larger network affiliate since both use the same amount of spectrum.

The FCC, the coalition noted, needs to resolve spectrum coordination issues with Canada and Mexico as soon as possible.

"The FCC should strive to resolve these border issues as quickly as possible to the extent that they could affect the incentive auction and the corresponding repacking of the broadcast spectrum," the coalition said.

OMVC Releases Tools for Mobile DTV On VHF Channels

The new "Predictive Model" for reception of High VHF mobile DTV signals will help engineers improve coverage and signal reception

By George Winslow -- Broadcasting & Cable, December 21, 2012

The Open Mobile Video Coalition (OMVC) is releasing new tools that are designed to help broadcast engineers improve the reception of mobile DTV signals on High VHF channels 7 to 13.

Based on extensive research, the new "Predictive Model" for reception of VHF mobile DTV signals is designed to help engineers predict signal coverage for a number of devices. These include automobiles with an antenna mounted on the vehicle; handheld units operating outdoors; and handheld units operating indoors.

The new report complements an earlier UHF Predictive Model that detailed reception characteristics for broadcasters operating on channels 14 and higher.

The new 20-page VHF Propagation Model report can be downloaded here

Anne Schelle, executive director of the OMVC noted in an interview that the report was part of the group's mission to help broadcasters better understand the technical issues involving mobile DTV broadcasts.

While these broadcasts use existing broadcast spectrum, "the signal qualities of Mobile TV are quite different than HDTV transmissions, because reception antennae in Mobile TV receivers are usually lower to the ground and always on the move," she noted in a statement. "We want broadcasters transmitting on VHF channels 7 through 13 to be aware of what transmission methods best serve a viewer who is walking, or a passenger who is watching while riding in a car."

To do that, she added that "we've opted for a 'semi-empirical' method that uses a blend of actual field reception data and theory. With information about the local terrain, antenna height, frequency, and polarization as well as details about the receiver and atmospheric conditions, we can predict signal strength for mobile broadcasts with this model," Schelle said.

The OMVC is scheduled to integrate its activities with the National Association of Broadcasters by the end of 2012. The move reflects the fact that the work on mobile DTV has moved from a technical phase to a period where these services are being rolled out to consumers, Schelle said. The incorporation of OMVC into the NAB will allow the mobile DTV efforts to draw on the more extensive resources available at the NAB.

The Dyle TV service backed by the Mobile Content Venture has already rolled out in 35 markets and the Mobile500 Alliance is working on another mobile DTV service.

FM LIST!

http://www.fmlist.org

Over the winter months, the USA section of FM List has been overhauled. Slogans and formats have been added. Translator originating stations have been added. Information has been obtained from multiple sources so there's no need to search elsewhere online. Here is an example of what you could see if you register on FMList. The frequency is 102.9. This resource is more thorough than the FM Atlas ever was, so register now and be ready for DX season!
