VHF-UHF DIGEST

The Official Publication of the Worldwide TV-FM DX Association

JULY 2013

The Magazine for TV and FM DXers

A SKIPLESS MONTH! E-Skip Has Left The Continent WHAT HAPPENED?

THE WORLDWIDE TV-FM DX ASSOCIATION

Serving the UHF-VHF Enthusiast

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS:

DOUG SMITH, GREG CONIGLIO, KEITH McGINNIS AND MIKE BUGAJ.

Editor and publisher: Mike Bugaj

Treasurer: Keith McGinnis wtfda.org Webmaster: Tim McVey

Forum Site Administrator: Chris Cervantez Editorial Staff: Jeff Kruszka, Keith McGinnis, Fred Nordquist, Nick Langan, Doug Smith, Peter Baskind, Bill Hale and John Zondlo,

Website: www.wtfda.org; Forums: http://forums.wtfda.org

xodlisM edT

P.O. Box 501 Somersville, CT 06072 Mike Bugaj - Enfield, CT mikeb@wtfda.org JULY 2013

Isn't this map just lovely. This map might be normal for February, but this is the end of June. Something is terribly, terribly wrong!

Generally speaking, DX conditions have been pretty grim in most of North America. The southern states, of course, have seen some skip, but not much. The Pacific Northwest has had a few openings (probably more than in past years), but not enough to begin to quench their thirsts for dx. But the northeast, for all intents and purposes, has had no FM skip since June first and only one or two faint traces of ch2 video carriers that could never gain in strength enough to show any video. I consider this June as the worst I've ever seen. I've seen grades of C and D- being posted on various forums online. I give it an F.

That's right, skip, take that F and turn it into a C for July. We'll be waiting to see if you can do it.

MEMBERS AND MORE

I don't think I mentioned this last month, but I want to welcome **Jon Pearkins** to the WTFDA. Jon is our northernmost member, living in Edmonton, Alberta. It's nice to see someone out west hearing some Es for a change.

We received renewals during the period of 5/11 through 6/10 from Michael Beu (TX), Richard Lucas (NY), Fritze Prentice (AR), Mike Hunter (NJ), Jay Novello (NC), Richard Allen

(OK), Doug McAbee (MI), Rod O'Connor (ME), William Lindsay (WA), and Eric Bueneman (MO). Thanks everyone for supporting the WTFDA.

MADISON-MILWAUKEE GTG

It's that time of year for you folks in the Midwest. Tim Noonan has the details..."This year the 20th annual Madison-Milwaukee Get-Together returns to the Milwaukee area.lt will be held on Saturday, August 17, 2013, in safe and friendly Oak Creek (in southern Milwaukee county). This is an all-band event, open to radio hobbyists of all interests. For more information, contact your hosts, Tim and Jill Noonan, at DXing2@aol.com> or 414-813-7373."

A NEW AMP TO PLAY WITH

While wandering around the local Walmart a short time ago I found myself in the TV section and found that Walmart has increased their stock of OTA TV equipment. One item I saw was an RCA amp, model AMP1450R, which is advertised as having extremely low noise and 12db gain. So I spenT \$14 for one and I am using it for VHF TV reception (WTNH-10). It just cannot compare with my CM 7775 UHF amp as far as gain, but if you live in an area prone to overload, this might do the trick for you. I have an RS amp with 6db noise that I've retired in favor of the RCA amp.

AND...

I was not expecting to see a nine page TV column this month with conditions as terrible as they are, but I want to thank you Southern guys for carrying the water this month. It's much appreciated. See you all next month!

Thanks to Earl Bronkar Jr. for information appearing elsewhere in this column.

Most of Newfoundland & Labrador will lose over-the-air TV at the end of this month. CBC closed their analog transmitters last summer; on July 31st, NTV will close their analog transmitters. No other stations exist in most of the province.

and NTV both converted transmitters in St. John's to digital, and those transmitters continue to operate. I believe the Aboriginal Peoples' Television Network continues to operate its analog transmitters in Labrador – this includes CHTG-TV in Goose Bay and five very low-powered transmitters on channels 12 and 13.

Many Sinclair stations have carried something called "The Country Network" on their .2 or .3 This country music channel subchannels. has changed its name to "Zuus Country".

NEWS ITEM: Commercials on Public Radio?

Listeners will soon be hearing commercials on CBC Radio 2 and Espace musique after the CRTC approved a three-year test of commercials for the two music-based networks as part of their license renewals. The two networks will be allowed to carry up to four minutes of commercials per hour in no more than two breaks. CBC/Radio-Canada's TV networks already carry commercials while CBC Radio One and La Première Chaîne will continue to be non-commercial.

NEWS ITEM: No More "Radio-Canada " . . . in French

CBC/Radio-Canada's French-language networks and websites have announced plans to drop the name "Radio-Canada" later this year in favor of "ici," which translates to "here" in French. The word has long been used in Radio-Canada promos and ID's: "ici Radio-Canada." Radio-Canada's broadcast TV network will become "ici Télé" on Sept. 9. On the radio, "La Première Chaîne" will become "ici Première" on Aug. 19, while a date for "Espace musique" to become "ici Musique" was not listed in a promotional video. The corporate name of the public broadcaster will continue to be CBC/Radio-Canada.

NEWS ITEM: BOSTON PIRATE'S EQUIPMENT SEIZED

The FCC first warned David Cange to stop broadcasting his pirate station in 2010 after Boston field agents used direction finding techniques to track the unlicensed station at 88.5 FM to his studio in Roslindale, MA. But the warning apparently didn't do the trick. The U.S. Attorney in Boston says federal agents have seized the equipment used by the pirate station. FCC records show Cange was previously warned about a pirate station in Brockton, MA in 2006.

The FCC remains committed to shutting down pirate broadcasters whose operations potentially endanger public safety and interfere with the legitimate broadcasts of our licensees," Enforcement Bureau chief Michele Ellison says. "We will continue to use all available enforcement tools, including equipment seizures, to protect the airwaves."

A warrant recently unsealed in U.S. District Court in Boston details the seizure of equipment, a move sought by the FCC after it received complaints from WRRS (88.5), which is a reading service to the visually impaired. According to an affidavit filed with the civil complaint, Cange was broadcasting from a shopping center.

NEWS ITEM: WBAI LAYS OFF ENTIRE STAFF

Pacifica's WBAI 99.5 New York has begun issuing notice to its entire staff and management that they'll be out of work come July 15.

The station has been having problems coming up with money to meet payroll and pay rent on its studios and Empire State Building transmitter site. The announcement comes a day after word that the Corporation for Public Broadcasting is withholding funding to Pacifica's five stations for insufficient accounting practices, misreported revenues and failure to comply with CPB rules on open meetings and financial transparency. One of the WBAI hosts claims that the layoffs have come about because "The Labor Department got wind that they were refusing to pay us."

WBAI launched its Emergency Transmitter Fund in March attempting to raise \$500,000. At this point it has only raised \$378,226 according to the station's website. In the monthly treasurer's report, WBAI Treasurer R. Paul Martin wrote on June 12 that the station will likely not be able to meet upcoming payroll and due rent.

The General Manager has sent out an E-mail extending the Spring on-air fund raiser by four days on an emergency basis to raise more money. He says, and the CFO concurs WBAI does not have the money to make the June 15, and June 30, payrolls, nor the July 1, Empire State Building rent. The rest of the Pacifica Foundation may not be able to cover WBAI's expenses later this month and early next month.

In addition to WBAI, Pacifica owns 94.1 KPFA and 89.3 KPFB Berkeley/San Francisco, 90.7 KPFK Los Angeles, 90.1 KPFT Houston, and 89.3 WPFW Washington.

NEWS ITEM: CNN RADIO CLOSING DOWN

CNN Radio [ceased] producing programming [June 25] as the company has shut down its radio division. In a press statement CNN said, "The company completed a review of its radio business and has made the decision to cease production of CNN Radio podcasts, effective immediately." Around 12 staffers are affected by the move,

although a few will reportedly be reassigned in the company.

CNN Radio ceased producing newscasts for radio stations on April 1, 2012 when its syndication agreement with Dial Global ran out and was replaced by NBC News. At the time CNN planned to still "continue to create original audio news content for other distribution channels including CNN Newsource, the CNN Wire and CNN.com, plus Web and mobile applications."

Thanks to Shawn Axelrod, Dan Sys, Inside Radio, RadioInsight, Tim Noonan, Radio World Online and Upper Midwest Broadcasting for news.

If you hear any changes on the FM band occur, share the news! 73

I guess it's that slow time of year, so we go back in time again with photos from Ed Phelps' collection of DX from Benton, KY. No ID's necessary, just reminisce and pine for the good 'ol days.

73's, JEFF

Coast to Coast TV DX

Featuring reports from the entire United States and all of Canada.

Send reports by the 15th of each month to: Nick Langan 1040 Riverview Drive Florence, NJ 08518

E-mail: nickl@wtfda.org

The Editor's Note

Ahh...the summertime. It's the season to enjoy the great outdoors and go picnicking or hiking or kayaking or whatever it is that floats your boat this time of year. Have any vacations planned? Too bad gas prices don't look to be dropping anytime soon. Maybe you should just pay attention to all the work that's needed around the house anyway.

Yes, you can kind of tell what I'm getting at. There's no need to mince at words...the month of June has been absolutely dreadful for E-skip across North America. After a very good opening for the eastern half of the U.S. on the 1st of the month, a large part of the continent saw over a 20-day drought for any sort of meaningful Es. A solid opening took place on the 23rd mainly in the middle part of the U.S., which included some 2-meter skip contacts being reported between Kansas and Florida. And the west coast, to their credit, saw two respectable openings on the 14th and 26th of month. But most elsewhere, several veteran DXers have agreed that this is probably the leanest June for Es they could recall, typically the month that features the lion's share of E-skip during the calendar year.

Yikes. Well, enough depressing spiel for this month's column. Let's at least get to some reports where actual DX occurred (what a concept!). We welcome Glenn Hauser's contributions to C2CTVDX this month.

Glenn Hauser

Enid, OK

* U S A. RF 9, May 18 at 1929 UT, KAFT Fayetteville AR, tropo is in with high humidity, even at mid-afternoon. 37.9 kW KAFT emits the usual four subchannels, three varieties of PBS, plus 13-4 with a reading service, video being nothing but a slide which changes colors and fonts every so often: I assume like all the other Arkansas PTV stations (OETA OTOH, restricts to only two so they can run HD on the prime one. KPTS-8 Wichita also has 3 or 4 channels we are missing in OK).

Inaugurating my new C-490 Antennacraft antenna, which replaces the same model severely damaged by icing last winter. I was trying to hold off till after tornado season, but couldn't wait any longer with sporadic E erupting (and the lowband elements being longest were the most damaged on the old one). The UHF 'arrow' segment of the C-490 was not damaged, and now I am wondering if I can detach it and use it productively independently? Heavy storms and high winds followed this night, but whew, no tornados here.

Actually the first non-local signal I got on the new antenna was KOTV-45 Tulsa, as I was realigning the rotor and it was actually pointing WNW. Hmm. Also in: KOED-11, Tulsa. I discovered that with end point due west, the rotor won't reach 270-280 degrees or so, but nothing much to be seen directly from that angle (Glenn Hauser, OK, DX

LISTENING DIGEST)

** OKLAHOMA. 48, May 19 after 0230 UT, with my new C-490 antenna in service, I am pleased to find that KOCY-LP is still NTSC from OKC, 18.1 kW with Estrella TV network. Under dead conditions I am lucky to see a frame bar, but with a little help from the troposphere, it visiblizes, hardly ever snow-free: the nearest if not only OK TV station that hasn't gone DTV yet, which I will really miss as a signal-checker that antenna be functional (Glenn Hauser, Enid, DX LISTENING DIGEST)

** MEXICO. 2, May 19 at 1533 UT, sporadic-E signal fades in, Spanish. Jockeying rotor, seems slightly east of due south. A B&W documentary. Probably XHY-TV Mérida, Yucatán; yes, during ads at 1541 I make a match to webstream via http://sipse.com/canal2/ with the usual delay. It's only a weak opening so far, in and out, mostly out, and not above ch 2. Hope to have more in my next report.

Glad to be getting some real TV DX again, while analog still exist in parts of México. But I continue to pine for something further, extended single hop from Central America, double-hop from Central or South America, which DXers further east now have little trouble getting with no US stations in the way. But for me, Mexicans are still in the way.

At 1550 UT, the essential 50 MHz Es maps at http://www.tvcomm.co.uk/radio/muf5.html

and

http://www.dxmaps.com/spots/map.php?Lan=E&Frec=50&Map=NA

show lots of paths across eastern, southern and western USA, but no links between Enid and Mérida

BTW, I appreciate the tolerance in SW lists for my including VHF/UHF DX which may simply be ignored if not interested, but which I find hard to fathom (Glenn Hauser, OK, WORLD OF RADIO 1670, DX LISTENING DIGEST)

** MEXICO. May 24 at 1705 UT, the 6m Es map shows opening over SW quadrant of USA, so time to aim at BCN and look for lowband analog TVDX, before Mexico turns everything into DTV:

According to:

http://tvdxtips.com/mexcitylist.html
Mexico Analog TV Shutdown Dates by City
Shutdown date for Tijuana is by April 16, 2013
Shutdown date for other 2013 is by November 26, 2013

The other 2013 cities for the latter date are: Mexicali, Juárez, Monterrey, Nuevo Laredo, Reynosa-Matamoros, i.e. the other major border cities, but the list is incomplete, not showing e.g. Nogales, Piedras Negras or Ensenada, where there has been a channel 2:

XHENT Azteca-7 50 kW ch 2 Ensenada, still in W9WI.com

but not on Danny's map of logos http://tvdxtips.com/mexlogos.html

Altho this is not a complete map, just the ones for which he has local logos. Is Ensenada considered part of the Tijuana market, so already off? XHENT is still shown with net-7 on Bill Hepburn's channel 2 map, which I hope he is keeping up to date: http://www.dxinfocentre.com/TV2.pdf

At 1705 there are traces of NTSC video on channel 2, maybe XHENT.

Around 1730 a novela is making it on 2, but direxion is more like SW, not WSW. At 1752 CCI on 2, including a variety show with Gala TV bug in LR, Televisa also, i.e., former Galavisión. The Gala TV bug is now a large swirl, as on the logos page above. Also at 1758 with horoscope nonsense, Gala TV bug again in LR.

The channel 2 list at http://www.w9wi.com/web/tv-channels/2.html

shows the *only* Televisa 9 = Gala TV station is: "Hermosillo, SO XHHMA-TV 30,000 Z H 29-04-29N 110-57-35W XLIC S:Televisa 9"

At 1800 on 2, another station audio mentions Sinaloa, so maybe XHI-TV in Los Mochis (not to be confused with the *other* XHI-TV in Ciudad Obregón, Sonora, which is related but not //, per Oglethorpe).

Channel 4 also shows occasional activity: at 1746 evil-penguin toon from net 5. 1758 again spotted net 5 bug in UR. There are lots of these all over the country, but the most likely in NW Mexico is: "Mazatlan, SN XHMAF-TV 100,000 Z H 23-15-34N

106-23-11W XLIC S:Televisa 5`` But there are also net-5s on ch 4 in La Paz and Torreón.

At 1840, sudden burst of video on ch 2 says 417-4040 / TAXI EXPRESS, and some other phone numbers, full screen, large font --- English?? No, Googling leads right to Ciudad Obregón, Sonora, as in W9WI.com:

``Cd. Obregon, SO XHI-TV 100,000 Z H 27-34-30N 109-56-27W XLIC S:Televisa local``

At 1850 I am finally getting a 'bright' signal from WSW on channel 3, which is what I was expecting at the outset: still analog for another semiyear, XHBC Mexicali, since it's running a PSA for TJE del Estado de Baja California, which once you get past Google and MS Word insistence that you must be typoing THE, means TRIBUNAL DE JUSTICIA ELECTORAL. A novela at 1855, maybe from same. After that the opening dies down, and I hope it stays down since I have to guit for now.

At least the short-spaced co-channel XHTJB in Tijuana, on same offset now must be gone --- or DT on 3? At

http://www.w9wi.com/web/tv-states/BN.html
XHTJB is still listed on ch 3 with no UHF or other
DTV replacement, but so is XETV on 6 past
deadline (Glenn Hauser, OK, DX LISTENING
DIGEST) Later saw Dennis Smith's comment in
June VUD that XETV analog extended to May 28

** MEXICO. Watching channel A2 for sporadic E, May 25: 1717 UT fades in with an Azteca-7 bug in UR, from due south, likely regular XHTAU in Tampico. Below 7 logo are temp 27 degrees and CDT = 12:18. Video only so far, seems infomercial; 1721 Soriana (department store chain) ad. Video shows 40 HD Proyecto 40 --- will that be XHTAU's DTV channel? W9WI.com still does not show any DTV channels for Tampico. The DTV transition deadline for that city is unknown; in fact it's not shown at all

on http://tvdxtips.com/mexstationlist2.html Could that mean: never?

Since Mexico, like Australia, has this absurd tradition of naming its national networks by the original channel number occupied in the source city, and remapping is now in the offing, will those start displaying the original network brand channel; or the former RF channel of the ex-analog relay transmitters, which have always been incidental and different in every city?

Some of the networks have been getting away from this, but Azteca remains branded to ``13`` and ``7``. It would be as if network TV in the USA had become known as ``2`` for all CBS affiliates, ``4`` for all NBC, and ``7`` for all ABC --- even tho that setup hardly extended beyond NY and LA, already nonsensical in Third City = Chicago.

I google the temp in Tampico as 28 degrees, close enough but hardly unique in the subtropics. 1724 MUF rises to color burst and some audio, now real estate commercial; 1734 again and better, now interviewing people outside, with a soccer ball in the lower left. 1803 mentions ``estado de Tamaulipas``. Some video & audio briefly now on ch 4, maybe Tampico too. WWV reports the K-

index now at 5, i.e. very disturbed as far as HF is concerned, but maybe unrelated to seasonal sporadic E which would be happening anyway. 6m maps show only a few E-W paths, not N-S, presumably due to the paucity of Mexican 6m ham activity (Glenn Hauser, OK, DX LISTENING DIGEST)

** CANADA. Channel A2, May 26 at 1530 UT, with antenna south expecting Mexico, some NTSC video fades in via sporadic E; graphic says In Touch, and then an apparent preacher at a lectern in and out. Could it be XHRIO, Matamoros? Still showing at 1615; 1622 audio fades in mentioning Global, so antenna rotated north! Discussion of the Ford Brothers in Toronto and allegations of crack. 1627 outro show as `Stand By` with Tom Clark; 1628 black/silent for a minute! 1629 series of ads/PSA, including McDonald House, Manitoba teachers; 1630 ``good evening``, and `Focus Manitoba` about sports, stadium. More or less gone after 1700 UT.

So it's CKND-TV-2, 100 kW satellite of Winnipeg at Minnedosa, still on the air in analog, but its days are allegedly numbered, with plans to move to hiband for DTV. At ideal E-skip distance, a regular here which will certainly be missed.

Later jumping thru the hoops at TV Guide, we find that Minnedosa is not even listed among itty bitty towns with cable providers, so back to Winnipeg, Shaw: CKND cable 12 confirmed at 10:30 am Sunday emitting `In Touch with Dr Charles Stanley`, but the 11:00 am program is listed as `West Block`.

At 1625, MUF briefly reached ch 4, something religious in English (Glenn Hauser, OK, DX LISTENING DIGEST)

- ** CANADA. Large Es opening across Midwest USA on 6m, but only this on TV: May 27 at 2326 UT, weak northerly video in English on ch A2; by 0024 UT May 28, peaking more from the NE, ad grafix in English; probably Ontario (Glenn Hauser, OK, DX LISTENING DIGEST)
- ** MEXICO. Channel A2, May 29 at 2124 UT, NTSC video fades in after monitoring snow for hours; sporadic E MUF has ascended. Ad for Danone (?), ``Salud es Belleza`` slogan; seems to peak SSE, so suspect XHY-TV Mérida, Yucatán. 2132 large graphic says TRI>>> / NOTICIAS, with kid voices audible. At 2141, report about HURACAN BARBARA, with weatherYL blocking part of the map/graphics with her body; all I can make out is OAXACA.

By the time the XHY-TV webcast boots up, I cannot get a match: it's playing music videos. This was about when Babs made landfall over Oaxaca heading north, not a threat to Yucatán, but no doubt of interest thruout México. Nothing much further besides some video CCI up to channel 3 at 2140 UT. Our own OK storms to the south are causing lightning crashes, and I have to shoot thru them (Glenn Hauser, OK, DX LISTENING DIGEST)

** OKLAHOMA. During first tornado outbreak the afternoon of May 30, which affected areas south

and east of here, circa oiltown Cushing, while we in Enid are in bright, placid sunshine, OKC TV stations are in wall-to-wall coverage, so I take the opportunity to tune the FM band starting at 2035 UT and find which stations are relaying which TV stations. Some of them * are in-and-out with own announcers, depending on how close they are to the warning areas (and how eager they are to get back to regular programming and commercials; make that: commercials and programming).

KFOR-27 (``4``): 102.7, 101.9, 96.1, 94.7, 90.5, 89.7/88.7/88.5*
KOCO-7 (``5``): 100.5, 98.1, 98.9*, 96.9*
KWTV-39 (``9``): 107.7, 105.1*, 104.1, 93.3, 92.5*, 91.7

Also checked some of the stronger AM signals without escaping household noise sources blocking the weaker ones:

KFOR: KTOK 1000

KWTV: Triple-play KOKP 1020 & KOKB 1580 (along with 105.1*); KOKC 1520 So unknown what KUSHing 1600 was doing.

I suspect the above groupings reflect clusters such as Clear Channel, Cumulus, Tyler, gospel-huxters; details which have never really interested me on stations I seldom care to listen to for their own content (Glenn Hauser, Enid, DX LISTENING DIGEST)

** MEXICO. No Es TVDX noted earlier on May 30 until 0220 UT May 31 some video fades in on channel A2. 6m maps imply it should be from the northeast, but this peaks south, tentatively net-7, likely XHTAU Tampico. Also some CCI on ch A4. At 0250 I can make out the `f` = net 4 Foro TV bug in the LR on ch A2.

More in keeping with the 6m map now, east-west paths: 0320 UT, on ch A3, Spanish from WSW, probably XHBC Mexicali; yes, at 0323 audio ID as ``Televisa Mexicali, Canal 135 en Mexicali, Canal 138 en el resto del estado``, program promos. I assume those canales refer to cable systems, and probably HD tier. Back to a novela.

Now I am monitoring on two screens at once, the Zenith 11.5-inch B&W which has been primary, despite overscanning, since it doesn't suffer from audio muting; and a Broksonic 14-inch color set which does. Both fed by the same antenna with amp and splitter, one direct to the B&W, the other with the DTT901 pass-thru to the color set. On the latter I can now see the bugs in the corners from XHBC: upper right, net-2 star; upper-left, Televisa oval logo, the word Televisa below it and tinier letters below that, presumably Mexicali. Snow-free peaks, made a few photos with the bugs during the novela. No sign of ch A5, XHAQ, presumably still operational but not enuf MUF.

Still wonder if XHENT, ch A2, Ensenada BCN is still on the analog air, not seen while XHBC was peaking, but as that fades out, now at 0336, ch 2 starts to appear with net-7, which fits XHENT among others.

0356, ch A2 fades in again but not necessarily the same station: Bancómer ad, seems further south,

CCI; is amid newscast, 0358 with circular bug in LR I can't make out. 0359 ad for Fábricas de Francia. Googling on that finds it's a nation-wide store chain a.k.a. Liverpool (does that make sense?), but not in Mexicali or Ensenada. In W & NW Mexico it does exist in Los Mochis, Tepic, and La Paz. 0401 HSBC ad, back to news.

By 0410, ch A2 is running a Jalisco PSA, probably electoral; but CCI, and also CCI on ch A3. 0412 ch A2 with Más Visión logo during drama in UR, +v in a circle, the plus also resembling a lower-case t. There is also a word below the logo in tiny font, seems too short to be Guadalajara, so what is it? Anyhow this is certainly XEWO-TV. At 0420, promo for Chapulín Colorado show on +v. 0424 animated full screen Más Visión logo, wish I had photoed or taped, back to novela. Opening finishes a few minutes later.

For a while I switched on the DTT901 DTV converter and tuned RF channels, surprised to see a very brief yellow-bar 'bad' signal on ch A6 at 0340 UT. XETV Tijuana was supposed to turn off analog on May 28, but I don't think they were going to continue on same channel with DTV, were they? Already had a UHF replacement going. Could be a fluke from my nearest DTV A6, KBSD Kansas, but antenna aimed pretty far off from that (Glenn Hauser, OK, DX LISTENING DIGEST)

** MEXICO. Turn on and tune in at 2119 UT May 31 finds big TV Es opening in progress; as usual the 6m Es maps don't reflect this:

All times and dates in UT!

2119, chs A2, A3 and A4 all with net-5 toons. Now the italic 5 in a circle bug is in lower right instead of upper right and has been enlarged, just what we DXers need! At 2122 on two sets I notice that the audio on 2 and 3 is an echo apart, still toon.

2120, ch A4 with some CCI to net-5.

2124, take some pix of toon on A3 with net-5 bug

2133, MUF now up to A5, peaks SSW. 2138 it`s net-5 too with Spongebob dubbed.

2140, A2 with forotv bug in LR, teleactiva elsewhere on screen, or CCI? The latter means it`s XEFB-TV in Monterrey NL, which also carries Foro per http://tvdxtips.com/mexlogosch2.html

2141, A2 with TV KIDZ bug in LL. What net/station is this program on?

2148, A2 with +v bug in UR during documentary with animated map. +v has a red background. So it's XEWO-TV Guadalajara, a.k.a. Más Visión, and that in fact is the lettering below the +v logo. There is some 20 kHz CCI, meaning XEWO is offset; Danny says it is (appropriately) plus

2154, A2 with MTY bug in UR during gameshow? Or court show. Danny says this is now XHCNL in Saltillo, Coahuila, relaying ch 34 in MonTerreY

2203, A4 with Azteca-13 bug in UR during novela, photoed. The yellow wedge segment stands out.

Snow-free peaks. W9WI.com shows there are ten possibilities of which seven are 10-100 kW. During this opening I did not see a single call-letter ID supered. By now lighting QRM is bothering, as there are storms building just south of here.

2208, A4 with Azteca Noticias - probably net-13 but could be 7

2209, A2 with Gala TV swirl bug in LR, CCI. W9WI.com shows the ONLY Televisa 9 on A2 is Hermosillo, SO XHHMA-TV 30,000 Z H 29-04-29N 110-57-35W XLIC

but this is outside the PTA (probable target area), and is probably misleading, as one of the Televisa Local stations could be carrying net-9 at the moment, other nets at other times: Mérida, Aguascalientes, Tepic, Nuevo Laredo, Ciudad Obregón

2216 on A4, Azteca 13 bug in UR again, novela

2221 on A3, American dubbed movie from net-5 – now the LR bug has been moved even further into screen because movie is letterboxed; snow-free peaks. XHBQ Zacatecas was the usual suspect past years, but W9WI.com now shows it's changed to Televisa net-2! Besides two low-powers, W9WI.com shows the only high-power 5 on 2 is: Zamorano, QT XEZ-TV 50,000 + H XLIC S:Televisa 5 which had been on net-2

It's logistically difficult for me to DX FM and TV from the same shack location, so I move to the porch with the DX-398 to see if MUF is getting into FM: all I get is:

2232 on 87.75 = Ch A6 audio, Spanish kid voices, probably toon, gone at 2235, back at 2237. No Spanish Es found in FM band proper, but I checked the tornado TV relays around OKC; see OKLAHOMA

2246 on A2, XEWO-TV is back with +v but in UR, CCI, one of them with chat show or court show

2314 on A3, net-5 back with movie, bug in LR. After that opening fades to weak CCI and out, fortunately, just as tornado axion is really heating up in OKC (Glenn Hauser, Enid OK, DX LISTENING DIGEST)

** MEXICO. Fitful Es into channel A2, June 2 at 1404 tune-in; antenna south, but 6m maps show all the axion is N and NE of me, so rotate? No, peaks SSE to S; briefly locks in with Spongebob and net-5 bug LR.

I was bringing up the XHY-TV Mérida UStream to make a match, but certainly not that. It's showing an old B&W musical movie featuring a variety of hats and neck-kerchiefs, marimba and guitarists. At 1442, now XHY-TV itself fades in briefly for a match. Lotsa news and ads at http://sipse.com but I can't find a plain old program schedule to ID the movie. Try TV Guide: provides cable listings only abroad, and can't find XHY-TV or Sipse on one Mérida system, and the other doesn't start until channel 43!

Ch A4, June 2 at 1538 now the MUF is hitting this channel, dubbed Spongebob again from net-5. Also signs of skip on channel A5, but everything is weak, in and out, mostly out as I close this report at 1556.

1650 on 2, heavy CCI in Spanish, including an interview; unknown bug in UR

1654 on 2, Televisa promo in CCI, for show about Pablo Escobar

1655 on 3, diabetes ad or infomercial

1655 on 5, chat show, with zero offset CCI, then into exercising? Or rather dancing; Azteca 13 in UR. Both 3 and 5 are from WSW, so Mexicali, 5 being XHAQ. Yes:

1658 on 3, Mexicali 686- phone on infomercial for Diabete Stevia, i.e. XHBC

1659 on 3 and 5, peaking snow-free

1700 on 3, infomercial still going

1724 on 3, now there is same-offset CCI here on XHBC, like we used to get, probably XHTJB Tijuana still analog

1725, 3 and 5 are fading out, now CCI on 2

1748 on 3, horse-dancing competition, in a corrida past 1804; was Mrs. Mitt there? XHBC again or not?

1758 on 2, CCI is peaking SSW now, and at 1804

1852 on 2, atop the CCI with Azteca-13 bug UR. There is another longer bug with text in upper left, varicolored, unseems callsign ID, can't make it out

1904 on 2, still Az-13 video, mixing with other audio

Think opening is fading, and I take a break anyhow, resuming:

2307 on 2, CCI most of the hour, nothing definite

UT June 3:

at 0158 brief fade in on 2, film with TELEACTIVA bug UR = XEFB Monterrey NL

TVDX Photos: three added from May 31 sporadic E opening: XEWO-2, XEZ-3, Azteca 13 on 4, via http://www.worldofradio.com/tvdxfoto.html (Glenn Hauser, OK, DX LISTENING DIGEST)

** U S A. Tropo TVDX is up from Kansas after local midnight June 1; besides nearby Wichita DTV signals:

At 0515 UT, KSHB Kansas City, RF 42 as 41-1

At 0520, NTSC on channel A28 from north, Daystar animated logo, no audio, gospel-huxter video in squeeze-o-vision; signal strengthens by the time I close around 0610 but the video looks edgy. It's KWKD-LP, 8.8 kW in Wichita, which needs a good tropo opening to visiblize. Only analog TV left there?

At 0525, KSNC Great Bend on RF 22, = 2-1. There were many other ``bad`` signals thruout the UHF band which didn`t decode

At 0524, KTWU RF 11 Topeka, on 11-1, 11-2 and 11-3. 11-1 with PBS promos, and replay at 0530 of 'Need to Know'; 11-2 running a drama in Italian with subtitles. This channel has a fancy bug in UR, looks like two V's with a crown(?) atop them, the Washburn University W logo? No, per http://www.ktwu.org 11.2 is called Worldview and the crown is really three hexagons. The Italian is a show called 'Detective Montalbano' starting at 0400 UT. Wow, look at the program schedule with lots of stuff from foreign TV, including RT and Al Jazeera. Wish we had regular access to that! Lucky Dave Pomeroy.

11-3 with alternate PBS programming, but too much to keep track of. Website shows that is called ``Enhance`` Did take a few photos, including KTWU ID in upper left on 11-1. Some of them will be linked later.

TVDX photo: added KTWU-11 Topeka KS from June 1 tropo opening, via http://www.worldofradio.com/tvdxfoto.html (Glenn Hauser, OK, DX LISTENING DIGEST)

- ** CANADA. Monitoring channel 2 analog for long hours the last few days with little to show for it during a sporadic-E lull. But with antenna parked northward, UT June 5 at 0014 for two or three seconds I see NEWSHOUR, and then GLOBAL Winnipeg, which is all I need to ID once again CKND-TV-2 Minnedosa MB, thus confirming it's still on air in analog. Could it have been meteor scatter? (Glenn Hauser, OK, DX LISTENING DIGEST)
- ** MEXICO. Re "At least the short-spaced cochannel XHTJB in Tijuana, on same offset now must be gone --- or DT on 3?". As of today (just after 0300 UT June 6), analog video and audio signals are both still quite audible here, for XHTJB/Ch. A3. Such a check for XETV/A6 is much more difficult, thanks to our local analog frankenvision negative-offset KSFV-LP from Mount Wilson. There does appear to be a video carrier on the A6 zero-offset frequency, but I wouldn't place any bets either way. Very 73z (GREG HARDISON, West SFV, CA, June 5, DX LISTENING DIGEST)
- ** OKLAHOMA. RF 51, June 7 at 1505 UT, I notice that KSBI OKC on its main channel 52-1 is now carrying a THIS TV movie, ``War Party``! It`s PSIP labeled KSBI-HD. Own main programming has been swapped to 52-2 as KSBI-SD, at the moment `We the People` with ``Judge`` Gloria Allred now she`s one too?? I always found her much more menacing when her hair was jet-black, never all red. What`s going on here? KSBI had picked up THIS for its secondary channel as soon as KOCO RF 7, 5-2, dropped it a few months ago in favour of MeTV.

W9WI.com listing still shows 52.1 as INDependent, and 52.2 as Tuff TV, a net I barely remember, defunct? Tuff also was on KSBI's LP companion, KXOC-LP 54 which since the DTV transition had (also?) been put on RF 51's secondary channel.

THIS exchange has also caused Enid Suddenlink to put THIS on cable 16 & 116 instead of KSBI's own programming, which has no other place to go as they were not relaying 52-2. If they were paying attention, would not duplicate on C16 & C116 (Glenn Hauser, OK, DX LISTENING DIGEST)

- ** CANADA. Ch A2 NTSC, June 9 at 1653 UT with antenna NNE, video flashes in for a second or two with English wording, likely meteor scatter as Es continues to be otherwise absent. Probably from Ontario or Manitoba (Glenn Hauser, OK, DX LISTENING DIGEST)
- ** OKLAHOMA. RF 31 KXOK-LD and RF 32, WQOS306 relaying KXOK Enid, have continued to broadcast black and silence on the two subchannels but still labeled 31-2 M-Fox and 31-3 Azteca whenever checked the last weeks, until: June 12 at 1513 UT, Azteca is back, but still no Mundo Fox. I'm sure this won't last (Glenn Hauser, Enid, DX LISTENING DIGEST)
- ** MEXICO. Sporadic E finally returns after several days` lull; earlier I was hearing 15825 WWCR inbooming, a good but not 100% reliable tipoff that Es may be reaching VHF.

Turning on the DX TV at 1421 UT June 12, Spanish is in on channel A2 NTSC from the south. Some weird combination of a novela/talk/gameshow. First I bring up the SIPSE live stream video of XHY-TV Mérida but that`s in news from foro tv. At peaks, I`m pretty sure the upper-right bug on A2 is +v, i.e. Más Visión = XEWO-TV Guadalajara.

By 1445 UT the main A2 signal now displays the Azteca-7 bug first in lower right during ads, CCI; 1459 in upper right during talk show.

At 1459 the MUF reaches ch A4 video and audio briefly, and at 1505, even ch A5 making video CCI to some cable leakage radiation I have trouble with on that channel more than others. The ch 5 DX video is in squeeze-o-vision.

At 1506, ch A4 briefly enough to recognize net-5 bug LR with toon.

At 1540 on A2, still mostly net-7 bug UR, talk/gameshow with large title in LR, DIMELO = "tell it to me". As usual, most likely 7-on-2 from south is XHTAU Tampico. CCI on ch A2 continues.

At 1614, net 7 on A2 now carrying fútbol and still past 1645. At 1647 a YL is talking about calories and exercises, but still seeing net-7 bug and ESPAÑA HOLANDA on the screen, so evidently during a break in the SBG. Still some A2 CCI past 1700, but gone by 1720 UT.

Sporadic-E analog TVDX opening continued from last report, June 12, UT, occasional MUF peaks into channel A2 NTSC:

1821, on 2, ad for something in Spanish 1846, on 2, Gala TV swirl bug in LR during novela; no audio MUF

1920, on 2, +v bug UR, i.e. XEWO Guadalajara; CCI

1940, on 2, a graphic mentioning Guadalajara

2000, on 2, algo still 2048, on 2, net-7 bug UR during drama; dark so maybe movie not novela (Glenn Hauser, OK, DX LISTENING DIGEST)

** CANADA. Fitful Es again this time from north, Channel A2, UT June 15 at 0009 fades in with DQ ad in English; MUF pokes up occasionally, sometimes with CCI but never very strong or above ch 2. 0010 English dialog and almost sure the GLOBAL bug is in LR; in and mostly out during the following hour; at 0133 I see SHAW on the screen which again correlates with Global, i.e. usual CKND-TV-2 Minnedosa, Manitoba. Andy Reid points out CRTC info that they have two years from now to move to DTV on channel 9, but probably won't take that long (Glenn Hauser, OK, DX LISTENING DIGEST)

A tornado blew through Hazelwood on April 10; I was able to salvage the APS-9B from the antenna damage sustained. The worst of the tornado damage was just to the south and west of my QTH. Unfortunately, the Radio Shack VU-210XR that I had used for FM DX prior to the acquisition of the APS-9B was totaled; I replaced it with a Winegard HD8200U VHF/UHF/FM receiver. Within 48 hours of getting the FM antenna back up, I noted a tropo opening into Indiana, Kentucky and Tennessee. Several high-power Nashville stations were in like locals at times; I noted new FMs from Alabama, Kentucky and Tennessee, including a city of license change for WLLE 102.1. The two new Tennessee stations were very welcome here. The E-skip opening on June 2 brought a new Mexican state on FM with the log of XHBY 96.7 from the state of Veracruz. Most of the openings have been tropo since I brought my FM antenna back online on May 18. The total of FM stations logged stands at 1,186 as of June 14, 2013. 73.

Not the greatest list. Kinda close in, but still from L'Anse to almost No.Dakota! Gone later as usual.

InnovAntennas OP-DES[™] Yagis: More DX for your Monitoring Station!

InnovAntennas' OP-DES"
Yagis are packed with new
design features that
improve your DX:

- OP-DES™ design provides high gain and low SWR over a wide frequency range
- Excellent back and side rejection for reduced interference over entire 88-108 MHz range
- Computer-optimized design utilizing NEC-4 and Particle Swarm Optimization
- High-quality construction (including marine-grade stainless-steel fasteners) for long life

InnoVate your station, and hear more of the world beyond...

Info on OP-DE5" and LFA" Yagis and our full line of HF, VHF and UHF antennas is at www.lmnovAntennas.us (North & South America) and www.lmnovAntennas.com (Europe and ROW). Toll Free: (U5) 888-998-8541 - (UK) (0)800 0124 205 Info@innovantennas.com info@innovantennas.us
