THE WORLDWIDE TV-FM DX ASSOCIATION

Serving the UHF-VHF Enthusiast

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, GREG CONIGLIO, KEITH MCGINNIS AND MIKE BUGAJ.

Editor and publisher: **Mike Bugaj**

Treasurer: **Keith McGinnis** wtfda.org Webmaster: **Tim McVey**

Forum Site Administrator: **Chris Cervantez**

Editorial Staff: **Jeff Kruszka, Keith McGinnis,**

Fred Nordquist, Nick Langan, Doug Smith,

Peter Baskind, Bill Hale and John Zondlo,

Website: **www.wtfda.org**; Forums: **http://forums.wtfda.org**

JULY 2013

THAT WAS THE SEASON THAT WAS

Just when you thought the skip season was over for the season, an opening comes along at the end of July to prove you wrong.

As skip seasons go, this one was pretty rotten. The month of June was almost completely void of skip for many of us. The month of July wasn't much better. There were 3-4 skip openings around the 3rd – 8th and then nothing until the 26th, when we were treated

to 1-2 hours of skip on FM. It almost seems like the skip gods threw us a bone just to keep us happy.

Losers this summer are the Northeast and New England. Winners are those in the west who have suffered for years of very little Es in the summer but got some this year.

MEMBERS AND MORE

This month we welcome John Sullivan (OK) to the WTFDA. Welcome, John! And another big welcome goes out to Andy Bolin (IL) who rejoined after emailing me about something completely unrelated. I think deep down Andy has always been a WTFDA member even when he wasn't.

A ton of renewals came in during the period from 6/13 to 7/18. Because the list is so long, I'll rush through it. Renewals from Greg Barker, Jerry Bond, Sheryl Paskiewidz, Owen Wood, Fred Laun, Mike Lazaro, Gray Fulk, David Austin, John Adams, Al Tobia, Jeff Kruszka, Stephen Ponder, Robert Rush, Frank Aden, Tim McVey, David Braun, Steve Walko, John Marx, Peter Baskind, Ed Phelps, Gary Siegel,

Alan Michalek, Benjamin Greenlaw, John Johnson, Eugene Hinton and Stan Weisbeck.

Thank you everybody for supporting your WTFDA!

AND MORE...

I never mentioned this, but during the spring I received a phone call from Peter Oprisko, Jr. Old timers will recognize the name. Pete senior was a VUD publisher back in the ice age (early 70s?) and I think he was also a board member. I was asked if I wanted some of his old publishing material because Pete Sr. was cleaning out his basement in preparation for a move. I declined. But I did talk later to Pete Senior himself and found him to be in decent health for being in his 80s. Pete is out of the DXing hobby at this point and no longer interested. I asked junior if he was interested in it, but he is not either. I guess age does do that to you eventually.

Another old timer by the name of Gary Siegel sent this: "Thanks for all the hard work you put in! Asking what everyone else is – where's the skip and where the tropo (Answer: it's in Europe this year -ed.) Where have they gone? Europe, I guess (Bingo! –ed) See you in the twin cities."

And speaking of twin cities, NRC is looking for someone in the WTFDA to spend 20 minutes there talking about new advances in TV and FM Dxing. Anyone want to volunteer for that? Contact Mark Durenberger at his email address of Mark4@durenberger.com.

AND SO

It has been a miserable skip season, but this looks like it will be one huge VUD. The people who did hear and see the DX have reported. I'm looking forward to this one. -Mike

Thanks to Karl Zuk, Dennis Smith, and Robert Ross for information appearing elsewhere in this column.

We've now seen the first shutdown of analog TV in Mexico. Tijuana was to be the first place to go all-digital, in May. The date was pushed back several times.

Dennis Smith noted XHBJ-45 didn't have a digital signal, until July 18th. The next day, the Tijuana analogs disappeared.

However, as of the 25th, XHDTV-49 in nearby Tecate was still operating in analog. (as well as digital, on RF channel 47)

Most of Newfoundland & Labrador will lose over-the-air TV at the end of this month. CBC TV closed their analog transmitters last summer; on July 31st, NTV will close their analog transmitters. No other stations exist in most of the province.

CBC and NTV both converted their transmitters in St. John's to digital, and those transmitters continue to operate. I *believe* the Aboriginal Peoples' Television Network continues to operate its analog transmitters in Labrador – this includes CHTG-TV in Goose Bay and five very low-powered transmitters on channels 12 and 13.

Many Sinclair stations have carried something called "The Country Network" on their .2 or .3 subchannels. This country music channel has changed its name to "Zuus Country".

NEWS ITEM: FCC TOTALS

The FCC reports that as 30 June 2013 there are 10,563 licensed FM stations. This includes 6606 commercial and 3957 educational stations.

NEWS ITEM: STING HELPS NAB TWO ALLEGED NEW YORK PIRATES

Two New York men could spend a year in jail after being arrested on charges they ran pirate radio stations. The Kings County District Attorney's office says Seon Bruce, 40, and Solomon Malka, 51, allegedly ran the station at 104.7 FM from the rooftop of a 50-story building in lower Manhattan.

Detectives ran a sting, buying commercial time from Bruce, known to listeners as "Fresh Kid." At the same time FCC engineers tracked the signal to an office building where armed with a search warrant they found the transmitter in a room on top of the building. While there, Malka allegedly told investigators he installed the equipment and he knew the radio station didn't have a license. Inside the room, detectives also found equipment for another pirate station at 91.7 FM — although it wasn't on the air. Malka allegedly admitted 91.7 FM was his station and claimed he had an FCC license for that frequency.

Detectives did their homework, and when they confirmed that wasn't true they got another search warrant and seized the transmitter which had been moved to the roof of a Brooklyn apartment building.

Operating a pirate station in New York is a class-A misdemeanor.

Thanks to Shawn Axelrod, Tim Noonan, Ralph Strobel, Dan Sys, Inside Radio, Radiolnsight, Radio World Online and Upper Midwest Broadcasting for news.

If you hear any changes on the FM band occur, share the news! 73

The Editor's Note

So, what was the overall verdict on E-skip activity in July after our woefully desolate June? Ehhhhhhh. The first half of July had its moments, including solid openings on the east coast on the 3rd and 5th of the month. The northern plains and Rockies enjoyed a nice opening on the evening of the 15th. And the Es clouds that did manage to form with a respectable MUF always seemed to spawn at the right midpoint for DXers in southwestern Ontario, a trend that has been going for the past three seasons strong. But since the 20th, the bottom has seemed to have fallen out on the season, certainly not a long enough period of activity to make up for the colossal lack of skip the month prior. Thus, I think most DXers would deem the 2013 E-skip season as below average, and for many the second consecutive lackluster campaign. There's always next year?

With that, we'll turn our attention towards tropo and hope that August proves fruitful. While we wait, one would insist there was actually a quality Es season going on with the amount of reports we have in C2CTV DX this month. Enjoy, and thank you all for your contributions!

Glenn Hauser
Enid, OK

All times, days and dates are strictly UT: CDT +5. These are more or less in chronological order, including Oklahoma news:

** MEXICO. Keeping an eye on the channel 2 snow, something fades in at 2158 UT June 17: soon visible is an MTY bug in the UR, before fade-out at 2200. So it's XHCNL-TV in Saltillo, Coahuila, relaying channel 34 in Monterrey, which apparently has same calls.

The next few fade-ins are getting into the typical ``second season`` of summer sporadic E, i.e. strong snow-free one station at a time, instead of a mess of CCI, so more geographically restricted despite the large number of channel 2 transmitters in close spacing all over Mexico.

At 2234 on 2, next fade-in is Azteca-13 net with bug in UR during novela; also for only two minutes, snow-free peaks, photoed:
<http://www.w4uvh.net/az13on2a.jpg>

There are seven high-power and one low-power 13s on 2 per W9WI.com but even the high-powers are mostly in the 5 kW ERP range, with only two at 100 kW: XHCH Chihuahua and XHFA in Nogales. I would gladly accept any of the others further east if only I could get a local ID.

At 2243 on 2, fade-in something with no bug during ads (in Spanish!) including www.totalmovie.com, Kotex

At 2245 on 2, another peak snow-free, during movie? Letterboxed

At 2248 on 2, net-13 novela, but not snow-free

At 2251 on 2, snow-free novela runs past 2300; but seems same station at 2302 now into YL talk show, `Cosas de Vida`, i.e. net-13, photoed:
<http://www.w4uvh.net/az13on2b.jpg>

At 2348 on 2, quick fade-in to snow-free, graphic says FAKE CALL; then see TELEACTIVA bug in UR, so now it's really Monterrey, XEFB-TV; video only

At 2353 on 2, old musical movie in B&W, since I can see TELEACTIVA bug in UR with red background, photoed:
<http://www.w4uvh.net/xefb.jpg>

At 2358, MUF is finally exceeding 60 MHz with algo weak on 3 and 4

At 2359 on 3, net-5 bug LR, studio sitcom, kids one with paper bag on head; probably XEZ

UT June 18:

At 0013 on 2, now heavy CCI but TELEACTIVA still dominant

At 0018 on 4, Azteca 13 still with `Cosas de Vida` talkshow previously seen on 2, and still at 0031. Of the ten 13s-on-4, eight of which are full-power, most likely would be XHWX in Monterrey NL, considering I am definitely getting Monterrey on 2

At 0032 on 2, news anchor? With italic-caps XEFE call letter bug in UR, from Nuevo Laredo, Tamaulipas, as illustrated along with many others at <http://tvdxtips.com/mexlogosch2.html>

At 0050 all that is left is weak CCI on 2, out by 0100

Another opening in the morning:

At 1405 on 2, sudden-fade in, news on Azteca net-7, probably XHTAU Tampico; soon gone

At 1428 on 2, talking head (but no audio) with label in LL, SORTEO TEC (?)

Sporadic E opening ramping up at tune-in 1440 UT June 19:

1440 on 2, algo with antenna south, but language not clear yet

1455 on 2, Spanish, studio discussion in and out; no bugs visible; 1457 mentions Mazatlán, and signal improves rotating toward SW; CCI

1504 on 2, crime news about a state, Ixtapa mentioned, which is in Guerrero

1507 on 3, f bug in LR = Foro TV from net-4, and Grupo Pacifico bug in UR, italic 3 in an oval, i.e. XHQ, Culiacán, Sinaloa

1507 on 4, toons from net-5, bug LR

1516 on 4, net-2 bug UR, costume show; clock 10:16 in LL. Probably XHBS-TV Los Mochis, Sinaloa [but with CDT instead of MDT? see below]

1537 on 4, net-2 again, photoed but bug may not show up

1541 on 5, net-5 toons, CCI from my cable leak; opening intensifies

1542 on 3, XHQ mostly clear and weak while 2 and 4 have stronger signals and CCI

1543 on 6, video starting to show here.

1558 on 4, more attempts at photoing with net 2 bug.

1609 on 4, previous signal of net-2 transfers to an infomercial about cicatrices (scars)

1609 on 5, net-5 toon, very good but video only, MUF not up to audio

1609 on 4, Televisa net-2 is back, talk show in studio; several fotos around 1616 UT with clock 11:16 in LL, and star bug in UR:

<http://www.w4uvh.net/tv2on4a.jpg>

<http://www.w4uvh.net/tv2on4b.jpg>

<http://www.w4uvh.net/tv2on4c.jpg>

<http://www.w4uvh.net/tv2on4d.jpg>

<http://www.w4uvh.net/tv2on4e.jpg>

<http://www.w4uvh.net/tv2on4f.jpg>

I thought it would be XHBS-TV, Los Mochis, Sinaloa, but local time there (MDT) is an hour earlier. Could still be XHBS with the wrong time clock relayed from the DF? A few other 2s-on-4 but

not from probable target area, such as XHD-TV in Tampico. Soon faded out

1658 on 2, still CCI up to here as opening fitfully continues

1705 on 2, title DEJA QUE TE CUENTE [Let me tell you --- gossip show?]

1728 on 2, Gala TV swirl bug in LR, within a square, but bug comes and goes replaced by illegible texts, during cooking show, apparently. Per W9WI.com, the only Televisa 9 on channel 2 is: Hermosillo SO XHHMA-TV 30000 ZH 29-04-29N 110-57-35W XLIC S:Televisa 9

but the usual advertence that it could still be some other Televisa local station relaying net-9 part-time.

1736 on 2, still Gala, now with soccer clips, then to anchors in studio with label behind them on set as Univision Deportes, i.e. the US net, apparently still with close ties to Televisa. Hermosillo fits as the opening is moving westward as follows:

1808 on 5, Azteca 13 making zero CCI with my cable leak of KOCO, gains when I rotate WSW, typical of XHAQ Mexicali BCN

1808 on 3, Mexicali ads, certainly XHBC, so both still analog

1808 on 6, algo as MUF ascends, soon at 1810 visibly net-5 with toons, perhaps Woody Woodpecker & Foghorn Leghorn (did they ever co-star?). Surely what has become of former English/San Diego station XETV Tijuana, which still hasn't turned off channel 6 analog.

Now trying FM but no DX heard in the few semi-open lower frequencies here. Opening dies even from TV by 1824, conveniently as I need to concentrate on producing World of Radio 1674.

2221 on 2, with WOR completed, CCI is starting to fade in again, this time Es peaking south

2222 on 5, zero-CCI video with local leak, again at 2244

2223 on 3, some Spanish audio, not much video

2320 on 2, +v bug in UR, i.e. Más Visión, i.e. XEWO-TV Guadalajara, in and out spotted again at 2349, 2359, and weak CCI most of the next hour.

Another opening in progress June 20 at 1425 tune-in on 2, algo;

1427 on 2, fade in enough to see f bug in LR = foro TV net-4 newscast; and TELEACTIVA in UR, i.e. XEFB-TV Monterrey NL; soon out

1456 on 2, another fade-in, studio show discussing weight loss, MTY bug in UR, so XHCNL Saltillo, Coahuila; see photo:

<http://www.w4uvh.net/xhcnl.jpg>

also with 27 degrees 9:57 in LR

1459 audibly mentions Monterrey, which it is relaying from ch 34

1537 on 2, another brief fade-in seeming political talk, no bugs seen

1628 on 2, another brief video fade-in of algo (Glenn Hauser, Enid OK, DX LISTENING DIGEST)

** MEXICO. Keeping an eye on channel A2 for sporadic E, but nothing noted since 1630 UT June 20, until:

0032 UT June 21, weak fade-in of algo, antenna south but too little to be certain it's not Canada, and no audio

0038 on 2, another brief fade-in, background design looks Mexican. That's it for today.

Yes, many of my Mexican TV DX logs are unidentified as to specific station source, but it makes more sense to me to keep these logs in one sequence by time, rather than trying to sort out what's identified or not.

Big sporadic-E opening on 6m per maps across eastern USA, June 23 at 1430 UT but nothing visible on analog VHF TV until:

1509 on 2, fade-in with fútbol, México vs Japón --- but not live from Japan as it's after midnite, and rather early in the day for Mexico; can't find a full game listed on any Mexican network in TV Guide, so maybe clip, as faded out quickly. This game actually occurred Saturday at 1900 UT, part of the last-biweek-of-June Copa Confederaciones series, apparently played in Brazil. Seems to peak from south

1534 on 2, another fade-in mixture but including fútbol

1535 on 2, graphic shows Tamaulipas, likely XHTAU Tampico

1536 on 2, ad for Instituto Británico de Monterrey, i.e. XEFB, then Despierta Monterrey, show?

1542 on 2, glimpse of Bob El Esponja, i.e. Televisa net-5

1543 on 2, Azteca net-7 bug UR, 27 degree temp below it, likely XHTAU Tampico

1550 on 3, MUF is poking up here now, Spanish audio.

Opening continues in and out. Later becomes the best of the year, so far for me; see also NICARAGUA, and U S A.

1609 on 2, Mérida ad, so XHY-TV

1610 on 2, CCI to XHY-TV with Azteca-13 logo

1632 on 2, MTY bug in UR on talk show, so XHCNL Saltillo, Coahuila; also shows in LR: 27 degrees and 11:33 clock

1700 on 2, audio says Monterrey televisión and later Televisa, so not clear if XEFB itself or the ch 34 relay XHCNL in Saltillo, as both are Televisa

I was out for a couple hours, but nothing happening when I got back. BTW, as with most TVDXing now, I am using two sets at once, one color, one B&W, split feed from same C-490 antenna, starting aiming SSW:

2104 on 2, fade-in with Spanish graphic, 275 MILLONES

2114 on 2, fade in just barely audio in Spanish

2138 on 2, CCI is strengthening

2154 on 2, U bug for UNIVISION: see U S A

2215 on 2, PAN political ad on audio, so this has to be from Mexico; then promos for several programs, audio copied, including `Las Noticias Revelan` at 7 pm lunes a viernes. This title is too generic for any useful search hits, but does anyone recognize it? Soon followed by mentions of Dia de los Padres; see NICARAGUA

2225 on 2, SIPSE promo during program about Mexican earthquakes. SIPSE means XHY-TV and that also matches its webstream which also shows the Gala TV swirl bug in UR = Televisa net-9, which is one of several program sources for XHY

2229 on 5, movie about wrestling (judging from reaction shots etc., a produced drama, not a lucha libre match per se); too much QRM, but unrecognized large circular bug in UR, smaller circle in LR; XHAJ as in logs below. (It's not hard to mix up the RF channels and the net numbers with two sets going at once, but I think I have this right.)

2229 on 4, movie in English with subtitles, Televisa net-5 bug UR

2235 on 2, same wrestling movie as earlier on 5, so XHFM Veracruz

2237 on 4, ads/promos mentioning Huasteca, Viva el Son, Jalapa, Veracruz, then full screen TV MAS, i.e. XHGV Las Lajas

2238 on 4, promo for DX = Deportes Extremos ! en TV MAS!

2238 on 3, tv3 promo, logo of XHP-TV Puebla. Strangely, most of the time during this opening there was little to see on channel 3

2239 on 2, Veracruz promo/ad, so XHFM-TV

2242 on 5, TeleVer 30 años promo, i.e. XHAJ-TV Las Lajas, Veracruz

2247 on 5, wrestling movie as in 2229 log, i.e. XHAJ; now I can make out TeleVer bug in UR; see 2251 below

2248 on 4, Veracruz news promo, Más Noticias, so XHGV again

Now there is heavy CCI on all channels 2-5, not yet 6.

2249 on 6, some video now showing, with beat bars about 15 kHz, i.e. off-offset rather than 0, 10

or 20. About time to try FM

2251 on 5, the TeleVer bug is visible in UR, fancy script V with a crossed t on the right leg. Attempted three photos, one of which is somewhat legible but blurry:

<http://www.w4uvh.net/xhaj.jpg>

better visible at the bottom

of <http://tvdxtips.com/mexlogosch5.html>

2303 on 5, Televisa net-5 bug in LR; could be XHGC flagship itself

UT June 24:

0050 on 2, Azteca net-7 with animation; XHTAU Tampico always prime suspect

0052 on 6, Azteca net-13 with game show, video only. W9WI.com has eight hi-powers and two lo-powers

0123, only weak CCI remains on channels 2-5, until:

0148 on 4, TV MAS on full screen, i.e. XHGV Las Lajas, Veracruz, as in earlier 2237 log; soon in and out

0154 on 88.1, brief fade-in of béisbol discussion, ``las grandes ligas``. And that's it for this DX opening lasting some 5 hours. {And it took almost as long the next day for me to research and compile this report.}

1540 on 2, fade-in Spanish with antenna SSW, back out quickly

1556 on 2, fade-in Televisa net-2 star bug in UR; 10:56 clock in LL, with large circle bug, for show? Then CCI, and occasional quick snatches of video on 2 during following hour, nothing more

(Glenn Hauser, Enid OK, DX LISTENING DIGEST)

** NICARAGUA. I can at least tentatively log this country in TVDX, a long sought double-hopper, which are extremely rare here, nothing definite since I got Venezuela sesquidecades ago.

June 23 at 2215 UT, I was also getting MEXICO, q.v. on channel 2, since there was a PAN political commercial, and just a few minutes earlier Univisión on 2, almost certainly WUVF-LP in Naples FL, see USA. But now the audio is mentioning ``Dia de los Padres``, i.e. Fathers` Day, which was last week = third Sunday, June 16 in the USA and in most of Latin America (except Cuba where it is nowhen) --- and EXCEPT, per Wikipedia, in Nicaragua, where it is always on June 23 (regardless of day of week)! This is my best clue, unless for some reason they were talking about FD somewhere else a week after it.

Ch 2 in Managua is <http://www.canal2.com.ni> Homepage has no link to program schedules, but searching further, we find a webcast schedule and a completely different broadcast schedule. The latter shows Sundays at 4-4:30 pm is `Cuello Blanco`, which is presumably the originally English crime drama from

USA Net, `White Collar`. Well, that does not fit. This seemed to be a talk show, not a drama, but maybe last week`s episode is delayed until this week in Nic and was themed on Fathers` Day?

Not on the webcast, but on the broadcast schedule of canal 2,

http://www.canal2.com.ni/Programas/Parrilla_Programacion.htm#

I see some Univisión programming, which casts doubt on my log a few minutes earlier presumed to be WUVF-LP in Naples FL. (But I`d be happy with either, if not both!)

Central & South American double-hop TV DX is difficultized here by the fact that Mexico is in the way, notably Mérida, Yucatán, XHY-TV on channel 2. Managua is within one or two degrees of exactly the same direxion, as are Belice, Tegucigalpa, San José, and for that matter, Guayaquil and Lima! Plus Guatemala and San Salvador are not far off either. This practically guarantees that if any of those manage to double-hop in, they will also suffer QRM from XHY or other Mexicans. Managua to Enid is 1828 miles = 2941 km (Glenn Hauser, OK, DX LISTENING DIGEST)

** OKLAHOMA. RF 31 & 32, KXOK-LD Enid, as of 1445 UT June 21 is again broadcasting black and silence on 31.2 Mundo Fox and 31.3 Azteca, whose PSIP labels still appear, while own programming of Retro network remains unimpeded on 31.1 (Glenn Hauser, OK, DX LISTENING DIGEST)

** U S A. Already getting MEXICO, q.v., but June 23 at 2154 UT on channel 2 analog, bug in LR is the U of Univisión, a US network, so much so that they forget the accent and don`t care if it`s pronounced as if English. I had also been glimpsing it the past several minutes, but now I am sure of it. However, not // the national Univision satellite feed we get in Enid on Cable 61. W9WI.com shows the only U on 2 is: WUVF-LP, 3 kW ERP in Naples FL, which many others have DXed, one of the last few analog channel 2 stations on the air in the US. (Do they plan to, or do they ever have to go DTV?) Signal holds up far enough eastward not to be Mexico, and certainly weak enough to be 3 kW. It`s no WPBT Miami, which used to be common, but I`ll take it!

FL certainly an active area as with FM DX from there later, tho a nagging doubt remains that it might have been a Mexican which was somehow simulcasting Univisión, but I would still not expect the U bug to be prominent or even visiblized.

2212, title in LL is S y P, and I think I hear them say ``Sangre y Pimienta, regresamos``, but probably really ``Sal y Pimienta`` (salt & pepper) which is a UNI program tho not at this time on the net schedules I find. Within the next few minutes I am also getting on 2 a definite Mexican, XHY-TV in Mérida, and I hope NICARAGUA, q.v. But Managua could also be carrying some Univisión (Glenn Hauser, OK, DX LISTENING DIGEST)

** MEXICO. A small Es opening no higher than channel 2, UT June 25:

0207 on 2, sitcom or studio game show, spotting italic 2 in oval bug UR, which is Grupo Pacifico logo, meaning it's one of the two XHI-TV's, in Los Mochis, Sinaloa or Ciudad Obregón, Sonora. Gala TV swirl bug is also there in LR corner

0215 on 2, Gala TV promos

0223 on 2, program title in LR: La Hora Pico; cast includes short Indian woman with braids, typical stereotype the Mexicans have no problem with

0237 on 2, another fade in, Gala bug in LR, but now there is no 2 bug in UR

0238 on 2, a lucky glimpse of a white text super ID for a second or two in the UR corner, including the word HERMOSILLO. Therefore in the meantime the skip has shifted from XHI/XHI to XHMMA-TV, 30 kW which is a fulltime Televisa-9 affiliate, unlike the XHIs

0245 on 2, CCI in and out, lasts a few minutes past 0300 fade out

Little spurts of sporadic E, UT June 26 at 0120 UT, more video on ch 4 than 2 or 3, with antenna SSW. Lots of Es on the 6m map across the USA, q.v.

Same frustrating situation on channel 2, June 26, bits at 1508, 1518, 1530 UT.

1532 UT on 3, Televisa net-5 toon fades in, most likely XEZ-TV.

1543 UT on 2, signals surge with more CCI, between Televisa net-5 with toon, 5 bug LR well inside the corner (audio out of synch with ch 3 which is a couple words behind), and also on ch 2, Televisa net-2 with star bug UR;

1548 UT on 4, MUF up to here with Spanish ad V & A for té con jugo; more to come?

1601 on 4, Televisa net-5 with toon

1602 on 3, net-5 with toon, better than on 4; XEZ?

1602 on 4, video shifts to another station than net-5

1621 on 4, net-5 toon fades in again; oval 5 bug in LR at edge

1629 on 4, now it's Televisa net-4, with the f bug in LR, and large legend behind anchor on set: MATUTINO EXPRESS, must be newscast

1631 on 4, seems same station with graphic PARALELO 23, which is roughly the middle of México from Mazatlán to Zacatecas to San Luís Potosí. Aguascalientes is closer to the 22nd parallel ---

1644 on 4, PSA from Instituto Estatal Electoral de -- - Aguascalientes, urging people to vote on July 7. Always pay attention to such PSAs on TV and radio, especially when an election is impending. It may be just a generic federal IFE PSA, but it could also nail down the state you are DXing. W9WI.com shows only one full-power channel 4 in the small state of Ags: XHJCM-TV, 15 kW on the Azteca-13

network. There is also a [very] low-power listed as 0 kW in Calvillo, Ags., XHCLA-TV, independent. One new definite ID per opening is doing well with Mexican TVDX full of little or no specific IDs!

1649 on 4, female makeup tips with Azteca net-13 bug UR, probably as above. Program title in LL is VENGA ALEGRIA with clock 11:50

1657 on 4, cooking show with Televisa net-2 star bug UR and clock

1703 on 2, talk show amid CCI, +v bug in UR = XEWO-TV Mas TV, Guadalajara

1711 on 2, still +v bug in UR, but now I see another bug in LR: U for Univisión! Program title in LL is Gf in script, which it soon becomes obvious from further grafix stands for `El Gordo y la Flaca` --- the fat guy and the skinny gal, and indeed the cohosts exhibit such morphic characteristic. Photo at 1714 showing all three bugs will be at <http://www.w4uvh.net/xewoU.jpg>

Thus, previous assumptions about the U bug NOT appearing on Mexican TV, but presumed from Naples FL, or even Nicaragua, are inoperative! I still could have captured either or both, but also could have been XEWO or any other Televisa local station hooked up with Univisión too.

1747 on 5, now MUF up to here with some CCI; and heavy CCI on 2, 3, 4; dominant on 2 continues to be +v, XEWO-TV

1757 on 2, Azteca net-7 bug UR, talk show, probably XHTAU Tampico

1802 on 2, +v, XEWO-TV still mostly atop the QRM

1810 on 4, mostly audio, Gala TV promos = Televisa net-9

1811 on 5, video is strengthening

1816 on 5, evil penguins toon (what is the name of this in English and Spanish, anyway?), Televisa net-5 bug in LR

1820 on 6, MUF pokes up to 6 video with same as 5, toon from net-5. Much of the time I also have an ear on 88.1, but no FM DX makes it

1848 on 4, Canal 5 promos, ads for HSBC, FIFA; now the net-5 bug is in UR, back to toon

1850 on 6, algo with weak video

1850 on 2, now a fútbol game is starting, from Azteca net-7, Uruguay vs Brasil; must be the Confederation Cup series again. I see it is also live on Univisión in the USA

1853 on 4, SAME fútbol game video, but different audio, and this has Televisa net-5 bug. Opening ceremony includes brief speech (prayer?) by a player in Portuguese, and even a stadium announcement in English. Uruguayan national anthem plays, very nice, apparently direct feed rather than picking up from PA.

This could be really confusing with both major competing Mex nets broadcasting the same live game: you'd think there would be an exclusivity deal

1917, opening is fading down, just weak CCI on 2, and I take a break

2029, CCI on 2-5; 4 has Televisa net-4 f bug in LR; 2 still in game

Henceforth I am recording WORLD OF RADIO 1675, but with one DX monitor on to see it is still going. I don't think I missed much as it's mostly CCI rather than identifiable individual stations by now

The game is over by about 2100, at least for Univisión. Somebody won

UT June 27:

0005 on 3, Televisa net-5 sitcom, as opening is about gone
(Glenn Hauser, Enid OK, DX LISTENING DIGEST)

June 27 at 1428, ch 2 fades in with net-7, presumably XHTAU Tampico with morning relay of Monterrey; 1506 a bit of algo on 4, but save details of this opening for next report (gh)

** U S A. Ch A2, June 26 at 0122 UT, with lots of Es on the USA 6-meter maps, it looks like the MUF would most favor something from the NNW, so that's where I aim and sit on channel 2 DTV. Now plus a few minutes onward, I do get a 'bad' yellow signal bar from time to time, but never breaks into decode or PSIP ID. Most likely it's KOTA ``3`` on RF2 from Rapid City SD, the only full-power station in that area; altho a bit close for frequent Es, I did see it many times in the analog era.

I have had very little luck with Es DTV DX --- not enough gain on the antenna and/or Zenith box, I guess, along with not being well-positioned geographically. E.g. KNOP-2 in NE is too close. I had that a few times by tropo in analog
(Glenn Hauser, OK, DX LISTENING DIGEST)

** MEXICO. More sporadic E analog TV DX, June 27, UT:

1428 on 2, fade-in Azteca net-7 news grafix, at first video only

1434 on 2, full-screen INFO on one line, 7 below it; quite steady but weak; 1439 some audio begins to appear as MUF inches up by 4.5 MHz

1445 on 2, interview about Los Tigres de Monterrey. If still Azteca—7, no doubt XHTAU Tampico, which in the mornings relays Monterrey studio rather than México DF, per Oglethorpe; although Monterrey has own ch 2 station and another Regiomontanan on 34 is relayed on 2 in Saltillo, all of which have been frequently seen here

1506 on 4, Televisa net-5 with bugs, in and out

1519 on 2, Televisa net-2 star bug in UR; and large circle bug in LL: I think that is for the Hoy (Today)

show

1550 on 2, CCI between net-2 bug UR, and Televisa net-4 with f bug in LR; XHY?

1559 on 2, Televisa net-5 bug in LR with toon, CCI

Opening peters out afterwards.

Bits of sporadic E occasionally poke MUF up to 55 MHz, with some video briefly on NTSC channel A2, with antenna south: June 29 at 2043 UT, fade-in enough easily to recognize the +v Mas Visión bug in the UR, i.e. XEWO-TV, Guadalajara; fades right back out, and again JBV at 2059; unID video bits continued next bihour a few times;

2301 UT on A2, fade-in a drama with Azteca net-7 bug easily spotted very briefly in UR, probably XHTAU, Tampico; nothing more.

Sporadic E analog TV DX June 30, UT:
1455 on 2, fade-in of Televisa net-5 bug LR, with Bob el Esponja, and fade right back out. Had been watching snow for almost an hour; another glimpse of same at 1500, this time with audio too. Here we go? Still in & out weakly at 1507.

1543 on 2, Azteca net-7 bug, stronger than some other CCI

1602 on 2, Azteca-7 in UR, with animation

1630 on 2, weak signal but now visibly soccer

1649 on 3, fade-in US sitcom, Spanish ads, video only; soon fade out along with ch 2

1715 on 2, fade-in algo

1720 on 2, ad in Spanish, video and audio

1730 on 2, animation, net-7 bug UR

1802 on 2, large font program title includes ISRAEL

1805 on 2, interview, fade-in enough to make out TeleVer bug UR: XHFM, Veracruz

1822 on 2, still same; interviewer has big boxy sign on his hand mike, unseems legend TeleVer on it, what?

1912 on 2, soccer and CCI, weak; nothing further
(Glenn Hauser, OK, DX LISTENING DIGEST)

UNIDENTIFIED. 55.25 MHz, July 3 at 2343, NTSC video fades in weakly for less than a minute, with antenna south. Probably Mexico ch A2 trying to reach here by sporadic E (Glenn Hauser, OK, DX LISTENING DIGEST)

** CANADA. 6-meter Es maps show activity to the northeast of here the morning of July 5, so I aim that way and monitor channel A2. At 1600 UT, in fades a signal with large graphics, NEWS NOON FROM GLOBAL TORONTO, and out in less than a minute. May we assume this would not also be carried in Manitoba at 11 am local? In that case it has to be CIII-TV-2, 100 kW in Bancroft, Ont., per Bill Hepburn's ch 2 map

and W9WI.com {Distance: 1204 miles = 1937 km, city to city}. I wonder what has become of the two CTV 100 kW in Ontario, Warton and SS Marie --- are they still on and in analog? (Glenn Hauser, OK, DX LISTENING DIGEST)

** MEXICO. Sporadic E opening in progress at tune-in July 8, with antenna south on NTSC channel A2, UT:

1413, Spanish audio; 1416 CCI, then peak of one signal with Elecciones 2013 full-screen graphics, returns for yesterday in Tamaulipas, then Coahuila and Chihuahua. This is during INFO 7 news show with Azteca net-7 bug in LR along with 9:18 clock and 24 degrees at 1418. So it's XHTAU in Tampico

1420, fade to another ch 2, with MATUTINO EXPRESS on set, f-bug (Televisa net-4) in LR, TELEACTIVA in UR, i.e. XEFB-TV Monterrey NL

1421, mentions Azteca Nordeste, and ``siete 7`` promo, i.e. this subnetwork:

1422, XHTAU dominates. Large INFO 7 in middle of set/screen between W & M anchorette (stage left) & anchor. Also reads info7.mx below it. Peaks snow-free for a bit. Headlines at screenbottom but not crawling, rather flipping vertically. Full story about vacationers having problems(?) or overloading the Monterrey bus station, as this morning cast originates in Monterrey tho relayed from Tampico. 1427 it's quite dominant, then fades in and out.

At 1444 I start to hear English on channel 2 so rotate to CANADA, q.v., maybe missing more from Mexico. (XHRIO in Matamoros switched from Fox in English to MundoFox in Spanish some time ago. So how do you see Fox in the RGV?) (Glenn Hauser, OK, DX LISTENING DIGEST)

** CANADA. After first getting XHTAU and XEFB on channel A2, July 8 at 1444 UT I hear some English while the antenna is still aimed southward:

1444, with 1-800 number, .ca website; so rotate to find video peak from north, YL gospel huxter is quoting Chuck Colson

1455, studio talkshow continues, in and out. Seems to be a bug in UR I cannot make out

1457, fade-in to show along with the hosts, ``866-273-4444 toll-free prayerline``. Also a large 100 in the LL along with some small lettering I can't make out

1458, outro show from `Crossroads`, Brampton Ont, and Niagara Falls NY addresses

1459, Global Evening News at Six promo

1500, SHAW bug in LR, other bugs in UL and LL. Now show is `The Doctors`, medical advice

Weak signal continues in & out following hour.

1600, now a cooking show, good at 1605

The Ontario network stations would all be

in noon news now. At first I thought I had CIII-TV-2, Bancroft Ont., a Global station, but its EDT programming is one hour of real time ahead of what I am getting which matches TV Guide CDT listings for Winnipeg, i.e. CKND-TV-2 Minnedosa, Manitoba:

9:30 am [1430 UT] 100 Huntley Street
10:00 am [1500 UT] The Doctors
11:00 am [1600 UT] Chef at Home
Crossroads Christian Communications produces
100 Huntley Street

1616, brief surge mentions ``a Manitoba website``

Now the 6m map shows Es all over the USA, but not a bit into Canada, and only one little line into Chihuahua; rotating, no Mexican TV now, so back to north

1624, ad for a Manitoba golf club, atop CCI from ? But Global keeps dominating, 1625, chef show about Louisiana cuisine

1630, into real estate show, `The Unsellables`, so still CKND-TV-2.

1643, another good peak, Manitoba Stampede ad; 1645 recycle cans at Winnipeg Blue Bombers games

During this opening, the MUF has never gone above channel 2, ALL THE ABOVE, until:

1644 on 4, some video starts to show, bits of English;

1648 on 4, ad for chilltowin.com; 1649 promo for `So You Think You Can Dance`; back to `e-talk` show as scheduled for CTV Winnipeg; 1652 snow-free. This must be CHYB-TV, 100 kW in Brandon MB.

1700 on 4, CTV news about Manitoba, somepol steps down from cabinet

1700 on 2, not news but `Design, Inc.` show as sked on Global Winnipeg

MUF pokes into FM band: see separate log

1733 on 2, still in, interview singer, `Entertainment Tonight` [sic]

1745 on 2, still in but about to disappear

(Glenn Hauser, Enid OK, DX LISTENING DIGEST)

** CANADA. July 10 from 0000 UT, 6m maps indicate most likely lowband sporadic E TV DX would develop from west, so aim that way for Mexicali, but nothing ever shows. 0115 UT start rotating other directions, and find English is in from the NE on channel A2 NTSC; at 0120 it's obviously `So You Think You Can Dance`, with a Fox bug in the LR, good at peaks --- but surely not a US lowpower station.

It's // KOKH-24 OKC but not synched via cable. There I can make out next to the Fox bug is tiny SYTYCD. 0126 on 2, different ads than on the US network, including at 0128 a large SAULT on the

screen and ``Sainte-Marie`` on the speaker in a hospital ad; 0130 CTV promo, 0135 fading, another brief inbit around 0143, then gone. So answering my question of a few days ago, yes, 100 kW CHBX-TV in SSM is still on their in analog. I've been getting this one since the '60s when it was CJIC-TV, probably a CBC affiliate then.

But network ID would not be enough, as there's another Ontario 2 CTV uncomfortably close in Wiarton, 198 miles away across Lake Huron, CKCO-TV-2, presumably on the air too --- it was and probably still is the one with off-frequency video making strange CCI as previously noted, but not this time. The pair must produce quite a mess overwater between them or around Georgian Bay (Glenn Hauser, OK, WORLD OF RADIO 1677, DX LISTENING DIGEST)

** CANADA. Channel A2 NTSC, July 11 at 1908 UT tune-in, `Dr. Phil`, some CCI; 1910 CTV logo, ``a Division of Bell Media``. Matches TV Guide cable listings for Sault Ste-Marie and Wiarton Ont, at 3 pm EDT weekdays, but probably CHBX again from the former; yet to be absolutely confirmed that CKCO-TV-2 in Wiarton is still on the analog air. There may have been a lot more sporadic-E earlier and/or later this afternoon, but did not have time to stay with it. A few chex of FM unproductive (Glenn Hauser, OK, DX LISTENING DIGEST)

** MEXICO. Channel A2 NTSC, July 11 at 2359 UT, a bit of a novela in Spanish peaking from the southwest; nothing further (Glenn Hauser, OK, DX LISTENING DIGEST)

** MEXICO. Sporadic E opening bringing in analog TVDX, July 12, all times UT:

2110 on 2, tune-in, Spanish in progress, something about NASA; antenna aimed south, but peaking more to SW; also algo on 4

2115 on 2, ad in Spanish but including English wording about cancer risk; 6m map shows all the Es is across the eastern USA only

2304 on 2, fade-in animation, letterboxed

2323 on 2, novela, Televisa net-2 star bug in UR; - 2330 closing credit says `La Rosa de Guadalupe`, into another novela

2355 on 2, Gala-TV swirl bug in LR = Televisa net-9; mostly no audio with MUF below 59.75 MHz

UT July 13:

0000 on 2, Azteca net-7 animated logo; 0002, net-7 bug in UR during lucha libre --- or not? No masks, so maybe just plain pro wrestling. 0009 one of the goons brings a big stepladder into the ring

0036 on 5, algo making zero CCI with my persistent cable leakage

-- a break for usual SW monitoring session circa 0100 UT on the porch

0224, resuming TV DX monitoring, now with heavy CCI on 2 and 3, in Spanish, also something on 4

0226 on 4, audio says ``cada familia en Cuba``, but probably just something from Mexico; quick rotation to SE does not improve it. Cuba TVDX is very rare here, tho Habana is only 1300+ miles away

0227 on 3, wrestling, but this time from Televisa net-5 per bug in UR; play-by-play by two Spanish commentators, but arena announcements in English. Turns out to be:

0240 on 2, wrestling Spanish voice-over audio // 3 but a reverb apart; it's WWE including interview with distraught woman, from Baltimore

0252 on 3, just missed supered ID flashing UR in small font; canal 5 promos

0300 on 6, signs of video as MUF peaks; 0302 maybe it's the Azteca 13 bug in UR

0323 on 3, drama with tv3 bug in UR = XHP Puebla; fade out by 0340 (Glenn Hauser, OK, DX LISTENING DIGEST)

** MEXICO. Some complain that this has been a very poor sporadic-E season, but I keep getting Mexico at least on lower TV channels. Another opening in progress when I turn on and tune in July 14:

1411 on 2, Azteca net-7

1411 on 3, algo audio in Spanish

1453 on 3, animation from Televisa net-5 bug in LR

1456 on 2, animation from Azteca net-7 bug in UR

1533 on 4, fade/in live axion, Televisa net-5 bug in LR

1542 on 4, now it's animation, no bug seen

1600 onwards, mostly heavy CCI on 2

1614 on 4, fade-in to snow free, program promo for `últimos días`; audio says ``en el sur del estado de Sonora``, and does peak toward southwest. Presumably XHHSS, Hermosillo, which is with Azteca-13

1615 on 6, also video starts to show, CCI

1616 on 4, snow-free, Azteca-13 bug UR in feature about mountainboarding, then back to studio variety, program bug LL: ``Venga el Domingo``

1622 on 6, discussion with a priest-collared person, CCI

1625 on 2, heavy CCI, one is YL discussion with bug in UR showing 10:24 clock [=MDT], below CANAL, below 22(?) maybe temp.

1627 on 2, CCI from a blender infomercial in Spanish

1629 on 6, promo for Béisbol al Día at 21:30; CCI. Later found that is a Telemex program; note the complicated logo, circle with jagged rectangles

coming out of it:

<http://www.telemax.com.mx/index.html>

or here where Danny says it's educational:

<http://tvdxtips.com/mexlogosch6.html>

Several of the other channels 6 around the country are educational

1629 on 3, nothing here, but strong CCI on 2-4-5-6

1630 on 6, Telemax on full-screen, "el canal de la familia" audio, long list of program times; 1632 mentions Hermosillo, Sonora. Telemax is in fact XEWH-TV in Hermosillo, which I got some 50 years ago when it was low-powered, and I think, the only low-bander in that city

1634 on 5, studio discussion in Spanish, zero-CCI to my cable leak (Glenn Hauser, OK, DX LISTENING DIGEST)

1713, I turn the Zenith converter on to RF channel 4, and am rewarded by a "bad" DTV signal! Bill Hepburn's map shows there's one near Tucson, K04QP-D, and W9WI.com shows it licensed to Casas Adobes with 300 watts, but CP for 2 kW. I "will" the signal to surpass the threshold of decoding, but it never does in the remaining few minutes it's registering at all on the meter in orange. I don't count stations, so I can confidently say it was this one, since it correlated with KLTU reception, and everything fits. (And of course there are no full-power DTVs on 4 anywhere around there).

FCC further shows it's owned by KVOA, the original full-power inhabitant of channel 4 in Tucson --- guess they could not bear to give up ch 4 completely while the real KVOA is now on RF 23. W9WI.com says it is // to KVOA, which on 23 also has Cozi, whatever that is, on "4.2". FCC coverage map of K04QP-D shows over the entire city of Tucson as far as Marana and Catalina to the north, Green Valley to the south. I suppose in the city, remapping would get KVOA on either RF 4 or 23, or both without knowing really which it be. Can this be because from the main mountaintop transmitter site, there are DTV signal problems down in the city proper? (Glenn Hauser, OK, DX LISTENING DIGEST)

** MEXICO. Continuing Es TV DX opening on July 14 from previous report, and also after an excursion to USA/Arizona on FM and DTV, here only analog in UT:

1715 on 3, lucha libre starts to show; bug in LR is oval, maybe generic Televisa

1717 on 2, children's competition of some sort with large auditorium audience. Since it's educational, I suspect it's the Once network, which I thought I heard mentioned, but no match on 2 in NW Mexico.

1721 on 2, I glance at one screen just at the right moment to read a local ID supered in white for a few seconds at top center: XHPDT. That leads to Puerto Peñasco, Sonora, 18 kW, per W9WI.com, with Televisa net-2. A new one for me. Program turns out to match their schedule at 12-14 local, "VIII Olimpiada Mexicana de Geografía", evidently qualifiers for the big one in St. Petersburg,

sponsored by National Geographic. 1726 pause for promos including Televisa Deportes, lost after that.

1730 on 3, still lucha libre. Bug in UL includes AAA. This wrestling originates in León, Guanajuato and ring announcements are in Spanish, but some of the participants' names are in gringo. The way they jump around, could almost pass for gymnasts. "Triple-A" also mentioned audibly in Spanish.

1740 on 3, better view of the Televisa bug in LR says DEPORTES tinily below it; quite a bit of ghosting on this but not much QRM. This is looking more and more like XHBC Mexicali; it does peak further north/west than the others, and soon confirmed their online program schedule with "Lucha Libre" at 10-noon Sunday. Plus:

1741 on 5, Azteca net-13 fades in vs CCI from my cable leak. This also fits for the other Mexicali, XHAQ, both seen often before

1742 on 6, a bit of video showing, probably XETV Tijuana on net-5

1800+ everything fades out, the last to go, weak video on 3.

6m maps have been showing much more activity to the northeast, so I finally rotate to see if anything come in from CANADA: q.v. (Glenn Hauser, OK, DX LISTENING DIGEST)

** MEXICO. Just a quick update as to some Tijuana TV details, re: Glenn Hauser and some of his DX Listening Digest reports (all very interesting, by the way). Because Tijuana/Tecate is seen quite often here in Santa Barbara by tropo ducting, I can clarify that all Tijuana/Tecate analogs are still on as of this writing in mid July 2013. So far, no deadline has been kept for their turn-off.

And, not all Mexico station info is up to date. As to the two specific stations in question: Analog XHTJB-3 Tijuana (Once TV XEIPN-11 Mexico City network) is still on. It is on DTV on RF ch 46 "3." Analog XETV-6 Tijuana (XHGC-5 Mexico City network) is still on, but no longer with its long-standing English service. XETV's English service is now only on its DTV RF ch 23-1 "6-1." Its XHGC-5 DTV service is on RF ch 23-2 "6-2." I hope this helps. Best of DX, (Dennis Smith, Santa Bárbara CA, July 10, for August WTFDA VUD, via editor Nick Langan, DXLD)

** CANADA. After concentrating on TV and FM DX from Sonora, Arizona and BCN for several hours July 14, that finally fades and I turn my attention and my antenna toward the northeast, as 6m maps indicate lots of Es activity there:

1908 UT on 2, weakish signal with two sports anchors side by side, then I make out CBS bug in LR, and it's obviously golf, with banners on little poles, and indeed // not synchronized with KWTV-39 OKC, PGA. TV Guide for Ontario shows the Canadian network simulcasting this is Global so altho I did not make out a Global bug (often hard to see), I conclude this is the only analog Global-2 in Ont., CIII-TV-2 in Bancroft; it's peaking NE rather than N which would be the Manitoban. Bill

Hepburn's map shows CIII is Global, although W9WI.com network info is missing for many of the stations on ch 2. Soon fades out, no more TV/FM DX for a while (Glenn Hauser, OK, DX LISTENING DIGEST)

Danny Oglethorpe

Note # 1 Mike Perron has been watching the live streams in order to determine differences in the Los Mochis and Cd Obregon XHI-2s. His findings indicate: They do run different programs at times. Los Mochis has "XHI TV" below the "2" logo, while Obregon does not. However, Los Mochis does relay Obregon at times, so if you see a station without the calls, it could be either. Check the live streams and on-line schedules.

Robert Grant (N8NU)

Most of the DX in this report from Temperance, MI (Southeast corner of the state, grid square EN81fs) Sole UHF logging on Panasonic 50X1, CM3020 at 33'

E-skip loggings using YA-6260 in backyard @13', through Lance dual-output AB425 amplifier, to 12" Zenith B/W (analog pix), Yaesu VX-5R (analog audio and offset determination) and converter boxes (Philco TB100HH9 and Sansonic FT-300A) (DTV DX)

"(S~)" denotes the unique cyclical carrier Frequency of Televen's Coro channel 3 Transmitter, which sounds like a "Siren" When beating with a stable, normal Video carrier.

Like June, July has been better for FM than for TV. Echostar (dba Dish Network) is building a number of transmitters on RF channel 56, said to be for a future mobile TV venture. They do transmit one non-mobile ATSC stream – the “Dish” logo on white on a black background, with no audio. They do not have any virtual channel. This could cause confusion in the Detroit area, since the local PBS affiliate is virtual channel 56, and without any PSIP, WQJY997 defaults to (another) 56.1 on most sets.

On April 10, a tornado tore through Hazelwood; the worst of the damage was about a mile to the south of my QTH. I did sustain antenna damage; I was able to salvage my VHF Amateur Radio antennas and my FM antenna, but the Radio Shack VU-210XR I had used as my primary TV DX antenna since 1998 was totaled. I had used a VHF/UHF J-Pole antenna (engineered for Amateur Radio) for over a month until I took delivery of a Winegard HD8200U in mid-May. I put it up on May 18; it was broken in with an E-skip opening into Mexico on the morning of May 19, followed by tropo into southern Indiana, western Kentucky and middle Tennessee that same evening. In that E-skip opening, I logged a new Mexican state when I logged XHGV analog 4 from the state of Veracruz. During the evening tropo, I logged my 150th DTV station with the log of WNIN 9 (previously logged on channel 12 in 2008), followed by two from Nashville (WNPT 8, which I never had in analog, as well as WSMV 10, which floated under KMOV on 4 in the analog days) and WBKO 13 (which I logged only once during the analog era). The opening of May 28 brought Cuba

on channel 3...I also noticed an unidentified station transmitting audio tone and color bar test pattern through the Cuban (my guess is either another Cuban or Jamaica). The May 29 E-skip opening brought another new Canadian; this time, it was CKCO2 on analog 2 from Wiarton (northwest of Owen Sound). A community calendar mentioning Waterloo gave it away. During the analog days, I also logged CKCO3 on 42 from Sarnia. Two E-skip openings into Mexico were noted on June 2, noting a new Mexico City station in the morning opening, and a new one from Coahuila in the evening opening. After seeing the Solar Impulse plane land at the St. Louis airport in the wee hours of June 4, I added only my third Arkansas DTV with KAFT 9. An interesting use of a sub-channel came in this case; their fourth sub-channel is used as a reading service for the visually impaired. June 17 brought another new log from Veracruz in the form of XHFM 2; just a few hours later, the Central Illinois VHF digital stations and WCIA 48 were in at semi-local to local strength. The big surprise of the June 24 was WMWC 8; unlike with the other TBN affiliates, the station only has one channel instead of the five channels on the other stations (most notably WCLJ 42). The openings of June 27 and 28 allowed me to more than double my Kansas DTV count with 11 and 13 from Topeka as well as 7 out of Pittsburg. E-skip on July 3 allowed me a relog of WRGB 6; I also noted its second channel, carrying This TV. WACP 4 finally decoded on July 5, noting an infomercial for a beauty product. The E-skip opening on July 8 brought CFQC1 on channel 3; it's probably the only analog TV left in Saskatchewan after most of them went digital. Mexican analog TV stations were noted again on July 10. A tropo opening on July 11 brought in Louisville, as well as southern and western Indiana, followed by an E-skip opening into Manitoba, noting CKND2 at least once more before they flip to digital on channel 9. I also had a weak signal on channel 4 during the opening. Very few of these E-skip openings have had MUFs in the FM band; the one on May 19 peaked at 96.7 to Veracruz, while the one on July 5 reached 99.5 to the Mid-Atlantic States and the one on July 8 reached 93.3 to Saskatchewan. As of July 11, the analog totals are at 575, the digital totals at 159. 73.

Dennis Park Smith

3605 San Remo Dr
Santa Barbara, CA 93105-2523
Telephone (805) 687-7803
24-hour PDT

This report is for June 2013. Santa Barbara is of course next to the Pacific Ocean. Ocean water temp this month was a roller coaster—it started June at 64F, Jun 6 to 62, Jun 20 up to 69, Jun 28 to 66, and Jul 1 again up to 69F. Air temps were 70F to low 80s, except Jun 28-30 at 90F with inland temps away from coastline up to 110F. Fog/inversion layer seemed uneven most of the time. Except for Jun 1, tropo ducting was mediocre. So-Calif tropo to San Diego/Tijuana/Tecate up to 220 mi:

Jun 1 Good Hi-press, calm & warming

Jun 2 – 3	None	Higher air layer boundary
Jun 4 - 10	Very poor	
Jun 11	Poor +	Lower air layer boundary
Jun 12 - 20	Var. very poor/poor	Stable
Jun 21 - 22	Fair	Mild, stable
Jun 23 - 30+	Var. very poor/poor	Unsettled, then stable & <u>hot</u>

Jun 21 Es 1930-1936 PDT, ch 2 Spanish, no ID. This was the only skip noted.

Tijuana/Tecate, Baja Calif analog stations are ALL STILL ON with regular programming as of July 1 and continuing.

Best of DX to All Dennis

William Draeb

1304 Ellis St.
Kewaunee, WI 54216

It's been another rotten month for Es. I won't expect much more from July.

6/12 Tr

0825 WEAU-38 New channel

6/16 Es

1845 CKND-2 "Focus Manitoba", promo for Global Network. Also – unIDs on 2 & 3; CTV Net.

6/20 Tr

The opening of June 17-18 finally brought much-wanted WVIL 101.3; I was able to reduce the digital sideband from WXOS 101.1 enough to pull this signal through. Less than an hour later, I would pull in my 190th Illinois FM with a log of WKIO 107.9. I had to tune to 108 MHz to get around the digital sideband from KSLZ 107.7; this is the first time I've noted this from the new city of license of Arcola. WCRC 95.7's signal was strong enough to completely obliterate the digital sideband from WFUN 95.5; I didn't think to put it into my logbook before the opening. Later in the morning, I noted WQCY on its new frequency, 103.9. I first noted the call on 99.5 (now WCOY) at my present QTH back in 1993. KTCM 97.3 was also noted in Stereo, as well as KBEQ 104.3 (obliterating the digital sidebands from WHHL 104.1). The big surprise of the morning was pulling in a 250-watt translator from Kansas City; K279BI was noted relaying KCMO (AM) with local news. The June 23 opening not only brought E-skip from the Rio Grande Valley, but also tropo from Arkansas. The opening of June 24 brought another Illinois FM; WWCT 99.9 was noted by nulling out semi-local KFAV. The morning opening of June 27 brought my 60th FM from Iowa when I pulled in KRNF 89.7; the evening opening on the same day finally brought KWKJ 98.5 to my location, and even allowed me to null out local KPNT to hear KXXK 105.7. I also noted the new KLMZ 107.1 with rock music and Farmington ads; this is a rock station serving Farmington and Park Hills. Leadwood is located in western St. Francois County, near the Washington County line. The opening on June 28 allowed me to null another local to hear DX; in this case KBWX 104.9 ("Wild 104-9") was nulled to pull in WXCL. WBBE 97.9 was noted later in the morning for my 195th Illinois FM. In that same opening, I noted my 1,200th overall FM station since I started my current log in 1992 with KSYN 92.5; I pulled this one through the digital sideband from WIL 92.3. I noted this station via E-skip in Woodstock, GA nearly a quarter of a century ago. Another milestone was noted when I pulled in KJML 107.1 for my 30th FM from the Sunflower State. The E-skip opening was brief on July 3; the valley referred to in WZZO's ID is the Lehigh Valley in northeastern Pennsylvania. The July 5 E-skip opening reached the highest frequency of the season thus far: 99.5 MHz. WRRV and WGBU were battling each other on 92.7, while some of the Philly FM stations were in like locals; most notably WIP 94.1 (the AM on 610 kHz has also made it into my log from my present QTH). WPEN 97.5 was noted for the 10th FM station from the Garden State. WZRV 90.1 is my first North Carolina FM noted via E-skip; the other two have been noted by meteor scatter (WZKB 94.3 in November 1998) and tropo (WMIT 106.9 in June 2011). The July 8 E-skip opening brought CJHD 93.3 through WPBG for my 18th Saskatchewan FM. As of July 11, the FM logbook stands at 1,209. 73.

1757 XHRE	88.1	GN	Celaya, PSA for Mexican House of Reps, ID as "La Comadre, XHRE"
1800 XHZN	88.1	MC	Zamora, "Los Cuarenta" slogan, "88 punto uno," rock in EE
1808 XHRED	88.1	DF	Mexico City, "Red FM, 88.1," rock in EE, I've now reheard within a few minutes 75% of the Mexicans on this frequency, the other unheard is in Veracruz
1808 WJIS	88.1	FL	Bradenton, "The Joy FM" ID in passing about a mission trip, soon lost to XHRED override, but enough to ID by slogan search at the new WTFDA database
1820 WIKX	92.9	FL	Charlotte Harbor, bluegrass, old school, then "Kix Country"
1823 WBPC	95.1	FL	Ebro, ad for Thursday ladies night at Gracie Ray in historic St. Andrews (a bar and grill in Panama City FL)
1826 WMTX	100.7	FL	Tampa, country rock, partial RDS before fadedown MIX/TRAIN.
1832 WLTQ	92.1	FL	Venice, "92-1 TheCoast.com," RDS stuck with one word, MARS (song/performer?)(bet it's performer Bruno Mars-jz).
1833 WARO	94.5	FL	Naples, partial RDS shows / 94.5 THE / before lost to ACI, mainly KGLB-LP 94.3 Enid, only a few km away. WTFDA db shows of the three full-power 94.5s in FL, the only one with THE in slogan is WARO
1840 WDBO	96.5	FL	Orlando, full RDS: NEWS / TALK / WDBO / 96.5 --- this is also better on vertical than horizontal antenna
1843 unID	93.5	??	??, romantic Mexican music in SS, stereo, soon fade
1847XHRED	88.1	DF	Mexico City, "88 punto uno, Red FM," again
1849 unID	97.7	??	??, live DJ, "los clásicos de la caliente," CCI from another in SS, just "97 punto 7," 97.7 is a busy frequency in Mexico! Cantú has 18 stations, but the only "La Caliente" is XHSNP in San Luís Potosí SLP, 50 kW. And the only one with "97.7" as its sole "name" is XERC in México DF. I had figured I would be getting XHGL in Mérida, Yuc., which is now known as KISS FM
1856 XHPY	95.3	NR	Tepic, "en cuestiones de amor, Estéreo Vida," so now the opening has reached the Pacific coast
1903 WJXR	92.1	FL	MacClenny, local KAMG-LP is still off the air (good!!), a live drawing is coming up. Mentions Faith Jewelers; 0004 about fireworks, "Midnite Madness" is the drawing.

Seems to be in mono; at least the stereo icon never lites up. Searching on the welers plus the madness gets nowhere, but just midnight madness 92.1 goes right to <http://www.wjxr.com/spree.php>. Nightly shopping spree on this ``bargain channel.``

- 2007 XHYUC 92.9 YU Merida, RDS: XHYUC / VIAJERA / YUCATAN with classic crooner, old romantic music, ID heard ``Yucatán FM``
- 2013 XHMH 95.3 YU Merida, ``Candela, La Más Grande``, election PSA in Spanish and also in Maya!, Then ode to Yucatán sung in Spanish, actually a PSA from El Gobierno del Estado. // 970, and you may recall it was briefly relayed several years ago on SW 6105 before that transmitter crashed, for good?

7/5 Es

- 1953 WRNS 95.1 NC Kinston, ID by YL DJ as ``Your Country 95.1 WRNS``

7/7Es

- 1202 CJLR-3 88.1 SK Prince Albert, Canadian news, ``That`s MBC news,`` Prince Albert ad, ad for White Bear Lake golf course, lengthy weather for all over SK, including first-nation areas, ``95 dot 5, MBC`` ID, DJ is Dale Rothman(?), shtick about ``be a kid again day``, such, this station originates with CJLR-FM-6, 95.5 in North Battleford. MBC is the Missinipi Broadcasting Corp.

7/14 Es

- 1136 KREE 88.1 AZ Pirtleville, ranchera music, easily topping KWOU Woodward OK, ``musica fronteriza en Radio Bilingüe``
- 1156 KLTU 88.1 AZ Mammoth, ``K-Love,``full ID and praise music

MONITORING TIMES TO CLOSE

The following email from Monitoring Times founder Bob Grove was sent to us by Keith McGinnis. Both Monitoring Times and Grove Enterprises will close their doors in December. They will be missed.

After 33 years of publishing the most informative and lauded magazine on monitoring the radio spectrum, Judy and I are finally going to retire. We are grateful for the dedicated efforts of our fine staff of writers for the excellent work which has kept MT alive for all these years. While we know the discontinuation of MT, with our December issue, will be a disappointment to our readers and writers alike, we realize that a combination of a down-turned economy, as well as the ready availability of free listening and technical information on the Internet, has reduced sales and subscriptions throughout the market place. I would like to thank you personally for your knowledge, your dependability, and your professionalism in making MT the publication that is most often referred to in the radio monitoring hobby. It is a legacy that we have all inherited.

As of 7/26 we were unable to enter the Grove Enterprises website. The Monitoring Times website contained a short announcement at the top of the page.
