THE WORLDWIDE TV-FM DX ASSOCIATION

Serving the UHF-VHF Enthusiast

THE VHE UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, GREG CONIGLIO, KEITH MCGINNIS AND MIKE BUGAJ.

> Editor and publisher: Mike Bugaj Treasurer: Keith McGinnis wtfda.org Webmaster: Tim McVey Forum Site Administrator: Chris Cervantez Editorial Staff: Jeff Kruszka, Keith McGinnis, Fred Nordquist, Nick Langan, Doug Smith, Peter Baskind, Bill Hale and John Zondlo, Website: www.wtfda.org; Forums: http://forums.wtfda.org

WHAT ELSE IS NEW?

The Es season was a bust for many of us and the tropo season isn't any better.

Has anyone noticed the lack of hurricanes this season so far? In the past, we in the east have relied on some hurricane induced tropo for some DX but this year there is neither. And forget about hurricanes, where is plain old ordinary coastal tropo?? Where are those huge tropo openings covering the eastern USA and/or Midwest? I give up.

MEMBERS AND THINGS

During the period from 7/22 through 8/13 we received renewals from John Hourigan, Williams, Randy Miltier, Richard Robert Lewelling, Robert Ross, Doug Smith, Jeff Falconer, Michael Perron, Ron Rader, Richard McVicar, Bob Hawkins, Fred McCormack, Steve Rich, Jim Thomas, Roy Barstow, John Callarman, John Zondlo, Joe Esser, Paul Swearingen, Nick Lombardi, Ron Purdue, Tommy Adair, Ralph Strobel, David Sinclair and Dennis Smith. That makes 25 renewals this month. Our membership is running about 230 members. Thanks everyone for supporting the club!

ANOTHER ONE BITES THE DUST

Last month we told you about Monitoring Times going out of business (well Grove is, but there could be a glimmer of hope for MT, maybe). This month here is another shocker.

The International Radio Club of America, better known as IRCA, a medium wave DX club, has ceased publication of their paper DX Monitor and will distribute their e-zine only. That leaves the National Radio Club and the WTFDA with both paper publications and ezines. The WTFDA has almost all of our members reading the e-VUD and those who are still reading paper should surely see the writing on the wall. While the NRC has upped their renewal dues for their paper publication in order to make the paper DXN less attractive, we haven't done it. We want you to switch to the e-zine but we not going to raise the price way up to make you do it.

By the way, I have now been publishing the VUD for 12 years now and I'm beginning year number 13. I'm now 67. I really and truly would like a break. Will someone give me one??

MAIL

Here's a recent email from Cal Glover..."I was cleaning out the garage and came across a four-bay bowtie and screen UHF antenna. And I was thinking about coupling it with my existing high-band VHF-UHF antenna. I was wondering if the screen configuration might help gather some of the "scattered" ATSC signals.

Have you heard of much DX with the bowtie type antenna? And what do you think of the possibly efficiency of combining the two types of antennas? I'm wondering if the scattered signals the bowtie might gather might actually cancel out the main ATSC signal.

In the "old days" down here (NC –ed), we could, during the summer, rely on picking up stations from the D.R., Cuba, Venezuela, and even Atlantic Canada on a regular basis, but antennas have changed. My new(er)

Antennacraft antenna has no low-band elements; there just aren't that many low-band DTV stations." If anyone has any ideas on combining antennas, please chime in.

And that's it for September. See you all next month. -Mike

NEWS ITEM: Two of the Radio Disney Stations That Have Been Put up for Sale Have Ceased Broadcasting KPHN-1190 Kansas City and KDIS-FM 99.5 Little Rock have both notified the FCC that they have suspended operations stating, "Radio Disney Group, LLC Is negotiating with prospective buyers of station KDIS-FM, and is committed to completing the sales process as quickly as possible in order to minimize the amount of the time that the station will be silent."

NEWS ITEM: WGWG to Sign off (the over-the-air signal)

Gardner-Webb University's non-commercial FM radio station WGWG (88.3) will be transitioning to an online-only station by the end of the year, according to an article in the Shelby (NC) Star. The Christian university, located in Boiling Springs, North Carolina, plans to keep the station call letters and branding, but is in the midst of negotiations to sell its 88.3 FM license. The 50,000 watt station began as a student radio club in 1961 and started broadcasting over FM in 1974. WGWG launched its website in 1998 and earlier this summer announced its plans to focus more on archived and on-demand programming via SoundCloud.

# Coast to Coast TV DX

Featuring reports from the entire United States and all of Canada.

Send reports by the 15th of each month to: Nick Langan 1040 Riverview Drive Florence, NJ 08518 E-mail: <u>nickl@wtfda.org</u>

### The Editor's Note

After a fall-like weather pattern encompassed much of the continent aside from Texas through late July and the first half of August, conditions shifted gears toward the end of the month as a large area of high pressure built over the plains. Despite the warmer temperatures, we did not really see any widespread tropo reports as a result, and that was the case pretty much throughout all of August. Yes, the 2013 DX season definitely does not look like one we'll be writing home about. Let's hope September brings more interesting DX.

More fine contributions this month from our readers. Bob Seybold checks in to let us know what he saw from Western NY this season, while we also have at least one recent good tropo report from Roger Gravelle in ON. Glenn Hauser, Eric Bueneman, Jeff Kadet, and Dennis Smith also check in for this edition of C2CTVDX.

P.O. Box 1684 Enid, OK 73702 <u>http://www.worldofradio.com</u> wghauser@yahoo.com

All times, days and dates are strictly UT: CDT +5. Including Oklahoma news:

** MEXICO. Sporadic E MUF is struggling to surpass 55 MHz, only occasionally succeeding, July 15, UT:

2248 on 2, fade-in something with Spanish A&V, and right out again; antenna south

2321 on 2, another fade-in-and-out, but not before I spot a Gala-TV swirl bug in the LR. As outpointed before, per W9WI.com there is only one Televisa net-9 affiliate on channel 2:

Hermosillo SO XHHMA-TV 30000 ZH 29-04-29N 110-57-35W XLIC S:Televisa 9

which it could be but no time to determine if it was coming from that far west, as we know it could also be another of the local Televisa channels just carrying net-9 at the moment, other nets at other times

UT July 16:

0040, on 2 another fade-in, but suspect English so rotate north and do find more weak CCI, but nothing to identify Canadianly

Monitoring channel 2 for signs of skip from 1400 UT July 17, with antenna southward:

1427 on 2, brief signal in and out; maybe just meteor scatter

1604 on 2, now sporadic E definitely fades in, peaking southwest, a studio news(?) show; bug in UR has the word CANAL in the middle, something else above it, and below it clock 10:04 = MDT/CST an hour earlier than here and most of Mexico.

AFAIK, the only ch 2 axually using the word CANAL in its logo is XEPM-TV in Ciudad Juárez, Chihuahua, so I take a look at the image on <u>http://tvdxtips.com/mexlogosch2.html</u> I see that the font and everything match. The full slogan is TU CANAL, but the TU is in a dark blue color, low contrast vs the CANAL in light color with dark background, which explains why I couldn`t make out the TU --- but I keep looking at my screen and finally see it too, as below. Above CANAL is the temp and a sun-symbol.

Lower left part of the current program at 1604 has a lower-case j surrounded by a jagged area, which I could not recognize as the outline of Chihuahua, but I bet the j stands for Juárez. Maybe it`s the outline of the city limits? No, here it is, for `Hola Juárez` show:

http://www.televisaregional.com/juarez/video/14871 9645.html

two offset superimposed screens(?) as background to the j.

XEPM has been seen lots of times, despite Juárez being only 588 miles = 947 km away, city to city Enid. Yet it was not an extremely strong opening, nothing above channel 2.

1634 on 2, now fades in station with a different bug in UR --- pretty sure it's Grupo Pacífico, italic number in an oval, but I can't tell whether it is a 2 or a 3, i.e. one of the two XHI's, or the XHQ relay in Sonora or Sinaloa: Ciudad Obregón, Los Mochis or Guamúchil. There is also a small bird in flight in the lower right corner of the oval, presumably seagull, hard to see except on Danny's illustrations. Obregón is 937 miles, Los Mochis 984, Guamúchil 967, all ideal skip distances, and somewhat less than double the distance to Juárez.

1644 on 2, signals in and out, same offset (which fits for XEPM and XHHMA, both zero). But also zero-offset per<u>http://www.dxinfocentre.com/TV2.pdf</u> are XHGWA, XHPDT, and XHI, with offset uncertain/unshown for XHQ. So all that is inconclusive.

1654 on 2, now there is a novela on XEPM, and I can make out the TU CANAL bug in UR, time 10:54 AM; good video but no audio, as the MUF is somewhere between 55.25 and 59.75 MHz

1655 as I continue to watch XEPM, its own bug is suddenly replaced by the Televisa net-2 star bug in UR, but only briefly before a commercial with no distracting bugs. Now there is no color much of the time, as the MUF is also below the color burst frequency for ch 2 zero-offset: 58.829545 MHz (3.579545 MHz above the video carrier).

1658 on 2, now color is back from another station with the Gala TV swirl bug = Televisa net-9 in LR during `Despierta América` originating from Miami, and the co-anchors have big U`s on their mikes. Tried a few photos, none good enough to link. In fact, it`s also on Univisión at 11-15 UT as we get it on cable in OK. Looks like it`s delayed at least two hours on this.

XHHMA-TV, Gala in Hermosillo is in exactly the same direxion as Juárez from here, but much further at 913 miles. The Pacífico stations are all a bit more to the south.

Next day I laboriously look up XHHMA programming on slow-loading TV Guide (Gala on cable 23 in Hermosillo, presumably this altho they hate to show X-callsigns), and NO match – instead `Veredicto Final` courtroom show? at 9-10 am MST July 17. A further fishing expedition will be too timeconsuming. No other ch 2 stations in NW Mexico are known to be on net-9, so maybe a part-time relay.

** MEXICO. Sporadic-E, morning of July 18 got no further than this:

Channel 2 at 1655, first fade-in after 3 or so hours watching snow, YL interviewing béisbol player, judging from his uniform, poor signal, video but no audio; a large square bug in the LR I don`t recognize

Not rechecked until 2143 when I find an opening in progress with antenna aimed southwest: 2143 on 2, novela with Azteca 13 bug in UR 2145 on 2, now Azteca 7 bug in UR has overtaken 2146 on 2, now back to Azteca 13

UT July 19, a better opening late in the evening fades in, antenna SW: 0325 on 3, novela, Televisa 5 bug in LR 0325 on 2, CCI 0325 on 4, novela2, Aztoca 13 in LIP

0325 on 4, novela?, Azteca 13 in UR

0351 on 4, still/again Azteca 13 0352 on 5, algo with MILENIO ad grafic, CCI 0352 on 3, lucky to catch XEZ-TV quick ID in top black strip of letterboxing, slightly right of center --that`s the net 5 in Zamorano, Querétaro, a regular here, tho seldom providing local ID

0356 on 4, news about Jalisco, Guadalajara, with anchor name on screen, Javier_Alatorre, so is it XHG? No, XHG is independent (or rather Televisa local, sibling to XEWO-2). Googling finds he runs `Hechos` at 2230-2300 local on Azteca 13. Which one? As usual, there are far too many, per W9WI.com: four full-power, four medium-power, and two low-power around Mexico

0356 on 3, net-5 is back 0422 on 3, fútbol promo, novela, net-5 LR 0423 on 2, Gala swirl bug in LR briefly = Televisa net-9; fadeout (Glenn Hauser, OK, DX LISTENING DIGEST)

** CANADA. Sporadic E analog TVDX July 20 sporadically exceeds 54 MHz for bits of channel 2 video, sometimes audio, no higher, UT:

2257, algo fades in, peaks north rather than south, so not Mexico

2301, Double Jeopardy on screen, either promo or program

2314, fades in enough to make out Global bug (the word) in lower right, translucent so hard to see but for the local viewer less obtrusive than many others. Video is letterboxed, in and out past 2350, peaks north rather than northeast, so must be CKND-TV-2 in Manitoba rather than Ontario. Also can see narrow 20-kHz CCI beat bars, so know this signal is offset plus or minus 10. Hepburn`s channel 2 map shows CKND as -(+) so not sure which? While CIII is plus.

UT July 21, looks like still the same: 0142, ad in English from north, letterboxed (Glenn Hauser, OK, DX LISTENING DIGEST)

** CANADA. Sporadic E is fitful July 26, UT:

1543 on 2, finally fade-in of some weak video with antenna NE, as I have been monitoring for an hour since 6m Es maps show lots of activity in that direction from here; right back out

1557 on 2, another fade in and out with audio definitely in English, surely one of the Ontarians

1611 on 2, some video again and stronger, audio in English; letterboxed during ad but no bug to be seen

1615 on 2, CCI with same offset, at least one with news, appropriate for noon EDT. Same offset points to the two CTVs, CHBX and CKCO-TV-2, both minus. 1622, CTV is mentioned in passing IDs of correspondents

1616 on 2, ad for Comfort Plus in Waterloo. That town next to Kitchener is west of Toronto, not directly served by any of the ch 2 stations, probably just on the Toronto feed to all of them 1631 on 2, ad for Northern Nationals, August dates [Googling leads to a drag race in Wawa, Aug 9-11]

1633 on 2, world news continues, but with that small-town feel; is this really from CTV Toronto HQ or a regional centre? M anchor has a rather high voice. Clip from ABC [USA] News; Lincoln Monument vandalized overnight

1634 on 2, another ABC News segment, exclusive interview with apologetic Trayvon juress. Besides ABC bug during this in UR, some kind of bug in LR I can't make out. I never recognize any CTV bug. Then report from CNN on Pope in Brasil.

1641 on 2, ID as CTV News; 1642 ad for Kapuskasing festival (lumberjack & motorcycle?). That town is further up in NW Ontario beyond Timmins; a name I have always found cute. Surely too far to be of interest to Toronto viewers.

1644 on 2, health segment starts sponsored by something in North Bay/Timmins/Sudbury, so bolsters my theory that this cast is originating regionally; the closest ch 2 CTV to this area is CHBX Sault Sainte-Marie, no doubt with strings of relays elsewhere on other channels

1651 on 2, clearance sale at Illio`s; pretty sure of spelling, but doesn`t Google to Ontario

1655 fadeout. MUF had just peaked at 113 MHz around Chicago says the 6m map {and the radar map shows right over a T-storm area too}. Also tried FM 88.1, but nothing other than KWOU Woodward OK occasionally in by airplane scatter with rapid accelerating Doppler fading

Also monitoring for DTV on 3, but as usual not even a `bad` signal registers. These analog 2s, tho generally weak, difficultize decoding of what should be a good target in DTV, CKPR in Thunder Bay, a once-common catch here in analog.

The sporadic E opening from Ontario, CHBX, SS Marie on channel A2, had faded out by 1655 UT July 26. But as often happens, the midway ionized patch drifted (scooted) westward, from Illinois to South Dakota, and by 1721 channel 2 is active again but with a different station:

1721 on 2, weak video fades in, now peaking north instead of northeast, so probably CKND-TV-2, Minnedosa, Manitoba; is infomercial about furniture, and fades in enough to make out translucent Global bug in LR.

1730 on 2, no local ID, but change to Entertainment Tonight [sic] Canada, as scheduled; 1747 fades, 1750 back, and out again. Lunchtime.

1809 on 2, fade-in algo, 1810 video flashes by for GLOBAL WINNIPEG.

1823 on 2, another fade-in still with Global bug in LR, talk show roundtable of YLs; yes, it`s THE TALK, from USA as title seen at 1826; nothing further. When in, there was little CCI, as CKND-TV-2 is more isolated geographically from the other few analog twos left (Glenn Hauser, OK, DX LISTENING DIGEST) 1700 on 2, above starts to mix with something from net-2 in UR, probably XEPM again; fade out and nothing further (Glenn Hauser, OK, DX LISTENING DIGEST)

** MEXICO. Sporadic E opening into VHF fires up July 29 after monitoring snow on channel 2 for almost an hour, UT:

1452 on 2, fade in with f bug in LR, i.e. Televisa net-4 foro; more from SSW than SSE so not XHY and later IDed below as XEFB Monterrey NL

1452 on 3, also signs of a video signal here; 1455 fades in a bit more

1507 on 2, Azteca net-7 bug in UR with time & temp, probably XHTAU Tampico with Monterrey programming as usual mornings

1511 on 4, MUF briefly hits here with algo

1519 on 2, fades in f bug in LR again, and this time also TELEACTIVA in UR, i.e. XEFB-TV, Monterrey NL

1527 on 2, fade in HOY bug in LL, sponsor BECALOS in LR, CDT clock: Televisa net-2

1540 on 2, Televisa net-5 bug LR with animation, occasional audio

1542 on 3, net-5 with animation // 2; it`s letterboxed; at first without reaching color burst

1600 on 2, some CCI again as MUF dips and surges

1611 on 2, YL on screen is not blonde, unusual for Mexican TV; maybe still HOY show

1611 on 3, net-5 bug LR, still animation

1616 on 2, YL plugging her Twitter, mentions `Hola, México`, another program name, not Hoy? Also made out some large V`s on screen

1629 on 2, CCI mixture includes Gala TV swirl in UR = Televisa net-9, and apparently a court show with YL judge

1636 on 4, fade-in with ads including Colgate (3 syllables). BTW, colgar means hang up (as a phone), but not with a form like colgate

1642 on 4, Woody Woodpecker, net-5 LR

1648 on 2, Gala swirl, net-9 UR; this seems to be court show amid CCI

1700+, mostly gone and it's lunch time

1744 on 2, novela with Azteca net-13 bug in UR

1759 on 3, algo fade-in with video only

1848 on 2, burst of a few seconds in Spanish, novela? bug in UR reminds me of TU CANAL in Juárez, but not positive. Behaved like meteor scatter, but signs of weak Es signals remain 1859 on 2, bug in UR looks like two lines in a circle, such as the number 11, but that's not Once network's logo; maybe just one vertical, i.e. Mundo Fox, i.e. XHRIO. Nothing further (Glenn Hauser, OK, DX LISTENING DIGEST)

** OKLAHOMA. Regional tropo is up, August 1 at 1525 UT with some Kansas DTV and also:

RF 11, KSWO-TV Lawton, (ABC) 7.1, plus subchannels: 7.2, Telemundo 7.3, LWN W9WI.com

has 7.2 TM but nothing as 7.3 for KSWO. LWN = Live Well Network; we don't get that on any closer station. At the moment with fat lady exercising; soon fades below decode level. I should have started DTV DXing much earlier in the morning. Oops, KSWO suddenly comes back, but with audio and video dropouts, at 1551, 1630 (Glenn Hauser, Enid, DX

LISTENING DIGEST)

_____

** OKLAHOMA. PREMIER TELEVISION PRODUCER, DIRECTOR AND PROGRAMMER, BILL THRASH HAS PASSED AWAY --- Posted on: 5:42 pm, July 15, 2013, by Ted Malave, updated on: 06:07pm, July 15, 2013 http://kfor.com/2013/07/15/premier-televisionproducer-director-and-programmer-bill-thrash-haspassed-away/

OKLAHOMA CITY — Bill Thrash, long time friend of Oklahoma television, has passed away at the age of 73. His beloved wife, Billie Thrash, delivered the sad news. She sent the information of Mr. Thrash's passing to OETA Executive Director, Dan Schiedel.

Bill was a great leader and mentor to so many. He left a legacy and a permanent mark on so many in Oklahoma and the nation.

Thrash was Oklahoma's premier television producer, director, programmer, part-time jazz pianist, and husband for over 40 years to wife Billie. He was also the bat boy for the Ada Hereford Class D baseball team back in his youth.

In 2010 he received the peer-nominated and Board of Governors-approved 2010 Gold Circle Emmy Award from the Heartland Chapter of the National Academy of Television, Arts and Sciences. Thrash joins the late Ned Hockman, former University of Oklahoma professor, as the only Oklahomans to receive this prestigious award. He was also honored in 2009 with the opening of the William C. Thrash Television Studio on the East Central University campus in Ada.

Thrash received the Bill Crawford Memorial media Award from then Gov. Brad Henry at the 31st Annual Governor's Arts Awards in 2006, which recognizes an individual in the print and/or electronic media who demonstrates commitment to the arts in Oklahoma. He is also a member of the Oklahoma Association of Broadcasters's Hall of Fame.

Thrash went to work for WKY-TV in 1971 and produced several local programs. He became program manager and station manager of WKY-TV. Bill Thrash later became the OETA Station Manager.

Bill Thrash HD - Obit2 [2:34 video]

Bill Thrash has always been recognized by his industry peers. His nomination for the honor was seconded by a Who's Who of Oklahoma broadcasters.

An innate curiosity regarding new technologies in television pulled young Thrash onto the campus of then-East Central State College to see a free demonstration of this new thing called live television.

Oklahoma City's WKY-TV was barnstorming the state demonstrating live TV production and local broadcasting on stage to stir interest and inform the, hopefully, future viewing public. When he worked for WKY-TV, which eventually became KFOR-TV, he was instrumental in launching shows like, The Stars and Stripes Show, Danny's Day, and The Butch and Ben McCain show.

He grew up in his hometown of Ada, glued to the family TV from the first morning test pattern to the playing of the National Anthem. He was always fascinated with new TV technology and brought forth many innovations that are taken for granted these days (KFOR-TV July 15 via DXLD)

No doubt OETA will be doing their own tribute. Search on his name at <u>http://www.oeta.tv</u> (Glenn Hauser, DX LISTENING DIGEST)

** OKLAHOMA. RF 31 & 32, KXOK-LD, Enid, August 5 at 1446 past 1600 UT, 31-3 with Azteca America! The bug in UR is clearly modeled after the Azteca Trece one we often see on DX from Mexico. Whenever checked the past several weeks, 31-3 had been black screen and silent audio, but still showing Azteca on the PSIP; 31-2 remains vacant except for M -FOX ID. One wonders whether this station has any human oversight. Its main channel 31-1 continues as TV-OK with Retro TV network.

Its office in Enid on the ground floor of the Broadway Tower is still there per sign on door, and still always closed whenever I go by, as upper floors of the building are being converted into a hotel. Antenna is atop same in downtown Enid (Glenn Hauser, OK, DX LISTENING DIGEST)

Ion: in OKC, KOPX-50 ``62`` now has 5 channels with 62.5 being QVC --what a waste (Glenn Hauser, OK, DX LISTENING DIGEST)

** MEXICO. No Es DX to VHF noted earlier Saturday, but turned on UT Sunday Aug 4 at 0216 with antenna still parked toward SSW, to find an ad or infomercial displaying a phone number for MTY, of 8048 4627. No bug visible. Peaked briefly to good level but soon faded out. Maps show all the 6m Es at the moment is in the NE guadrant of the USA.

Another brief fade-in at 0234, nothing more. Can't assume it's XEFB in Monterrey since ch 34 in Monterrey is relayed on ch 2 in Saltillo (and even ch 2 in Tampico takes some programming from Monterrey, altho only in mornings, I think.)

August 4 at 1436 UT turn on and tune in ch 2 to find Es in progress, Spanish audio, antenna still SSW; generally frustrating opening with lots of QRM, nothing dominating for long.

1443 on 2, animation from Azteca net 7 bug UR

1500 on 2, CCI includes soccer from something; 1515 soccer looks like an edited playback; maybe net-7 bug UR

1519 on 2, fade-in English audio about global warming vs coral reefs; quickly rotate toward north, but lose signal, and 6m maps show no activity up there. May well be a Mexican with docu in English, subtitled as have caught previously. Back to south

1545 on 4, ads/infomercial involving luxuriant headhair on YLs

1550 on 2, heavy CCI

1555 on 3, MONEY TALKS on screen, apparently title for Spongebob which follows from Televisa net-5 as bug in LR

1556 on 2, Azteca-7 promo; CCI continues following hour on 2, 3, occasionally 4, as I am too busy compiling rest of this report

1700 on 5, MUF up to here making zero-beats with my cable leak, still so at 1726  $\,$ 

1714 on 3, Chicago Fire promo on Canal 5, start toon with credits in English; probably XEZ.

1729 on 2, and 4, soccer, now seems live.

1730 on 2, another station inviting photos to a gmail address

1731 on 3, lizard animation, net-5 bug LR.

1739, mostly 2, some 3 still in. To be continued?

1847 on 2, after lunch I find the opening has shifted to the west, now peaking SW instead of SSW; letterbox infomercial, with phone numbers, looks like call ID in upper right, but:

1852 on 2, a bit clearer, the UR word is STAR in white and another word in dark which turns out to be *VIEW. It`s for a small portable projector for presentations, etc., and keeps going past 1900, <u>http://www.starview.mx</u>

1901 on 4, brief MUF surge with Azteca-13 bug UR in talk show

1908 ch 2 fades out and nothing further until a few hours later:

2240 on 2, fade-in with soccer; in and out weak signals

2356 on 2, fade in credits in Spanish, producer was Tele-Universitario, then into music videos, letterboxed, bug in UL maybe for program name

2357 on 2, seems same station with MAS VISION and +v logo at 2359 so it's XEWO-TV Guadalajara

UT August 5:

0004 on 2, drama with net-5 bug LR; unknown bug in UL  $\,$ 

0044 on 2, Azteca-13 bug UR in variety show, good brief peak in color

0115 on 2, lucha libre

weak signals, CCI on 2 continue in and out until about 0230

August 7 turned on channel 2 around 1445 UT with antenna SSW for snowfest until:

1516 on 2, fades in Spanish, talk show, letterboxed

1516 on 4, that was quick, MUF already up to here, novela with Televisa net-9 Gala TV swirl bug in upper left, and Televisa net-2 star bug in upper right at same time! Sort that out.

1516 on 5, MUF even to here with toon from Televisa net-5. You never know whether their italic 5 bug in an oval will be in the UR or LR corner, and this time I did not note which

1517 on 4, under Gala swirl UL are time 10:17 (CDT), and 33 degree temp, still with Estrella also in UR. Does it ever get that hot at the elevation of México DF?

1520 on 2, Azteca net-7 bug in UR; program? bug in LL says DE VIVA VOZ, apparent interview show. This is full-screen, not letterboxed. The 7 bug (just the large figure) in the UR comes and goes and comes and goes, rather than staying constant

1545 on 2, startled to hear some English audio mixing with Spanish from another station, but it's just an ad for Open English (language learning?)

1555 on 2, still Azteca-7, YL caster mentions Torreón, Coahuila. Probably the morning news from Monterrey carried by XHTAU Tampico

1635 on 4, toon from Televisa net-5, bug in LR, Woody Woodpecker

1643 on 2, Guadalajara phone number and address in ad/infomercial involving a crucifix, so XEWO-TV

1653 on 2, italic +v bug in UR = Más Visión, XEWO-TV. The plus sort of doubles as a lowercase t

1708 on 2, YLs are talking about mini-pigs; program? bug in LL seems

to read HV or maybe HY (or could it be part of HOY from Televisa-2?)

1717 on 2, CCI involving Azteca-7

1727 on 2, CCI includes soccer from one of them; also glimpse a graphic which says TIA BANK ---probably SCOTIABANK. Are we getting Canada too? No signal from north and nothing on 6m maps from north. Scotiabank does in fact function in Mexico, which comes up before Canada in a Google search; also claims to be in USA, in a few major cities, but I think not for ordinary customer banking. At least I`ve never seen one

1734 on 2, +v bug again in UR, 10 kHz offset CCI from algo

1810 on 4 (after lunch break of Indian green curry and BBQ pork), YL with weather map probably showing hurricane; crawler mentions Jalisco. So maybe XEWO's sibling XHG Guadalajara (MUF this hi yet nothing showing now on either 6m map!)

1817 on 4, toon from Televisa net-5, bug in LR 1820 on 4, novela, with net-5 bug in UR, so two different ones with unsame programming?

1837 on 2, still heavy CCI, including +v = XEWO.

You may have noticed that thruout this entire opening there has been nothing on channel 3! Well, hardly anything but some weak CCI now and then not otherwise logged

1900 on 2, animation from Televisa net-5, bug in LR

Now I am recording WORLD OF RADIO 1681, but keep an eye on the monitor as the opening gradually disappears in the next half hour or so

2119 on 2, nothing in until a quick glimpse of TU CANAL bug in UR. May well be a Perseid meteor scattering rather than a sporadic-E surge, i.e. XEPM in Juárez (Glenn Hauser, OK, DX LISTENING DIGEST)

Sporadic E TVDX from Mexico still coming in August 7, but about time for the season to slacken (Glenn Hauser, WORLD OF RADIO 1681, DXLD)

E-skip to Mexico continued during the month of July, as well as the few remaining analog TV stations in Canada. At least I was able to get CKND2 once more before they go digital on Channel 9. The E-skip opening of July 15 allowed me to also pull in a couple of Montana FMs, and the meter lit up on DTV Channels 5 and 6, but couldn't get even PSIP info from these channels. The opening of July 18 brought me my 10th Mexican state, when I logged XHQ 3 for my first one from Sinaloa. A lackluster E-skip season ended with the reception of XEFE and XEPM on analog Channel 2 on August 2. The morning of August 4 brought a few Illinois DTVs, including the addition of Bounce to WMBD 30. The same night, I noted an opening to Memphis; only WHBQ 13 decoded. It was strong enough to note a 24-hour movie channel, Movies!, on 13.2. On the FM receiver, I noted the audio from WPGF-LP analog Channel 6, this time simulcasting WHBQ (560 kHz). The meter also lit up on DTV Channels 5 and 28, but didn't produce PSIP info. I also noted two Central Illinois channels that have dropped their second channels: WICD 41 has dropped The Cool TV, while WRSP 44 has dropped MeTV. The Cool TV has also been dropped from WLFI 11. St. Louis' last analog TV station signed off on August 3, when K49FC 49 went digital on Channel 25 as K25NG. Four video and three audio channels are offered, with all four 3ABN television networks, 3ABN Radio feeds in English and Spanish, and Radio 74 Internationale. 3ABN Radio in English and Radio 74 Internationale are also available on a number of FM stations. The analog total now stands at 576, while the digital total stands at 160.73.

Main Road Silver Creek, NY 14136 Nick:

It has been a rather DX-less season so far but I did have a couple good trops openings recently so

### Period 7-22-13 to 7-25-13

here is a report:

Good opening into Michigan, Ohio and Wisconsin with some evidence of tropo DX continuous all day and night. Toledo 11, 13, 30; Detroit 41, 44, 45, 21; Jackson 18 WHTV (new); Lansing 53; also Battle Creek, Grand Rapids, Flint, other Lansing digitals, Kalamazoo, Ann Arbor, Milwaukee, Madison, Bowling Green 27, Cleveland 61, Canadians 10, 13, 31, 40, 41, 42, 44, 47, 22, 29, 57, 48, 35, 36, 51, 48. On few occasions Buffalo 17, 23, 29 got knocked by Michigan digitals. Also 2 other openings CKVR-3 decoded and was in and out for others plus Canadian analogs on 2 and 8 were strong. Also South Bend digitals were in one evening and signs of Chicago.

As for E-skip only a few signs of Canadian analogs and couple low power Florida analogs but no big openings at all. A rather disappointing season to date. Roger Gravelle 42 Little Creek Place Port Stanley, ON N5L 1K1

This report is for July 2013 and into August a little. Ocean water temp this month started at 69F and went steadily downward to 59F by end of July, but then by Aug 6 warmed to 64. Air temps were from 80F to 75F for highs. Inland temps away from ocean started month at 100+F and went down to about 85F by end of July. So-Calif tropo ducting to San Diego (Calif USA)/Tijuana/Tecate (Baja Calif Mexico) up to 220 mi:

Jun 23 - 30 Jul 1 - 6 p	Var. very– oor/poor	Unsettled, then– stable & <u>hot</u>
Jul 7 - 10	Fair	Still stable, not as hot
Jul 11 - 12	Very poor	Unsettled; rain
further SE		
Jul 12 eve	Fair	Stable, warming
Jul 13 - 19	Var. poor/fair	<ul> <li>Unsettled; with–</li> </ul>
Jul 20 - 23	Poor/fair, but	a little rain Jul 22
Jul 24 - 25	Very poor	Gradual pressure
changes		
Jul25eve-26	None	
Jul 27 - 29	Very poor	Calming
Jul 30	Poor	
Jul 31	None	Cooling, stable
Aug 1 - 2	Very poor	
Aug 3 - 4	Poor +	
Aug 5 - 6	Fair	

Things moved very fast in Tijuana after mid July. Tijuana analogs are NOW OFF, as of about July 20. However, the two Tecate analogs are STILL ON.

As of Jul 20, I thought that tropo worsened (the "<u>but</u>..." noted above; it had been only so-so, anyway), because all Tijuana analogs disappeared. But that was about when they went off the air, with no announcements that I ever saw. There was one remaining Tijuana DTV xmtr to get on the air. It finally came on, on or before Jul 18. Here is the scenario as I saw it.

**Jul 18:** At home, evening during some tropo, I noted a weak signal on  $\underline{d44}$  on my indoor antennas. That is a channel where no DTV had been seen

before in SBarb. I finally got to Don Voegele's place on **Jul 23**, finding through some tropo on his big dish that there is indeed a **new DTV** on the air. It is:

<u>RF 44 XHBJ-TDT "45" Tijuana</u> (200 mi). It is replacement for analog XHBJ-45 Tijuana. That <u>may</u> have been the reason for delay in getting Tijuana analogs off, because of waiting for this last Tijuana DTV to get on air, and then the analogs went off right away. At my place, the last day that I remember seeing those analogs was approx Jul 19. By about Jul 20, they were gone.

Tropo was barely fair that day (Jul 23) at Don's place. A number of SDiego/Tijuana DTVs were seen, but the <u>only analogs</u> seen were KZSD-LP 39 SDiego (Azteca America, 175 mi) and XHDTV-49 Tecate ("My TV for San Diego" 220 mi). Yes—analog XHDTV-49 is still on, even with its XHDTV-TDT RF 47 "49" on. I did not see analog XHUAA-relay 56 Tecate (it is not seen as often). No Tijuana analogs were seen, so are evidently <u>off:</u> XHTJB-3 XETV-6 XEWT-12 XHTIT-21 XHJK-27 XHAS-33 XHBJ-45 XHUAA-57.

**Jul 30:** At Don's place, SDiego/Tij tropo was poor, <u>but</u> analog XHDTV-49 and its DTV XHDTV-TDT 47 Tecate were good, and analog XHUAA-relay 56 Tecate was seen. So those two analogs are still <u>on.</u> I continue in early August to see XHDTV-49 at my place.

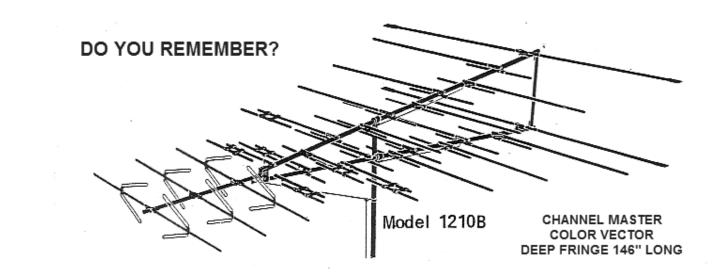

**Aug 6:** At Don's place, tropo fair, SDiego/Tij DTV, analogs XHDTV-49 and XHUAA-relay 56 Tecate, plus this new logging at about 0815 PDT for only a few minutes:

<u>Analog Ch 7 KZTC-LP San Diego</u> (MundoFox [Spanish] 175 mi). It has been on air maybe 3+ years but I had not seen it here until now.

XHBJ-TDT adds 1 new to my SBarb in-town DTV total, to make 59. If DTV seen from local mtns are included, the total is 67.

KZTC-LP adds 1 new to my SBarb partiallyreconstructed analog total, to make 91 in-town and 118 with mtn loggings included.

Best of DX to All Dennis

This year's E-skip season has been pretty lackluster, to say the least...only 11 new FM stations have been logged via E-skip; three times that many new FM stations have been logged via tropo since the beginning of May. The E-skip opening of July 15 had the year's highest MUF of 101.7 (by contrast, the highest MUF last season was 162.475 MHz) by pulling in KWGF 101.7. The company that owns the station, Star Radio, also owns WCOY 99.5 in Quincy, IL. The tropo opening of July 24 brought me one Illinois FM station closer to the 200 mark when I pulled WIUW 89.5 through WARW. The Illinois FM total as I write this stands at 196. A few tropo openings also had surprise extensions...the July 25 opening, dominated by stations from Illinois, Indiana, Kentucky and Tennessee, had an extension into Atlanta when WZGC 92.9 took out WSEI. The opening on July 31, dominated by stations from Illinois and Iowa, extended into southwestern Kansas with the log of WNG535 on 162.525 (normally dominated by either WWF75 Bourbon, MO or WXM90 Jacksonville, IL). The previous day's opening brought a new FM translator in K259BB 99.7 Sikeston, MO (relaying local KSIV 91.5 St. Louis). It's the second new FM translator logged this season, and my 170th Missouri FM. For a moment, I thought I had WMFS 92.9 with ESPN Radio (I've logged the AM on 680 kHz), but was pleasantly surprised to hear a dual ID for KLSC Malden, MO and AM sister KMAL 1470 kHz. The wee hours of August 1 brought stations from Illinois and Kentucky, but a tropo opening in the evening hours extended to the Wichita area. The late night hours of August 4 and the wee hours of August 5 brought DX in from Tennessee, Mississippi and Alabama. WZLQ 98.5 made it through KTJJ for my eighth FM from the Magnolia State, while two more Memphis FMs, WQOX 88.5 and WRVR 104.5, made it through before midnight. After midnight, I noted the city of license change from WRSA 96.9, which I previously logged while it was in Decatur, AL. Holly Pond is a small town on U.S. 278 east of Cullman. Another such change was KWNW 101.9, which I had previously noted as KIYS when it was in Jonesboro, AR. Crawfordsville is along U.S. 64 west of Memphis. I also noted my first noncommercial FM from Mississippi when I noted WMAE 89.5 carrying BBC World Service on the Mississippi Public Radio network. The opening of August 8 also went into western Missouri and eastern Kansas, getting as far west as Hutchinson and Wichita going into the wee hours of August 9. The morning hours brought an opening into northwest Indiana and east central Illinois. The August 11 and 12 openings brought stations from Indiana, Kentucky and Tennessee. The FM total as of August 12 now stands at 1,222. 73.

The 7/26 Es opening was a very nice way to close out what had been a lackluster skip season. The lone highlight of the Tr season so far was a memorable opening to the Carolinas on 6/21.

On 7/4, 93.9 KXDI-ND was FM log #3000 from this location.

Top 5 states in terms of logs here: FL-268, NY-186, PA-175, TX-153, MN-145.

# WTFDA'S NEWEST OFFERING FOR CLUB MEMBERS THE WTFDA BULLETIN BOARD http://wtfdadxbb.vci.com

Work DX and log stations along with other DXers in real-time. Similar to another fmskiplog online but without the bitter aftertaste. No spamers. No hackers. No chronic complainers. Just DXing. No joke. If you want to try it, email us (mikeb@wtfda.org) for a password.

# DO IT YOURSELF...A SEVEN ELEMENT LOG YAGI FOR FM Mike Bugaj

If you need a new FM antenna but can't afford one that has good specs, here is a seven element antenna modeled by Brian Beezley. This antenna is a single reflector design. I found the details on Brian's webpage before they were removed and replaced with similar antennas featuring multiple reflectors. Gain ranges from 7+db on the lower half of the FM band to 8+db gain from 102mhz upward. Front to back radio is over 30db. Boom length is 8 feet. This antenna uses three driven elements. Brian designed this antenna to have good gain but an even better front to back ratio, the reasoning being that on our crowed FM band, F/B is a little more important now than gain.

This antenna was constructed in two days. The first day consisted of totally disassembling an old Winegard PR-5030 VHF TV antenna and salvaging all of the parts, including the phasing lines. The second day was spent actually building the antenna.

The antenna has one reflector (R1), three driven elements (DE1, DE2 and DE3) and three directors (D1, D2 and D3). D1 is on one end, followed by D2 and D3, then DE!, DE2 and DE3 and finally the reflector R1 at the other end.

33.3"
31"
26.5"
25.3"
25"
24"
21"

The element lengths in the table to the left are taken from the center of the boom to the tip of the element and are in inches. A phasing line connects the three driven elements. Brian suggests using 1/8" aluminum wire, crossing wires halfway between driven elements and keeping them one inch from the metal boom or other phasing lines. Your coax connects to DE1. Use three loops of 75 ohm coax connected directly to the DE1 Connection points instead of a commercially made balun. Make the loops

about 3" in diameter and secure with wire ties or electrical tape, etc. I used a small plastic box under D1 with an F fitting inside and wires from that to the two connection points.

My antenna used the phasing lines from the Winegard PR-5030, lengths of which were exact from DE1 to DE2. For DE2 to DE3 I used two more sets of Winegard phasing lines, cutting them until I had the proper length and securing with a screw, washer and nut. If you have an old Winegard TV antenna to use for parts, don't bother with the aluminum wire. Their phasing lines will work.

Element Name	Distance from Reflector
Reflector	zero
DE3	21"
DE2	36.5
DE1	47.1
D3	50.4
D2	67
D1	95

Use this table to find the distance of each element using the reflector as a starting point.

Important: Add two stubs, 4 3/8" long, extending from the rear of D3 (see top photo) and short them out. Doing this decreases the back lobe of the antenna.

And finally here is a photo of the Winegard phasing line being used for the FM antenna. With junk parts laying around, this antenna cost me nothing except a few hours of labor, which I enjoyed anyway, so it wasn't work. I use it as a phase antenna with my Bolin box and it's excellent, even at 13" AGL. But with its eight foot length, it would also make a great mobile antenna. Either way, this antenna performs great. Why buy something inferior when you can build something better for less? (see additional photo at http://www.ham-radio.com/k6sti/logyag.htm at the bottom of the page.)
