JANUARY 2014

Hello and welcome to January! Let us hope that the month of January turns out better for DXers like Jeff Falconer and Bill Hepburn, both of whom got caught in that terrible ice storm before Christmas that ran from Maine to the midwest. Bill reported about 1.1" of ice covering everything and Jeff had about 3/4" of ice on his APS-13. As far as we can tell, no equipment got totaled in that event, which was just plain rain in many areas to the south.

We welcome **Stephen Parker** to the WTFDA. Stephen lives in London, ON and for all we know, he could be Robert Ross' neighbor.

During the period from 11/14 through 12/22 we had renewals from Russel Lay, Bill Nollman, Randall Trapp, Wolfgang Schneiter, Ted Liczewski, Edward MacDonald, Marv Shults, Edward Ritchie, Matt Sittel, Les Prus, Roger Sabella, Chester Jaffee, Tom Bryant and Garth Jensen. Thanks everyone for staying part of WTFDA!

From **Paul Mitschler** speaking of the October VUD cover "That was a great cover. I would say almost perfect for our hobby. My only complaint was that I just had to get that episode. It was from the "Lucy Show" series done after the divorce and the series "I Love Lucy."

What is **Bob Cooper** doing these days? Well, he writes: "I am nearly completed with copying DXing Horizons issues and they will be posted where already exist CATJ, CSD, SatFACTS and more. Also 99.9% completed is "Who invented CATV?" and it is at

http://theoldcatvequipmentmuseum.org/220/226/index.html. The same site address ending in .org will take you to a "Coop" selection within which you will find the aforementioned publications and when ready, DXing Horizons as well. Many (most?) group members will probably find value here."

Gary Hickerson mentions in the November VUD, page 30 that the frequency for KMAG was shown as 99.7 when it really should be 97.9. Oops. Gary Writes "But that's not why I'm writing to you. KMAG offices is just 5 miles from me so I got the idea to copy this page and a few others and take it over and show them. That's what I did. I explained about the club and DX and showed them the logging. I told them that on June 1st, Mr. Gauthier heard them in Canada at 1322 miles away! They seemed to enjoy this information and the fact that they were being heard so far away."

Bob Hawkins makes a correction to the December VUD FM News..."page 12 I can assure you that WSPM 89.1 (Catholic Radio) and WIRE 91.1 (Hot AC as Radio Mom) do not simulcast—nor have they in years if ever. Actually I believe WSPM was recently sold and the ownership between the two stations is no longer the same." I'm glad Bob caught that and I'm really glad to know that people read the columns!

Chris Dunne reports from Florida: "What I thought was a Cuban on 107.9 in the lower Keys on my car radio was actually Radio Marti. I thought to myself, what about WMFM in Key West? Well, turns out that WMFM & Marti must have some kind of LMA deal or other, similar to what WPIK 102.5 had a few years back. So, beware, if you catch SS on 107.9 come Es season! When Marti was on 94.7, they ran only from 7 to 9:30 pm nightly. This was out of that time frame. BTW, no idea how much power WMFM is running; can't be the 100 kW they're allowed. By Mile Marker 25, West Palm Beach was coming in to battle it." And that's all for this time. We'll see you next month! -Mike

VA/I	Walinin	103.2	W277AC	Changes City-of-License from Clyman

^{*} Honest! Since this item has been deleted from the FCC's database, we can't investigate whether the applicant really entered '501 Lansbury Drive' as the city. But, after doing some research, we found such an address in Danville, so it's suspected that was the intended City-of-License.

Changes City-of-License from Clyman

If anyone can fill in the undetermined formats of the stations listed above (WJLN and KMXQ) in question, please let us know. Thanks! - Editor

NEWS ITEM: Statement of Commissioner AJIT PAI on Revising the Communications Act of 1934 "I welcome the announcement by Chairman Fred Upton and Subcommittee Chairman Greg Walden that the Energy and Commerce Committee of the U.S. House of Representatives will examine how to modernize the Communications Act to reflect the realities of a 21st century marketplace. Some provisions of the Act have yellowed with age, unchanged, since the Great Depression; even those of more recent vintage predate the transformative impacts of the Internet, competition, and innovation. In a converged industry, it does not make sense to apply different rules to providers and technologies that compete in the same markets. Convergence is now the norm, and consumers, companies, and the Commission would be better off if our laws and regulations recognized as much. As the Committee moves forward with its work, I stand ready and able to assist in whatever way I can."

THAT WAS THE YEAR THAT WAS

Month	Cpys	Pgs	Printing \$	Postal \$	Other \$	Details
January	75	40	79.76	39.71	196.00 + 56.00	2 years Dreamhost + P.O.B.
February	75	40	79.76	43.90		
March	75	24	47.86	48.40		
April	75	28	55.83	46.00	31.89	Envelopes
May	75	32	68.93	28.40		
June	75	32	68.93	44.90	523.56	FM Database dev.
July	75	40	68.93	47.30	209.42	FM Database dev.
August	75	56	111.30	59.28		
September	75	64	111.30	79.95		
October	70	36	103.97	26.40	31.89	Envelopes
November	70	36	129.35	35.00		
December	70	36	75.21	31.26		

The above chart shows our expenses for the year 2013. Almost all of our expenses centered around the paper VUD, which currently is sent to 51 members (47US/3CAN/1NZ). This number continues to drop slowly as some who previously received the paper VUD fail to renew.

The largest expense in 2013 was the development of the WTFDA FM Database in June and July by the Dwayne, LLC in Honolulu. This was the club's most ambitious project in a long time.

Club membership stands at about 230 at the end of December. That number has been more or less constant through the year.

As of December 27th we have \$1933.10 in our account at Citizens Bank and \$99.95 in our Paypal account for a grand total of \$2033.05 on hand.

Also just before Christmas we moved both the tvfmdx email list and the amdx email list from Dreamhost, where we were experiencing major blocking & delivery problems, over to Google Groups. The FM Database continues to be hosted at Dreamhost while the the WTFDA Website and Forums are hosted at Hostgator.

The WTFDA Board of Directors thanks you for supporting the WTFDA in 2013!

CUBA MANUFACTURES ITS OWN 32 INCH INTEGRATED DIGITAL TELEVISIONS

November 27, 2013

Havana, Cuba (CAN) – A Cuban 32-inch screen digitally integrated television set will be shown on Wednesday at the twelfth edition of the Technological Week Event.

The new television set is produced by the Electronic Industry Enterprise, opened in a close relationship with its Chinese developers.

The set is undergoing tests for its final registration in the industrial output record. The price of this set is very competitive and its high quality quarantees its successful entry in the market. The new equipment Introduces several innovations, such as the reproduction of music, videos and photos, besides its Normal reception of TV signals.

The Technological Week event is focusing on the application of electronics to educational processes And to the sustainability of telecommunications in Cuba.

THE WTFDA EMAIL LISTS HAVE MOVED!

The email lists formerly known as tvfmdx and amdx have been moved to Google Groups. The tvfmdx list is now known as WTFDA and the am list is now known as MWDX.

To join the new FM/TV list, send an email to <u>WTFDA+subscribe</u>@googlegroups.com.

To join the new MWDX list, send an email to mwdx@googlegroups.com.

Those who were on the old lists have been moved to the new lists and there is no need for those users to subscribe again. Those members with Google email addresses or Google accounts can also read the lists and post directly from the list home page on Google.

Mike Bugaj and Russ Edmunds are your admins on the new lists and are available to help in any way.

Jeff Kruszka 1909 Lost Lake Place Pearland, TX 77581 jkruszka@sbcglobal.net

January 2014

Happy New Year! We start off with a couple from Ed Phelps, Benton, KY:

WJHL-11 Johnson City, TN 352 mi Tr seen 7-30-13

WEAU-38 Eau Claire, WI 556 mi Tr seen 9-3-13

...and now 3 from Danny Oglethorpe, Shreveport, LA:

KABB-30 San Antonio, TX 341 mi Tr seen 7-31-13

KCWX-5 Fredericksburg, TX 338 mi Tr seen 7-30-13

KUVM-CD 34.1 Missouri City, TX 227 mi Tr seen 9-27-13 ...and one from Eric Bueneman, of Hazelwood, MO:

CFQC1-3 Stranraer, SK 1200 mi Es seen 7-15-13

And finally, one from Harry Hayes, of Wilkes Barre, PA. I believe this is the first time I've printed something from Harry. His equipment is a Zenith 1999 Sentry TV, Zenith DTT901 box, 6' dish in attic w/window screening, and Winegard AP 4700 preamp.

WTEN-26 Albany, NY 145 mi Tr seen 9-20-13

73's and Happy New Year, JEFF

Coast to Coast TV DX

Featuring reports from the entire United States and all of Canada.

Send reports by the 15th of each month to: Nick Langan 1040 Riverview Drive Florence, NJ 08518

E-mail: nickl@wtfda.org

The Editor's Note

We hope you had a wonderful Christmas and holiday season, and here's to a great, DX-filled 2014! There has been some winter E-skip around, for the most part cresting at the 6-meter amateur band, with the exception of a couple of brief openings with higher MUF on the 3rd and 11th of December, mainly confined to the east coast.

You may have by now seen this news elsewhere, but in case you missed it, a new VHF low-band DTV is on the air in my neck of the woods, as KJWP-DT-2 utilized an FCC loophole to relocate from Jackson, WY to "Wilmington, DE". KJWP-DT is now transmitting from the Roxborough antenna farm in Philadelphia as of early November, and with an ERP of 9.36 kW, it's been reported to get out pretty well and should be a good E-skip target for those in range. Meanwhile within 25 miles of my location, I now have VHF-low DTVs on 2 (KJWP), 4 (WACP), and 6 (WPVI). One man's pest is another man's skip target.

We have a couple reports to help ring in the new year, as Bob Seybold proves that there is plenty of DTV DX to be had with an active fall tropo season in Western New York, while Dennis Smith updates us on SoCal DX.

Bob Seybold

1865 W. Main Rd. Silver Creek, NY 14136

Nick:

I believe I should send in a DX report as there has been a lot of DX at my location since mid-August till now which is October 13th. The best has been in recent days with trops in 100 to 400+ mile range on most days and all night conditions.

8-16-13 to 8-30-13 - some trops on almost daily basis with 0500-0930 and 1600-2400 the best results but on some occasions in all night -Canadians CKVR 3, CHPL 10, CHCH 31, Omni 48 London, TVO 18 London, TVO 28, CITY TV-44, CITY 31 Woodstock (repeating CITY-TV 44 Toronto); CKVP 35 and 42 (repeating CKVR 3 Barrie); CHCJ 35 Omni 40 & 47 Toronto; CKCO 13; Wingham 8 (analog); Bancroft and Wiarton 2 both analog, also Kearns 2 (analog), CIII 22 Stevenson on occasion, also WDIV, WXYZ, WWJ Detroit frequently with WDIV 4 the best; WHTV 18 WLHJ Lansing often; Cleveland 3, 5, 61 often; Toledo 30 often also Toledo 68, 11 & 13 now and then; WBGU 27 Bowling Green; Peterborough 12 and 27; Ion 31 (Detroit or Ann Arbor? Probably WPXD-DT-50 Virtual 31 Ann Arbor - NL) always in when WDIV Detroit is in; most of above received often throughout month of September.

More recently in late September WROC 8 Batavia Ion 51 and most Rochester digitals; WANE 13 Ft. Wayne several times, also South Bend 46 WUPV

36; WEYI 25, also Flint, Bay City, Grand Rapids, Battle Creek, Kalamazoo digitals also other Fort Wayne, also new WRLM 47 Canton, also Indiana digitals on 50, also digitals on one opening Cincinnati, Dayton, Columbus, Chicago, and Indianapolis.

On one recent super all night and early morning I had over 100 digital loggings such as Channel 3 (3), Channel 4 (3), Channel 5 (4), Channel 6 (4), Channel 7 (3), Channel 8 (3), Channel 9 (1), Channel 10 (3), Channel 11 (2), Channel 12 (5), Channel 13 (4), Channel 14 (2), Channel 15 (3), Channel 16 (3), Channel 17 (5), Channel 18 (4), Channel 19 (1), Channel 20 (1), Channel 21 (3), Channel 22 (1), Channel 23 (6), Channel 24 (1), Channel 25 (3), Channel 26 (4), Channel 27 (3), Channel 28 (2), Channel 29 (2), Channel 30 (5), Channel 31 (4), Channel 32 (1), Channel 33 (1), Channel 34 (1), Channel 35 (1), Channel 36 (2), Channel 38 (1), Channel 39 (2), Channel 40 (1), Channel 41 (3), Channel 42 (1), Channel 43 (4), Channel 44 (2), Channel 45 (4), Channel 46 (2), Channel 47 (4), Channel 48 (1), Channel 49 (2), Channel 50 (4), Channel 51 (4), Channel 53 (1), Channel 67 (4), Channel 68 (1), and Channel 69 (1). On this occasion the scan system on my digital receiver was loaded with antenna movement punching numbers in and out at rapid rate. In fact locked in my system now has up to 6 decoded signals on same channel. For example Channel 50 has 50-1, 50-2, 50-3, 50-4, 50-5, 50-6, 50-7.

Even though I did not log any super distant loggings there was a lot out to 400 miles or so with

many good days with hours of DX. Mild quiet days and cool nights created ideal conditions. Also new WBTB 39 on air now (digital). Also had several lon network stations seen but never caught any city and state location as they decoded as for example lon 31 or some other numbers but no call letters noted so several mystery loggings. That's it for now.

Dennis Park Smith

3605 San Remo Dr Santa Barbara, CA 93105-2523 Telephone (805) 687-7803 24-hour PST (now standard time, for only 4 months)

This report is from November 3 to December 13, 2013.

It has gotten colder. Tropo has tapered off to only a little at times, but mostly none. Ocean water temp Nov 5 to 62F/17C, steady until Nov 25 down to 61F/16C. Dec 6 to 59F/15C. Dec 11 down to 57F/14C.

Air temps highs mid Nov up to 80F/27C, then tapering off, by mid Dec barely 60F/16C. Lows steady 50F/10C until Dec 10 morning touching 32F/0C.

Distances are approximate. So-Calif tropo ducting to San Diego/Tijuana/Tecate from 175 mi/280 km up to 220 mi/350 km SE:

Nov 3 – 5	None	Cooler, low pressure	
Nov 6 – 7	Poor	Warm, breezy, hi-press.	
Nov 8 – 15	Var. poor-fair	Warm, stable, hi-press.	
Nov 16 – 24	None	Cool, unsettled, lo-press, some	rain Nov 20-22
Nov 25 – 27	Var. poor-fair	Cool, stable-barely	
Nov 28 – 29	None	Unsettled, some rain Nov 29	
Nov30-Dec3	Poor	Mild, stable, hi-press.	
Dec 4 – 11	None	Colder, some rain Dec 7	
Dec 12 – 13	Poor Ju	st a tad warmer	

Local analog KZDF-LP 8 Santa Barbara has been translator via satellite of KEMO-TV rf 32 "50" Santa Rosa/San Francisco (Azteca America). In late Oct KZDF lost its satellite signal, and as of Nov 13 has been completely off air. (..forever? Ihopelhopelhope)

To the WTFDAer in nearby Goleta: I misplaced your phone number. Could you give me another call? Apologies.

Best of DX to All Dennis

CPB Board hears troubling predictions for spectrum auctions and repacking

Published on Current.org, December 10, 2013

By Dru Sefton

CPB Board members got an ominous preview Monday of the corporation's upcoming white paper about spectrum issues in public broadcasting.

At a meeting at CPB's headquarters in Washington, D.C., Harry Hawkes of Booz & Co.'s media and technology practice told board members that if the FCC goes ahead with plans to clear 120 MHz of spectrum for use by mobile devices, 110 to 130 pubcasting stations will need to shift due to repacking even if their operators don't participate in the auction.

"That means that one-third of the system could have to change channels," noted Vincent Curren, CPB's c.o.o. "This will likely be more disruptive than the digital transition. This will be a major undertaking for our industry over the next several years."

CPB commissioned the white paper, due out early next year, to inform policy discussions within the system about spectrum issues. The FCC announced last week that spectrum auctions will be conducted in mid-2015; repacking of the remaining bandwidth is expected to occur soon after. CPB SVP Michael Levy said the corporation will soon use the Booz data to compose a letter to "communicate our concerns and sense of opportunity" to new FCC Chairman Tom Wheeler, along with members of Congress, national pubcasting partners and stations.

Those concerns include <u>reimbursements to pubcasters</u>. While Congress has set aside \$1.75 billion of auction proceeds to repay all broadcasters for costs associated with the disruption, translators are not covered, Hawkes said. He estimated that 200 to 250 low-power pubcasting translators for rural areas may need to move to new channels at an estimated systemwide cost of \$3 million to \$4 million.

Pubcasters in several states are "highly reliant" on translators, Hawkes said, such as Utah, New Mexico, Wyoming, Idaho, Colorado and North Carolina.

Beyond the translator issue, pubcasters continue to struggle with decisions regarding spectrum, Hawkes said. So far, Booz representatives have interviewed more than 40 station executives, and nearly 90 stations participated in a dynamic-inquiry webinar on the topic.

Booz is discovering that pubTV executives "vary in their understanding" of spectrum auctions, Hawkes said. Many are concerned because there is "no consistent way of gauging whether an auction will occur in their market," which depends on where wireless companies want spectrum, he said.

While some pubTV stations are open to participating in the spectrum auction, Hawkes said, "most believe that continuing to offer multicast channels and over-the-air content is critical" to the mission of public broadcasting.

Some pubcasters are considering an option offered by the FCC option to shift their signals to VHF; others are concerned about interference and broadcast quality in that lower band, Hawkes said. Stations are also curious about the option of channel sharing, for which they would sell part of their spectrum and partner with nearby broadcasters to share signals.

CQ to realign publications

CQ Communications, Inc. has announced plans to realign its roster of publications and to launch an exciting new online supplement to its flagship magazine, **CQ Amateur Radio**.

"The hobby radio market is changing," said CQ Communications President and Publisher Dick Ross, K2MGA, "and we are changing what we do and how we do it in order to continue providing leadership to all segments of the radio hobby." CQ Communications is currently the only publisher in the United States serving the broad radio hobby, from broadcast band DXing to amateur radio moonbounce and satellite communications. CQ itself has been amateur radio's leading independent

voice for seven decades.

Effective with the February 2014 issue of CQ, said Ross, content from the magazine's three sister publications, Popular Communications, CQ VHF and WorldRadio Online, will be incorporated into CQ's digital edition as a supplement to be called "CQ Plus." With this change, hobby radio enthusiasts of all types will be able to go to a single source - CQ - for articles on the broader aspects of hobby radio, from shortwave listening and scanner monitoring to personal two-way services and Internet radio, as well as amateur radio. Richard Fisher, KI6SN, currently Editor of both Popular Communications and WorldRadio Online, will be Editor of CQ Plus.

"Our primary audience is ham radio operators," explained Ross, "but very few hams began their radio involvement as amateurs. Most of us started out as shortwave listeners, broadcast band DXers, CBers or scanning enthusiasts. Many continue to be involved in many different aspects of the radio hobby in addition to amateur radio."

"By consolidating four specialized publications into one," Ross continued, "we will be better able to keep these multidimensional readers informed on all aspects of the radio hobby while simultaneously exposing those who are not hams to all the excitement and opportunities that amateur radio has to offer. We see this as a win-win for all of our readers and our advertisers, who will now be able to reach a wider and more diverse audience."

The expanded material will be an integral part of the digital edition of CQ, and will be included as part of a standard digital subscription. Each month's digital edition will simply continue beyond where the print edition ends, offering supplemental material on all aspects of hobby radio communication and will include selected columns carried over from the other magazines. The added digital content will make full use of the multimedia opportunities presented by digital publications.

Current subscriptions to Popular Communications, CQ VHF and WorldRadio Online will be converted to CQ subscriptions - and receive CQ Plus at no additional charge! Details will be posted on each magazine website.

Regulator wants viewers to talk about the future of Canadian TV

By Terry Pedwell, The Canadian Press October 24, 2013

OTTAWA - The country's broadcast regulator wants Canadians to help it predict the future of the ever-evolving television industry. The Canadian Radio-television and Telecommunications Commission has opened what it hopes will be a month-long dialogue among Canadians about how they watch TV. In particular, the regulator urges participants to imagine how they'd like to watch television in the future. CRTC chairman Jean-Pierre Blais says he understands that viewing habits have already been dramatically altered through the distribution of programming online and on wireless devices.

But what about the future? "Many still enjoy network-scheduled programming on their TV sets, but the viewing habits of many others are changing," Blais said in a statement.

"Let's Talk TV: A Conversation with Canadians, is an opportunity for all Canadians to tell us what they think of their television system and how they would like to see it changed." The "Let's Talk TV" campaign will certainly also focus on the Harper government's proposal to introduce so-called pick-and-pay cable and satellite television services, aimed at allowing subscribers to select and pay for individual channels. Last week's speech from the throne outlined how the government wants Canadians to be able to choose the channels they want to watch, without having to pay for the ones they don't. The CRTC expects it'll get an earful on the issue, said Blais. "We've been hearing some frustration from Canadians for some time about the costs of cable and satellite," he said. "So I wouldn't be surprised if Canadians came to our conversation and raised issues related to that as well."

The regulator wants to hear by Nov. 22 what people think about what's on TV, how they receive programming and whether they have enough information to make good viewing choices.

From the: June 1, 1954 Buffalo, NY Courier-Express

Radio and TV

LOCAL DX CLUB ORGANIZED

One evening last week a bespectacled man with a penchant for television DXing (long-distance tuning) sat in his living room and watched a program called "The Ch 2 Soda Shop" The program was originated, from Deliver, Colo., and the man in the Buffalo living' room (Kenneth Bush of 60 Grace St.) noticed that the variety show devoted a great deal of time to acknowledging letters from other DXers who watched it from long distances.

On 'the spur 'of the moment,.Ken Bush placed a call to KFEL-TV In Denver and told them he was receiving a clear audio and visual Signal of the program here.

On receiving the message, the emcee of the "Soda Shop" literally jumped up and down, saying, "That's the farthest distance we've had a report from yet!"

Bush had hardly hung up his Denver call when his phone buzzed again. On the other end of the line was Thomas Carberry of 53 Fries St. in Tonawanda. Coincidentally, Carberry had been watching the same program and it took a Denver television station to Introduce two DX fans In this area to one another.

It was then that the two men—along with DXers Kenneth Stoll of 421 East St. and Art Collins of 68 Amber St.— conceived the idea of forming a club founded on their mutual interest. They are now attempting to contact all DXers in the area who would like to become members of the club for purposes of exchanging information on favorable conditions, logs and other data. They will also publicize Information of new stations which have been reached by members, exchange DXing hints and discuss boosters and equipment. The four charter members are enrolling fans at their home addresses and with an eye on 13- year old Donald Voegele of Lancaster, whose DXing exploits were reported in this column last week—stress the fact that there is no age limit for membership in the club.

Among these four DXers alone, 134 long-distance stations have already been logged. Collins reports 45 VHF and two UHF stations; Bush, 34 VHF; Stoll, 27 VHF and two UHF; and Carberry, 23 VHF and one UHF.

"People don't really need expensive installations to get into this hobby," Ken Bush explained, "but, of course, the more you do put into it, the more results you get."

Asked to put into layman's language the principles which make DXing possible, Bush explained that wave propagation (by which long-distance TV signals are transmitted) is brought about by the changing conditions in the atmosphere, troposphere and ionosphere (second and third layers of the atmosphere). Quite frequently, technical writers claim that solar changes are responsible for an influx of signals.

The VHF television signal, as it is transmitted, is generally not supposed to travel more than 40 to 60 miles because, after that distance,, the signal continues out in a straight line into space. As it does not follow the curvature of the earth, It is not picked up by the receiving antenna.

When these waves of signal reach the atmosphere and penetrate to the tropospheric layer, they reflect along this medium and curve back to earth. They are then picked up on the receiving array and the distance viewing potential is about 500 miles. As this particular type of reception increases with signal frequency, it is most often received on channels seven through 13. In other cases—also depending on weather changes, barometric changes brought about by atmospheric pressure variations, time and season — transmitted signals enter space and ionosphere E layer, roughly 50 miles above the earth's s u r f a c e . The signals bounce off heavily ionized particles and return to earth at the rate of 300 to 1,500 miles a skip. Under extraordinary conditions, multiple hops will bring signals from the transmitting antenna. These signals are found, particularly during the months of May through August, jamming channels two through six and can be very easily recognized by their intensities, which often produce a picture q u a l i t y comparable to that from local channels.

These intense signals are also characterized by sudden appearances and abrupt departures. They sometimes remain on the screen for only a matter of seconds.

All told, DXing requires a little luck and a great deal of patience and time in monitoring a TV set during favorable hours and weather conditions. Late night hours generally seem to yield the best conditions, so many of the fans lose a great deal of sleep in pursuing this unusual hobby.

T-Mobile 600 MHz study shows LTE can share channels with nearby TV stations

December 18, 2013 | By Tammy Parker

T-Mobile US (<u>NYSE:TMUS</u>) says its research shows that LTE networks could operate side by side with co-channel, broadcast TV signals even in some of the nation's most densely populated areas.

LTE services can operate "in the presence of co-channel, over-the-air television operations in geographically nearby market areas, even in a region as densely populated as the northeastern United States when sufficient terrain and distance separation exists," said T-Mobile in an *ex parte* filing with the FCC.

The filing referenced a Dec. 13 meeting involving T-Mobile legal and technology policy executives Kathleen Ham, Steve Sharkey and Chris Wieczorek, They met with numerous FCC leaders from the Incentive Auction Task Force, Wireless Telecommunications Bureau, Office of Engineering and Technology, and Media Bureau. Also participating were representatives of technical consulting firm Roberson and Associates, which prepared the study for T-Mobile.

The point of the meeting was to examine T-Mobile's research regarding co-channel and adjacent channel interference and consider ways the FCC might open up spectrum for cellular communications even when in-market TV stations are operating on nearby airwaves. T-Mobile's test results appear to support use of market variability in the band plan being designed the upcoming 600 MHz incentive auctions of TV broadcast spectrum. Market variability could come into play if the FCC recovers different amounts of TV broadcast spectrum in different markets.

T-Mobile's co-channel analysis looked at some 10,000 cell sites and 18 television stations in and around New York in a total of 19 Economic Areas (EAs). The operator said its analysis revealed that while "most broadband LTE cell sites in the New York EA would experience interference from inmarket television stations, LTE cell sites outside of the New York EA would exhibit considerably less interference."

FCC service contours of 18 TV stations near New York City. (Source: T-Mobile / Roberson and Associates)

In fact, the operator found that cell sites in the majority of markets outside of the New York EA would be largely or entirely unimpaired as a result of co-channel TV operations inside the New York EA.

T-Mobile suggested it may be possible to "accommodate a small number of different regional band plan variations, where regional EA clusters have the same bandplan (sic)." The operator said this is not the most desirable scenario but may be necessary "if insufficient spectrum is recovered nationally in the incentive auction."

Broadcasters have opposed the market variability approach, saying it would entail a host of engineering challenges and could produce harmful interference to broadcasters as well as wireless operators because the two groups would end up sharing channels in adjacent markets.

In comments and a <u>presentation</u> submitted last summer to U.S. Rep. Henry Waxman (D-Calif.), Rick Kaplan, executive vice president of Strategic Planning of the National Association of Broadcasters, contended that if channel 47 were licensed to a high-power TV broadcaster in New York and also licensed to a wireless operator in Philadelphia or New Haven, Conn., there could be significant interference between the services unless "significant mitigation techniques" such as large geographic separation between the services, were undertaken.

Although T-Mobile discussed licensing services based on EAs and regional EA clusters, the ultimate 600 MHz band plan might offer licenses for even smaller geographic areas. The Wireless Telecommunications Bureau is considering an approach <u>advocated</u> by the Competitive Carriers Association, which wants 600 MHz licenses to be issued for Partial Economic Areas (PEAs) rather than the larger EAs. The bureau is soliciting public input with comments and replies due next month.
