AUGUST 2014

### THE END OF E-SKIP?

Here we are heading into August and as I write this and look at map at DXMaps, I see plenty going on in Europe but not much going on here. But that's the way it goes in late July. Skip tapers off and hopefully gets replaced by tropo and I've already seen some good reports of it in the Midwest.

Did you have a good Es season? If you live in Ontario, you probably did. And if you had the time to stay by your receiver all day you probably did. I had very little time to do any DXing this summer and missed at least two big openings. If you want time to DX, don't ever retire because when you do retire, you won't have any.

### MEMBERS AND MORE

This month we welcome Dr. Carter Bays to the club. Carter lives Columbia, SC. His main interests are analog and DTV DXing and uses an Antennas Direct XG91 (which is what I also use) along with an Insignia converter box.

Renewals were received this month from Jeff Kruszka, Fred Laun, John Adams, David Austin, Gray Fulk, Tim McVey, Gary Siegel, Dave Bright, Al Tobia, Duane Whittingham, Eric Sundius, Stan Weisbeck, John Marx, David Sinclair, Mike Lazaro, David Braun, Bob Rush, Doug McAbee, Jim Thomas and Rob Ross. Thank you all for your support of the WTFDA!

Gary Siegel writes "Enclosed is a \$10 money order to continue membership in the club via the e-zine computer means. Not sure how well this will work for me but I get where things have gone. Will certainly miss the VUD in printed form. I actually miss it already. What with no skip this season (it basically gone from TV) – not missing much, I guess. Will want to stay in touch with other DXers."

### INTERESTING PICTURE

If you have ever been to the WTFDA website (the wtfda.org website) you may have come across a photo of dxers at the 1957 AIPA convention. A man by the name of Larry Vehorn saw the picture and wrote "The photo was taken in front of our garage. I hosted the '57 AIPA Convention in Indianapolis. I had the "welcome" sign painted locally and handed it to Carl Lupton who hosted the '58 convention. Most guys in the photo are

gone now but a couple of us are still around. Our family TV was set up in the garage. The tuner was well used but survived the weekend. The CE of WFBM-TV (now WRTV) visited us, then invited everyone to a tour of the studios downtown." And now you know the rest of the story.

### LIKES THE FM DATABASE

We received an email from a user of the WTFDA FM Station Database that read "Thank you so much for putting the FM database together! Ever since 10000watts.com became so expensive a few years ago, finding a good database to reference has become a challenge. This looks like a great setup." –ds. I thanked the user for his kind words and he now has become a source for some good info in his part of the country.

Our database has been up just over a year now and covers not only the US and Canada, but Mexico, Cuba and the Cayman Islands. We've had about 15,000 visits to the site with around 2,000 being return visits.

### THE CUBAN ANALOG SHUTDOWN

Here's the latest information on the shutdown of Cuban analog TV. It was supplied by Bill Hepburn on the WTFDA bulletin board and "Raymie" on the WTFDA Forums.

Cuba? Digital television? Why yes!

You might recall that Cuba is using the Chinese DTMB standard, but there was still a lot we didn't know. Channel spacing and allotments, whether Cuba actually had DTV on the air and other matters were all unknown.

Well, I hit the jackpot between the ICRT site and that of state organism LACETEL, the self-described "Institute for Telecommunications Research and Development". Here's what we now know, both about DTV and changes to Cuban broadcast services:

- Cuban DTMB will be using NTSC channels in high VHF (7-13) and UHF (14-51) as outlined in [the standards](#) (which are in English!). All currently assigned transmitters are on UHF. [A list of these transmitters is available](#); only two are set up for HD at this time.
- And to receive these signals via tropo you'll need a converter box. [Pretty much all of the](#)

[available equipment is being made by Chinese firms.](#) I have no idea how someone in the US would go about procuring one legally.

- The DTV service includes three new state channels: Cubavisión Internacional, Canal Infantil (kids' shows) and Canal Clave (music), as well as weather and data broadcasts and six radio streams. Canal Clave does, however, mean the end of the music channel that's taken over CE in past summers.
- Speaking of which, Canal Educativo 2 now simulcasts Telesur 20 out of 24 hours a day (airing its own shows only from 4:30 to 8:30 pm).

### RADIOSEARCHENGINE.COM

Thanks to Jim Thomas, here is an email received from Michael Robertson of the RadioSearchEngine site:.

I was referred to you by Jim Thomas who suggested I make contact with you and alert you to our services which may be of interest to WTFDA.

We offer a search engine which tracks radio stations in real-time for what song they're playing. We have data on most stations. This is a free service available at [radiosearchengine.com](http://radiosearchengine.com).

The DAR.fm (<http://dar.fm>) services lets people record radio stations from around the globe. We have about 40,000 stations in our system. Users can record one station for free or up to five for \$40 per year.

Jim says he finds these services useful to identify stations he's getting over the air because he can search for the song or compare the recording. I hope you'll invite your members to check them out.

Also, I made a coupon code for dar.fm available for WTFDA members. They can get 10% off any subscription tier by using the coupon code: DAR10off during the check out process.

### VIZIO IS YOUR PAL

Here is an email from Cal Glover on the beach in NC: "Another update on my new Vizio HDTV and its many hidden talents. My SCART connector finally got here from China, and I hooked it up to give me an extra composite video and audio outputs. When I hooked up the TV and vintage multi-system VCR with RCA cables, I found that it not only displayed beautiful PAL (European PAL!) pictures, but it also displays fine-looking SECAM (both French and MESECAM). So it looks like the "world chip" still lives in the video sections of these sets. An added bonus—thanks to the set's 120 Hz refresh rate, the traditional 50 Hz Euro-flicker is gone.

Even though VCRs output relatively grotty SD pictures, it's very easy to notice the difference in picture quality that the 80 extra lines (576 vs 480 lines) make in PAL and SECAM. To say the least, I'm tickled.

### NEED A DVR?

This was received on 7/24 from Gary Hickerson...

Introducing the new 1TB model DVR+ from Channel Master. Pause live TV, skip, fast-forward, rewind and record / store 160 hours of your favorite shows with the 1TB model DVR+'s internal 1-Terabyte hard drive. The new 1TB model DVR+ eliminates the need to attach an external USB hard drive for full DVR functionality.

Available today from Channel Master and Best Buy, the new 1TB model DVR+ provides all of the same features and functionality as the 16GB model DVR+, including dual tuners for watching one program while recording another, and access to streaming services and an enhanced 14-day channel guide with an Internet connection absolutely subscription-free. No contracts, no fees, no obligations.

Tired of missing your favorite programs when you're not at home? Ready to free yourself from those pesky VCR tapes? The DVR+ from Channel Master is your answer for a better antenna TV viewing experience.

And of course we are not endorsing any product mentioned in this column. They are mentioned here for informational purposes only.

### PERSEUS FOR SALE!

Bill Nollman put this ad on our email lists (and other places). Since many of you also do some AM DXing in the winter, you might be interested...

Bought 5 years ago and used often but not a lot. Non-smoking house. The unit itself is in near mint condition. Includes SDR, box, US power supply, USB cable and home made dual end Y cable for running from laptop power. Paid \$1200, now selling for \$999, asking \$850. I'd prefer to sell it to someone in the US but if it's not too much of a hassle will ship anywhere if you are willing to pay shipping and insurance.

I also have a Dientronik 88-108MHz FM downconverter if interested.

Please email me offlist at [billct@comcast.net](mailto:billct@comcast.net).

### AND FINALLY

I just have to thank the rest of the board of directors for their generous "retirement" gift of the Elad S2 SDR. Over the past fifty years I've owned (and modified) more FM receivers and tuners than I can count. I've had them all, or close to it. I'm not joking when I say that the Elad SDR is the best receiver for FM that I've ever owned, and that includes the XDR-F1HD. This receiver has everything a DXer would want in a receiver. But it doesn't have HD. But then, who cares about HD anyway. Thanks Greg, Keith and Doug. CU next month.

The three new WVPYs in Virginia are additional transmitters for a Distributed Transmission System. The official cities-of-license are all Front Royal, Virginia – the cities I'm listing are the largest communities within the new transmitters' coverage areas.

These three transmitters join an existing 150kw transmitter on the same channel near Strasburg, Virginia. The same WVPY call letters apply to all four transmitters.

ON Brechin	96.9	APP	25 kW/88 m DA, 44-39-40/79-05-58; Class B1; \$ [
ON Temagami	106.1	CBEU-FM	50 W/16 m, 47-04-08/79-47-16; Class LP; Mono [would convert from 1340 kHz]
ON Toronto	96.7	CFZM-FM	100 W/280 m DA, 43-38-56/79-22-54; Class A; \$ [would be a nested repeater for CFZM-740 kHz]

### DENIALS AND DISMISSALS

QC Percé	91.9	CKRJ-FM	440 W/362 m, 48-31-36/64-14-37; Class A; \$ [Radio du Rocher Percé inc.]
----------	------	---------	--

### — OTHERNEWS —

BC Salt Spring Island	107.9	CFSI-FM	License renewed, but for only one year due to continual issues of non-compliance. Mandatory orders were issued requiring the owner (Satnam Media) to comply with conditions of license at all times.
SK Prince Albert	107.1	CIAM-FM22	Extension application granted to August 31, 2015 to get this new 50 Watt partial repeater of CIAM-FM 92.7 Fort Vermillion on the air

### NEWS ITEM: Pattison Expanding into Northern Alberta and Saskatchewan

(Kamloops, B.C.) - The Jim Pattison Broadcast Group Limited Partnership and Rawlco Radio Ltd., subject to CRTC approval, jointly announced Pattison's acquisition of nine radio stations (and related assets) located in Northern Alberta and Saskatchewan. The stations involved in the transaction include: CIUP-FM 99.3 and CKNO-FM 102.3 in Edmonton, Alberta; CFMM-FM 99.1, CHQX-FM 101.5 and CKBI-900 in Prince Albert, Saskatchewan; CJHD-FM 93.3, CJCQ-FM 97.9 and CJNB-1050 in North Battleford, Saskatchewan; and CJNS-FM 102.3 in Meadow Lake, Saskatchewan. Rawlco Radio will continue to hold their existing seven radio licences in Saskatoon, Regina and Calgary.

NEWS ITEM UPDATE: Back in November 2013, we had a NEWS ITEM concerning KIMI 107.9 Humboldt, NE. The station was originally licensed for 6.1 kW-V/82 m at 40-13-55/95-58-17. They were granted a CP to move to 107.7 with 50 kW/124 m at 40-56-56/95-45-28 Class C2, plus change City-of-License to Sidney, Iowa. After construction of the tower and antenna was completed, and KIMI was conducting Program Tests, the Federal Aviation Administration intervened. Their concerns the new transmitter's location being only 12 miles away from Offutt AFB at Bellevue, Nebraska, and the new facility, being inline with Runway 30's final approach, would cause interference to the Instrument Landing System (ILS) frequency (109.5) leading aircraft to Offutt's Runway 30. KIMI then operated with an STA with 500 Watts from the new tower. The FCC has now issued a modification to the CP downgrading the power to 13 kW (they added H polarization) at 124 m Class C3 at the new site. In addition, KIMI has changed the City-of-License to Malvern. At this time . . . that's the latest scoop.

Thanks to Shawn Axelrod, Tim Noonan, Ralph Strobel, Dan Sys, Radio Insight, Radio World Online and Upper Midwest Broadcasting for news. If you hear any changes occur on your FM dial, share the news! 73

## Madison-Milwaukee DX Get-Together

The 21st annual Madison-Milwaukee Get-together for DXers and Radio Enthusiasts returns to Madison this year, after the highly successful gathering in Oak Creek, WI last year. This year's event will be held on **Saturday, August 16** from **1:00 to 11:00 PM**. The WTFDA's Bill and Nina Dvorak are this year's hosts, and the location will be at their home, **3358 Ridgeway Avenue, Madison WI 53704-4327**.

This all-band event has for many years been a popular destination for Upper Midwest WTFDA members. In fact, if you would like to get a little flavor of a recent GTG (and see who from the WTFDA attended), there is a recap of the 2012 event in the October VUD of that year, pages 46-47.

For more information on this year's event, please e-mail Bill at [dxerak@gmail.com](mailto:dxerak@gmail.com) (please include "Madison DX GTG" in the subject line), write him at the above address or phone him at 608-244-5497.

We hope to see you in Madison on August 16!

Ah, the good old days. Yes, more from the analog files of Ed Phelps, Benton, KY:

73's, JEFF

# Coast to Coast TV DX

Featuring reports from the entire United States and all of Canada.

Send reports by the 15<sup>th</sup> of each month to:

Nick Langan

1040 Riverview Drive

Florence, NJ 08518

E-mail: [nickl@wtfda.org](mailto:nickl@wtfda.org)

## *The Editor's Note*

Outside of some cameo appearances, the 2014 E-skip season looks to be close to completion at this point, and although it had its moments, below average activity overall would be its most conclusive verdict. As often can be the case, early July had the most Es activity, with a major opening on July 6 producing hours of high MUF Es in the middle portion of the continent and eventually moving westward. There were some more unusual endpoints reported (at least compared to recent years) throughout the month, including fairly strong openings on the 15<sup>th</sup> between the Canadian Maritimes and the Northern Great Lakes, and the Pacific Northwest and the Canadian Prairies. Overall though, every time it seemed like the season was about to get into a "groove", it wobbled off the proverbial rails. There's always next year!

This column goes to press as one of the stronger tropo events in quite some time has been ongoing across the mid-south into the Great Lakes. Paths reported on the 24<sup>th</sup> through 26<sup>th</sup> include from IL to AL and GA, KY to NC and VA, and MI and Ontario to AL and MS. The eastern half of the continent has been embedded in an overall cool weather pattern for this time of year, but as brief infiltrations of warm air filter in out ahead of the seemingly endless parade of incoming cool fronts, there may be more chances ahead for good tropo as we head into August.

### **Glenn Hauser**

PO Box 1684  
Enid, OK 73702

[wghauser@yahoo.com](mailto:wghauser@yahoo.com)

<http://www.worldofradio.com>

all times and dates strictly UT = 5 hours ahead of  
CDT, 6 hours ahead of CST

\*\* OKLAHOMA. Area tropo enhancement brings RF21, June 24 at 1412 UT. HSN is decoding with antenna south; what's this?! NO PSIP ID, just blank for 21-1, but has three more also blank: 21-2 with religious talk by FRANCES on the set, only clue being an email address to JSM.org; 21-3 is black with "No video input" and rapid digital clock in the UL including frames zipping by, just like we sometimes see on Enid public access TV, like 16:21:28.25 etc. (not the current time but the number of hours+accumulating that there has been NVI!) However, there is JBA modulation, can't make it out, but sounds like the fully modulated 21-4 with an ad for mops & buckets. W9WI.com reveals what this is: KTOU-LD, 4 kW ERP in OKC, but he has only 21.1 with HSN.

JSM means Jimmy Swaggart Ministries, but the sinful bawler's TV channel is called SBN = Sonlife Broadcasting Network. So I enter an OKC zipcode in the Channel Finder, <http://jsm.org/channelfinder.html> and what do I get? Only cable and satellite providers! They are so incompetent they don't even know, or want us to know that they are on air 21.2 in OKC.

As for HSN, what in the world is the point of putting it on this LPTV, when it is also on RF 50 Ion's fullpower 62.6 in OKC?? So I still don't know what programming is supposed to be on 21.3 and 21.4 from KTOU. Who owns this sorry excuse for a TV station, anyway? FCC TV Query shows Mako Communications LLC, in Corpus Christi TX.

Had almost forgotten, but previously logged KTOU on 21 with HSN as in DXLDs 10-30, 11-03, 11-06, 11-07, 11-09, 11-23 shortly after their DTV transition.

While I have this in from OKC, I also check the other listed LP channels: "bad" signals on 19, 36, 45, 46 (Norman) --- of course could be from somewhere else like 45 Tulsa or Wichita; and NO signals on 17, 41, 48 (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* OKLAHOMA. RF 26, June 24 at 1413 UT, KTENNBC on PSIP as 10-1, i.e. Ada's station which is rarely seen here, altho nor far beyond OKC. Also KTEN-CW as 10-2. W9WI.com also has ABC on 10-3, but I didn't find it. Back in the day on analog 10 only, KTEN was a joint ABC/NBC affiliate which led to all kinds of scheduling problems, especially prime-time.

Same market for CBS is KXII-12, originally Ardmore but today listed only under Sherman TX across the river; now only a bad signal from it(?) still on RF-12. Transmitter site is still in OK between Ardmore and Durant north of Lake Texoma (Glenn Hauser, Enid, DX LISTENING DIGEST)

Sporadic E, analog TV DX June 24, UT:

1830 check, no DX, but:

2055 on 2, 3, 4, now there are some signals, CCI, more or less from the southwest

2103 on 4, novela? with Azteca-13 bug UR; loud audio

2104 on 3, World Cup football

2105 on 5 and weaker 6, algo video

As this point FM DX may be in, so switch to that on the porch; see U S A. After some FL stations fade out, back to TV:

2140 on 2, CCI, Spanish from south and algo on 3

2155 on 2, Televisa Espectáculos, from SSW? Clock in UR

2159 on 2, clip of Patrick Stewart guesting on Jimmy Fallon, in squeeze-o-vision

2200 on 2, entertainment magazine, clock in UR says 17:00 = CDT; no bug visible in LR; algo in LL

2202 on 2, tentatively Gala swirl bug in LR

2250 on 2, soccer fades in weakly

2302 on 2, ads, Azteca-7 Mundial promo (which could be on Azteca-13), Cámara de Diputados federal PSA; nothing more.

More feeble Es, June 25, UT:

1603 on 2, algo from south CCI

1623 on 2, football made out among the weak CCI; Mundial presumed

1650 on 2, YLs in studio chat show, CCI

1709 on 2, Azteca-7 bug in UR during football

weak signals in & out for the next hour or so (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* MEXICO. Fitful sporadic E poking MUF barely into channel A2, June 26, UT:

1424 on 2, weak CCI peaking about SSW

1433 on 2, animation with Televisa-5 net bug in LR

1454 on 2, panda character visible (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* MEXICO. Not much Es to be seen lately as I let the analog TV set snow away on channel A2, until, UT June 28:

2217 on 2, video from the west fades in, to go with indications on the 6m ham map; soon gone again

UT June 29:

0025 on 3, Spanish from the WSW; square bug in UR with italic bold 3 in white/light; at a fade-up I can see it's XHBC Mexicali with call letters on the left side, running upward on their sides. Also smaller

lettering in a rectangular block on the bottom side of the square; during a ghostly movie; 0028 ads, including mention of ``en ambas Californias`` which is a dead giveaway for XHBC, and Notivisa promo, which also is.

0025 on 2, also something on this channel; 0035 Spanish, Televisa-2 star bug in LR with game(?) show, and nothing on 3 at this time. No more monitoring this evening (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* MEXICO. Sporadic E opening, UT June 30:

0044 on 2, from WSW in Spanish, novela, Televisa net-2 star bug LR

0058 on 2, now heavy CCI here

0104 on 2, Gala swirl bug in LR, i.e. Televisa net-9  
0105 on 4, local? Music show; Azteca-13 bug in UR (these two typical of Hermosillo, Sonora); after a SW/FM monitoring break, back to TV:

0143 on 2, video from one, audio from another; Gala net-9 promo

0144 on 3, ad for Q resort; glimpse of Stars & Stripes, maybe aimed at Americans for July 4th (later seen definitely on XHBC Mexicali)

0145 on 4, algo, MUF up to here; soon see Televisa-2 star bug LR, and lucky!!! Just before 0146, also white super local ID upper left:  
CANAL 4  
LOS MOCHIS, SINALOA  
29-06-14

Of course, came and went too quickly to get a photo. Unusual for these to include the date? I have presumably seen this station a number of times before; it's really XHBS-TV, 100 kW.

[At this point I also get some FM DX; see USA: 88.3]

0153 on 2, Gala bug in LR

0154 on 3, XHBC bug in UR: it's the dark blue square with a bold white italic 3 in the middle in a circle; left border, XHBC letters on their sides reading upwards; across the bottom in tiny font, MEXICALI-CALEXICO. Something else at the top may have been cut off by overscanning. At same time, generic Televisa squashed-oval bug in LR. With news anchor? Caption reads CARLOS ARGÜELLO / STUDIO C MEDIAWORKS.

0158 on 3, large on screen: TELEVISIA / BAJA CALIFORNIA; `Hola Mexicali` program promo for 2 de julio.

Photo of N logo of Notivisa on snowy XHBC picture at 0202: <http://www.w4uvh.net/xhbc4.jpg>

0203 on 5, briefly Azteca-13 bug LR, no doubt XHAQ also Mexicali

0204 on 3 and onwards, lengthy interview by leggy woman with Eva Longoria, all in English with open Spanish captions. Eva explains that she's of Mexican heritage but a ninth-generation American

from Texas; parents speak Spanish to each other but not to her; is snow free much of the time, but heavy ghosting.

0205 on 3, photos of XHBC (sorry, my monitor is ``folding over`` at the top of screen, but you can still see the ``3`` bugs in the UR)

Eva by herself:

<http://www.w4uvh.net/xhbc4.jpg>

Eva with leggy interviewer:

<http://www.w4uvh.net/xhbc5.jpg>

Eva interview with Spanish caption:

<http://www.w4uvh.net/xhbc6.jpg>

To be added to

<http://www.worldofradio.com/tvdxfoto.html>

0206 on 3, Eva iv interrupted for ``Somos Amigos del Aire`` XHBC-3 promo, anti-pollution? federal PSA; Copa promo

0219 on 3, after another commercial break, cut back abruptly to Eva iv in progress as if there were not any natural breaks in it; prompted by the interviewer, she is lamenting how tough it is to be both beautiful and bright. Then fade out for a while

0224 on 2, two stations at same offset CCI from SW; one with a pasodoble, dance competition show? on Televisa-2 net

0227 on 3 & 4, algo

0228 on 3, poor signal about the Copa from Televisa Deportes

0247 on 3, XHBC fades back in, still the interview with Eva Longoria

0248 on 3, ad on XHBC for Q – Quechan Casino Report (which is not in the Andes, but Winterhaven CA, across from Yuma AZ)

0254 on 3, XHBC audio mixing with something else, football?

0320 on 3, XHBC still in poorly

0358 on 2, bit of f-bug in LR from SW, i.e. Televisa-4 net  
(Glenn Hauser, OK, DX LISTENING DIGEST)

\*\*\* MEXICO. Another Sporadic E opening, June 30 UT:

1406 on 2, f bug in LR from south, i.e. Televisa-4 net or relay

1415 on 2, TELEACTIVA bug in UR, i.e. XEFB-TV, Monterrey NL

1416 on 4, algo

1435 on 2, talk show, Azteca-13 bug in UR

1445 on 2, nothing but CCI now

1507 on 2, Azteca 13 bug in UR, very poor

1529 on 2, TU CANAL bug in UR, 9:29 AM clock during detailed horoscope nonsense by YL, from Aries onward, i.e. XEPM-TV Ciudad Juárez, Chihuahua, still going at 1537

1540 on 2, local Ciudad Juárez ad; in `Hola, Juárez` show, with its large but lower-case j logo

Then I have to go out, but no Es noted on lower FM caradio (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* MEXICO. Bits of sporadic E above 54 MHz: nothing during the day on July 1, but snow-patrol on analog 2 set finally gets something July 2, UT:

0306 on 2, talkshow from TELEFUTURA bug in UR fades in weakly = XEFB-TV, Monterrey NL; also algo on 3

Bits of video continue to show occasionally on 2 past 0435, maybe same station. Some may be meteor bursts (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* MEXICO. On the lookout for sporadic E, antenna south, from 1430 UT or so July 3 until it breaks out despite nothing much on G7IZU 6m map:

1512 on 2, fade in algo from south

1520 on 2, Spanish promo ``en el siete``, so Azteca-7 net, most likely XHTAU Tampico; 1525 menacing robomonster animation, net-7 bug in UR

1550 on 2, animated ID for Azteca

1551 on 4, other animation from Televisa net-5, with bug in LR

1557 on 4, novela with Televisa net-2 star bug in LR, unID bug in LL; also 20 kHz offset CCI. At 1558 one of them supers across top of screen in big bright letters, XELN-TV4, which is 100 kW in Torreón, Coahuila, and which W9WI.com lists as with Televisa-5, and zero-offset, which if correct could not produce fine 20-kHz beat bars with anything else

1558 on 2, Aztecarioca studio show handling soccer ball, pre-game?

1559 on 4, Gala swirl bug in upper left, unusual, during novela. Only one listed in W9WI.com is XHGK-TV, 100 kW in Tapachula, Chiapas, but I am not convinced. But Bill Hepburn`s updated ch 4 map, <http://www.dxinfocentre.com/TV4.pdf> shows XELN-TV as Gala, rather than the number 9, and Chiapas remains cut off the map, too far south --- one more inch would cover all of Mexico

1612 on 3, algo, studio soccer; unID bug in UR

1616 on 3, Pingüinos de Madagascar animation, net-5 LR, so starting earlier than 11:30 am today

1641 on 5, exercising, Televisa net-2 star bug LR

1642 on 6, algo, studio talk

(I have also been monitoring 87.75, 88.1 and 88.3, but no MUF into FM)

1705 on 5, Pingüinos from Televisa 5

1710 onwards, opening diminishes, just in time for lunch

1748 on 2, still weak CCI and at times also on 3

1758 on 3, old-style movie credits, gunshots, must be western, seems opening rather than closing; bug in UR I can't make out.

1802 on 4, graphic reading BANCO CENTRAL -----; 1804 financial graph

1805 on 3, western is in again, hero in white hat but unseems El Llanero Solitario; unknown bug in UR, too close to corner

1810 on 3, Televisa-5 bug LR, animalation dubbed into Spanish, surely originally speaking English

1815 on 3, better view of them, a bitch and a dog --- rather like Lady & the Tramp? Haven't seen it in sesquidecades. No, dog is more wolfy than woofy, and so is she. Has rodramatic music score; 1817 Canal 5 promo, CCI

1818 on 4, still financial discussion audio at least; 1821, up to color briefly, host welcomes YL to ``her`` studio

1818 on 5, MUF back up to here weakly with algo ads

1831 on 3, wolves vs bears in feature-animation, // on 2, but less CCI on 3; definitely net-5 bug in LR, but this does \*not\* match their national schedule: <http://www.televisa.com/canal5/horarios/> with a series of half-hour cartoon shows

Weak opening still going on ch 2 and 3 as I wrap up this report at 1845 UT July 3 (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* MEXICO. Another analog sporadic-E opening is underway when I turn on and tune in at 1418 UT July 5:

1418 on 2, `Sabadazo` show bug in lower left, with segment from a beach, peaks southwest. Televisa-2 star bug in LR; audio CCI from rap/dance music in English

1423 on 2, now they've added an -o, so ``Sabadazoo`` as current guest is a parrot

1433 on 2, Sabadazo now features clown, and girl with teeth braces

1436 on 4, algo with loud audio but hardly any video. This takes some doing, considering the 4.5 MHz MUF difference. I've long suspected certain Mexicans are still running 2:1 video/audio power ratio, analogically abandoned long ago in USA for 5:1 and then 10:1. It's // something in the CCI on 2

1457 on 3, Grupo Pacífico oval 3 bug in UR, so XHQ Culiacán, Sinaloa; 1459 organ donation PSA/promo, finishing with animated YO CREO

1502 on 3, ``Grupo Pacífico`` audibly mentioned, 1503 DTV promo explaining about converters. So how much longer will XHQ remain DXable on analog 3? Until November 26, 2015 according to: <http://tvdxtips.com/mexcitylist.html>

See also map at <http://www.tdt.mx/tdt/> But it must be outdated as claims already shutdown analog May 2014 in Monterrey, and border cities Nuevo Laredo, Juárez, all of which I am still seeing in analog in June/July! But I suppose ch 2 stations like XEFB, XEFE and XEPM could vanish at any moment

1504 on 3, animated intro to CARRUSEL show for kids, then YL hostess in studio, soon two of them. This is still XHQ

1509-1510 on 3, snapped several photos of XHQ with 3 bug in UR, this the sharpest altho color had dropped out:

<http://www.w4uvh.net/XHQ1.jpg>

to be added to

<http://www.worldofradio.com/dxfotos.html>

1513 on 3, stationary graphic about ``Fidel Gutiérrez`` audibly mentioned, turns out to be an ``Amber Alert Sinaloa``, i.e. missing (young?) person

1526 on 4, MUF up to here now with CCI

1529 on 3, another Amber Alert Sinaloa with mugshot. Bug in upper right now appears to be Pacífico`s stylized gull-in-flight enlarged in the oval, but no number

1530 on 3, back to show with 3 bug in UR

1532 on 4, it's Televisa-5 net bug in LR with animation, soon gone

1539 on 4, shelf of football uniforms, pre-game show. Generic Televisa Deportes bug in UR, alternates with Televisa-2 star bug also in UR

1539 on 2, // 4 but much CCI on 2; then 4 talking about boxing next Saturday, back to Copacabana for World Cup

1540 on 3, still kidvid with two YLs

1556 on 4, Belgian national anthem, // Univisión on cable 61 here, not synched by a few seconds. Also // ABC via KOCO-7, not ESPN-1 with Wimbledon. This 4 is very likely XHBS-TV, Los Mochis, Sinaloa

1612 on 4, built up to strong signal but also CCI; yet nothing on 5, 6

1616 on 5, now weak video here

1619 on 5, it's WC FB // 4

1627 on 4, I am still seeing World Cup, but now with Azteca-13 bug in UR. Skip has evidently shifted to Hermosillo, Sonora, XHHSS-TV. So both major nets are covering the same game? In any given market is it only one or the other, or does both not matter?

1634 on 4, back to Televisa Deportes generic bug UR for WC FB alternating with net-2 star. At the moment nothing visible on 2, 3, 5!

1659 on 2 & 3, only weak CCI remains

1659 on 3, fades in something letterboxed, evidently PSA for GNP, followed by ad for Nikzon (pronounced almost like Nixon), an haemorrhoid remedy, and then Bancomático; no bugs during these ads to distract customers

1701 on 3, Televisa Deportes graphic, photoed <http://www.w4uvh.net/XHQ2.jpg> and back to game, snow-free for a while, Argentina beating Bélgica; then bug in LL says TECNOLOGIA TD LIBERVISION --- apparently an interactive gadget for classic fútbol games wherein TD means not only Televisa Deportes but Tú Diriges. (I am not certain it's still XHQ by this time.)

1705 on 3, WC FB // UNI and ABC, and nothing on other channels

1731 on 2, weak video CCI only; mostly gone, so lunch

1840 on 2, bit of video but mostly nothing (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* CANADA. Sporadic E opening July 6 gets both Canada and Mexico at same time. Already going at turn-on, all times UT:

1306 on 2, CCI with antenna NE for UHF tropo, movie? in English, 1309Wendy's ad; some 2-tone whine on the audio, video offset QRM? One of the pitches is close to G4 above middle C, 392 Hz. Likely one of the surviving analog Ontarians, CHBX or CIII2.

1311 on 3, CCI here

1312 on 2, CCI in Spanish as Mexico is also hopping, so I rotate and concentrate mainly on that, q.v.

1446 on 2, from north, preacher, praying in English; I have just been getting Missoula MT on FM 94.9; see U S A too

1615 on 2, antenna NE, weak graphic in English with countdown

2123 on 2, golf in English from NE; as PGA scheduled on Global in Ontario, so CIII-TV-2 in Bancroft (I am also getting FM from Ohio). 1937 km = 1204 miles

2331 on 2, fade-in from NE, movie/drama in English; 2352 still week video

UT July 7:

0124 on 2, weak signal from NE, with whine, English, letterboxed, a competition in studio; can't make out any bug; 0127 promo for BellMedia. Skeds show likely `Rising Star` on CTV in Ont, so CHBX Sault Ste Marie (Glenn Hauser, OK, WORLD OF RADIO 1729, DX LISTENING DIGEST)

\*\* MEXICO. Big sporadic E opening July 6, started off with CANADA, q.v. from the NE, but with Spanish also in, soon rotate to south to concentrate on Mexico, all times UT:

1312 on 2, CCI to Canada, PSA `Mover a México`

1317 on 2, old western movie, CCI, clock in UR at 8:17 and something else I can't make out

1317 on 4, Spanish audio

1318 on 6, ape movie, Azteca-13 bug in UR; mentions subtítulos; no CCI

1319 on 2, movie? with Azteca-7 bug in UR; CCI from Mexican music

1321 on 6, Mexican video but my old Zenith B&W monitor prefers to insert NPR audio from 88.1 KWOU Woodward OK, which is up with tropo

1324 on 5, Canal 5 promo; local RFI from somewhere to the video

1324 on 3, oval 3 bug in UR from Pacífico, i.e. XHQ Culiacán, Sinaloa; violent music video. Bug in UL says ---- MUSICAL

1325 on 4, Televisa-2 star bug in LR, probably XHBS Los Mochis, Sin.

1326 on 4, Televisa-5 promo, ``La Teoría del Big-Bang, nueva programación en Canal 5`` but could be cross-promo from net 2 XHBS

1327 on 3, Pingüinos in music video(?), Televisa-5 bug in LR

1327 on 5, Pingüinos from two video meshing signals CCI, net 5

1332 on 6, Ape movie is back, video, Azteca-13

1338 on 6, Azteca-7 promo, but probably cross from Azteca-13. (The only way to be sure which net is by the bugs, not the content.)

1348 on 6, now there is CCI as opening grows, so start checking FM

1351 on 87.75 gospel music in English, Franken FM?? See U S A

1352 on 87.75 Spanish channel 6 audio; 1358, Azteca-7 promo, ads, Azteca-13 promo

1400 on 87.75, Azteca 13 announcer says ``Jorge de la Selva``, so that's the ape movie, but rejoining plays clip from ``Charlie's Angels`` --- was that in George of the Jungle movie?

1421 on 6, Azteca-13, dubbed movie

1424 on 4, Televisa Canal 5 promo

1433-1518, concentrating on FM DX from Montana, Idaho; see U S A

1508 on 2-6, still CCI peaking SSW

1509 on 5, SpongeBob animation, presumably Televisa-5 net

1510 on 6, bug in UR with constant white letters, can't make out

1524-1648, FM DX from North Carolina, Virginia; see U S A

1631 on 4, at SSW, Spanish, animation, net-5?

1636 on 4, ad in Spanish for Transformers, color, back to SpongeBob animation on net-5, LR bug. At the moment nothing on 2/3/5/6!

1700 on 3-6, only weak CCI

1701 on 6, fútbol, Azteca? World Cup probably; soon fade out for lunch

After 2120 more Es DX but mostly FM from Ohio, Michigan, Virginia  
(Glenn Hauser, Enid OK, DX LISTENING DIGSET)

\*\* MEXICO. July 7 was a respite day for sporadic E after all the axion on July 6, but some is back UT July 8:

0051 on 2, algo CCI from SSW

0055 on 2, now it's a novela with Televisa-2 net star bug in LR

0200 on 2, still CCI

0200 on 3, dramatic film with Televisa-5 bug in LR

0218 on 4, novela with Televisa-2 star bug LR, probably XHBS Sinaloa

0230 on 4, same still in, but now with CCI

0312 on 3, news fromXHBC with its blue square bug in LR with white 3 and tiny call letters going upward on left side. Mexicali BCN

0322 on 5, waiting for the other Mexicalian to MUF in, and now it does, XHAQ with Azteca-13 bug in UR, contest or talk show, heavy ghosting like 3, soon gone

0333 on 3, XHBC still in but very poor with fading

0400 on 3, presumed XHBC fades in again briefly with novela  
(Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* U S A. Tropo from NW Arkansas brings in RF9 KAFT, Fayetteville, distance city to city, 336 km = 209 miles, July 7 1420 UT:  
13-1 KAFT-1 [PBS kidvid]  
13-2 KAFT-2 Create  
13-3 KAFT-3 plus bug in LR [the word, not the + symbol]  
13-4 KAFT-4 AIRS – video is same text on several alternating slides in different fonts and colors, including script, centered, reading  
YOU ARE LISTENING TO  
AIRS  
ARKANSAS INFORMATION  
READING SERVICE  
FOR THE BLIND  
photoed one:  
<http://www.w4uvh.net/KAFT4AIRS.jpg>

Audio at moment is British accent about smartphones, and he pronounces Leadville CO as ``Leedville``. That is not South Dakota, where Lead is not pronounced led, but leed. After confusing my converter because OETA is not only virtual 13 but RF 13, the KAFT signals hold up until some breakup starts at 1500. OTOH, KETA OKC, \*constantly\* breaks up on both my antennas, under dead or DX conditions, unusable. Multipath problem or something wrong with transmission? (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* MEXICO. Sporadic E DX openings continue; we're enjoying them while possible during the summer, especially since analog telecasts are being phased out after 2015, earlier in some parts. July 9, all UT:

1520 on 2, fade-in Spanish with antenna SSW; back out in a few seconds

1603 on 2, anchoress fades in again

1612 on 2, Televisa net 2 star bug in lower right; some audio; 1614 soccer recap

[no observations 1645-1925]

1928 on 2, algo CCI

1930 on 2, Azteca news promo, soccer, from SSW, Azteca-7 bug UR

1940 on 2, different station with 2:40 clock (CDT) in LR, and maybe temp, kidvid with clown?

UT July 10:

May have missed some late July 9 and early July 10 as involved in World of Radio 1729 production

0137 on 2, Pacífico 3 bug in UR, which means one of three known Grupo Pacífico outlets on 2 in Sinaloa, Sonora; also glimpsed with it, I think, a Televisa-9 = Gala TV swirl bug in LR

0210 on 2, from SW, algo with heavy fading, maybe same as above

0212 on 2, novela with Televisa-2 star bug LR; better at 0220

0221 on 4, Azteca-7 bug in UR with YL in studio

0225 on 4, 20 kHz CCI, meaning an offset plus vs an offset minus, i.e. many very thin beat bars

0228 on 2 and 4, // audio from novela; 4 has Azteca-13 bug in UR

0235 on 87.75, ch 6 audio on FM receiver, novela, briefly

0235 on 5, béisbol, with numbers in LR, time or scoring? Peaks SSW

0244 on 3, béisbol here but different bug setup: large white one in UR

0300 on 2 and 4, heavy CCI

0303 on 3, soccer with square XHBC bug in LR, easily recognizable as previously described, so Mexicali BCN, further to the northwest

0306 on 3, XHBC is really a newscast with other topix, 0315 better; also CCI on 2, 4, and 5 now, but 3 has the least, altho ghosty

0337 on 6, political speech, very good peak, with audio, yet now I am not getting audio on 87.75 FM. Televisa-2 star bug in UR

0356 on 4, local promo/ad for talent show mentions Coahuila, CCI; so likely XELN-TV Torreón

0358 on 4, novela VG with Televisa-2 star bug in LR

0409 on 5, still-slide labeled María Benítez, apparently to go with audio-only correspondent report. Also crawler a bottom about lots of rain expected due to low-pressure area. Can't make out bug in LR. One Mexiperson by that name is Linked In, but I am not

CCI on several channels continues, but I tire of trying to dig anything out of it

0436 on 4, algo; soccer on 2, but can't be a live game now

0451 on 2, soccer, now with Televisa-9 Gala swirl bug in lower left

0510, finally mostly gone

(Glenn Hauser, OK, DX LISTENING DIGEST)

\* CANADA. Analog-only sporadic E TV-DX July 11, UT:

2233 on 2, antenna northeast, algo in English, very poor

2337 on 2, Global bug barely visible in UR during ET-like show, antenna north. In fact, `Entertainment Tonight` is exactly what's scheduled now on CKND-2 Minnedosa MB. Soon overtaken by Spanish so I rotate toward Mexico, q.v. When I am getting both Canada and Mexico, of course, double-hop distances are possible end-to-end, but never for us in the middle of it (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* MEXICO. A bit of Es DX on channel A2, July 11 at 1411 from SSW, but nothing further develops (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* OKLAHOMA. OETA must be reeling from another budget cut thanks to the Republican-controlled OK government, hostile to spending on anything `public`. Despite OETA's director instituting a puff program interviewing legislators two by two. OETA flagship news program, the `Oklahoma News Report`, effective July 11, has been cut back to only half an hour per week. For the past year it had been one hour per week, also a drastic cut from the former 5 x 30 minutes per week. Anchor Dick Pryor tries to put a positive spin on it, saying the half-hour weekly format `for a while`, will enable OETA to put more resources into online news for `deeper news impact and greater reach`. Similarly, on the website: `Beginning Friday, July 11 at 7pm, ONR will air as a 30-minute program that will also be available online. Managing Editor Dick Pryor and his team are developing a newscast strategy that will be designed to provide broadcast viewers and digital users meaningful Oklahoma content, value-added resources and an enhanced educational experience.` ONR does get repeated several times on OETA-1 and OETA-2 (OKLA): UT Sat 0000, 2300; Sun 1530-OKLA; Sun 1900, Mon 1800-OKLA, Tue 1900-OKLA, Wed 2000-OKLA.

This first edition of the new series boldly led with a feature about Oklahoma Atheists and how surprisingly active the group is, 3000+ members, fifth most active in the world by some measure; yet many people had their faces blotted out for fear of reprisals by the Good Christians making up 92% of the state. Their logo is A-OK! The July 11 show is not yet on the video page nor the OA part yet as a clip:

<http://videos.oeta.tv/program/onr/>

See also:

<http://www.oklahomatheists.com>

<https://www.facebook.com/OklahomaAtheists>

Lots of funny stuff on the FB (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* MEXICO. Analog-only sporadic E July 11, UT:

2340 on 2, as I am watching CKND-2 from Manitoba to the north, Spanish overcomes it, so I rotate toward Mexico for the rest: Televisa-9 Gala swirl bug in LR

2341 on 4, Azteca-13 bug in UR during novela

2343 on 2, old B&W Mexican musical movie

2346 on 2, Televisa-9 Gala bug in LR, western movie, signs of color

2348 on 6, MUF pops up to here, Televisa-5 bug in LR

UT Saturday July 12:

0002 on 6, CCI, now more than one station propagating, but no FM

0026 on 4, algo, as MUF has dropped, and sports on 2

0031 on 2, Azteca promo could be for 7 or 13

0040 on 2, sports/gymnastics/games, Azteca-7 bug UR; NINJA graphic

0041 on 2, `Simpsons` opening sequence again at this odd time, dubbed; Azteca 7 bug UR

0048 on 2, Azteca-13 promo on Azteca 7

0058 on 2, all that's left is some CCI here as I head to the porch for my evening SW monitoring session

0137 on 2, back at the TV, \*still\* Simpsons --- two eps in a row?

Next morning, July 12, more:

1459 on 2, antenna south, fades in rap music video in English, extreme letterboxing, i.e. large black blox atop & abottom; circular bug in UL comes and goes. Nice steady signal for a while. Some Spanish thrown into video, ``caliente``; 1502 black screen for a while, and 1503 neat video showing impressive TV transmission tower and antenna (channel 2 makes for the biggest elements), and finally animated ID for ``XEFE La Imagen Familiar`` with the usual very big call letters. That's Nuevo Laredo again, one of our closest possible XE TVDX stations, 1005 km/625 miles (while XEPN-3 is 892/554 away, XEPM-2 947/588). I wonder if XEFE stands for ``Frontera Extrema``. Now same-offset CCI is growing

1501 on 3, algo

1504 on 3 // 2, docu about Islandia, with junior rating

1505 on 3, live action, maybe same as above, now with Televisa-5 LR

1539 on 2, fade-in lucha libre promo on Canal 13

1606 on 2, fade-in YL in front of PLAN B graphic; time bug in UR

1626 on 2, still various CCI in and out on 2

1629 on 2, studio dance show, www.neovision.tv super at bottom, also with phone number. Website acerca de says only: ``Somos un canal de TV que se preocupa por ofrecerte contenido de calidad para toda la familia. Buscamos promover la cultura, valores y buenas costumbres. ¡Gracias por vernos!`` and has various programs, both news and entertainment, but whence, on what station(s)?? ``Contacto`` has no physical address, only by webform, so I sent:

``Esta mañana del sábado veo su programación en canal 2 a larga distancia en Oklahoma. ¿Cuál es la televisora en la frontera? ¿Donde se ubica su cadena?``

1632 on 2, music video letterboxed, again circular bug in UL, probably the XEFE ``2``

1640 on 2, still signals in and out, mostly out after 1700  
(Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* CANADA. Traces of sporadic E TV DX on channel A2, 1422 UT July 13, with antenna NE; 6m Es maps show likely path from Ontario, not Mexico. A few more snatches like at 1537; 1547 ad grafix in English (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* CANADA. More weak sporadic E TV-DX, July 13, UT: 1657 on 2, audible promo ``on CTV``; CHBX Sault Ste. Marie, Ont., presumed, as it's from the NE rather than NW where there are also some analog CTV 2s left in Sask, Alta. Soon getting Spanish too from opposite direxion; see MEXICO (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* MEXICO. Weak sporadic E TV-DX, July 13, UT:

1702 on 2, Spanish from the SSW, 5 minutes after getting English from the NE, presumed Ont.; see CANADA

1805 on 2, heavy CCI from SSW, Spanish, World Cup coverage

1805 on 4, algo. CCI at least on 2 continues for a while but nothing specific (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* OKLAHOMA. 10.8 MHz area, July 14 at 1337, extremely distorted wideband FM radiation from unknown neighbor's FM receiver IF re-tuned to 101.9 KTST OKC which matches audio and pauses. Also was hearing same about an hour earlier on its second harmonic circa 21.6 MHz (and no real 13m broadcasters making it) (Glenn Hauser, Enid, DX LISTENING DIGEST)

\*\* MEXICO. And more July 14 UT, already in progress at turn-on, tune-in 1419 UT:

1419 on 2, Spanish CCI from SSW; also algo on 3, 5

1435 on 2, f bug in LR = Televisa-4 net; 1437 news about Ukraine

1452 on 5, 5 bug in lower right, not like the Televisa-5 one we have seen so far: no longer italic, and not encircled, just a bold dark 5, with lite/white outlining. Haven't made out what color the 5 is. It's still Televisa-5 net, possibly flagship XHGC México DF itself. We find:

New programming effective today July 14, and new logo on website:

<http://i2.esmas.com/2014/07/04/668568/nuevos-estrenos-de-canal-5-1024x768.jpg>

However the 5 logo on this page is not exactly like the one on screen, but both are non-italic; star inside the lower hook of the 5 filling the hole. Still with the old logo, italic 5 in a circle with a star to the upper right of the 5:

<http://tvdxtips.com/mexlogos.html>

1459 on 5, something else with studio announcer, game show? Soccer ball

1507 on 2, boxeo, f-bug in LR, CCI

1509 on 5, Pingüinos de Madagascar animation, new 5 bug (reminds me of what used to be KXAS-5

DFW, but not any more). Televisa Canal 5 program schedule, also via above site, for today July 14 does not show the Penguins until 1630 UT! At 1500 UT = 10 am HCM = CDT is supposed to be Monstruos vs Aliens

1515 on 6, pan handling, maybe cooking show; hasten to turn off my RF feeder on 87.9 which was RFling its video, but quickly gone again. Never find any FM DX

1516 on 2, `Matutino Express` show going to a commercial break. That's on Televisa-4 = Foro-TV net (BTW ``foro`` is not Spanish for ``four``)

1517 on 2, Nixon resignation video & audio with subtitles, ``desde el archivo visual de Televisa``. OK ---

1524 on 5, still Pingüinos, with same-offset CCI

1528 on 3, ``Somos Mexicanos`` federal PSA for the legislature

1532 on 3, Pingüinos here too, so Televisa-5 net; XHBQ Zacatecas?

1608 on 3, ditto with new 5 bug LR

1613 on 3, Four? YLs in a row, bug in LR is an equilateral parallelogram but can't make out its contents; nothing similar at tvdxtips.com – may not be a net or station ID

1616 on 2, astrological advice show, apparently live with the fraud taking phone calls, lots of numbers and Veracruz locations on screen including Xalapa at 1616, Poza Rica at 1622. Occupying the LR bug corner are alternating horoscopic symbols; so it's certainly XHFM

1621 on 4, TVMAS among the constant lettering at screen bottom, slightly left of center, with studio demonstration, cooking? So XHGV, Las Lajas, Veracruz

1630 on 2, new show starting, not sure if same station as horoscope, MUJER in title, including lipstick cylinder flying across the screen. Novela, I guess, rather than talkshow

TeleVer program page  
<http://www.televisaregional.com/veracruz/programacion/>  
verifies that the 1600 horoscope nonsense is titled `Que Vuelan Vuelan`, (which I also heard mentioned, but what does this mean idiomatically? Something about flying); and the 1630 novela(?) is `Mujer --- Casos de la Vida Real`

1637 on 2, ad for knee treatment which has now come to Veracruz! CCI

1639 on 2, animated TeleVer ID showing XHFM, and Bocas de Oro, which is apparently a resort area in the state

1645, MUF remains down to channel 2, with plenty of CCI

1656 on 3, animation, net 5 bug LR, // audio on 2 amid CCI

1702 on 2, heavy CCI, novela vs talk show

1704 on 2, TeleVer animated promo/ID = XHFM

1720 on 3, novela

1738 on 3, 4, 5, weak Spanish

1744 on 4, TVMAS ID animated with 3-D non-Rubik cube logo = XHGV

1746 on 4, 20-kHz CCI to above from Televisa-5 with LR bug

1757 on 2, promo for Info-7 app, and Azteca-7 bug in LR along with time and temp; then huge INFO 7 occupying left side of screen behind anchoress, Tampico mentioned, so XHTAU as suspected

1807 on 2, still CCI, occasionally up to 3 and 4

1811 on 2, promo mentions Acapulco, but not enough to assume XHAP-TV; then also mentions Tamaulipas, as also still XHTAU

1813 on 2, old western movie, maybe Teleactiva bug in UR as in XEFB-TV, Monterrey. Program schedule is coming up blank:  
<http://www.televisaregional.com/monterrey/programacion/?c=2#>

Then I checked some online TV program guides and found Teleactiva not even listed, besides scads of cable channels, many of them from USA. O, bug in UR is just digital clock

1830 on 2, quiz show

1842, Still some CCI on 2 as I close this report. 6m Es maps checked a few times during this opening have showed little if any activity between here and Mexico

1845 on 2, SEP PSA [Secretaría de Educación Pública]

1847 on 2, Mexican western movie, B&W? No bugs; opening fading out

2244 on 2, fade-in & out somestation with clock bug in UR, as seen earlier; what's it? Same station at 2249 full-screen ID as +v, and opening credits for another old Mexican movie. Therefore it's XEWO-TV Guadalajara. Rather than temp to the right of the clock, IIRC, it's a tiny +v logo [Más Vision], which is just about invisible, too far into the corners on both my overscanned monitors. So XEWO-TV applies to the earlier log at 1813 which had been suspected as XEFB-TV Monterrey (Glenn Hauser, OK, WORLD OF RADIO 1730, DX LISTENING DIGEST)

\*\* OKLAHOMA. 90.3, July 14 at 1540 UT, promo ``Southern Gospel Saturday from 6 am here on KHYM``. But it's really KHEV Fairview OK west of Enid, usually eclipsed by closer and stronger 90.5 KGVV Goltry with 14 kW; as I am bandscanning for

Mexican FM DX to go with TVDX up to channel 5 or 6.

From FCC info you'd never know that the IDs you hear on KHEV are ``KHYM``, but licensed to Great Plains Christian Radio, Inc., same as for KHYM 103.9 in Copeland KS, 100 kW, but with numerous relays in KS and OK. FCC shows 90.3 site is about 10 miles WSW of Fairview on north side of US 60, and with only 490 watts, its 60 dBu service contour barely exceeds the US 60/412 junxion north of Fairview (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* OKLAHOMA. RF 33, KOCB ``34``, OKC, (a sibling station to ``Fox 25``, KOKH, RF 24), has finally added a subchannel after a long time with none (altho IIRC they did have one for a while after the DTV transition) --- now it's GetTV as 34-2, which seems to have a fairly good selection of old movies. Primetime theme UT July 15 was Africa (Glenn Hauser, Enid, July 14, DX LISTENING DIGEST)

\*\* MEXICO. Sporadic E analog TVDX started coming in just as I was completing the last report: July 15, UT:

1553 on 2, antenna south, weak video, guys talking

1616 on 2, aiming NE since 6m maps show opening up there, but I hear Spanish, so back to SSW for much more signal, also CCI on 4

1625 on 4, Televisa-2 promo for Cantinflas movie on Saturday afternoon; seems more S than SW so not XHBS Los Mochis?

1632 on 2, CRASH TEST DUMMY lettering on screen --- no wonder they say it in English; in studio interview from Azteca-13

1633 on 4, Televisa-2 again star bug in LR, studio talk show

1640 on 2, Azteca-13 mentions ``Siempre Acapulco``, name of novela

1645 opening fades out (and no sign of any more Es for the next 23 hours at least) (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* MEXICO. Sporadic-E analog TV DX, July 16, UT:

1742 on 2, weak video signal, animation, new Televisa-5 net bug LR

1942 on 2, next check after a break, algo from southwest, with an 01-800 phone number across the bottom (It's started raining here; for some reason seldom get Es DX when it's raining; and continues all afternoon for 2.5 inches; at least no thunder for a while, so I can leave the antennas connected.)

2009 on 2, glimpse of FOX on someone's hand-held mike. So could it be XHRIO Matamoros, now with Mundo-Fox?

2012 on 2, ad mentions ``el valle``, another clue toward XHRIO in El Valle del Rio Bravo, but hardly

certain. `S720` at the top, with an f; 2013 ad for Colegio del Occidente. (Searched later: as the name implies, there are several of these in Sinaloa, Sonora); 2014 program `Barra Deportiva`, and Grupo Pacifico circle 2 bug in upper right, so XHI Ciudad Obregón, Sonora or one of its clones

2028 on 2, CCI is now heavier

2039 on 2, gala swirl bug in LR among CCI, i.e. Televisa-9 net

2040 on 2, now there's an f bug in LR, i.e. Televisa-4 net

2104 on 4, Azteca-13 bug in UR; at times it vaporizes, resumes

2111 on 4, Azteca-13 is VG now with novela; while 2 with Gala has CCI

2145 on 4, Hermosillo addresses visible in ads; 2147 snow-free

2147 on 2, music show with Tu Canal bug in UR = XEPM Juárez

2213 on 2, movie from Tu Canal; this and Gala are same offset producing heavy QRM; W9WI.com shows CiJz an H'so are both zero offset and so is XHI; Hepburn map agrees, but so are plenty of others

2218 on 2, Gala with promo(?) for Las Noticias por Adentro, so Hermosillo? Mixed with CCI from Tu Canal movie

2219 on 2, Gala TV promo for `Pasillo TV` show at 4 pm

2227 on 2, Gala with less CCI

2232 on 2, video from one, audio from the other

2248 thunder starts and opening fades out by 2300, so about to close down here

2304 on 2, brief resurgence of algo

2338 on 2, TV back on, Gala swirl in LR, poor, nothing more.

Recapping, this setup is getting to be familiar: XEPM Juárez on 2 in same direction as Hermosillo XHMMA on 2 with Gala; Hermosillo XHHSS on 4 with Azteca 13 (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* MEXICO. Weak sporadic E is trying to get going July 17, UT:

1548 on 2, fade-in with f bug in LR = Televisa-4 net

1602 on 2, looks like the horoscope show again, traced July 13 at same hour to XHFM, TeleVer in Veracruz

1630 on 2, f bug in LR continues to fade in and out occasionally (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* OKLAHOMA. RF 31 & 32, KXOK-LD Enid: my numerous complaints that there has been \*No sound for months\* are incorrect! I had found this to be the case on two separate set-top-box converters, and not the case with any other DTV channels they pick up. No, the boxes' own mute button is not engaged, and anyway if it were, would surely apply to all channels? I have a third STB which I hardly ever use, so July 18 at 0100 UT I try it too, and voilà, there is sound on these channels, yet back to the first two and they are still silent.

Maybe rescanning them would fix the problem, but I have a bunch of local and DX channels saved I really don't want to get deleted since they are not coming in all the time. I still suspect KXOK transmission somehow caused this since the sound disappeared independently on two STBs but not on the third (they are all Zenith 900/901) which had been out of use. Anyone else with such DTV/STB experiences? There may have been a time I accidentally hit autotuning instead of manual on the setup menu, but got out of it ASAP and no damage seemed to have been done (Glenn Hauser, OK, DX LISTENING DIGEST)

---

Note #1 -this is the second time i've been shafted  
by not being able to count Delaware as a new  
state. The previous time was with WTGI-61. Their  
tx was in NJ!

73, Jeff

June 16 brought two new Texas FM stations in KINL and KPRR; tropo from northern Arkansas was in at the same time. The June 19 opening brought six new FM stations from Florida to bring that state to the 70-station mark. I finally hit the 200-station mark from Illinois with the log of new WJMG 105.5; I also added two new stations during the E-skip opening the same evening. June 30 brought a tropo opening to the Mid-South that allowed me to log two new NOAA Weather Radio stations from Mississippi. The Ackerman transmitter was clearly the strongest of the two new Mississippi stations heard. On both stations, I heard a tropical weather outlook for the storm that became Hurricane Arthur. WBLX 92.9 is the first Mobile market station I've logged on tropo (I heard WZEW 92.1 via E-skip in 2009). In the middle of that opening, an E-skip opening was also noted to upstate New York and southern Quebec, noting relogs of WQTK and CBF12 on 92.7. I caught WSIE 88.7 off on July 5 during an E-skip opening, allowing me to log KFRI with their Christian CHR programming from Air 1. The E-skip opening the next day started with another opening to Quebec, combined with a tropo opening to western Indiana. The opening switched to the northwest later in the day, with only my second North Dakota FM in the logbook (KACL 98.7) and putting Montana one station closer to #20 (KTHC 95.1 is the 19<sup>th</sup> Montana FM). The opening ended with the log of KQAZ 101.7 for my 14<sup>th</sup> Arizona FM. The July 10 E-skip openings brought MUFs into the FM band from Quebec and Ontario, with another log of CBF12 and hearing CBON26 for the first time in several years. As of July 14, the FM total is now at 1,279, with the NOAA Weather Radio total at 116. 73.

Telephone (805) 687-7803  
24-hour PDT

This report is from June 15 to July 11, 2014. No skip seen. Nothing exciting this time.

Air temp here along coast was a rather steady 70s to low 80sF/20sC, inland away from ocean 90sF/30sC. Ocean water temp was mostly 60sF/teensC, but in late June was up to 70F/21C before going back down to 60sF/teensC in early July.

Distances are approximate. So-Calif tropo ducting to San Diego/Tijuana/Tecate from 175 mi/280 km up to 220 mi/350 km SE:

Jun 6 - 16	Poor	Higher layer inversion and hotter inland

Best of DX to All Dennis

## 2014 IRCA 50<sup>th</sup> Anniversary Convention - Billings, Montana

The 2014 IRCA 50<sup>th</sup> Anniversary Convention will be held in Billings, Montana on September 19<sup>th</sup> and 20<sup>th</sup>. John and Nancy Johnson of Mesa, Arizona are your convention hosts and will arrive a couple of days before the convention. The convention will be held at the Lexington Inn & Suites by Vantage located at 3040 King Avenue West. IRCA members are eligible to receive a special room rate of \$95.00(US) per night plus 7% Lodging Tax & \$1.00(US) TBID fees. A limited block of rooms have been set aside so you will want to make your reservations early. Please mention "IRCA-International Radio Club of America" when making your reservation for the special IRCA member's rate. You may call them directly at 406-294-9090 or toll-free 1-877-488-4649. You will need to give them a credit card number and check-in and check-out dates. They do offer an airport shuttle. The parking area is quite large. With this rate you will enjoy the following **COMPLIMENTARY** top quality amenities to enhance your stay

- **100% SMOKE-FREE and PET FREE** to ensure a healthy environment,
- Guest rooms featuring beautiful furniture, sitting areas, spacious bright bathrooms, pillow-top mattresses, upgraded bed and bath linens and exceptionally quiet rooms,
- New Panasonic flat-screen TVs, iHome radios,
- Comfortable and well-lit workspaces with secure high-speed internet desk access,
- Voice mail and free local calls within the (406) area code,
- Free Internet - wired and wireless,
- Indoor swimming pool with hot tub, changing room and outdoor patio, fitness center,
- Hot continental breakfast. Some gluten items available for purchase.

For more information about Lexington Inn & Suites by Vantage go to **LexingtonBillings.com**

Radio station tours will be scheduled for Friday morning and afternoon. A tour of Connoisseur Media's stations is almost finalized. Stations include News-talk KYA-730, ESPN KBLG-910, Sky KRKX-94.1, The Zone KRZN-96.3, MY 105.9 KWMY, and KLPN-106.7 The Planet. Details will be updated as more tours are added. There will also be a tour of KTVQ 2.1 / Billings CW 2.2 on Friday evening to watch a live production of the 10 PM News. Tours are subject to availability of guides and may be subject to change. There will be several talks presented during the convention.

### Tentative Schedule:

#### Friday, September 19

- 9 AM - registrations
- 10 AM - Station Tour
- 11 AM - Station Tour
- 12 PM - Open Lunch
- 2 PM - Station Tour
- 3 PM - Station Tour
- 4 PM - Open session
- 6 PM - Pizza Ranch - IRCA picks up the tab
- 7:30 PM - Talk
- 9 PM - KTVQ tour lasting through 10 PM Newscast

#### Saturday, September 20

- 10 AM - Talk
- 11 AM - Talk
- 12-2 PM - Open Lunch
- 2 PM - Talk
- 3 PM - Talk
- 4 PM - IRCA Business meeting
- 5 PM - Open session
- 6 PM - Banquet - Montana Rib & Chop House
- 8 PM - Auction

Hungry? You'll discover Billings, Montana is filled with numerous places to eat. There is a Johnny Carino's adjacent to the convention hotel. A few blocks away there is a Pizza Ranch where we will gather on Friday evening. IRCA will pay for this event. Pizza Ranch is a buffet facility featuring pizza and broasted chicken. You can even ask for them to make a pizza your way. The Saturday night convention banquet will be held at the Montana Rib and Chop House.

Registration for club\* members is just \$35.00(US) (Does NOT include the banquet - details of the banquet will be announced later). Non-club member's registration is \$50.00(US) which includes a one year membership in the IRCA. (Hint: Save money, a one year membership in the IRCA is less than the increased registration fee for non-members. Join the IRCA now.) You may pay in advance by check or PayPal. If paying by PayPal, please add \$1.00(US) to cover the \$1.34(US) additional charges added on by PayPal. Use this PayPal address: **john@johninmontana.com** and include a message that the money is for the IRCA convention registration. If paying via check, make that out to John C Johnson and mail to 2922 S Olivewood, Mesa, AZ 85212-2923.

\* Club membership in IRCA, NRC, or WTFDA qualifies for the \$35.00(US) registration fee. Non club members are encouraged to join the IRCA.

More details about the convention will be announced later. Check out the IRCA Facebook site too! If you have any questions please contact John Johnson at **john@johninmontana.com**
