OCTOBER 2014

TROPO...YAWN

I know I've been really busy this month so I may have missed them, but have there not been any reports of good tropo around *anywhere* during the month of September? There sure hasn't been any in this neck of the woods. I'm not talking about the 100-200 mile long trop but the good stuff out over 300 miles and more. Where is it?

We all know that Mr. Phelps does very well at his location in Kentucky and so does Jeff Kadet in IL, but when Roy Barstow on Cape Cod is quiet, then his silence is worth noting.

What a whacked out year it has been so far in 2014 for TV or FM Dxing. That's my take on the situation, for whatever it's worth. If you disagree, tell us.

MEMBERS AND MORE

It has also been a slow month for renewals. During the period from August 18 through Sept 19 we received renewals from Randy Miltier, Roy Barstow, Ronnie Rader, Saul Chernos, Tommy Adair, Paul Swearingen, Steve Walko, Glen Hauser, Wolfgang Schneiter and John Tudenham. Thank you for your support of the WTFDA.

I'd like to thank Les Prus for the cheat sheets he sent me for MS Word 2013, which I'm sure is just as screwed up as Word 2010. It seems we both are in the same boat. I got a new computer and he had to get a new computer. Les writes: "I had a catastrophic hard drive failure on my old Dell running Office 2003 and XP and I couldn't get it to boot. So I eventually got a new desktop (Dell) with Windows 7 and Office 2013 and know exactly what you're going through. Cheatsheets help but it's still a hard slog to catch up with 10 years of changes...seems like 30."

So Les sent me 10 pages of documentation on Word 2013 and a few pages on Windows 7.

As for me, I put Word 2003 back on this new computer so that this column could be finished in a reasonable length of time with little or no cussing or

throwing of objects. I'll work on the new version of Word when I get the time so I can find out where in the world they hid the features that were out in the open on Word 2003. And Les...do you want to borrow my Office 2003 disk?

THE IVIEW 3500STBII

I took Scott Fybush's advice and bought an iView 3500STBII (this is a newer version of the one Scott mentioned, having the "II" at the end). I just got it this week. I disconnected my normal TiVo and gave it a try. I plugged in a PNY 4GB USB stick I had laying around. I recorded some of these catches and plugged it into my computer after. It saves the recording to attached storage untouched as the broadcast MPEG with no re-encoding, just like my TiVo. It puts it in the .MTS container file and I am able to play it using VLC Media Player and Windows Media Player!

The box seems pretty sensitive and I am impressed! I put it in manual tune mode and go directly to an RF channel. It shows the actual frequency in MHz and a signal meter. Since Philly was coming in, I purposely went to channels such as 32 to see if I could decode WPSG and turned the rotor. The signal meter is very responsive and updates quickly, however it is a black screen while in this mode. Once you see a signal, you press enter and it will show you a list of the sub-channels with PSIPs for a couple seconds, then it goes to live TV.

I bought this primarily so I could bring it with me while traveling and record TV in other markets. It seems like a great little tuner! The ability to record to a USB thumb drive or portable hard drive and easily play it on a PC is just plain awesome. I didn't experience buffering because the stick was too slow to read/write as Scott had mentioned, at least with this stick. - Rich Cabral September 5th

And that's all for this month. See you in November, we hope! -Mike

FCC Chair Tom Wheeler issued a statement in early September congratulating Los Angeles non-commercial stations KCET and KLCS for entering a channel sharing partnership. Presumably the stations will merge broadcasts onto a single transmitter. (the statement is only two paragraphs and contains no details) Either channel 28 (KCET) or 41 (KLCS) will be surrendered for auction. My bet would be on 41.

The Commission is asking for comments on two competing proposals for *virtual* channel assignments for new station KVVV, RF channel 3 at New York City. (city of license Middletown Township, New Jersey)

Ordinarily, this station would use its RF channel (3) as its virtual channel. However, KVVV will have some coverage overlap with existing station WFSB Hartford, Connecticut. WFSB's old analog assignment was channel 3 – which of course means WFSB's digital signal is on virtual channel 3. The two stations' coverage areas will meet in Fairfield County, Connecticut.

WFSB's owners have asked the FCC to order KVVV to use virtual channel 33. This is WFSB's *RF* channel. (thus, no conflicts are possible as the presence of WFSB would prevent assignment of another station on RF channel 33.)

KVVV has presented a counterproposal. They suggest *both* stations be allowed to use *major* virtual channel 3 – but that *minor* virtual channels be split between the two. WFSB would continue to use minor virtual channels 1-4 (channels 3.1, 3.2, 3.3, and 3.4), and would be allowed to add up to five more virtual channels in the future. (3.5, 3.6, 3.7, 3.8, and 3.9) KVVV would start with minor virtual channel 10 and would go up from there. (3.10, 3.11, 3.12, etc.)

KVVV's interest in using major virtual channel 3 is that it gives them a leg up on getting a desirable low channel on cable. Stations electing must-carry may request to be carried on their major virtual channel on cable. If technically feasible, the cable operator must do so. If KVVV can use major virtual channel 3, it gets to be channel 3 on cable. KVVV has offered to *not* request cable channel 3 in Fairfield County, Connecticut.

WFSB, presumably, would prefer not to have the audience confused by the presence of two channel 3s in an important part of their coverage area. (Disclaimer: I work for a different location of the company that owns WFSB.)

The Commission notes KVVV will also have a major virtual channel conflict with Philadelphia's KYW-TV.

Right at press time, new Delaware station WMDE channel 5 is reported on the air. Right now, they're only running a test pattern. WMDE is using virtual channel 36, by order of the FCC, to avoid conflicts with Washington's WTTG. WTTG is already using virtual channel 5.

DENIALS AND DISMISSALS

BC Vancouver	104.3	CHLG-FM	Application denied to have conditions of license removed that required the station to air "x" amount of Blues programming per day
NS Halifax	99.1	APP	Application for a new Class A station denied

— OTHERNEWS —

AB Drumheller	99.5	CHOO-FM	Applies to have the condition of their license which requires that they devote 10% of all musical selections from Content Subcategory 32 (folk and folk-oriented). removed
QC St-Fabien-de-Panet	92.5	CIQI-FM1	Extension granted to February 6, 2016 to get this new relay of Hot AC CIQI-FM 90.3 in Montmagny on the air with 17.5 kW/123 m DA at 46-39-23/70-08-49; Class B; \$ [Groupe Radio Simard]

NEWS ITEM: William Rowe has applied to bring the Christian Radio Network CHIM back on the air. The CRTC revoked the license of the original CHIM network back in November 2012 over non-compliance issues. [See list of stations under 'Applications for New Facilities']

NEWS ITEM: Emergency alert requirement comes to Canada.

U.S. radio stations have been required to air emergency alerts for decades, and now stations north of the border will need to do the same. The CRTC, the Canadian regulatory agency, ruled last week that most radio and TV stations must relay emergency alerts to the public starting March 31, 2015. Until now, participation in Canada's National Public Alerting System had been voluntary.

"During an emergency situation, important information can be relayed quickly to Canadians over the radio and through their televisions," CRTC chair Jean-Pierre Blais says. "We are making sure that broadcasters and television service providers play their part in improving the security and safety of Canadians."

The dictate will not only cover over-the-air broadcasts, but also cable and satellite TV companies. But unlike in the U.S., the National Public Alerting System requirements don't yet extend to wireless companies. The CRTC is giving stations run by local communities, schools, or Native tribes until March 2016 to comply with the new requirement.

NEWS ITEM: FCC vows to quickly get FM translators to AMs

It has been a year since FCC commissioner Ajit Pai floated the idea of the agency undertaking an AM revitalization proceeding. And while nothing has formally been proposed, Audio Division chief Peter Doyle said yesterday at the Radio Show his team is making progress on some short- and long-term possibilities.

"We have developed several proposals and recommendations internally," he said. "And we have a number of ideas that could have a real beneficial effect for the AM service." Doyle thinks some of the long-term fixes could have the most impact such as an idea to rework AM channel parameters. "If adopted that will have the ability to give many stations increased daytime and nighttime power," Doyle predicted.

But broadcast attorney Nancy Ory said most of her clients are focused on FM. "Our clients are only really interested in the AM translator," she said, explaining, "They aren't willing to spend money on a failing service."

If the FCC moves forward with an AM-only translator window, Doyle said it's something they can accomplish very quickly. "We're very confident we can turn applications into construction permits very quickly," he said. How rapidly they move will however depend on the parameters set by the Commission, such as whether to only open the window for just daytimers or standalone AMs.

NEWS ITEM: Clear Channel changes name to iHeartMedia.

Clear Channel has changed its company name to iHeartMedia. The company says the new identity reflects its successful transformation into a multi-platform media company. The new name will serve as umbrella branding for its 859 radio stations, iHeartMedia Digital streaming service, radio networks live music events and related companies, including Katz Media Group and Clear Channel Outdoor.

Mexican DTV Update

Forum User Raymie Humbert posting on the WTFDA Forums

(Aug.31) Did I mention that the hard date for the analog shutoff is December 31, 2015? Some localities will start to go later this year; I think the first will probably be in northern Tamaulipas where there have already been distributions. **Keep in mind that the threshold for allowing a shutoff in a given area is now 90% of low-resource households as defined by Sedesol (Mexico's state welfare agency) where previously it was 90% of all households.**

(Sept. 4) The IFT's Pleno (Committee) has been super busy of late. They had some nine different sessions during August (some of which did not relate to TV, like the one where they issued their new Constitution and Bylaws and another about telephone rates).

Well, they today turned their attention back to television by issuing their new TDT Transition Policy (press release).

The Editor's Note

The DX narrative for September could be placed on autopilot from the past several months – in what has been one of the more mundane years for propagation since yours truly has been observing this strange hobby, the trend continued. A few notable instances of tropo were reported, including DTV tropo over 500 mi. received by Steve Rich from near Quincy IL into MS on the 23rd. However, the long haul tropo paths that generally make September one of the more revered months in DX circles were nowhere to be found.

There's always October, which is often the last chance saloon for tropo of any note in northern locales. As we hold out hope for a late blooming season, we bring you reports from Doug Smith and Dennis Smith inside this edition of C2CTV DX.

24-hour PDT

This report is from August 14 to September 12, 2014. Still no skip seen.

Air temp highs here along the coast has been above average, anywhere between 80F/27C to 90F/32C. Ocean water temp in mid August was 63F/17C, but since Aug 18 has been a steady apx 68F/20C. Weather has been calm and stable— even with hurricanes Marie and Norbert to our south. No rain or storminess in our region.

Distances are approximate. So-Calif tropo ducting to San Diego/Tijuana/Tecate from 175 mi/280 km up to 220 mi/350 km SE:

Jul 31-Aug 18	Var. poor to fair	Calm, warm
Aug 19 – 26	Vy.poor to none	High inversion layer-3000ft
Aug 26 – 27	Out of town, to WASCO	
Aug27-Sep10	Var. poor to fair +Normal layer	1000ft+
Sep 11 – 12	Out of town, to WASCO	

Wasco (near Bakersfield) is in the south end of California's Central Valley, in the section called the San Joaquin Valley. The Valley is extensively very flat—like Amarillo TX region—though here with high mtns in a 50mi/80km-distant radius half-circle from east through south to west. Temp very HOT, about 103F/39C. At my Wasco house, the antennas are only 10ft/3m & 16ft/5m above ground. Lead-in wires have deteriorated over time and need replacing. In the meantime, on Aug 26-27, I took a Wasco motel room 3rd floor with my LG flat-screen

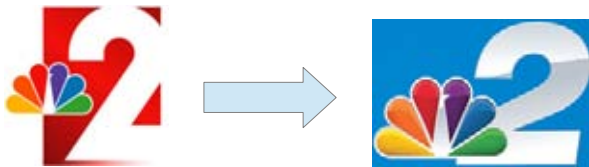

TV & carry-around antennas of UHF 4-bay conical & VHF bunny ears. The view out the north window was 30ft/9m above ground. No tropo, but plenty of local & regular signals chs 7-51 to go through, 35 DTVs & 6 analogs, Bakersfield southeast 35mi/55km. to Fresno north 100mi/160km. From the motel, these new loggings, not seen in Wasco before.

- Aug 26: All DTV, north 85mi/135km to 100 mi/160km
- 16 "16" KHSC-LP Fresno (ex-analog 16 HSN past seen) testing color bars
- 17 "12" K17JI-D Fresno (ex-analog K12OZ never seen) 3ABN
- 22 "22" KZMM-CD Fresno (ex-analog 22 past seen) mx videos
- 24 "31" KBID-LP Fresno (ex-analog 31 past seen) variety of 7 subchannels
- 26 "13" KCWB-LP Reedley/Fr. (ex-analog 13 never seen) var of 9 subchs
- 42 "4" KVHF-LD Fresno (ex-analog 4 never seen) var of 4 subchs

I was at the motel again briefly with relatives on Sept 11-12. No new loggings.

My Wasco DTV total is now 41 with these 6 new.

Best of DX to All Dennis

WBBH, the NBC affiliate in Fort Myers, Florida and employer of your VUD editor, has changed their "NBC2" logo and launched a new studio in September.

WBBH is RF 15, Virtual 20

Other major stations in the market:

RF 50, Virtual 11*

*WZVN
RF 41, Virtual 26*

*WXCW (another recent logo change)
RF 45, Virtual 46*

*WFTX
RF 35, Virtual 36*

Storm TV Ch2 Port-au-Prince Haiti

Both Chris Dunne and Fred Nordquist recently logged Haiti via single hop E skip. On September 12th at 1416z Fred had two stations fighting it out on channel two and at one point a “StOrm (large O in the middle)” appeared on the screen. Fred took the photo on the left.

And on September 7th, Chris Dunne in Florida noticed Es in the morning with Tele Antilles battling a French speaking station on channel 2. Chris took the photo on the right which shows the storm logo on the bottom right corner. At 9:19am Chris noted the Disney show “Good Luck Charlie” dubbed in French and later the start of a drama and a Haitian music video between the two programs.

This is the first time anyone has seen Es from Haiti.

As it turns out, this may also be the last time anyone logs lowband analog Es from Haiti. WTFDA Forums member Raymie Humbert reports the following...

What a catch! It might be one of the last times we see Haiti, as even they are going digital! [June 15, 2015 is the day](#), CONATEL informs us.

Even further, I have some information on [Haiti's digital transition](#)! This may be the first time ever details have been published in English.

STANDARD: ATSC 2.0, adopted 18 July 2013

BANDS IN USE: High VHF; UHF, 14-30; UHF 31-51 will be used for subscription television broadcast services under a yet-to-be-decided standard. 700 MHz will be cleared. Post-transition the entire High VHF band will have TV stations on it, and eventually the entire low UHF band too. Initially though most TV services will be packed 6 to a channel, with 6 transmitters in Port-au-Prince and two in most other cities.

[I also found a document listing all broadcast AM, FM and TV stations in Haiti](#). I can confirm that Storm TV channel 2 is licensed to Port-au-Prince, with an assignment date of March 18, 2013. The listed name is [Steve Halloun](#). Storm is the only channel 2 in all of Haiti.

The DTV document says that the highest-powered analog TV station in Port-au-Prince (of which there are 36) has an ERP of 5 kW. That could very well be Storm TV.

On UHF it appears that Haiti has all even channels (with DR being all odd channels).

The tropo opening of July 21 brought in two new logs; I finally pulled KLPW 107.3 through local K297BI with ESPN programming. The big surprise was KREJ 101.7 with Christian programming from the Moody Bible Network. Thanks to broadcaster Paul Walker for the ID help. The Channel Master rotator that has been pointing my antenna finally gave up the ghost after the July 24 opening. Even with the antenna pointed north, I managed to log WQUT 101.5 for my first Tri-Cities (TN/VA) market station via tropospheric enhancement propagation. I've logged WFHG 92.9 via E-skip at my location. The next night, I pulled in WTUG 92.9 from its new city of license; I heard this in 2006 when it was licensed to Tuscaloosa. This is my 20th Alabama FM. The E-skip opening brought in WEOV 92.7 and the Cuban on 93.3 for the second time this year; it seems that KESO is making at least an annual visit to my shack. On July 30, I took delivery of an RCA VH126R rotator; I broke it in with a surprise E-skip opening to Montana and Saskatchewan, pulling in KVCK 92.7 for the 20th FM from Montana and another Billings FM station in KCTR 102.9. As of August 13, 2014, the logbook stands at 1,285. 73.

Here are my first FM e-skip catches as promised, following on the tail of some nice May tropo. FM continues to run circles around TV, which didn't offer catches beyond Orlando while FM was going all

the way to NC's Outer Banks. South Carolina's WRJA offered my first out-of-state ID by RDS (I knew it would come in handy sooner or later) and WMGV came in right through a low-power local to claim the title of "farthest northeast" catch. This finished off my first tropo season with FM, which I'm very happy with. And what if this was a slow season? LOL.

May 26 offered my first e-skip opening on FM, and a good start that went all the way up the band. June 1 was the second, and KLMR broke my old TV Es record. I knew that SE Colorado was barely within my 1Es range, but I didn't expect to log an FM there so soon! More RDS IDs followed, both at home on the Sony and on my breaks with the Sangean out in a parking lot. KHCD on June 2 was the first IBOC e-skip catch, but it wasn't the first to decode audio; that title would go to WKSV on July 2. I added Canada to the logbook just before leaving on vacation (which included Canada), but since my return conditions have been pretty dead. Hopefully this season isn't done already. 73s

Mexican DTV Update

CONTINUED FROM PAGE 12

Forum User Raymie Humbert posting on the WTFDA Forums

(Sept. 4) The IFT's Pleno (Committee) has been super busy of late. They had some nine different sessions during August (some of which did not relate to TV, like the one where they issued their new Constitution and Bylaws and another about telephone rates).

Well, they today turned their attention back to television by issuing their new TDT Transition Policy (press release).

The new policy includes the new procedure to get an analog shutoff for a specific area going: the SCT tells the IFT how the distributions to low-resource homes are going (**reminder: the threshold is 90% of low-resource homes, not of all households like it had been**) and all parties agree on a date that then must be published in the DOF (seriously, the Mexican government loves to publish stuff!) and then disseminated through various media. Now that this new TDT policy is up and running I would expect to start hearing about a shutoff for Nuevo Laredo and Reynosa-Matamoros, which I definitely think is happening this year, with other areas in northern Mexico likely to follow. I'm hoping Monterrey and XEFB-2 stick around until E-skip season for Chris, personally, but I have my doubts. Chihuahua will probably not go right away because it's way behind other northern Mexican cities in TDT rollout (Azteca, I'm looking at you).

(Sept. 11) You might recall the IFT began a project to update the TDT Transition Policy recently. It got its day in the DOF today, which means it goes into effect tomorrow (Sept.12). (Just in time for El Grito and Mexico's Independence Day!)

There isn't much of note except that there's a real important date: every DTV station in the country must be on by August 15, 2015. Azteca, Televisa and certain state governments (looking at you, Sonora) will need to really get to building their digital facilities in smaller communities in Mexico. (And some larger ones: XHCH, XHIT and XHECH are still not in digital in Chihuahua!)

The next 16 months look to be the busiest time for TV station construction in Mexico. Not only do all these new stations (a number definitely in the hundreds) need to be authorized and/or built, we might see the beginning of the new network buildouts (seven bidders competing for two networks). The final initial phase of the OPMA/SPR stations is also expected to be online soon, including stations in Ciudad Obregón, Tuxtla Gutiérrez and Colima.
