# THE WORLDWIDE TV-FM DX ASSOCIATION

*Serving the UHF-VHF Enthusiast*

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, GREG CONIGLIO, KEITH MCGINNIS AND MIKE BUGAJ.

*Editor and publisher:* **Ryan Grabow**

*Treasurer:* **Keith McGinnis** [wtfda.org](http://wtfda.org) *Webmaster:* **Tim McVey**

*Forum Site Administrator:* **Chris Cervantez**

*Editorial Staff:* **Jeff Kruszka, Keith McGinnis, Fred Nordquist, Nick Langan, Doug Smith, Bill Hale, John Zondlo and Mike Bugaj**

*Website:* [www.wtfda.org](http://www.wtfda.org); *Forums:* <http://forums.wtfda.org>

## The Mailbox

P.O. Box 501 Somersville, CT 06072

Mike Bugaj - Enfield, CT [mikeb@wtfda.org](mailto:mikeb@wtfda.org)

**September 2015**

By now you have probably noticed something familiar in the new column header. It's back. The graphics have been a little updated but it's still the same old Mailbox, but it's also Page Two. So take your pick. It's both. Hard to believe that I've been doing this column since 2000, the same year I began as VUD editor which took me through to July 2014 when Ryan took over the job. Previous to me, a guy by the name of Bill Thompson published the VUD. I wonder if anyone has heard from Bill over the years and knows what he's doing now. Bill is still on the membership list.

Skip season is over now, I think. But this year you never know. I've experienced two FM openings in August and other DXers in the northeast have seen quite a bit more. Ontario, Western NY and Ohio seems to be the area with the big bullseye over it. Meanwhile other DXers are shaking their heads and wondering what skip season?

Before we go any further I will mention that the joint 2015 Convention was a success and netted our club just over \$200 to be deposited in the bank. That brings us to next year. WTFDA is going in with the NRC one more time for 2016. The next convention will be held in Kansas City, MO on September 9, 10 and 11. It will be hosted by NRCers Ernie Wesolowski from Omaha and Dale Hamm of Kansas City. As the months fly by we will have more information for you about this event, so stay tuned.

This month we welcome Roy Crosier to the WTFDA. Roy lives in Warsaw, IN and his interests are FM DX and 30-50mhz. He is also an amateur with the callsign AC9DN. Welcome Roy! We also welcome Rob Keeney to the WTFDA. Rob lives in South Carolina and I know he DXes FM because I used to see his name on FMList quite a bit. Glad you're here, Rob.

During the period from July 20<sup>th</sup> through August 15<sup>th</sup>, renewals arrived from Bob Rush (MA), Dwayne Whittingham (IL), Bob Hawkins (IN), Steve French (MN), Eugene Hinton (CA), Randy Miltier (OR), Rob Ross (ON), Roy Barstow (MA), Bob Timmerman (IN), Mike Perron (LA), Steve Walko (PA), Alan Michalek (MA), Stan Weisbeck (WA), Paul Swearingen (KS), John Callarman (TX), Ron Purdue (MN), Keith McGinnis (MA), Doug Smith (TN), John Zondlo (OK), Ron Rader (IA), Jeff Falconer (ON), Curtis Sadowski (IL), Steve Rich (IN), John Lentz (WI) and Nick Lombardi (GA). This is a big group this time and thank you all for your support of the WTFDA!

Here is a short story from Roy Barstow about the start of his DX career:

I was around 10 when my older brother said Florida was coming in on the TV. Our family lived in Walpole, MA. This older brother never got married and took me under his wing, so to say. We both purchased the 70ft crank up tower and had it in the back yard. Also while young and living in Walpole logged 49 states on the am band, 2 from Hawaii. Went to Vietman came back and married 3 years later. My wife and I lived in Boston for she was a school teacher at the time. Found out about a program called 235 which was a government program where if you qualify you would pay so much according to your income and the government would pay the rest. The houses were on Heritage Circle, Teaticket. We lucked out and got the house they picked out for us. And the rest as they say is history. Now if I ever moved I would live close to the ocean in NC or SC.

That's Roy's story and I would imagine that one of the HI stations Roy heard back then was KORL on 650khz because it's what I heard a few times on Monday mornings around 4am when I was a kid of high school age growing up in the center of CT.

### THE INSIGNIA BOX

Many of us own either the Insignia NS-DXA1 or the Zenith equivalent. Here's some info from Carter Bays along with a photo that describes the anomaly.

The Insignia digital converter (Zenith DTT-901) is generally regarded as one of the the best converter boxes for the TV DX hobbyist. It allows one to immediately identify a station; it timestamps the reception, has a (rudimentary) signal strength indicator, scroll thru actual RF frequencies, etc.

But here is an issue that you might not be aware of: It occasionally misidentifies stations!! This appears to happen sporadically, but always involves two stations on the same RF channel, usually originating in different directions, one presenting a somewhat stronger signal than the other (though not necessarily). If you lock in on the stronger station, then rotate to the weaker one, the call letters of the stronger station will (sometimes) remain. The enclosed pix illustrates this phenomenon.

Channel 34 is identified by the Insignia as WMMP, Charleston SC. But the antenna is pointed at Charlotte NC – the video is from WSOC!! On this particular day, I could also reverse the process and obtain a WSOC ID with a WMMP picture.

If you suspect this is happening (or, just to be on the safe side during an extensive tropo opening) just flip up (or down) to the adjacent RF channel, then back. Usually this works; if it does not, power the Insignia off, then on again. This will cure the issue – unless of course you rotate the antenna and re-introduce it!

It is possible that my antenna setup, which I turn by hand, exacerbates the issue, for I can rotate it 180 degrees in about 2 seconds. But that is another story.

### MEXICO FM STATION SPACING

Over on Raymie Humbert's area of the WTFDA Forums he recently wrote about the possibility of Mexico changing the station spacing for FM stations in metropolitan areas down to 400khz. Here is what he wrote:

In the IFT magazine *Gaceta IFT*, one of the IFT committee members talked about the addition of the new FMs from the 2015 bid. This is the first new FM auction in Mexico in more than 20 years; it includes 191 stations — including 94 social use and 13 public use allotments — which represent a 20% increase on the 1,243 existing FM stations. The IFT received 600 applications/declarations of interest.

However, the bigger change on the horizon is the potential change of station spacing from 800 kHz to 400 kHz, and for that we have more to read about from Gabriel Sosa Plata.

Things to note:

Opposition to 400 kHz is two-pronged. One group says that short spacing does not work well with HD Radio. The other says that opening up more stations would mean smaller slices of a stagnant radio pie, and thus a potential economic crisis.

The IFT, though, has a study conducted jointly by itself, the Universidad Iberoamericana and the IPN. The participation of Ibero in the study is important. They own XHUJA 90.9 Mexico City, which is one of two non-IMER permit stations to broadcast in HD Radio. They are bookended by XEDA and XHFAJ, each of which also is in HD Radio — and there's no interference between the stations, according to the study. The IPN also operates a "halfway" station in Mexico City, XHUPC 95.7.

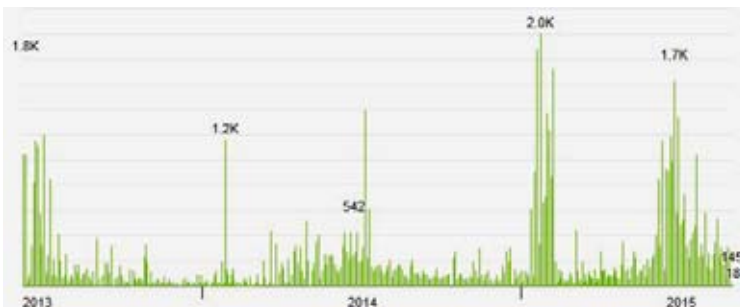

As for the market part, the IFT will likely defend itself by mentioning that all AM stations have the right to move to FM (and of course, in some markets there was not room for that). In fact, Sosa Plata says what I said a while back, that groups with no FM radio stations in an area (e.g. Radiorama, Radio S.A. in Mexico City) should be prioritized in such a process. He also says that the IFT, as the telecom regulator, must defend the rights of the audiences to pluralism in broadcasting and information.

For those who have never checked it out, here is a screengrab from the WTFDA FM Station Database showing what information is available there. Going from left to right you will find callsign, originating station if applicable, city, state/province, ERPH, ERPV, HAATH, HAATV, mode (mono, HD), PI code, PS Info, Radiotext, Pty (Program type), slogan and format. Most fields are sortable and searchable to make it easier for you to find what you are looking for.

The site (db.wtfda.org) is now just a little over 2 years old now. Each year has shown an increase in traffic. As of this writing the site has seen over 185,000 page views from over 24,000 first-time visitors.

Countries included in this database are the US, Canada, Mexico, Bahamas, Cuba, Cayman Islands, The Dominican Republic and Haiti were added this year.

The graph on the left shows the increase in page views since July 2013.

See you all next month!

September 1<sup>st</sup> is the deadline for Class A stations to convert to digital operation. Stations listed as "DTV requested", "DTV granted", or "no DTV request" are Class A stations still operating in analog. They will be required to shut down their analog operations on the 1<sup>st</sup>. Some (most?) of those listed with "DTV granted" may already be operating in digital and won't be affected. I strongly suspect the three stations listed as "no digital request" will be going away permanently. (if it hasn't already happened...)

# FM NEWS for CANADA and USA

September 2015

BILL HALE  
FMNews@wtfda.org

## INDEX OF ABBREVIATIONS USED IN FM NEWS

APP: application  
APP Mod: Change to an already submitted application  
Class: FM license class  
CoL: City-of-License  
CP: construction permit (authority to broadcast with facilities noted)  
CP Mod: change to an already granted CP  
DA: directional antenna  
EE: English language  
FF: French language

\$: Stereo  
SS: Spanish language  
STA: Special Temporary Authorization  
XL: Transmitter Location change to  
> : change to [in formats]  
< : an increase to [in technical data]  
> : a decrease to [in technical data]  
[ ] : Calls in brackets signifies assumed or applied-for status  
Note: antenna heights are HAAT except where noted

BC	Abbotsford	89.9 CP	VF2691
BC	Abbotsford	107.9 CP	VF2690
ON	Creemore	90.1 CP	CKAW-FM
QC	Gatineau	96.5 CFTX-FM	CKLX-FM
QC	Montreal	91.9 CKLX-FM	CFSI-FM

## NEW STATIONS ON THE AIR

BC	Cranbrook	107.5 CFSM-FM	2.5 kW-H/1048 m DA, 49-27-30/115-37-49; Class C1; \$
BC	Creston	94.1 CKCV-FM	2.8 kW-H/602 m DA, 49-09-56/116-40-39; Class C1; \$

## FORMAT and SLOGAN UPDATES

BC	Cranbrook	107.5 CFSM-FM	Signs on with AC: <i>Summit 107 FM</i>
BC	Creston	94.1 CKCV-FM	Signs on with Variety Hits: <i>Juice FM</i>
QC	Drummondville	92.1 CJDM-FM	Reverts back to <i>Energie FM</i> as a slogan, remaining CHR
QC	Gatineau	104.1 CKTF-FM	Reverts back to <i>Energie FM</i> as a slogan, remaining CHR

QC Montréal	94.3	CKMF-FM	Reverts back to <i>Energie FM</i> as a slogan, remaining Alternative Rock
QC Québec	98.9	CHIK-FM	Reverts back to <i>Energie FM</i> as a slogan, remaining CHR
QC Rouyn	99.1	CJMM-FM	Reverts back to <i>Energie FM</i> as a slogan, remaining CHR
QC Val d'Or	102.7	CJMV-FM	Reverts back to <i>Energie FM</i> as a slogan, remaining CHR

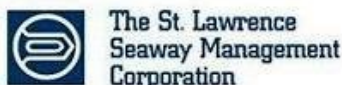

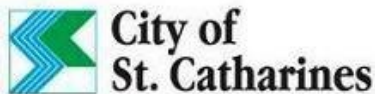

— TECHNICAL CHANGES —

GRANTS FOR NEW STATIONS

CP granted for:

BC Abbotsford	89.9	VF2691	.05 kW/28 m DA, 49-03-02/122-20-03; Class LP; \$ [will be South Asian; Singh Pannu]
BC Abbotsford	107.9	VF2690	.034 kW/28 m, 49-03-02/122-20-03; Class LP; \$ [will be South Asian; Singh Pannu]
ON Creemore	90.1	CKAW-FM	.005 kW/(-) 29 m, 44-19-34/80-06-22; Class LP; \$ [will be Variety (Developmental Community); Clearview Community Radio]
ON Nakina	98.1	[CBQT-FM3]	.05 kW/ 9 m, 50-10-43/86-42-23; Class LP; Mono [will relay the CBC's CBQT-FM 88.3 Thunder Bay and replace CBLN-1240 Nakina]
ON St Catharines	93.3	CFBN-FM	.05 kW/35 m DA, 43-11-07/79-11-55; Class LP; Mono [The St. Lawrence Seaway Management Corporation]
ON Stratford	107.1	[CJCS-FM]	4 kW-H/43 m DA, 43-21-52/80-57-38; Class A; \$ [will simulcast CJCS-1240 for 3 months, at which time the AM station would sign off; Vista Radio Ltd.]

GRANTS TO EXISTING STATIONS

CP granted for:

QC Amos	88.3	CBFX-FM3	47.75 kW-V//< 100 kW-H (adds V)/< 189 m DA, XL to 48-12-01/78-07-15; (to) Class C1; \$
QC Amos/Val D'Or	91.5	CHLM-FM1	45.6 kW-V//< 100 kW-H (adds V)/< 189 m DA, XL to 48-12-01/78-07-15; (to) Class C1; \$

APPLICATIONS FROM EXISTING/PROPOSED FACILITIES

Applies for:

ON Ohsweken	100.3	CKRZ-FM	< 5 kW/46 m, 43-04-01/80-07-28; Class A1; \$
ON Waterloo	100.3	CKMS-FM	.25 kW/27 m, 42-29-00/80-32-44; Class A1; \$ [proposes to move to 102.7 in order to facilitate the proposed power increase at CKRZ-FM 100.3 Ohsweken]

APPLICATIONS FOR NEW FACILITIES

AB Ponoka	89.7	APP	<u>Applies for:</u> 1 kW/111 m, 52-43-58/113-39-34; Class A; \$ [would be a Country format; [this is a re-application from Blackgold Broadcasting with decreased power to serve a smaller area than the former request]
BC Hudson's Hope	103.1	[CBYG-FM1]	.124 kW/(-) 159 m, 56-01-40/121-55-11; Class LP; \$ [would replace CBXU-940 with CBC's Radio One service from CBYG-FM 91.5 Prince George]

## DENIALS AND DISMISSALS

BC North Vancouver	99.9	APP	.45 kW/57 m [would have been a relay of CKEE-FM 101.5 Whistler; Four Senses, Inc]
BC Vancouver	99.7	APP	6 kW/75 m DA [would have been a nested repeater of CKNW-980 New Westminster; Corus]

### — OTHERNEWS —

BC Pemberton	98.9	CFPV-FM	Is silent
NU Baker Lake	99.3	CKQN-FM	An application has been made to transfer CKQN-FM from Qamanittuap Naaluataa Society to the CBC. If approved, the station will become a fulltime rebroadcaster of CBQR-FM 105.1 Rankin Inlet, Nunavut.
QC Ottawa-Hull	97.1	CHLX-FM	RNC Media will operate this station under a local sales agreement (LMA) with CKOF-FM 104.7 Gatineau
QC Gatineau	104.7	CKOF-FM	Cogeco will operate this station under a local sales agreement (LMA) with CHLX-FM 97.1 Ottawa-Hull

### NEWS ITEMS:

- **Newcap** has applied for a new commercial station in Kentville, Nova Scotia on 94.3 with 14 kW. The CRTC has issued a call for comments on market capacity and the appropriateness of issuing a call for radio applications to serve Kentville.
- **Aboriginal Voices Radio** remains on air pending appeal of CRTC decision to yank licences  
 OTTAWA - Aboriginal Voices Radio has been granted a temporary reprieve from a CRTC decision ordering it to shut down its radio stations in Toronto, Vancouver, Calgary and Edmonton.  
 The Federal Court of Appeal stayed the suspension of license for the four stations pending the outcome of an application by the broadcaster for a leave to appeal CRTC 2015-282 issued June 25.  
 "In the event that the application by AVR for leave to appeal this Decision has not been determined by August 31, 2015, the broadcasting licences for these four radio stations shall continue on the same terms and conditions as those that were applicable to these licences prior to the Decision, until the application for leave to appeal is determined", reads court documents dated July 23, 2015.

WY Worland	103.7	KKSG-LP	License cancelled; call deleted

It appears the FCC is, as promised, has began deleting those stations it has detected as being silent for one year or longer, as most of the deletions noted above fall into that category.

+++++

**NEWS ITEMS:**

- **St. Francis High School of Mountain View, California**, licensee of KSFH 87.9 (Channel 200), has received a CP to move to 100.7 MHz. The application states that on 87.9, they receive "extensive first-adjacent channel interference from LPTV station KBKF-LP San Jose on channel 6 . . .". The CP is for 10 Watts at (-) 44 meters HAAT at 37-23-51/122-03-01, about 3 miles from the former location. That leaves one licensed FM station on 87.9: K200AA in Sun Valley, Nevada.

+++++

**Thanks to Shawn Axelrod, Glenn Hauser, Tim Noonan, Ralph Strobel, Dan Sys, Radio Insight, and Upper Midwest Broadcasting for news.**

**If you hear any changes occur on your FM dial, share the news! 73**

## *The Editor's Note*

Go figure – in a month where most of us normally begin to focus efforts on tropo or turn attention toward other activities, several surprisingly high quality E-skip events popped up across the eastern and central areas. For many, August legitimately brought more Es activity than July. The highlight was a long-duration opening on the 11<sup>th</sup> which had MUF over 144 MHz. for a period. This was arguably the strongest event of the season. A solid opening from the east into the Gulf coast region was reported as late as the 26<sup>th</sup>. Can we get more skip in September?

Tropo, meanwhile, was not nearly as abundant as we might expect this time of year. A warm forecasted start to September across the Great Lakes and northern states may help change that.

### **Glenn Hauser**

Enid, OK

Mostly Mexican TVDX to Enid OK, June 18-July 26, 2015

\*\* CANADA. Re my channel 2 TVDX which included the ``Channel 590 Community Calendar``, on second thought, ``Channel 590`` would more likely refer to a high-tier cable or satellite TV channel than a MW frequency --- but searching various providers in the SSM area, no match for that either. Possibly some station other than CHBX snuck in. There is supposedly a ch 2 analog still active in NS, CHCH5 with CTV like CHBX, but I can't relate it to the 590 MW station although it is ``community``.

Richard Langley in NB says, ``Hi Glenn: With regard to your TV DX, commercials for retirement in Elliot Lake are shown across Canada, I believe. I've certainly seen them on our cable feed here in New Brunswick. – Richard``

Richard, OK, but that bit I got from reading about E.L. on their city website, not from something in the DX. Just the 60th anniversary note.

A bit more sporadic E despite antenna aimed SSE, June 19, UT:

1738 on 2, ads in English, video; some hum, low audible het? 1741 word QUANTICO flashes on screen. As far as analogous signals go, especially when 6m Es maps agree, CHBX Sault Ste Marie Ont remains the prime suspect, at optimum skip distance, although another Ontarian, CIII2, Global in Bancroft, is probably active too (Glenn Hauser, OK, DX LISTENING DIGEST)

Given that the show 'Quantico' is supposed to be coming to the CTV network in the fall, that would likely discount Global's transmitter from Bancroft (Theo Donnelly, BC, ODXA yg via DXLD) The ch A2 analog CTV station in the Maritimes, CJCH5, is in NS, not NB as I misstated in last report. Per the WTFDA list:

<http://www.wtfd.org/canlbtv.html> it's only one sesqui-kW at Sheet Harbour NS, so getting that by double-hop would be extraordinary, rather than plain old CHBX SSM full-power 100 kW at single-hop (Glenn Hauser, DX LISTENING DIGEST)

\*\* MEXICO. A bit of sporadic E, evening of June 18 = UT June 19:

0134 on 2, f bug in LR, = Televisa net 4 Foro TV, JBV

0139 on 2, Spanish language audio briefly

0215 on 2, algo video

0338 on 2, Spanish video, then Gala swirl bug in LR, drama

0352 on 2, SIPSE and GALA animated logos full-screen so XHY-TV Mérida

[and non?]. Lots of sporadic E June 20, but very frustrating, as mostly weak signal CCI on channel 2 video, seldom even audio to ascertain whether Spanish or English. Anyhow, all in UT:

1541 on 2, algo video; lots of fading in and out, nothing logable for hours

1821 on 2, a bit of Spanish audio; more in and out video CCI

2203 on 2, constant bug in UR looks rather like an X, plus two lines of tiny text to its right which may well be call and location or something else IDable if I could only make it out. Closest thing to design is the TeleVer script T V logo as in Danny's channel 2 reference, i.e. XHFM Veracruz (which my antenna is aimed at anyway); again visible at 2228; 2235 when dogs are featured on rest of screen

2246 on 2, now a small bug in LR, probably star of Televisa-2; heavy CCI continues

UT June 21:

0021 on 4, algo, variety show? Spanish audio; also usual CCI on 2

0113 on 4, ``en el Trece``, audio promo, so Azteca 13 net

Looks like June 21 will be another frustrating sporadic E day, of almost continuous weak analog CCI past 1535 UT but hard to ID anything. 6m Es maps would lead you to believe all the action is over most of the USA only.

1400 UT turn-on to find CCI on channel 2, some Spanish audio.

1400 on 4, also here and at 1432 it manages some Spanish audio, wacky voices probably for animation

1535 on 4, still CCI much like 2.

1539 on 4, it's Bob el Esponja with Televisa net-5 bug in LR

1541 on 5, MUF is building, now CCI here; to be continued?

1634 on 5, Sanborn's ad --- store chain catering to American visitors

1637 on 3, promo for algo on [Televisa] Canal 5 net, Pantene ad

1648 on 6, MUF up to here with also video and Spanish audio, CCI; I'm getting more audio on the TV set than 87.75 FM lacking external antenna

1656 on 5, video breaking into color, photos attempted, believe the bug in LR is Televisa-2 star

Then MUF plunge, nothing more on FM, but back to the TV DX at 1735, still CCI on 2 thru 6

1825 on 2, now the CCI is down mostly to this channel only, and I quit monitoring for a few hours

2215 on 2, algo video CCI

2219 on 2, bug in UR like an X but maybe the script T V of XHFM Veracruz

2222 on 2, fútbol, unknown bug in UR. A Copa América game is now underway since 2130, Brasil vs Venezuela at Santiago de Chile, presumably this via some Mexican.

JUNE 23!!!! Don't you believe 6m Es maps which show hardly any activity, only in NW and NE USA! Analog TV DX on NTSC A-system channels, all times UT, June 23:

1439 on 2, fade-in Foro, Televisa net 4 as evidenced by f bug in LR

1620 on 2, fade-in Televisa-5 net bug in LR, with animation

1622 on 2, fade-in snow free sports news show, no bugs visible, but running tweets at bottom; then plug for Fundación Televisa by YL on screen, with large www.becalos.mx across bottom

1627 on 2, exercise segment with Televisa-2 star bug LR

1630 on 2, back to net-5 LR bug with animation.

1638 on 2, comedy with guy in funny cap

1659 on 3, animation, Televisa-5 bug LR, wacky voices

1659 on 5, MUF growing, CCI here including tentative net-5 as well.

1721 on 5, yes, it's Televisa-5 bug LR, animation. At the moment, not much else on the other channels

To be continued. Hope for another FM opening, but competing with lunch  
(Glenn Hauser, OK, DX LISTENING DIGEST)

FYI, I was getting a huge sporadic E FM DX opening from Mexico up past 106 MHz from before 1800 UT until about 2030 today June 23. TV is still wide open channels 2-6 and maybe some FM too, but I need a break from that! So far I have filled 12 pages of log notes which will require a lot of processing (Glenn Hauser, OK, 2112 UT June 23, dxldyg via WORLD OF RADIO 1779, DX LISTENING DIGEST)

\*\* MEXICO. Sporadic E analog TVDX the morning of June 26, but not into FM, all times UT:

1417 on 2 & 3, CCI

1419 on 3, animation, Televisa-5 net bug in LR; I used to assume the most likely source would be XHBQ, Zacatecas and maybe still is, but never get a local ID from it. 1426 the 5 icon morphs, spins into some other symbol(s) and back to 5

1435 on 2, horoscope with large astrological symbols, one by one, YL talking nonsense

1438 on 2, Televisa-5 net bug

1438 on 2, audio not from net-5, same as on channel 3 at the moment, but a second behind it

1522 on 2, animation, Televisa-5 bug LR

1527 on 2, guy in a sports(?) uniform, labeled Miguel Herrera; crawler too, but no bug visible; CCI

1630 on 2, CCI fades out around now

1652 on 2, infomercial for female hair STYLER, phone 01-800-120-6202

UT June 27:

0247 on 2, tune-in to find a MOVER MEXICO Gobierno de la República PSA about some business that ``cree en México``. Maybe like Nestlé I heard previously; followed by ads for elektra; acid indigestion; 0249 to drama(?) and fadeout. No bugs visible during the ads

0309 on 2, Azteca-7 net bug in UR, soon gone

NTSC Analog channel A2, 54-60 MHz, i.e. 55.25 MHz video carrier plus/minus 10 kHz, June 27 at 1425 turn-on finds novela with Televisa-2 net star bug in lower-right; wasn't expecting it since no sign of Es on HF, such as 15825 WWCR. Tho sporadic E areas are broader at HF than at VHF, that is of course 90 degrees off the direction of Mexico, more or less. A bit more CCI during the next hour but nothing significant develops in TV DX (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* CANADA. Channel A2, NTSC, June 28 at 1449 UT, video fades in; will it be Spanish or English? The latter, soon preaching, 1452 already wrapping up `Living Truth`, with contact info, including .ca website, Toronto address. For less than a minute, the video is strong and sharp, despite antenna still aimed toward México. I bet it's CHBX, Sault Ste Marie Ont., now my prime Canadian TVDX not yet DTV --- yes, local.ca schedule for CHBX shows `Living Truth` Sunday 10-11 am EDT. 6m map alleges MUF is 113 MHz centered around Illinois, so I check for SSM FM: 88.1 could bear CBON-FM-18, 3.59 kW, SRC; 89.5 has CBSM-FM = CBC Radio 1, 46 kW, but neither making it here. No more TV or FM DX today (Glenn Hauser, OK, DX LISTENING DIGEST)

UNIDENTIFIED. I still run an analog TV on channel 2 most of the day for signs of Es DX; not much lately, but June 29 from 2220 UT for about a semihour, there is some weak CCI, never enough to nail language on audio or video as Spanish or

English; however, 6m Es map again shows center of activity around northern IL, so that points to Ontario rather than Mexico; but we know Mexican info is insufficient. MUF even reaches into 2 meters in eastern USA, but not even any FM DX here (Glenn Hauser, OK, DX LISTENING DIGEST)

Channel A2 NTSC, July 1 at 1659 UT, fade-in some CCI by sporadic E, including same-offset beat; 6m Es map shows opening centered over New Mexico? and MUF 55 MHz; nothing identifiable until 1733 when I spot the Televisa-2 net star bug in lower right, and nothing more today (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* MEXICO. Sporadic E analog TV DX July 3: Turn on ch. 2 at 1430 UT;

1442 on 2, some CCI appears; 1451 the audio is Spanish

1454 on 3, now MUF up to here with some video

1508 on 2, Spanish YL with variety? show; no bugs visible but may be there; shortly a better fade-in has a vertical rectangle in the upper right, including 24 = temperature somewhere.

1517 on 2, ad for Plan B

1527 on 2, now the UR bug is clearer with a large 7 at its upper-right, so likely XHTAU Tampico on regional Azteca-7 network (morning show originating in Monterrey?); now besides the 24 I can also read a clock at 10:27, i.e. CDT = HVCM, so not Tu Canal, XEPM in Juárez as I first suspected, and which is due to quit ch 2 for UHF digital on July 14. A fashion show earlier, a lady with two large numbers on her breast, now one in shorts labeled ``el estilo ``chicken````.

6m Es map shows no Mexican contacts except XE2M on the border in BCN. Weak signals on 2 continue past 1628 UT.

Channel A2 NTSC, July 7 at 2235 UT, brief fade-in of novela with TRECE legend at upper-right, i.e. bug for Azteca-13 network. Had been monitoring 54-60 MHz most of the day waiting for Es MUF to reach it, but nothing more than this (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* U S A. Since I am getting Kansas all over the FM dial, I turn on DTV to see what's in. There are Bad

signals on just about every UHF channel, antenna still stuck toward OKC. One which does decode is:

RF 41, July 13 at 1425 UT, KMCI as DTV 38-1 = 730 kW in Lawrence KS

RF 27, July 13 at 1425 UT, KFOR OKC is unusually NOT decoding, which means it has co-channel QRM, probably from KSNT Topeka KS, 77.9 kW

RF 14, July 13 at 1426 UT, tuning channel 13 for OETA, I also get a remap to 14 but not a decode, so has to be KERA in Dallas TX. I might have expected KOCW Hoisington KS as seen before on RF 14 but not a ``13`` (Glenn Hauser, Enid OK, DX LISTENING DIGEST)

\*\* MEXICO. NTSC channel A2, July 13 at 1647 UT, sporadic E fade-in of algo, digital clock lower right 2 minutes slow! In CDT at ``11:45``; likewise at 1649 ``11:47`` and now I can see a guy in a black cowboy hat being interviewed on a studio set with a large SIPSE and a Calle 60 in the background, which gives it away as XHY-TV in Mérida, Yucatán, for its corporate name and studio location = morning show name; at 1655 UT, clock for ``11:53``. Still bits of video occasionally following hour to 1758 UT.

Distance city-to-city: 1896 km = 1178 statute miles. Will certainly miss XHY-TV when it goes DTV on UHF. I wonder what the planned date for that is in the Mérida market, but presumably by the end of this year if not before. cursory look at <http://sipse.com> finds nothing about digital channels, but it does remind us what SIPSE stands for, as it also has newspapers and radio: Servicios Informativos y Publicitarios del Sureste.

2303 UT July 13, some ch 2 video starts to show again; more to come?

2322 on 2, CCI including Televisa-2 net star bug in lower right

2324 on 2, in addition LA VECINA = novela title temporarily in LL

2330 on 3, algo video here too

2334 on 2, still novela from 2 net

UT July 14:

0001 on 2, 3 and even audio on 4: weak CCI

0018 on 3, Spanish audio

0037 on 2, Televisa-5 net bug in LR, also at 0048, 0052; no more

1253 on 2, some Es CCI is already apparent; correlating with sporadic-E boost for 13845 WWCR and less so for 15825, which emits some dead air at 1304-1305

1357 on 2, still Es CCI, cowboy in white hat; 1358 it's a live studio variety show, Spanish audio, suspected XHY-TV Mérida, Yucatán. At same time I am getting UHF DTV tropo DX from TX to KS; see USA.

\*\* U S A. Morning of July 14, Bill Hepburn's tropo maps show mostly over Kansas, but bandscan gets first decode from north TX as favored by my antenna pointing, all times UT:

1351 on RF30, decode as 29-1 KMPX, and at 1352 with Estrella TV bug in LR (like we get from KTUZ RF 29 as 48-1, KOCY OKC). That chex in W9WI.com for the megawatt KMPX in Decatur TX (NW of Fort Worth). Soon gone

1352 on RF29, meanwhile, KTUZ is not decoding no doubt because of CCI, which would be KTXA, another megawatt in Fort Worth; a few minutes later, KTUZ reappears (Glenn Hauser, OK, DX LISTENING DIGEST)

Sporadic-E NTSC TVDX monitoring, UT July 14:  
2201 on 2, fade-in and back out, shark(?) movie in Spanish  
2245 on 2, CCI from two stations on same offset, big bar  
2325 on 2, old movie in Spanish, looks like monochrome era

July 15: signs of CCI on channel 2 most of the morning;  
1702 on 2, fades in a bit, traces of audio too, Spanish  
1713 on 2, Spanish ad for ropa (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* MEXICO. Sporadic E analog TVDX, July 17, UT:  
2314 on 2, fade-in Televisa-2 net star bug lower right, then image of Virgen de Guadalupe with her mandatory rays, a Mexican thing

2328 on 2, fade-in during a novela, still net-2 bug; 6m Es map shows centered over Kentucky, but not for this path

2338 on 2, fade-in again, still net-2 bug

UT July 18:

0000 on 2, fade-in again, still same

0002 on 2, now the novela features guys in hard-hats; also algo on 4

0034 on 2, old movie, probably monochrome, playing a 78 rpm, sounds like Gardel, no bug visible on this one, CCI with the above novela

0047 on 4, animated movie, Televisa-5 net bug in LR

0134 on 2, still some CCI [co-channel interference]

1755 on 2 and 3, CCI and Spanish

1753 on 2, Televisa-5 net bug in LR during movie? not animation; NO activity shown on either 6m map!

1802 on 2, still Televisa-5 bug LR, same offset CCI, now seems novela

1806 on 2, ``Cine Cinco`` promo heard

[break in my TVDX monitoring, not promising, I thought]

2010 on 2, resume monitoring, CCI with Azteca 7 promo audio; Gala swirl video bug lower right; stronger signals than before and more MUF

2010 on 4, CCI from algo

2012 on 5, CCI, brief MUF peak, maybe just beating against KOCO cable radiation; but time to check FM

2032 on 4, strong signal with Azteca 7 promo, heavy ghosting

2032 on 4, CCI at 10 kHz offset. Now the 6m central Es node is over north Texas

2042 on 2, movie with unknown bug in upper right; a bit more CCI and then nothing more.

Brief sporadic E MUF topping 54 MHz, UT July 19 at 0341, CCI on 2, and a soccer field on 3.

1513 July 19 on 2, CCI fades in after peripherally watching snow for a sesquihour; here we go? NO

After a morning of summer snow, July 21 at 1558 UT, fades in sporadic E analog CCI on 2.

1601 on 2, Televisa-5 net bug in LR, animation amid CCI

1604 on 3, Play-Doh ad with no CCI, // 2 with CCI

1605 on 2, promo for Ridículos show on net-5

1610 on 2, f bug in LR = Televisa 4 Foro net

1617 on 4, algo video, no bug, but 1618 MATUTINO EXPRESS on set background, letters so large you can see only part of them at a time as the rotate; little CCI.

1622 on 3, net-5 animation almost snow-free in color

1624 on 4, Scotch-Brite, Smartphone, USACell, VICHY, Kleenex, Bayer, Nuevo RAID (`ride`) ads, back to show `Sin palabras, torneo de verano`

1627 on 5, now strong video here, PSA for MOVER MEXICO.

1632 on 6, some DX video starting here, 1636 net 5 bug LR, as I wrap this report; more to come? If MUF keeps going up I'll have to head to the porch for FM DX.

With TV MUF up to channels 5 and 6, I head to the porch to check for FM, circa 1645-1705 UT, but no DX showing. Back inside for more TVDX:

1705 on 2, Info 7, anchor, CCI with time and temp LR, 32 degrees. Crawler to go with current story about a big traffic accident on the Reynosa-Juárez Hiway, where 27 were lesioned. [There is no thru hiway anywhere near the border in northern Coahuila; evidently refers to indirect Hwy 40 from Reynosa to Torreón, then 49 to Jiménez, and 45 to Juárez.] This programming points to XHTAU, Tampico, but originating in Monterrey, although local IDs are rare if ever.

1712 on 4, still some CCI, and on 5, algo

1719 on 2, Info 7

1719 on 4, animated 5 logo = Televisa 5 net

1727 on 2, Info 7, also exhibiting the old Azteca 13 swish logo on the set near the LR logo. I guess it's generic Azteca since the 13 net itself merely bugs as TRECE anymore

1730 on 4, TVMÁS and RTV logos on full-screen; male singer in Studio; video squeezed. It's XHGV in Veracruz

1733 on 5, novela, with unknown white text bug in LR

1822 on 2 and 3, still some CCI; gone by 1845

A similar opening July 22, UT:

1534 on 2, fade-in Es CCI, YL anchor; 1536 Mérida on backdrop, SN logo by YL (elongated horizontally letters as SIPSE Noticias); 1527 Gala bug in LR apparently same station, as the wide S is also in the LL, i.e. XHY-TV in Yucatán, quite a regular here

1548 on 2, exercise segment led by muscular but effeminate guy; digital clock in lower right is rolling over now only 20 seconds slow; XHY

1625 on 2, XHY still morning variety show

1630 on 2, CCI from novela? with music

1633 on 2, Info7 takes over making same-offset almost single heavy bar video beat. Bill Hepburn's channel 2 map confirms what I suspected: XHY-TV and XHTAU in Tampico are same offset = zero. These offsets must not have been planned with DXers in mind; nor platforms in the Gulf midway?

1637 on 2, PLAN B in large font on set or backdrop, program name? Have seen it before. 7 bug in UR, with clock 11:38 and 29 degrees. Apparently part of the Info7 XHTAU program

1644 on 2, Gala bug LR, street scenes

1645 on 2, PLAN B, same-offset CCI again, 30 degree temp now in UR; talking about Saltillo; 1647 it's snow-free in color

1648 on 5, algo video in Spanish

1648 on 4, Spanish audio, and some video but 2 fades at the moment

1649 on 4, it's a docu/news report about bomberos [not bombers, but pumpers, i.e. fire-fighters]. Letterboxed with open Spanish/Spanish captioning. This has a little unknown triangular bug in the UR, but it's not right in the corner, somewhat toward the center

1655 on 2, PLAN B again, and I see its clock turn over 5 seconds slow; when anchorette appears, large Coca Cola logo behind her

1722 on 2, CCI between novela and talk show

1730 on 2, serious animated drama, but no 5 bug visible; instead the Azteca 7 bug in UR, and some more same-CCI. I guess XHTAU has moved on from Info7 show after local noon

1738 on 4, audio & video letterboxed, ads; 1740 for Felix = cat food?

1743 on 4, Azteca Noticias promo; mentions Monclova

1816 on 3, federal PSA interviewing kids, tv3 bug in LR which means XHP-TV Puebla. The 3 is a lot larger than the tv and they are italix

1817 on 3, promo for tv3 Noticias, L-V 2:30-4 pm, and logo tv3N

1819 on 2, star bug in LR of Televisa-2 net; CCI

1820 on 3, after ads, XHP back to film drama

1829 on 2, Azteca novela promo

1911 on 2, game show with Televisa-2 bug

2020 on 2, Televisa-5 bug in LR, CCI

2045 on 2, sitcom from net-5 bug LR; algo on 3

2049 on 3, now net-5 bug LR here too but can't tell if // 2

2056 on 3, tv3 bug in LR now during the XHP news sesquihour as above

2058 on 3, interview in Xalapa per caption

2107 on 3, net-5 animation

2124 on 3, animation, net-5 bug LR; algo CCI on 2

Some CCI on 2 remains for a while till fadeout (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* U S A. A bit of tropo DTVDX morning of July 25, despite antenna still pointed toward OKC, lots of Bad signals a few decodes, UT:  
1425 on RF 43, 12-1 KODE-DT, Joplin MO  
1425 on RF 42, 41-1 KMYT-DT, Tulsa OK  
1426 on RF 20, 19-1 KQCW-HD, Muskogee OK  
RF 27, KFOR OKC was not decoding due to CCI, Topeka or Ft Smith?  
BTW, KXOK-LD Enid is still absent from both RF31 and RF32. Now FCC has an application for a megawatt here on RF21! (Glenn Hauser, Enid OK, DX LISTENING DIGEST)

\*\* MEXICO. A bit of sporadic E DX on July 25, UT:  
1444 on 2, fade-in some Spanish grafix, including 1445 Colgate ad, and then the name Ricardo Naya; 1446 full screen 7, and credit roll for an animated show, still with smaller Azteca-7 bug in upper right; soon fade and nothing more all day. As usual, first guess is XHTAU in Tampico; I wouldn't mind seeing the ones in Campeche or Durango for a change, but little chance of distinguishing them.

July 26, UT:  
1441 on 2, fade-in briefly some guys in soccer uniforms  
1524 on 2, CCI, Play-doh ad, animation  
1525 on 2, animation, Televisa-5 bug lower right (Glenn Hauser, OK, DX LISTENING DIGEST)

8/12 Tr (LG 24" LED, attic system)  
2307 W48AV 23 MI Detroit EN82 50  
(new call and virtual channel  
48.1 - was WUdT-CD 23.1)

2015 was one of the poorest Es seasons I could remember, with a very slow start, signals quite weak when openings occurred, and a lot of skip just too far south to work with at my latitude north of 40°. Needless to say, there were a lot of stations than when unidentified, and not a single new addition to the list of TV stations I have seen by E-skip. A further handicap was that fact that morning openings predominated this year, and I work day shift in a steel building.

There were two openings where the FM band was open and I added a few new ones there.

The 7/15-16 opening was a nice treat, the first good long-haul trop opening since four years ago, when the band opened up to Iowa. This opening instead gave me my first "Pittsburgh sweep", with six new stations by Tr in a few hours (nearly all of the new stations by Tr since the Iowa opening were the result of facilities changes and short tropo.) This opening was a true duct in some cases, such as WPSU on 15 having to go right over flamethrower semilocal WEWS. I can't be sure of the distance from WPSU - they have two full-power transmitters on 15. The transmitter closer to I is also more powerful and with fewer obstructions than the other, so I'm treating the logging as that of the closer one.

I've joined the "cord cutter club" and wired the whole house for OTA DTV. One of the last Antennacraft C290 antennas made is in the attic fixed at the Detroit tower farm, has a low-gain Winegard preamplifier, and then is fed through a distribution amplifier to 5 sets and two further DTV tuners.

Tropospheric enhancement propagation took over after the end of June, making 2015 one of the worst E-skip seasons since I returned to Hazelwood at the end of June 1992. I can remember two worse seasons in that period: 1995 and 2002. The July 17 opening only had WHBQ 13 decode, although the signal meter lit up on 5 as well. The July 20 and 26 openings brought mainly stations from southern Illinois, southeast Missouri and southwest Indiana at semi-local to local strength. The opening on August 2 only allowed WCIU 27 to decode, although the signal meter lit up on 12, 19, 29, 38, 44, 45, 50 and 51 from Chicagoland. The opening of August 9 started with 5 and 13 from Memphis, followed by southern Illinois and Paducah signals at semi-local to local strength, getting as far north as Champaign/Urbana. WSMV 10 and WKRN 27 decoded from Nashville, although the signal meter lit up on 5 and 15. WSIU 8 was in at local strength. During the opening, the signal meter also lit up on 7, 11, 12, 18, 28, 29 and 41. The digital TV logbook still stands at 167. 73.

Telephone (805) 687-7803  
24-hour PDT

This report is through August 14, 2015.

I have not kept up with tropo conditions on the southern-California coast in any detail for July and into August. It appears, though, to have been fair to poor in recent times.

I could at least point out that there have been no new DTV signals sighted in recent months, either at my place with my indoor antennas or nearby at Don Voegele's place with his outdoor antennas.

Best of DX to All Dennis

Distance estimation for 8/11 opening 850 miles to central Alabama to about 1300 miles for Texas logs. I do not search out mileage for each average e-skip reception because I believe it's a waste of time and who "really" pays attention to that.

With the calendar turned to July, the E-skip season came to an abrupt end; this will go down as one of the worst E-skip seasons I had since returning to Hazelwood at the end of June 1992. I can remember only two E-skip seasons that were worse at this location: 1995 and 2002. The July 10

opening brought two new logs on the NOAA Weather Radio bands; one from Michigan and the other from Indiana. WWF34 was a nice surprise; quite a signal for a 300-watt station (note that maximum power for NOAA Weather Radio is 1,000 watts). The rest of July was mostly re-logs. The opening on August 2 allowed me to pull in a new state on NOAA Weather Radio when I pulled in KEC60 on 162.4 from Milwaukee, making Wisconsin the 24th state logged on the 162.4-162.55 MHz band. It makes me wonder what State #25 on NOAA Weather Radio will be. I also pulled in two new Indiana FM stations in WBYT 100.7 and WMEE 97.3 for the 53rd and 54th FM stations from the Hoosier State. The reason why the WNG648 calls are underlined is because it changed its city of license from Dixon to Crocker, MO; this was noted on August 3. The National Weather Service office in Springfield, MO was running programming recorded by an actual human voice; the digital voices were undergoing maintenance at that particular time. The August 8-9 opening put me at the dials with a few breaks for 12 hours, pretty much going non-stop from 2200 on August 8 to about 0730 on August 9. WDMS 100.7 put the Magnolia State into double digits, as it's the 10th FM station noted from Mississippi. The only Alabama station noted was KIH20 on 162.4; the signal was in all night, trading places dominating with WXL45 and WXL47. The FM logbook now stands at 1,303; the NOAA Weather Radio logbook now stands at 127. 73.

lots of Ontario relogs

8/14 had Es to the Dominican Republic with relogs, and more relogs 8/17 with Es to MO/NE/IA/SD. Highlight of the season was on 6/18 with 2Es reception of WJVC 93.9 Bogota, Colombia, RCN RDS at 1999 miles. 8/11 Es opening was the personal best ever with 68 new loggings, at least 2 top of the band Es clouds covering wide areas. FM Total log = 2904. 73-Fred

## DX Bulletin Board Loggings
