Welcome back to Jim Renfrew and Steve Solomon, and thanks everyone for your support of the WTFDA!

FEBRUARY DX?

February is not known for DX in the Northeastern US, but sometimes it happens and some lucky person happens to be at the right place at the right time to catch it. So it happened to Chris Lucas during the warm spell the northeast experienced on February 20 and 21. Chris writes on the TV and FM DX Facebook group: "I guess February DX can

happen! Here in Poughkeepsie last night, tropo to Ohio, also with one new Pennsylvania log, WHVL-LD 27/29 State College, PA, 15 kw, 221 miles. 29.1 is My Network, and 29.2 is called "Bob's B" (don't know what that means) and they carry "Buzzr". This logged as I was literally climbing into bed for the night. Four Ohio signals noted: WFMJ 20/21 Youngstown with sub-channel 21.2 "WBCB"... fake in-house call letters. Also WVPX-23 Akron, noted seventh sub-channel 17.1 WDLI, The WDLI 49/17 Canton itself 2 minutes later. And finally WKYC 17/3 Cleveland noted with new sub-channel, 3.4 "Quest, distance champ for the night at 405 miles."

SDR OBSERVATIONS

Keith McGinnis makes some observations on the various SDRs out there and he writes about his newest SDR, the Airspy HF+, and others.

"New firmware upgrade and it actually decreased the noise floor a little on MW and increased sensitivity. This SDR (the HF+) might actually be better than the Perseus from about 300 khz to 30 mhz. If I had to rate the SDR's on MW and HF I have had or still have with a point score from 1-10 this is how it would look.

Airspy HF+ 9 (doesn't get a 10 due weak signals below 300 khz and the fact *the widest recordings are at 768 khz*)

Airspy HF+

ELAD 8.5 (less sensitive than either the Perseus or HF+ but its recording bandwidth and nice software package make this a close second below 30 mhz)

Perseus 8.0 (easy to use software excellent sensitivity but a somewhat higher noise floor and tinny audio....if you supplant the native software for Studio 1 it comes up a bit but still below the ELAD)

I won't even bother to rate the RSP1A (crappy ergonomics and too much overload....at least for me) and the 1st SDR--The SDR IQ (overloaded and only 192 khz bandwidth)

On FM the ELAD is still king.

ELAD S2 9.5 (great audio, excellent RDS response with SDR SPY, easy to use software, etc, *and 6 mhz of recording bandwidth.*)

Airspy R1 8.5 (better than I originally thought...it has grown on me. Sensitivity at par with the ELAD but audio and RDS not up to ELAD Standards. *8 mhz worth of recording* and bandwidth a plus but large recording files a downer...Overall good software SDR# --think easier to use version of SDR Console)

Perseus and FM Plus 7.5 (a nice combo along with the software...audio is pedestrian but is better with Studio 1...expensive and limited to *2 mhz recording bandwidth*).

Airspy HF+ 6 for now (audio is good but the recording bandwidth is a killer for recording dx, etc.) After the recent firmware upgraded-which improved an already great MW performance-I feel it might have hurt FM performance...still too early to tell. I thought it might end up being a good single Channel monitor during trop..we shall see)

Overall the ELAD is the best bang for the buck followed by either of the Airspy offerings.

SDR Software I'd rate in the following order:

ELAD
Studio 1
SDR #
Perseus and FM plus
SDR Console (getting better)

SDR Uno (truncated version of Studio 1, hard to get used to..maybe in time)

HSDR (wish I could like it better...maybe give it another whirl)

The only SDRs that Keith wasn't too thrilled about are the RSPs from SDRplay. I have two of them (8mhz bandwidth) plus an Airspy mini with

6mhz bandwidth and these days those are all I use. You can get a little overload sometimes with any of the three I just listed, but they work fine in my location. You can even get some on an FDM-S2 if you live in the wrong location. Supposedly the HF+ does not overload, but the trade off is in its small bandwidth.

And finally, I looked at the Elad home page today and found a price for the FDM-S3.

Wouldn't you know it, the price was in Euros. You can buy it from their website for 949 Euros. That converts to \$1169.89. I expect everybody to run over to the Elad site and pick one up at that ridiculously low price. I have not seen the S3 listed on Elad's US website yet.

When looking for an SDR, consider what bands you want to use it on, the cost, how much spectrum you want to see, Also consider what software is available for it. Some is simple but some is complicated. They all do the same functions (mostly) but in different ways. For example, notching out an AM signal is much easier with HSDR than with the Elad software.

Mike Schaffer writes in the WTFDA Forums that he has, and can order, DTMB converter boxes right from the factory for those who want to use them to look for Cuban DTV stations. If you live in the south, you might be interested. Please see this thread:

<http://forums.wtfda.org/showthread.php?11755-Cuban-Market-DTMB-T-Tuners>. And that's all!

Lafayette	48	K48MK	License canceled
Monroe	40	KCWL-LD	Call changed from K40MB
Maine			
Portland	15	WGME-TV	From 38, 1000kw/500m; granted
Portland	34	WPXT	From 43, 190kw/267m, 43-51-06/70-19-38; granted
Presque Isle	8	WAGM-TV	OFF temporarily Feb. 4th due to ice
Massachusetts			
Adams	36	WCDC-TV	OFF permanently Nov. 19, 2017, sold in auction
Boston	34	WFXT	From 31, 1000kw/350m, 42-18-11/71-13-05; granted
Winchendon	22	WVMA-CD	From 47; granted
Woburn	32	WDPX-TV	Moved from 40, 300kw/292m, 42-18-27/71-13-24; CL from Vineyard Haven; sharing on WBPX-TV Boston, group 41
Michigan			
Battle Creek	21	WZPX-TV	From 44, 120kw/320m; amendment from 191kw/320m
Midland	49	WCYA-LD	License canceled
Minnesota			
Minneapolis	29	KILW-LD	Requests power increase to 15kw, 44-32-53/93-32-11 (east of New Prague); granted

Location	RF Ch	Callsign	Notes
Minneapolis	49	KMQV-LD	Requests power increase to 15kw, 44-32-53/93-32-11 (east of New Prague); granted
St. Cloud	16	KPXM-TV	From 40, 470kw/289m, 45-20-12/93-23-31; granted
Mississippi			
Biloxi	32	WLOX	From 39, 525kw/397m; granted
Clarksdale	18	WQEK-LD	Returned to the air Jan. 19th
Tupelo	17	WEPH	From 49, 700kw/453m, 33-47-40/89-05-16; amendment from 517kw/453m; granted
Vicksburg	41	WLOO	Requests Special Temporary Authority for 491kw (50% power) due to IOT tube failure. Will probably remain on reduced power until moved to post-repack channel 36.
Missouri			
Jefferson City	32	K32KV	License canceled
Joplin	27	KULG-LD	Requests power reduction to 5kw, 37-06-52/93-45-24 (east of Mt. Vernon); granted
Joplin	45	KRLJ-LD	Requests power reduction to 2kw, 37-11-30/94-41-19 (Crestline, Kans.); granted
Nebraska			
Lincoln	14	WNWE-LD	License canceled
Lincoln	15	KFXL-TV	Special Temporary Authority granted for estimated 2kw, 40-43-40/96-36-51 due to tower collapse; refined to 2.6kw/110m
Lincoln	34	KQLD-LD	Granted power increase to 15kw, 40-51-10/96-40-37
Lincoln	40	K40LJ	License canceled
Lincoln	41	KQLP-LD	Granted power increase to 15kw, 40-51-10/96-40-37
Nevada			
Las Vegas	25, 45	KSNV	Experimental Special Temporary Authority, 1000kw/383m, 36-00-27/115-00-27, for ATSC 3.0 demonstration during the NAB Convention. 1000Kw is maximum power, actual power will probably be less. May use additional sites in the Las Vegas market to demonstrate a Single Frequency Network.
Reno	2	K02QW	Requests power increase to 3kw; dismissed
New Hampshire			
Derry	27	WWJE-DT	Call changed from WBIN-TV
Merrimack	29	WNEU	From 34, 540kw/374m, 42-18-37/71-14-12; granted
New Jersey			
Atlantic City	12	WMCN-TV	From 44, 30kw/294m, 40-02-31/75-14-22; amendment to share on WHYY-TV Wilmington, Delaware instead of WPHY-CD Philadelphia. (WHYY tower is also in Philadelphia) Application says new channel is 50 but that's a typo.
Glassboro	26	WQAV-CD	From 50, 39-44-04/74-50-27; granted
Newark	13	WNET	New backup transmitter in operation, 12.5kw/297m, 40-45-22/73-59-11
Paterson	41	WNJJ-LD	OFF Feb. 4 th , T-Mobile
Teaneck	20	W20EF	Granted power increase to 6.02kw
Trenton	22	WPHY-CD	From 25, 15kw, 20-02-30/75-14-10; modification from 3.17kw & to change site (Philadelphia tower farm); granted

Milwaukee	36	WMKE-CD	From 21; granted
Wausau	47	WEKK-LD	License canceled

A number of stations either went dark or enacted Channel Sharing Agreements on the 23rd. 90-day extensions granted for a number of stations mean this will happen again on April 23rd.

According to my count, 133 stations told the FCC they wished to enter Channel Sharing Agreements. (CSAs) This includes CSAs agreed to before the auction, and stations which indicated they wished to enter a CSA after the auction.

Of those 133 stations, 98 have filed agreements. 27 have instead surrendered their licenses and gone dark. That leaves eight stations unaccounted for. I believe they all have extensions until April to find a partner & get their paperwork filed.

Three of the 98 were filed more or less at the last minute. WRNN-TV sharing on WWOR-TV is not particularly unusual. The other two, in northern Virginia, are worth a few words.

WNVC Fairfax and WNVT Goldvein are both located in the Washington, DC market. Both stations sold their spectrum in the auction and told the FCC they sought to enter a post-auction CSA. They later filed for an extension of time to file that CSA – and indicated they planned to share with commonly-owned stations.

WNVC and WNVT do indeed have co-owned sister stations: WCVE-TV Richmond and WHTJ Charlottesville. However, neither station is in the Washington market. (Richmond and Charlottesville are each their own markets) My understanding was that a CSA must involve stations in the same market.

We now see how they made this work. WNVC will share on WHTJ – and change its principal community (“city of license”) to Culpeper, Virginia. Culpeper is about as close to Charlottesville as you can get – and still be in the Washington market. Similarly, WNVT will share on WCVE-TV and change its principal community to Spotsylvania Court House.

Note the temporary ATSC 3.0 installation in Las Vegas for April's NAB Convention. Given the near total lack of tropo in that part of the country I doubt anyone will be DXing these:)

FM News March 2018

[Changes made to db.wtfda.org]

More new translator action from the FCC this month, but far fewer than our last report. As in February's column, the newbie facilities are indicated as [new] following the call. Since the FCC opened the gates for more new applications from stations which hadn't filed previously, look for more in months to come. Stay tuned . . . and your pencils sharpened!!

FCC Will Open April Window For Auction-Displaced LPTVs

Stations, translators can file for new channels where space is available

Written for *Broadcasting & Cable* by John Eggerton [Feb 9, 2018]

Source: <http://www.broadcastingcable.com/news/washington/fcc-will-open-april-window-auction-displaced-lptvs/171682>

The FCC has set the schedule for low-power TVs and translators displaced in [the incentive auction](#) to try and find new channels, including advising stations to identify new channels as close to existing broadcasters as possible, echoing advice from Microsoft, which wants as much of the remaining spectrum used for unlicensed wireless as possible.

In a public notice issued Friday (Feb. 9), the FCC's Media Bureau and Incentive Auction Task Force said the "special displacement window" for filing applications for new channels opens April 10 and closes May 15.

The FCC also released a study to help stations figure out what new channels will be available in the new, repacked, TV bands. Actually the FCC study identifies channels that won't be available because they are being used by non-displaced LPTVs and translators or full-power TV's or Class A LPVTS, which were protected in the repack.

The existing channels of LPTVs and translators were not protected in the congressional legislation that created the auction and necessitated the repack, but those displaced in the process are being given a "space available" option to apply for them. No one is guaranteed a new channel, but the FCC will try to accommodate as many as possible.

The application process is not like a musical chairs game, where first last in loses. If there are mutually exclusive applications--both parties want the same channel or one assignment precludes the other, the FCC will give them a chance to cure it among themselves before designating that license for an auction between the parties.

The FCC is also advising those looking for new channels outside the top 40 DMA's to stay close to existing stations "to help provide flexibility in the future." That sounds like the FCC could be looking to free up even more TV spectrum in that flexible future? NAB was vetting the notice at press time and an FCC spokesperson was not available for comment. But Microsoft has been suggesting such language to the FCC as it pushes for as much contiguous white spaces spectrum between TV channels as it can get.

In fact, according to a document from the FCC auction docket, the advisory tracks with Microsoft's recommended addition to the notice, except that the confined the advice to markets below top 40, while Microsoft wanted it to go to 15 larger markets.

Microsoft counsel Paul Margie said in a letter to the commission Feb. 5: "Microsoft recommends that the Commission provide the following guidance to broadcasters participating in the Special Displacement Window for low-power television ("LPTV") and translator stations:

Given the public interest in promoting the efficient use of spectrum, the Incentive Auction Task Force and Media Bureau encourage LPTV and TV translator licensees operating outside of the largest 25 DMAs to select new channels for displaced stations that are adjacent to channels in use by other broadcast television stations. This will preserve spectrum for future uses and allow for maximum flexibility for all stations on a going forward basis.

The FCC language was:

Given the public interest in promoting the efficient use of spectrum, we encourage LPTV/translator stations operating outside of the largest 40 DMAs to select new channels for displaced stations that are adjacent to channels in use by other broadcast television stations to help provide flexibility in the future.

When a station has studied the FCC study data and identified a channel not in use, and not liable to cause interference to one in use, it needs to file a construction permit.

The FCC is suspending its general freeze on displacement applications, which is what opens the window, and reinstating it at 11:59 p.m. May 15.

Stations that don't file in that window will have to wait until the freeze is ultimately lifted.

The FCC is trying to limit the number of station facilities changes within the Rubik's cube of the larger repack of close to a thousand stations.

The FCC [last month froze](#) minor LPTV facilities changes signaling the displacement window was about to open.

Not surprisingly, the LPTV Spectrum Rights Coalition is seeking proposals from consulting engineers for displacement studies in advance of the window, preferable at a group rate.

"Finally, the day of judgement has arrived for the 1000s displaced by the incentive auction LPTV and TV translators," said Spectrum Rights Coalition Director Mike Gravino "[T]he Public Notice and corresponding FCC data will keep the communications counsel and consulting engineers in business for quite a few months, as this is not an easy issue to understand. Good luck to all which need to file, and remember, this is a collaborative window, and those with the biggest checkbooks will be happy. Thanks Congress!"

The **2018 IRCA convention** will be held at the Best Western Plus Charles Inn in St. Charles MO on September 7 and 8, 2018. The hotel is located at 1425 S Fifth Street in St Charles, NW of I-70 exit 229B, or the first exit west of the Missouri River, eight miles west of the Lambert St Louis International Airport.

The room rate is \$104.99 a night for either a standard king or two queens. The phone number to call the hotel directly to make reservations for that weekend is (636) 946-6936 or toll-free at 1-888-274-0988. When calling to make the reservation, you must mention the code IRCA to get the rate. There is a block of 30 rooms reserved at that rate for each night for your choice of a single or double bed, your choice. Reservations must be made by August 7, 2018. One note, if all the rooms for this block sell out, then the meeting room at the hotel will be complementary. Registration fee is only \$25 per person with free breakfast.

There will be a tentative radio tour of KCLC FM 89.1 at Lindenwood College in St Charles as well as another possible radio tour and a possible tentative radio tower visit. Banquet is out of pocket and the place will be announced at a later date, possibly soon. Your host for the convention is Ken Hawkins. You can either email him at StLouisHerdFan@gmail.com or you can call him on this cell phone at (636) 577-4295. Please make your plans and reservations now for the 2018 IRCA convention as this will probably be one of the best!
