3/16/2018	Joe Perge	ОН	3-19

A big hello goes out to Andrew Karvel and Monique Miller. Welcome to the WTFDA! Thanks everyone for supporting your club!

Member Gary Hickerson had some VERY serious health problems in 2017 and we hope he does much better in 2018! Get better, Gary!

Gerry Hart sent in a little note with his renewal to tell us that this year marks year 41 in the WTFDA. That's getting up there Gerry but I think a few others have you beat!

#### MULTIHOP FM E SKIP

A report surfaced recently on the Skywaves email list regarding a 5380km (3342mi) multihop reception of Big FM, 92.7 in Rajkot India on August 1, 2013 heard by Finnish DXer Markku Sollo. He wrote "Network ID and frequency in English, then Hindi px with very deep fade outs mixing with another Big FMst. Also ID in Gujarat language., According to a Big

Belarus
Ukraine
Kazakhstan
Turkey
Turkmenistan
Fakistan
Fakistan
Fakistan

Fakistan

Fakistan

FM DJ this came from Surat, because in 2013 there were no other gujarat speaking st on this fq."

Considering the terrible state of the FM band in much of N.A., is any reception like this one possible?

See you all next month!

Phoenix will be the site for a demonstration ATSC 3.0 project.

Univision's KFPH-CD will host ATSC 3.0 signals for ten stations: KASW, KPNX, KNXV, KPHO-TV, KSAZ-TV, KTAZ, KTVK, KTVW, and KUTP, along with KFPH's own signal. The FCC requires a station operating in ATSC 3.0 to arrange for a simulcast in ATSC 1.0; KFPH's programming will be simulcast on KTVW's ATSC 1.0 signal.

(this is a majority of Phoenix' TV stations, but it's not all of them. KAET, KPNX, KPAZ, KPPX, and two Class A stations are not participating.)

While looking up the answer to a question asked on Facebook, I found WWOR-TV was reassigned to transition "Phase 0". There is no phase 0. As you see above, T-Mobile paid WWOR to move early, on March 5<sup>th</sup>.

I found 39 other stations have been assigned to "Phase 0":

- KWOG Springdale, Arkansas (Fort Smith) is moving on the 1<sup>st</sup> of this month.
- Nine stations are moving on June 1<sup>st</sup>. Three are in the Miami market the rest are spread around the country.
- WPNE and WGBA in Green Bay are moving on July 1st.
- Twenty stations in Puerto Rico and the U.S. Virgin Islands are moving on August 1st.
- WXOW in La Crosse, Wisconsin is also moving on August 1st.
- Stations in Biloxi and Baton Rouge are moving on August 31st.
- Stations in Panama City, Augusta (Ga.), and Ontario (Calif.) are moving on September 13<sup>th</sup>. That's the day before the *begin* date for Phase 1.

All of these stations, except those in Puerto Rico and the Virgin Islands, are operating above channel 37. KWOG's and WKAR's applications specify a desire to allow T-Mobile to get early access to their new spectrum. It would have taken far too long to read the rest of the applications but I'm betting that's the reason for all of them.

I don't see any reasons filed for the stations in Puerto Rico and the Virgin Islands. Most stations in these territories were destroyed by Hurricane Maria. I'm sure they see little point in rebuilding on prerepack channels, only to build *another* facility for their post-repack channels. It may be the FCC issued a blanket authority to these stations.

# Primed for the E-skip Season!

The South of the Border WTFDA FM Database 2018 Report

We've tightened the lug-nuts, greased the wheels, and updated the FM listings for México, Central America & the Caribbean islands in your exclusive WTFDA Database of FM radio stations for North America, Central America, and the Caribbean islands.

All FM radio listings come from the official government license documents released in those respective countries.

Here is your FM Report for the 2018 FM E-skip season.

#### México

1,398 listings. Last update - Updated daily

#### Caribbean Islands

Aruba - 17 listings. Last update, 3-14-2017
Bahamas - 34 listings. Last update, 8-10-2017
Bermuda - 9 listings. Last update, 5-21-2017
Cayman Islands - 20 listings. Last update, 9-04-2017
Cuba - 333 listings. Last update, 11-25-2017
Dominican Republic - 311 listings. Last update, 3-23-2018
Haiti - 296 listings. Last update, 12-07-2017
Jamaica - 187 listings. Last update, 1-07-2017

#### Central America

Belize - 47 listings. Last update, 1-07-2017 Costa Rica - 72 listings. Last update, 3-23-2018 El Salvador - 261 listings. Last update, 1-17-2018 Guatemala - 341 listings. Last update, 1-16-2018 Honduras - 804 listings. Last update, 3-24-2018 Nicaragua - 357 listings. Last update, 11-29-2017 Panamá - 188 listings. Last update, 1-15-2018

#### **ATSC 3.0 Rollout Can Begin Next Month**

Written for *Broadcasting & Cable* by John Eggerton [Feb 1, 2018] Source: https://www.broadcastingcable.com/news/atsc-30-rollout-can-begin-next-month-171487

Broadcasters will soon get the green flag on their race to an interactive, geo-targeted, video-on-demand future.

The FCC's framework for rolling out a new ATSC 3.0 advanced television transmission standard will become effective the first week in March.

The Federal Register signaled Thursday (Feb. 1) that the final rule for allowing broadcasters to roll out the standard on a "market-driven, voluntary basis" will publish Feb. 2, with the rule going into effect 30 days after that, according to the FCC.

The new standard, which was championed by broadcasters, emergency alert groups and the <u>Consumer Technology Association</u>, is expected to drive sales of 4K TVs whose higher-resolution pictures can be delivered by the new standard, and give broadcasters a competitive foothold in the interactive, targeted advertising, IP world.

A <u>politically divided FCC voted 3-2</u> on Nov. 16 to allow for the voluntary rollout of the standard. That came over the objections of Democrats on the commission and in Congress, who argued that it was a gift to Sinclair or a rush to a standard that could leave viewers paying for the change through new TV's or equipment of higher cable prices.

ATSC 3.0 will allow TV stations to do geo-targeted ads and emergency alerts, video on demand and other interactive services using a broadband return path for viewers with Internet access, and provide those high-high definition 4K pictures.

While most of the rule will become effective in early March, three portions will not because they require information collection, which must first get the OK of the Office of Management and Budget per the Paperwork Reduction Act, which requires new regs that entail new information collection to be vetted to make sure those are not overly burdensome.

So, the portions of the rule that will not become effective until OMB signs off on their info collection (and that sign-off is also published in the Register) are those dealing with simulcasting agreements between stations (sections 73.3801, 73.6029, 74.782)

As part of the rule, stations in a market that want to roll out the transmission standard can join forces (a kind of Jack Spratt arrangement(, with one transmitting both station's signals in ATSC 3.0, and the other both signals in the current ATSC 1. format--ATSC 3.0 is not backward compatible (it requires a new set or adaptor), so the FCC wants to make sure that, for at least the first few years of the rollout--signals are available in both formats.

Broadcasters will have a chance to make a case for flash-cutting to ATSC 3.0 rather than simulcasting, and Low Power TV's will be allowed to flash cut without simulcasting. MVPDs must continue to carry ATSC signals but don't have to carry the new 3.0 signals. Broadcasters can combine retrans negotiations for new ATSC 3.0 and existing 1.0 signals, which cable operators had opposed.

National Association of Broadcasters President Gordon Smith said following the November vote: "Two decades ago, the FCC blessed the transition from analog to digital television, which ushered in the broadcast-led era of HDTV that dazzled consumers and was the envy of the technology world. Today, the Commissioner endorses Next Gen TV, which marks the beginning of a reinvention of free and local broadcast television in America."

"ATSC 3.0 will deliver advanced emergency warnings and market-driven flexibility, so consumers can be safer and enjoy the highest-quality, most innovative over-the-air TV experience ever," CTA President Gary Shapiro has said of the new standard.

APRIL 2018 ... 25 ... ATSC 3.0 ROLLOUT

#### **UPCOMING METEOR SHOWERS**

DATA FROM THE
AMERICAN METEOR SOCIETY
amsmeteors.org

#### Lyrids

Active from April 16th to April 25th, 2018 (Peak night Apr 21-22)

The Lyrids are a medium strength shower that usually produces good rates for three nights centered on the maximum. These meteors also usually lack persistent trains but can produce fireballs. These meteors are best seen from the northern hemisphere where the radiant is high in the sky at dawn. Activity from this shower can be seen from the southern hemisphere, but at a lower rate.

Radiant: 18:04 +34° - ZHR: 18 - Velocity: 30 miles/sec (medium - 48.4km/sec) - Parent Object: C/1861 G1 (Thatcher)

#### **Eta Aquariids**

Active from April 19th to May 26th, 2018 (Peak night May 6-7)

The Eta Aquariids are a strong shower when viewed from the southern tropics. From the equator northward, they usually only produce medium rates of 10-30 per hour just before dawn. From the equator to 25S they can produce rates of 40-60 per hour just before dawn at maximum. The longer nights in the southern hemisphere allows the radiant to rise higher in their sky. South of 25S the radiant altitude actually decreases. Activity is good for a week centered the night of maximum activity. These are swift meteors that produce a high percentage of persistent trains, but few fireballs.

Radiant: 22:32 -1° - ZHR: 55 - Velocity: 42 miles/sec (swift - 66.9km/sec) - Parent Object: 1P/Halley

The **2018 IRCA convention** will be held at the Best Western Plus Charles Inn in St. Charles MO on September 7 and 8, 2018. The hotel is located at 1425 S Fifth Street in St Charles, NW of I-70 exit 229B, or the first exit west of the Missouri River, eight miles west of the Lambert St Louis International Airport.

The room rate is \$104.99 a night for either a standard king or two queens. The phone number to call the hotel directly to make reservations for that weekend is (636) 946-6936 or toll-free at 1-888-274-0988. When calling to make the reservation, you must mention the code IRCA to get the rate. There is a block of 30 rooms reserved at that rate for each night for your choice of a single or double bed, your choice. Reservations must be made by August 7, 2018. One note, if all the rooms for this block sell out, then the meeting room at the hotel will be complementary. Registration fee is only \$25 per person with free breakfast.

There will be a tentative radio tour of KCLC FM 89.1 at Lindenwood College in St Charles as well as another possible radio tour and a possible tentative radio tower visit. Banquet is out of pocket and the place will be announced at a later date, possibly soon. Your host for the convention is Ken Hawkins. You can either email him at <a href="mailto:StLouisHerdFan@gmail.com">StLouisHerdFan@gmail.com</a> or you can call him on this cell phone at (636) 577-4295. Please make your plans and reservations now for the 2018 IRCA convention as this will probably be one of the best!
