VEE-D-X
THE WORLD'S
MOST POWERFUL ANTENNAS

NEW Stacked Arrays

PRODUCE SHARP, CLEAR PICTURES AT AMAZING DISTANCES

Vee-D-X — largest producer of Yagis — brings you new stacked arrays that provide still higher gain and further reduce noise interference. Perfected by Vee-D-X engineers in collaboration with a foremost authority on wave propagation, these stacked arrays make a world of difference in picture quality. In addition to the already popular double stacked array ("A" below) with half-wave spacing, you can employ double stacked arrays with full-wave spacing ("B" below) and half-wave four stacked, either vertical or side-by-side. Choice of array depends on area terrain and reception conditions.

NOVEMBER 2018

DUES RECEIVED

DATE	NAME	S/P	EXP
9/28/2018	Robert Seaman	PA	9/19
9/30/2018	Fred Morton	OK	10/19
10/3/2018	Rick Nelson	OH	10/19
10/15/2018	Gary Russo	PA	11/19
10/17/2018	Bill Mitchell	OH	10/21
10/17/2018	David Mackes	MD	9/19
10/17/2018	Larry Weil	FL	10/19
10/17/2018	Flavio Aurelio Archangelo	BRA	11/19
10/21/2018	Steve Walko	PA	11/19

This month we welcome Fred Morton, Gary Russo and Flavio Aurelio Archangelo to the WTFDA. Fred has been in broadcasting a long time. He's a co-owner of KIXC and KWFB and among other things, is a consultant for some LPFMs in the Wichita Falls area (according to LinkedIn).

Flavio lives in Jundiaí, state of São Paulo, about 30 miles NNE of the center of São Paulo (Ivan, our other member in Brazil, lives in Sorocaba, about 50 miles WNW of São Paulo. Thank you, Google Earth.

And Gary, well...he lives in Harrisburg and most of us know where that is.

Thank you all for your support of WTFDA. It's nice to see Rick Nelson and Steve Walko back after being away for a while.

SANTO DOMINGO UPDATES

Jim Thomas has just completed a major update to the city of Santo Domingo, DR on the WTFDA FM Station Database (<http://db.wtfda.org>). All of the station co-ordinates are now exact and additional info for many can now be found in the remarks column. Jim has been busy adding more FM stations to the Mexico database as they continue to transition AM stations over to FM. Also we have seen a dramatic downturn in the number of translator grants (except for October 31st when the FCC granted around 25 more of them).

A RUMOR?

Remember, it's just a rumor, but from Pedro in Havana we read: "Here there rumors that maybe the analog black out for Habana will start around 2019. If (this) is the case for the low vhf channels I would like to try with an HD Homerunner that send

the info to the rabbitears website. I will place a low VHF yagi (around 6 or 7db) but in an independent mast, taking into account that the capture area of a 6db antenna at 88mhz is more than 100 square feet and the same going at 54mhz is around 200.

I still couldn't solve my interference problem in UHF. You won't believe it, but for me (it) has been easier to ask a friend to bring me a good booster from London then finding here a decent chicken mesh to put in the reflector of the cm 4251 (to improve directivity and F/B). Those I've found still now are rusted and in very bad condition. But I still will insist to find a solution.

Winegard HD-6065

I decided to put down my FM Winegard hd 6065p antenna I been using in the last two or three years and replace it by a 7 ele FM yagi. I had noticed that in the upper part of the band (it) was not working as efficient as I expected. Why? The friend that previously owned it, had to repaired completely after a hurricane some years ago and then he had trasformed it in a kind of 75ohms twin boom yagi feed it directly with the coaxial cable connector. So, a balance antenna system connected directly with a non balance feed line (he had also lost the original balun that came with it). That's why now with the 7 ele yagi (about 10feet long) I had recovered the sensivity that I traditionaly had in the upper part of the band."

Pedro, don't throw away that HD6065! If you go to <http://ham-radio.com/k6sti/hd6055p.htm> you will find the spec sheet for that antenna with boom and element lengths so you can compare them to your own 6065 and possibly you can repair it. There are not many 6065s around anymore and there are

very few decent outdoor FM antennas around anymore, either.

HD RADIO QUESTION

The following was taken from the WTFDA email list on Googlegroups. **Steven Ponder:** I've been thinking about upgrading to a portable HD FM radio with a speaker. My daughters gave me an Amazon gift card, so I've been searching there and have found two possibilities, both Sangean - the HDR-16 HD Radio/FM-Stereo/AM Portable Radio and the HDR-14 HD AM/FM Pocket Radio.

I'm leaning toward the HDR-16 because it is larger and should have a longer internal ferrite rod antenna for AM listening. The drawback is the limited memory locations. The HDR-14 is much smaller, but has four times the memory locations. However, I've read numerous reviews about a problematic On/Off switch on the HDR-14.

Rick Lewis: Hi Steve, I don't know about the HDR-16, but the HDR-14 is image-prone. I have a SPARC portable that gets images in certain situations.

A friend brought his HDR-14 to a convention I was attending in St. Louis. I was excited. I got a station that my SPARC didn't receive at all. I waited through ten minutes of commercials, only to find that it was an image from a nearby frequency. My friend likes it, and I normally trust his judgment, but not this time. I wouldn't recommend the HDR-14 at all. I wasn't impressed.

AN EBAY SPECIAL

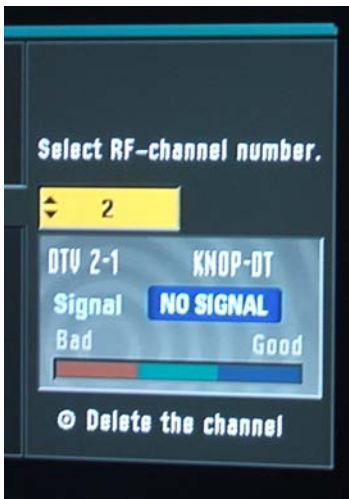

This log periodic antenna was found on ebay and purchased for \$20USD by Dave Nieman. I hope he will check back and let us know how, or if, it performs.

And with that, we will see you next month. Mike.

Nevada			
Hawthorne	15	K15LG	Moved from K50AI
Hawthorne	29	K29MG	Moved from K48GG
Las Vegas	35	KVTE-LD	Requests power increase to 15kw, 35-56-43/115-02-35
McDermitt	18	K18NG	From K43NT, 42-08-53/117-41-51; granted
Round Mountain	18	K18MU	Moved from K42EK, 35 watts
Round Mountain	33	K33PY	Moved from K45EY, 35 watts
OStateline	24	K24NS	From K38FW, 15kw; granted
Verdi	36	K36OB	From K47KJ, 15kw; requests STA for interim (lower) antenna, 137 watts
Walker Lake	19	K19LS	Moved from K38EH, 661 watts
Walker Lake	23	K23OK	Moved from K42DS, 480 watts
New Hampshire			
Concord	22	WLEK-LD	Granted power reduction to 5kw, 42-57-05/71-16-04 near Chester.
New Jersey			
Atlantic City	7	WMGM-LP	Returned to the air (Analog station)
Atlantic City	10	WMGM-LD	Site change granted to 39-43-41/74-50-38
Morristown	17	WNMF-LD	Requests site change to 40-47-18/74-15-18 (West Orange)
New Mexico			
Caballo	28	K28QE	From K18LP; granted
Carlsbad	33	K33NX	Moved from K45GJ
Deming	24	K46GU	STA for this channel dismissed
Deming	29	K49GV	STA for this channel dismissed
Eagle Nest	18	K18LT	Moved from K48AX
Farmington	34	KFNM-LD	License canceled
Hobbs	19	K19KT	Moved from K45IL, 4.4kw
Las Vegas	23	K23NN	Moved from K47GV, 35-36-12/105-15-32
Red River	17	K17ML	Moved from K46GL
Ruidoso	20	KGDR-LD	From 47, 15kw; granted
Truth or Consequences	33	K40GH	STA for this channel dismissed as unnecessary; already granted regular move as K33PE.
New York			
New York	5	WNYX-LD	Moved from 35, 300 watts. OFF Oct. 8 th pending negotiation of a new lease. Site owner allowed temporary operation on channel 5 but required shutdown until the lease can be amended.
Port Jervis	22	W22EW	Returned to the air Oct. 24 th
Poughkeepsie	23	W23ER	Converted to digital from analog W42AE, 11kw/269m, 41-43-07/73-59-45. One of very few LPTVs with a HAAT in the database.
North Carolina			
Andrews	20	W20EK	From W49DB, 15kw; granted
Canton	26	W26FB	From W47DY, 15kw; granted
Charlotte	21	W21CK	OFF Aug. 15 th due to transmitter failure
Fayetteville	40	WDRN-LD	OFF Oct. 1 st pending delivery of equipment to move to ch. 32
Marion	26	W26FA	From W42DR; granted
Wilmington	43	WADA-LD	OFF Sept. 28 th pending construction of permanent facility
North Dakota			
Valley City	24	KRDK-TV	Requests STA to transition late, in Phase 3 by June 21, 2019, instead of Phase 1 by Nov. 30 th .

<i>Location</i>	<i>RF Ch</i>	<i>Callsign</i>	<i>Notes</i>
Nuevo Leon			
Monterrey	51	XHSPRMT	Call changed from XHOPMT
Oaxaca			
Oaxaca	35	XHSPROA	Call changed from XHOPOA
San Francisco Ixhuatán	30	XHPSO-2	Permit granted for new station, 360w/244m, 16-21-10/94-29-03; relays Matías Romero
Ohio			
Canton	11	WIVM-LD	Moved from 39, 2kw
Columbus	29	W29EG	Requests power reduction to 1.39kw, 39-55-18/82-56-16; from Zanesville; granted
Youngstown	31	W44CR	Requests STA for this channel; to be displaced by T-Mobile. Channel 31 is temporary until August 1 st , 2019 when WQED Pittsburgh moves to ch. 4 and W44CR can move to ch. 13. On August 2 nd , WYTV moves from 36 to 31 and would displace W44CR. STA granted.
Oklahoma			
Ardmore	20	K20OH	From K24IW, 15kw, 34-00-17/96-48-56; granted
Claremore	36	KRSU-TV	Granted STA 144kw/255m; to operate at 70-75% power due to power supply failure.
Concho	35	K35MV	Moved from K47MU
Duncan	20	K20MH	From K47KI, 10kw; granted
Enid	33	KUOC-LD	Requests STA for this channel, 750 watts vs. authorized 5kw
Oklahoma City	21	KUOT-CD	From 19, 15kw
Poteau	34	KSJF-CD	From 50, 14kw, 35-31-30/94-22-28; granted
Tulsa	35	KEGG-LD	From 19; granted
Oregon			
Bend	31	K31NO	Requests STA for reduced power of 8.26kw until new transmitter is delivered in 2019; granted
Eugene	9	KEZI	Requests move to 44-17-27/123-32-22, 21.4kw/706m; near Alsea Falls, opposite side of I-5 from other Eugene stations.
Eugene	17	KMTR	Granted STA 70kw/294m, 44-00-09/123-06-58. Station has lost lease on existing site and will operate interim facility from KVAL-TV's site.
Grants Pass	4	K04EY	License cancelled
Grants Pass	34	K34NO	Requests STA from K44JB, 330 watts (reduced power from K34NO permit); T-Mobile. Post-repack facility inadvertently built at reduced power. STA apparently unnecessary as station has moved to ch. 34 under ordinary license.
Madras	26	K26NX	Moved from K38NM
Madras	28	K28OV	Moved from K40MP
Medford	16	KDOV-LD	Moved from 44, 1.25kw, 42-17-51/122-45-04
North La Pine	36	K36OD	Moved from K38DT
Pendleton	16	K16LN	Moved from K49MI
Portland	25	KOIN	Requests STA 36kw/443m, 45-31-13/122-44-41 to operate on temporary post-repack antenna while main antenna is installed; granted.
Portland	45	KNMT	Requests STA 235kw/455m for interim pre-repack antenna while post-repack ch. 32 antenna is installed; granted. Suspect 455m is a typo, probably should be about 330m.
Rockaway Beach	15	K15KV	Moved from K41GG
Rockaway Beach	23	K23NS	Moved from K47CD

Location	RF Ch	Callsign	Notes
The Dalles	29	K51EH	From 51, 1.28kw; amendment from ch. 23; denied, reason not given. Requests STA for this channel, T-Mobile.
Pennsylvania			
Allentown	25	WTXF-DRT	From 38, 14.6kw; granted
Butler	17	WJMB-CD	Returned to the air Oct. 11 th
Clarks Summit	29	W29CU	Moved from W47DH
Kittanning	44	WKHU-CD	OFF Oct. 11 th pending construction of permanent facility on ch. 32
Middleburg	21	W21DY	From W16CO, 15kw, 40-18-56/76-57-08; granted
Philadelphia	21	WEFG-LD	From 48, 15kw, 40-04-58/75-10-54
Uniontown	47	WWKH-CD	Returned to the air Oct. 9 th
Washington	20	WWLM-CD	Returned to the air Oct. 10 th
Puebla			
Puebla	38	XHSPRPA	Call changed from XHOPPA
Puerto Rico			
Aguadilla	17	WVEO	Returned to the air Sept. 6th under STA for 34.3kw/309m, 18-19-25/67-10-11 (WIOB-FM tower)
Guaynabo	8	W08EI	Granted power increase to 3kw, 18-16-46/65-56-35
Ponce	14	WTIN-TV	From 15, 750kw/848m, 18-10-02/66-34-34; granted
Ponce	31	W31DL	License cancelled
Quebradillas	23	WQSJ-CD	Moved from 48, 15kw
Toa Baja	25	W25EF	Granted site change to 18-15-54/66-05-06
Vieques	33	W33ED	From W34DY, 10kw; granted
Yauco	17	WIRS	Returned to the air Sept. 6th at reduced power 34.3kw/309m, 18-19-25/67-10-11, sharing on the WVEO transmitter
Quèbec			
Îles-de-la-Madeleine	12	CHAU-DT-10	New transmitter granted, 100 watts/147m, to relay Carleton
Querétaro			
Querétaro	30	XHSPRMQ	Call changed from XHOPMQ
Rhode Island			
Providence	30	WCRN-LD	From 25, 42-05-44/71-13-48; granted (Foxborough, Mass.)
Sinaloa			
Mazatlán	41	XHSPRMS	Call changed from XHOPMS
Sonora			
Cd. Obregón	31	XHSPROS	Call changed from XHOPOS
Hermosillo	35	XHSPRHA	Call changed from XHOPHA
South Carolina			
Charleston	33	WBSE-LD	From 20, 15kw; granted
Charleston	36	WUDI-LD	From 27, 8kw, 33-32-03/79-59-14; CL from Myrtle Beach; granted
Florence	22	WVEB-LD	From 14, 5kw; granted
Myrtle Beach	5	W05DC	Granted power increase to 3kw
Myrtle Beach	27	WUDI-LD	Granted power reduction to 8kw
Spartanburg	38	WSQY-LD	License canceled. This is their Digital Companion Channel. Analog channel 51 remains valid, although temporarily dark. It has a permit to convert to digital on ch. 29.

<i>Location</i>	<i>RF Ch</i>	<i>Callsign</i>	<i>Notes</i>
South Dakota			
Rapid City	22	K22JU	Power increase request dismissed at request of applicant.
Tabasco			
Villahermosa	38	XHSPRVT	Call changed from XHOPVT
Tamaulipas

Rabbit Ears No More

Cordcutting jumpstarts market for over-the-air antennas

Written for *TV Technology* by Gary Arlen [Sep 4, 2018]

Source: <https://www.tvtechnology.com/news/rabbit-ears-no-more>

BETHESDA, MD.—About 8.1 million Americans will buy TV antennas this year, according to a mid-year analysis by the [Consumer Technology Association](#), reflecting the growing audience for over-the-air broadcast signals as more homes cut—or at least trim back—their cable subscriptions. This year’s estimates will mark a peak in antenna sales, which have been hovering just under the 8 million level for several years and which are expected to decline only slightly in the near future, according to CTA’s latest analysis.

One wild card in future antenna sales is the impact of the [new ATSC 3.0 standard](#), which will debut over the next several years.

“When 3.0 rolls out, consumers will become aware of additional services, and that will give a boost to antenna sales,” said Brian Markwalter, senior vice president, research and standards for CTA. “Viewers won’t need any special antennas to receive 3.0, but reception may be affected by the repack” of channels.

SUPPLEMENTING PROGRAM CHOICES

Markwalter, as do others who follow the antenna business, contends that the steady sales of home antennas reflects the increased rate of cord cutting by cable subscribers.

CTA’s research shows “one in five consumers say they watch OTA through an antenna,” said Ben Arnold, senior director of innovation and trends at CTA. “The reasons all revolve around supplementing their programming.” Cord-cutters or trimmers “want live TV plus OTT,” Arnold adds.

That combination of OTA and OTT is reflected by some of the new antenna kits that combine access to OTA and broadband. Likewise, viewers who toggle between live broadcasts and on-demand streams keep their antennas inside. Stephen Baker, vice president of industry analysis at research firm [NPD Group, Inc.](#), says that the bundled products “solve some of the customer satisfaction issue.”

“People aren’t necessarily buying [antennas] on their own when they cut the cord, but are getting them through their subscriptions or their devices that are enabling them to make the cut,” he said.

Although most antennas sell for about \$30–\$80, versions for multidirectional (180-degree range) and long-range directional (up to 100 miles) reception cost up to \$160. NPD, which estimates about 34 million antennas have been sold since 2014, has found that the average retail price of about \$26 “has been very stable over that time,” Baker said. He doesn’t expect many repeat or add-on sales since antennas are “not a product that gets a lot of upgrade or replacement purchases [unless something happens to the old one] due to a change in technology.”

“About 90 percent of the antennas are classified as indoor,” said Baker, whose firm also tracks hardware sales and usage. “Obviously most antennas today are pretty small and digital. They are not

like those rooftop things from the '60s but are more like 'modern rabbit ears.' He also points out that cord-cutters who discover antennas may have to be trained about how to use them, especially since many customers have little understanding of OTA broadcasts.

"They need some help in being reminded what an antenna is for," Baker said.

AVAILABLE OPTIONS

Joe Bingochea, president of [Channel Master](#), one of the largest U.S. antenna makers, agrees that while not all cord-cutters will use OTA, "our experience shows that a percentage of them will use OTA to supplement whatever streaming services they choose."

Bingochea adds that antenna reception can be tricky. "When the consumer cuts the cord, who do they look to when there is a problem?" he asks rhetorically, explaining that his company's components, including cables and connectors, enable users to put together entire systems. Channel Master's product line includes the "Stream+" (for OTA and DVR) and the "Smartenna+," a smart indoor antenna with active steering technology.

Bingochea says that Channel Master sales are diversified among a variety of retail, installer and online avenues. Antennas are sold at Best Buy, Home Depot, Fry's Electronics as well as small dealers and e-tailers including Amazon and the company's own website.

Richard Schneider, president of [Antennas Direct](#), expects the market for antennas "will accelerate as cord-cutting becomes more mainstream." The company's new ClearStream antennas relay signals over a home's Wi-Fi network, allowing customers to place the antenna in a convenient location then send signals to TV sets around the home.

The company started as an e-commerce venture from suburban St. Louis, but has migrated to other sales outlets and now only about 10 percent of its sales come from the Web, Schneider said. Its products are available in 8,000 stores, include Walmart, Best Buy, Lowes, Fry's and regional chains plus Amazon.

Schneider's customer research has found that new customers are "more female and less tech oriented." Antennas Direct's early users were people trying to connect a "\$50,000 home theater" whereas today's budget-conscious customers "is usually buying an antenna to complement a Netflix subscription," Schneider told TV Technology.

FIRST TIMERS

One gauge of consumer interest in antennas is the growing usage of [AntennaWeb.org](#), which lets consumers figure out what kind of antenna they'll need to pick up local broadcast signals based on their address.

More than 2.6 million users checked into the site during 2017, and at least 85 percent of them were first-time users, according to Mick Rinehart, president of [TitanTV Inc.](#), which operates the free online

At the International CES in January, Channel Master launched SMARTenna+.

service. AntennaWeb was created by the [Consumer Technology Association](#) at the dawn of the digital TV era a decade ago. NAB teamed up with CTA, and both are now co-sponsors for TitanTV's antenna checking service. Users see a color-coded "selector map" which matches the labels on antennas, indicating the type of device needed for a specific location.

"From the number of new visitors, it is apparent that interest in cord cutting continues to grow," says Rinehart.

He acknowledges that AntennaWeb originally focused on signal strength calculations and antenna recommendations for outdoor reception; but now there is high interest in indoor antennas. The reception information, based on signal data from CTA and other sources, incorporates topographic and environmental factors that can affect television reception at a viewer's location.

"There are many variables within their home that will also impact reception via an indoor antenna," Rinehart adds, pointing to a resources section of the site that offers advice on how to choose, connect and place an indoor antenna for optimum reception.

BROADCAST PARTNERSHIPS

Antennas Direct saw the increased demand for over-the-air antennas even before the current cord-cutting trend began to take hold.

Phones at the company's St. Louis headquarters "started ringing off the hook" a few years ago, with all the calls coming from Sacramento, Calif., recalled company President Richard Schneider.

"Unbeknownst to us, the Gannett station [now [Tegna Media's KXTV-10](#)] was endorsing one of our models on a live newscast," he said. "Then the following week, [WLUK in Green Bay](#) [Sinclair Broadcasting] asked if we could come up in 48 hours to hand out antennas and appear on the news during a retransmission dispute," Schneider continues.

"And I thought, 'hey'—there are 1,800 full-power broadcasters, so we should do this 1,798 more times."

As a result, the company set up a "Broadcaster Partners Program," which involves antenna giveaways in exchange for on-air time in which Antennas Direct "extols the virtues of free over-the-air TV," Schneider said.

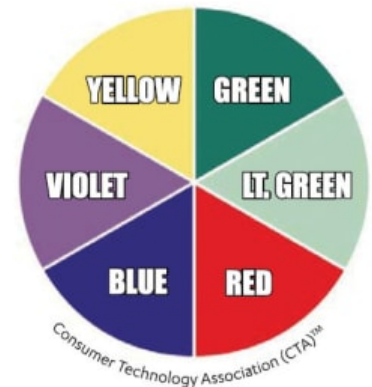

"So far we have given away more than 14,000 antennas in 52 markets."

Schneider said he wants to "partner with more broadcasters to get the news out about how... using an antenna with a streaming service can save the average household about \$1,800 per year."

Other antenna marketers have collaborated with TV broadcasters as well.

Antenna Selector

This antenna works in the following zone(s).

See the TV Antenna Selector Map to find the zone in which you live.

This chart on TitanTV's AntennaWeb alerts consumers about which antennas work best in their viewing area.

Richard Schneider, president of Antennas Direct

Channel Master has “several relationships” and has launched joint promotions with stations “to promote OTA awareness,” according to Bingochea.

IMPACT OF REPACK, NEXT GEN TV

CTA’s Arnold expects antenna prices may go up slightly because 3.0 will deliver new features that may require better antennas, but any increases may be offset by volume deals as more customers buy antennas.

Bingochea of Channel Master contends that the 3.0 business model “is not far enough along to gauge the potential impact” although he believes that the addition of 4K and HDR will attract new consumers.

AntennaWeb’s Rinehart expects the upcoming channel repack program, which affects broadcasters and their channel assignments, will give new impetus to the antenna selection process. But he acknowledges that some customers may be surprised by what they find.

“If a local station that you would expect to see is not listed in AntennaWeb, its predicted signal strength may be calculated to be just a fraction of a dBu below the threshold for that channel,” he explains. “Nevertheless, because it is below the minimum dBu cutoff value, it is not displayed.”

Rinehart also pointed to a growing consumer complaint about finding shows—especially in a milieu of blended OTA and OTT content.

“The emergence of Diginets [DTV auxiliary channels] has expanded the genre and variety of content free for viewing,” he said, but cited the challenge for consumers who want an electronic program guide when moving between paid and free video. His company’s free consumer TV Listings site includes channel lineups for all platforms (OTA, OTT, cable, satellite) and can be blended into a single custom guide from disparate sources.

NAB agrees that antennas are a permanent part of the expanding media landscape.

“More than 72 million Americans rely on over-the-air television received through an antenna,” said Dennis Wharton, executive vice president of communications for the association. “Traditional OTA viewers as well as cord-cutters and cord-nevers are discovering an abundance of today’s most popular HD broadcast programming available for free using an antenna, which now come in sleek easy-to-install designs.”

[Nielsen’s first quarter 2018 Total Audience Report](#) noted that “broadcast-only” homes were up by 6 percent (to 16.53 million households) compared to previous quarter. During the past year, the share of homes getting OTT and other subscription video-on-demand services also climbed and now reaches 64 percent of U.S. homes.

Bingochea of Channel Master sees the current OTA/OTT era as the continuation of the evolving video delivery industry. He says that he has “experienced the changes in the antenna business over the years when things like cable, C-band satellite and Direct Broadcasting Satellites were introduced.”

“Now we are just in a new phase.”

Joe Bingochea, president of Channel Master
