# THE VHF-UHF DIGEST

## THE WORLDWIDE TV-FM DX ASSOCIATION

*Serving the UHF-VHF Enthusiast*

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, KEITH MCGINNIS, JIM THOMAS AND MIKE BUGAJ.

*Treasurer:* **Keith McGinnis** [wtfda.org/info](http://wtfda.org/info) *Webmaster:* **Tim McVey**  
*Forum Site Administrator:* **Chris Cervantez**  
*Editorial Staff:* **Jeff Kruszka, Keith McGinnis, Fred Nordquist, Nick Langan, Doug Smith, John Zondlo and Mike Bugaj**

# First Attempt At RSPduo Diversity Reception

Bill Nollman and Keith McGinnis

Thanks to Keith he was convinced to leave his RSPduo here for a few days. After reading the 80 page SDRuno users guide and being impressed with how good a manual could be written and how painfully boring it got after about 40 pages I jumped ahead to the Diversity directions. Connected the Probe 9 and APS-13 and pointed towards Providence hoping to hear WHJY again over Faith 94.1. Complete failure as all I could get was WTIC overload – even though I adjusted both tuners gain down. Next test WBLI. Pointed both antennas in that direction and noticed the massive WHCN IBOC. No sign of anything but IBOC on both antennas. Adjusted overload on both tuners and tweaked the Diversity bullseye. In about 15 seconds I had nulled the IBOC and had WBLI completely in the clear! The higher WHCN HD sideband doesn't even show on the waterfall!

The only things I found less than stellar was the phase doesn't stay in the same place if you change frequency and come back. For example, I wanted to off tune to 106.11 and the second I did that the phase was gone and to get it back I had to find it again on the bullseye. It wasn't even close to where it had been before.

Other thing is the tuners seem to overload more than the ELAD's. But I haven't actually compared them side by side. I also haven't compared to the Bolin Phase Box but that's such a PITA to drag out and connect it's not worth the effort IMHO.

And finally the SDRuno software. Meh. I used to like Studio1. I don't hate it but I don't like it as much as I used to.

Overall, very impressive especially if you don't have a phase box. This could be game changing for some.

\*\*\*\*\*

Keith:

Don't forget to mess with the IF AGC setting to see if that makes a difference. You'll find that under the SETT. Tab on the Main Box...If you uncheck the IF AGC box at the bottom you can then manually set it for less overload issues.

You are right about the setting changing if you go off frequency. In fact I found if you go off say .001 hz it goes off but then if you go up .005 hz off it goes back. Keep trying for HJY...maybe changing the direction of the antenna a little ? I think that while the phase/null with the Bolin Box is a little more stable...the same thing with the Diversity mode is a little deeper.

## DX Pets

“Having your pet sit on your SDR or climb across your keyboard as you DX really increases your enjoyment of the hobby”

-anonymous

This month we have a photo of Paul Mitschler’s pet Impy. Impy isn’t much interested in DX. He (or she?) is much more interested in birds and flatscreen TVs. I’m assuming Paul is referring to the Pet Collective Channel on Pluto TV (if you stream your TV you probably have heard of it.

I don't know if you still want pet photos but I finally found this one of my cat, Impy who is just fascinated by nature shows on PBS. She also like the animal channel I have on the Pluto network that came with my Samsung smart TV. -Paul

If you have any photos of your pet that you'd like to see in the VUD, just email us a picture with a brief description and you'll see it here.

Thanks to Raymie Humbert and Jim Thomas for information in this month's column.

The deleted Kentucky and Ohio stations' licenses expired in the summer of 1998. Renewal applications were due in the spring of that year, but were never filed. The FCC discovered the missing renewals in 2004. (?!). They wrote the licensee, giving thirty days to give his side of the story. (maybe he filed but the Commission lost the applications?)

The Commission received no response.

During that thirty-day period, the licensee attempted to renew the licenses. (which, again, had expired six years earlier) However, he didn't pay the filing fees, so the applications weren't processed. (it isn't clear whether they would have been granted, six years too late, if the fees had been paid) The Commission wrote the licensee, notifying him the renewals were not processed and the licenses were deleted.

The stations continued to operate.

(earlier this year, the licensee was fined \$144,000 for eighteen years' unlicensed operation of W10BM. The Commission says nothing about the other two stations.)

In July 2017, the licensee filed a "Petition to Reinstate Licenses". He claimed he \*did\* pay the renewal filing fees in 2004, but the Commission's CDBS computer system told him the renewals had already been filed. He argued that he had notified Commission staff of difficulties in renewing in a 2004 phone call, and that the renewal applications had been neither granted nor denied. He also argued the letters informing him the licenses were cancelled were mailed to the wrong address.

There are several problems with those positions.

1. Licensees are required to keep the Commission informed of their current address. If the stations moved & he didn't tell the FCC, it is not the Commission's fault he didn't receive notice.
2. The fees he paid were annual regulatory fees, not filing fees for a license renewal. The renewal fees remained unpaid.
3. Even if the renewal fees were paid & the renewal properly filed in 2004, the stations' authority to operate was suspended when the licenses expired six years earlier.
4. A phone call does not constitute a response to a FCC official inquiry.

The FCC gets *really* unhappy when they are unable to contact a licensee.

Motor Racing Network has requested experimental STAs for very low-powered stations at four race tracks. Each STA is for a one-week period culminating in a major race. Each station will run 75 watts to a rather low antenna, presumably mounted on the superstructure of the race track. The STAs say the stations will air race-related programming to viewers at the track. (at the power levels specified, reception outside the premises will be unlikely) Details are sketchy but I'm not thinking the broadcasts are intended to be directly received by racegoers. There appears to be some kind of connection with a firm that provides large displays at public venues. I think they're just trying to avoid running long cables around the track.

The four facilities requested:

|                     |                               |        |          |  |                         |
|---------------------|-------------------------------|--------|----------|--|-------------------------|
| Avondale, Arizona   | Phoenix International Raceway | ch. 25 | 75w/-30m | Nov. 6 <sup>th</sup> -11 <sup>th</sup>       | Bluegreen Vacations 500 |
| Kansas City, Kansas | Kansas Speedway               | ch. 26 | 75w/42m  | Oct. 16 <sup>th</sup> -21 <sup>st</sup>      | Hollywood Casino 400    |
| Fort Worth, Texas   | Texas Motor Speedway          | ch. 26 | 75w/9m   | Oct. 30 <sup>th</sup> – Nov. 4 <sup>th</sup> | Texas 500               |
| Ridgeway, Virginia  | Martinsville Speedway         | ch. 24 | 75w/-4m  | Oct. 23 <sup>rd</sup> -28 <sup>th</sup>      | First Data 500          |

A similar request has been filed for analog channel 4 at Nationals Park. (Washington Nationals baseball) See above. In the Washington case, game-goers *are* expected to individually view/hear the broadcasts, over receivers provided (presumably rented?) by Live Sports Radio.

In New York, WPXU-LD and W31EF both filed for displacement to channel 29. Of course, both requests could not be granted. The stations reached an agreement wherein WPXU has withdrawn its application for full possession of channel 29; asked the FCC to grant their rival's request for the same channel; and then share on the W31EF transmitter.

Channel Master 7777 Titan2 VHF/UHF ...

Thank you all for your support of WTFDA.

While reading the posts on the FB TV and FM DXing group, I noticed that someone posted that Channel Master has discontinued production and is moving their operations to Bulgaria! No joke! Bulgaria!

**TROPO ODDITY**

We received this recently from Russ Edmunds. Does anyone have an idea of what happened here?

During the tropo of 9/11 AM, I heard ID's for WMWX-106.5-MD and WSFL-106.5-NC on 105.7. Locally I have a string of county emergency LPFM's, the closest one of which is on 105.7. Apparently all of them are fed OTA from the 'base' LP which is on 106.5, so the local 105.7 (WEMZ-LP) was picking up the tropo stations instead. Later I was able to parallel the WSFL audio between the two frequencies. More interesting was capturing the WSFL RDS on 105.7 ( per attachment ).

I was surprised to see the RDS coming through this arrangement, especially as the LP's don't transmit RDS.

\*\*\*\*\*

That's all for this month. There's not much going on. We will see you next month, hopefully.

"Testing"

WQED-4 Pittsburgh, PA  
997 mi Es  
Seen 7/14/19

WTLW-4 Lima, OH  
1041 mi Es  
Seen 7/20/19

And one from Bill Hepburn in Grimsby, ON:

KZFW-LP-6 Dallas, TX  
1194 mi Es  
Seen 7/20/19  
"franken FM"

And finally, one from me (! – last contribution June 2012), albeit a local. Look for "Vision" for the 5-1 psip. I still have yet to see even a psip from my "local" channel 3 DTV, although the signal strength meter does flicker in the red periodically.

"Vision Celestial"

# **SIGN UP & Renewal Form**

**YEARLY DUES \$10.00 USD for Monthly VUD E-ZINE**  
Print this form and send it with your dues.

Name \_\_\_\_\_

Address \_\_\_\_\_ Apt # \_\_\_\_\_

City \_\_\_\_\_ State/Prov \_\_\_\_\_ Zip \_\_\_\_\_

Country \_\_\_\_\_ Interests: TV (  ) FM (  ) 30-50 (  ) Weather (  )

E-Mail Address \_\_\_\_\_

Sign me up/renew me for: 1 year (  ) 2 years (  ) More (  ) \_\_\_\_\_

**Mail your yearly dues to: WTFDA, P.O. Box 501, Somersville, CT USA 06072**  
**Make your checks/money orders payable to: WTFDA**  
**And *thanks* for your support of the WTFDA!**

## **Southern Taurids**

### **Currently active**

Active from September 10th to November 20th, 2019

The Southern Taurids are a long-lasting shower that reaches a barely noticeable maximum on October 9 or 10. The shower is active for more than two months but rarely produces more than five shower members per hour, even at maximum activity. The Taurids (both branches) are rich in fireballs and are often responsible for increased number of fireball reports from September through November.

## **Orionids**

Next period of activity: October 2nd, 2019 to November 7th, 2019

The Orionids are a medium strength shower that sometimes reaches high strength activity. In a normal year the Orionids produce 10-20 shower members at maximum. In exceptional years, such as 2006-2009, the peak rates were on par with the Perseids (50-75 per hour). Recent displays have produced low to average displays of this shower.
