## In This Issue: Easily Add RDS Spy to SDRUno

W05DH ch5 Jupiter, FL on the air and ready for DXing

# THE VHF-UHF DIGEST

### The Worldwide TV-FM DX Association

Serving the TV, FM, 30-50mhz Utility and Weather Radio DXer since 1968

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, SAUL CHERNOS, KEITH MCGINNIS, JAMES THOMAS AND MIKE BUGAJ

Treasurer: Keith McGinnis wtfda.org/info Webmaster: Tim McVey
Forum Site Administrator: Chris Cervantez
Creative Director: Saul Chernos
Editorial Staff: Jeff Kruszka, Keith McGinnis,
Fred Nordquist, Nick Langan, Doug Smith,
John Zondlo and Mike Bugaj

The WTFDA Board of Directors

Renewals by mail: Send to WTFDA, P.O. Box 501, Somersville, CT 06072. Check or MO for \$10 payable to WTFDA. Renewals by Paypal: Send your dues (\$10USD) from the Paypal website to sales@wtfda.org or go to <a href="https://www.paypal.me/WTFDA">https://www.paypal.me/WTFDA</a> and type 10.00 or 20.00 for two years in the box.

Our WTFDA.org website webmaster is Tim McVey, webmaster@wtfda.org. Our WTFDA Forums webmaster is Chris Cervantez, Chriscrevantez@gmail.com. Fred Nordquist is in charge of club statistics at nordquis@homesc.com

Our email reflector is on Googlegroups. To join, send an email to WTFDA+subscribe@googlegroups.com

Visit our club website at http://www.wtfda.org . Participate in our forums at http://forums.wtfda.org.

Our real-time prop logger is located at http:logger.wtfda.org . Only WTFDA members can participate.

The public WTFDA FM Radio Station Database is administered and updated daily by your fellow WTFDA members. It is completely free to use and serves over 500 users daily in season.

Our new social media site is at Weme.com. https://mewe.com/join/tvandfmradiodx. Register and join the group. Only WTFDA members can participate and many already have.

# The Mailbox

#### P.O. Box 501 Somersville, CT 06072 Mike Bugaj - Enfield, CT mikeb@wtfda.org

Ice, snow and freezing temps in Texas. Hurricane force winds in the Pacific Northwest. Snow, more snow and cold up north. That's February for you, and with this kind of weather you can't expect much in the way of TV or FM DX. The loggers have been pretty empty. Maybe something happens in March but don't hold your breath. Perhaps by Memorial Day.

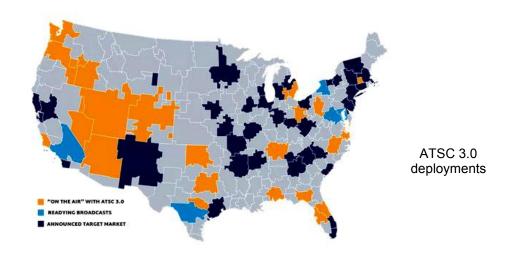

Renewals were received from Jennifer Lewis, Cal Glover, John Edwardson, Rick Shaftan, James Herkimer, Bobby Newport, Charles Gauthier, Chad Bryan, Neal McLain, Josh Moore, Gerard Hart, Mr. Kaimbridge, Harry Hayes, Frank Merrill, Marcus Barboni and John Kosinski (as of 2/27). Thanks to all of your for your support of the WTFDA.

In other news, Trip has posted on the rabbitears.info site that users may see some downtime as he looks to another webhost for rabbitears. He's had to move off his original host and needs a new home. He also intends to move to his own server which may also cause outages at times so be advised if you are a regular user of rabbitears.

According to WNYO TV, it intends to switch to ATSC 3.0 on March 18<sup>th</sup>, but in reality that date may be much sooner. This move will give Buffalo area DXers with equipment capable of receiving ATSC 3.0 signals a chance to see their first 3.0 channel.

And last but not least (wow I haven't used that phrase in years), ex-member Chris Dunne down in Florida reports that W05DH in Jupiter is transmitting on RF channel 5, which makes it one more DX target for DXers in the northern states. W05DH's analog channel was RF 47 and shows 47-1.

And that's all I have. It's going to be a small VUD this month. Catch you next time. -Mike

### **Using RDS Spy with SDRuno**

Mike Bugai

RDS Spy was my favorite RDS decoder for years until I got a newer computer and couldn't get Spy to work with VAC (Virtual Audio Cable) any longer. Then I moved to SDR Console until I bought my RSPDuo, where I was forced to use SDRuno in order to use phasing (Diversity) mode with it. It was by accident that I watched a video made in November 2020 that showed how to use RDS Spy with SDRplay products. I took notes, downloaded what I needed and set up the Duo to work with RDS Spy. It was not difficult. The process is much easier than trying to use virtual audio cable because I'm not using VAC; I'm using VB Cable Hi-Fi instead. VB Cable Hi-Fi is a free program unlike VAC. The instructions that follow are for VB Cable Hi-Fi.

First, if you are already using SDRUno, upgrade it to v1.40.2. Once you upgrade, turn on the SDR and make sure everything is working. Then, if you need to, download and install RDS Spy. Then download VB Cable Hi-Fi and install it.

Next go back to SDRuno. Go to SETT in the RX Control Window. When the RX Settings windows appears, select your soundcard as your Output Device. Then close the RX Settings window.

Then go to the Plugins tab on the SDRuno Main window. Select MPX Output from the Plugins menu and click on Load Plugins. Next, the MPX Output window appears. Make sure the VB-audio Hi Fi Cable is selected and click on the **Enable Output** button. (Note: if SDRuno is not on and running, the **Enable Output** button will be grayed out so make sure that your SDR is active when you click it.) I'd suggest keeping the Plugins window on your desktop and the MPX output window visible on your desktop since they are small windows but you don't need to.

Turn on the SDR and find a tune to a station that uses RDS. Then double click on the RDS Spy icon on your desktop and load RDS Spy. Go to the "Configure" tab, select RDS Source. Make sure that Hi-Fi Cable Output (VB-Audio HI) shows in the Input audio device window and that Direct RDS/MPX (192khz) is ticked in the Sound Card Input Mode box. Then click okay.

RDS Spy is super quick. You'll really see the difference between Spy and Uno's built-in RDS decoder.

#### **ATSC 3.0 NOTES ETC**

Posted on WTFDA mewe.com Group Page by Bill Hepburn

#### ATSC 3.0 Manual.

https://www.atsc.org/wp-content/uploads/2020/08/NextGenTV-Host-Station-Manual-V8-Final.pdf

Important to note that there is no rule for a certain number of years of mandatory simulcasting 1.0 and 3.0; *instead it's a sharp cut-off date of 2023-Jul-17* (to be re-evaluated in 2022-Jul).

4 main transmission configurations (1000's of variations possible). In HEVC, it takes just 4 MB/s for a full HD channel instead of 16 MB/s.

- **1.High Capacity**. Total thru-put 24.9 MB/s. **17.7 dB** S/N threshold (a little worse reception than ATSC 1.0).
- 2. ATSC-Like. 21.4 MB/s. 15.5 dB S/N (same as ATSC 1.0).
- **3.Robust**. 3 MB/s. **0.2 dB S/N**! (much better than ATSC 1.0 but only allows 1 sub-par HD channel, or a whole bunch of SD's, but great for weak signal DXing).
- **4.Middle**. Split into 17.7 MB/s and 3.1 MB/s. **17.9 dB** and **5.9 dB** S/N respectively. (compromise allowing for high resolution, a little worse than ATSC 1.0 signal, and one lower resolution stream of channels with better than ATSC 1.0 signal for mobiles and dx.)

So it looks like not all stations will be created equally when it comes to potential for weak signal DX.

Use of SFN's (multiple xmtrs on one channel) can help raise signal levels throughout an area.

After the simulcast period is over, most existing HD-SD subchannel setups should be able to use the Middle setup. Until 4K comes along....

#### **HDHR Firmware**

New firmware for HDHR-4K. Note the mention of faster channel scan. I'm hoping this solves my occasional problem of CITY-18 Toronto being erroneously logged as CITY-17 Ottawa. The date says 20210209, but it shows 20210210 on my HDHR.

#### HDHomeRun Firmware (20210209beta3)

- \* 4K models: Fix problem where SPS headers were incorrectly added to every frame on ATSC 3.0 channels when outputting TS format video.
- \* 4K models: Set audio PES length on ATSC 3.0 channels when outputting TS format video.
- \* 4K models: Add ATSC3 flag to channel lineup xml/json on ATSC 3.0 channels.
- \* US models: Faster OTA channel scan.

Hanna	9	K09MQ	License canceled Feb. 25 <sup>th</sup> .
Hanna	11	K11ND	License canceled Feb. 25 <sup>th</sup> .
Logan	13	KUTA-LD	Calls changed from K13YY.
Logan	17	K17II	Requests STA 250w/-249m, 41-47-14/111-49-59; granted. Lost site.
Roosevelt	50	K50GO	License canceled Feb. 25 <sup>th</sup> .
Utahn	11	K11TL	License canceled Feb. 25 <sup>th</sup> .
Washington			
Spokane	15	KHQ-TV	Operating at half power since Jan. 13th pending delivery of

Location	RF Ch	Callsign	Notes replacement part. Returned to full power Feb. 9 <sup>th</sup> .
West Virginia			
Huntington	9	WVPB-TV	Requests power increase to 60.3kw/375m.  Amended to 30kw. Granted.
Huntington	21	WHWV-LD	Requests power reduction to 2kw/66m, 38-42-18/82-12-13. Calls changed from W21EG.
Wisconsin			
La Crosse	28	WXOW	Application for new aux, 99kw/335m; granted & on the air.
Wyoming			
Casper	8	KPTW	Requests power increase to 28.1kw/308m; supersedes previously-granted increase to 20kw/568m.
Casper	12	KCWY-DT	Granted power increase to 16.5kw/553m.
Cheyenne	11	KQCK	Requests power reduction to 16kw/403m. Appears to be correction of site elevation, not an actual change.
Douglas	29	K29JO	Power increased to 1.1kw/103m.
Gillette	16	K16AE	OFF Feb. 1 <sup>st</sup> , lost site.

#### **ANALOG: WHAT'S LEFT:**

As of Feb. 21<sup>st</sup>, there are 1,099 U.S. stations authorized to broadcast in analog. Of these:

		<u>, ,</u>
222	(20%)	are also licensed to operate in digital. Presumably the FCC has not gotten around to deleting their analog licenses.
480	(44%)	hold construction permits to convert to digital. Some may be operating in digital pending FCC action on their licenses-to-cover.
26	(2%)	have applied for permission to convert to digital. The FCC has not yet acted on their applications.
15	(1%)	have Digital Companion Channels simulcasting their analog signals. Presumably they don't care if their analog is deleted, they're already operating in digital.
77	(7%)	have done nothing to convert. Unless they act promptly they will be out of business later this year.
279	(25%)	are located in Alaska. I suspect some of these have in fact converted to digital.

#### MOVING, OR NOT:

WGIQ-43 is one of the Alabama Educational Television Commission's (AETC) stations. Licensed to Louisville, Alabama it transmits from a tower near Texasville (which is nowhere near Texas) and is regarded by the AETC as the station serving Dothan. However, Nielsen sees WGIQ as a Montgomery-market station. As a result, WGIQ doesn't have must-carry protection in Dothan, and neither does any of the AETC's other stations. Which means AETC is not available to satellite viewers in the Dothan area. (they receive a generic national PBS feed instead)

The AETC asked the FCC to amend the WGIQ license to change the city of license to Dothan. This is definitely technically feasible. It is not, however, *legally* feasible.

The Commission *really* doesn't like to see a community's only station deleted. It is sometimes possible to convince them to allow it *if* the new community will get its first station as a result. That's not the case here. Dothan already has two TV stations: WDHN-18 and WTVY-4.

Reading the decision, I suspect the FCC might have approved the move if the AETC had specified a town that didn't already have stations. For example, Cowarts, Alabama. (which borders on Dothan)

## For Those Computer Geeks Out There

And I know there are a few. This is the first time that a VUD has been assembled on a linux computer and not a Windows computer with MS Word, Libreoffice and Adobe Acrobat. Instead, I used WPS Office, Libreoffice for Linux, PDFSam Visual and PDF Arranger along with the Mint Cinnamon operating system on a Dell Desktop i5 computer. For "snips" I use Etcher instead of MS Snipping Tool. For adding page numbers I use Both GIMP and Scribus (95% Scribus) instead of Adobe Acrobat.

Nothing happening until the Lyrids (April 16 through April 20th)
