

# VHF-UHF DIGEST

The Official Publication of the Worldwide TV-FM DX Association

JULY 2021

**2 hop FM Skip Reported from Cape Cod to Puerto Rico**

**Left: Double Hop E skip from Palmdale, CA to Tampa!**

And later the **same station** skipped from **Tampa to Washington State** and was heard on a portable with an extended whip. **What next?**

**What's next??**

**GREENLAND 88.5 AND QUEBEC 90.7 LOGGED IN N.IRELAND**

**SPAIN ON 88.8 SKIPS TO NEWFOUNDLAND.**

First Verified Reception of European FM in North America

# THE VHF-UHF DIGEST

## The Worldwide TV-FM DX Association

Serving the TV, FM, 30-50mhz Utility and Weather Radio DXer since 1968

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS:

SAUL CERNOS, KEITH MCGINNIS, JAMES THOMAS AND MIKE BUGAJ

*Publisher: Mike Bugaj*

*Treasurer: Keith McGinnis wtfda.org/info Webmaster: Tim McVey*

*Forum Site Administrator: Chris Cervantez*

*Creative Director: Saul Chernos*

*Editorial Staff: Jeff Kruszka, Keith McGinnis,  
Fred Nordquist, Nick Langan, Doug Smith & John Zondlo*

Mike Bugaj - Enfield, CT [mikeb@wtfda.org](mailto:mikeb@wtfda.org)

Here it is, the 2021 E skip season. It's time to take the WTFDA Es van out of storage, give it a tune up and an oil change, and get it back out on the road finding skip for you and me.

I think most of us had some pretty decent Es during the first half of June, but that dreaded "June lull" took over and killed it for the second half of the month. Now, at the very end of June, Es *seems* to be making a return but we'll have to see how it all plays out.

This month we welcome Mathew Amador to the club. Mat, as many of you have already heard, has already received 2Es from his home in Palmdale, CA. The info is on the front cover. We also welcome back Randy Zerr, currently living in Nevada somewhere in the middle of nowhere, where he's doing well with Es this season. And then we welcome Leslie Wood from the state of New York, who was a WTFDA member back in the 90s and remembers Bill Nienajadly, who was one of the first DXers to begin changing filters in their tuners and receivers. Bill got me started in it. Welcome and Welcome back to you all.

For renewals we have Sheryl Paskiewicz, Paul Snider, Gray Fulk, Kegan Parkinson, Brian Penney (2 years), Juan Gualda, John Marx, Dan Oetting (2 years), Rick Lucas, John Lochey, Dave Bright, Taylor Crain, Mike Glass, Bill Coury, Wally Bloss, Stephen Ponder, Stan Weisbeck, Dennis Bannister, Jeff Kruszka, Al Tobia, Tim McVey, Mike Lazaro, Rob Keeney (thanks for rejoiniing!) and David Austin. Thanks everyone and have a great Es season! Thanks for supporting the WTFDA.

Here's a little from Mat Amador regarding his 2Es reception: "This is my first post on WTFDA, so allow me to introduce myself briefly. My name is Mat, otherwise known as N6AVI, or my online alias, "SkyWaveBirdDX" I reside here in Southern California, in a little town called Palmdale. I have been doing FM DX for the last three years, and it's been an exciting hobby to get into.

I'd like to inform this forum of a multi-hop Sporadic-E catch I have got recently. On May 26, 2021, at 4:54 PM local [2354 UTC] during a really strong and bizarre opening on FM during May, I happened to catch WBVM from Tampa, Florida. Distance has been found to be 2,153 mi, or 3,465 kilometers. Confirmation: RDS with valid PI code on SDR which was used during the event."

And then in June another FM Dixer in Moses Lake, WA reported double hop reception of WBVM 90.5 at 2:35pm (PDT) at 2377 miles on June 16<sup>th</sup>. The reception was made using a SPARC SHD-TX2 portable with extended whip antenna. The Dixer supplied a photo of his the SPARC's RDS display

which we include here. Imagine that! He heard double hop FM Es using a portable radio with the built-in whip extended.

Here's a note from Leslie Wood (NY): "Hi, I'm a fellow member of WTFDA, having just joined this past May! I'm also a member of the NRC, longtime member since 1993! I remember first joining WTFDA, in the summer of 1994, when I received physical VUD's, and you were HQ'd in Buffalo, New York. I remember corresponding with WTFDA member, Bill Nedjeny at the time! "

We have new WTFDA member Paul Logan and another remarkable Es reception from Northern Ireland..."Checking IQ files of the end of the opening to Greenland today a station fades up on 90.7 for a few seconds with a radio canada. ca email address. Checked against the online show recording from *Ici Musique and bingo it fits! Think it's this:*

90.70 1401 CAN CBRX-FM-3, Rivière-du-Loup (QC) yl with "[radiocanada.ca](mailto:radio@radiocanada.ca)" email address, brief. Fits online recording of show 4261km

89.5 from the same site is blocked for me but had it been Sherbrooke QC then 89.7 would have been in too and it wasn't. So I think I'm going with Riviere Du Loup - the larger powered closer transmitter.

I'm very surprised at this reception. Not only that it happened but that it was such a southerly path at the same time as GRL.

Does anyone know if there are any other "Ici Musique"s on that frequency but further north? So that's TA - 5 to North America from here and 2 to the Caribbean since 2003. I'll sleep tonight!!!!!"

Not to be outdone, here's another great one from Bryce Foster...Puerto Rico FM to Mashpee, MA (which is on Cape Cod)...

### ***June 16th 2021 - 2x Es - MA to Puerto Rico***

Things have come full circle as my second lifetime 2x Es catch is the exact inverse path of my first one (first 2x Es is pinned on the forum, from Puerto Rico to Canadian Maritimes, however that opening started with a sports signal on 96.3 that I believe was WEII-FM, one of my current locals).

I noticed on DXMaps a good amount of Es from MA and ME to Puerto Rico... without a lot of other activity I swung south and rolled SDR IQ recordings from 88-95 MHz hoping maybe I'd catch a fadeup. Sure enough, I loaded the IQ back up about an hour later and found a 2 minute fadeup with 3 signals; 88.1, 89.7 and 90.5.

**88.1** programming was Spanish Christian music, "Vamos A Salir a la Calle" by Alay Music ft. Gilberto Daza. RDS did trigger for this one, a bogus code of FFFF. I suspect this was WCRP-FM Guayama, PR. This is not noted in the WTFDA DB, and while I was in Puerto Rico in 2020, this station was running a different bogus PI code.

**89.7** was my positive ID. Jazz programming, a nice signal over a weak WGBH off the back of my antenna. No audio ID, but RDS including PI and PS information came through strong with WRTU's data, consistent with what I saw last year while in PR.

Logbook information is **89.7 WRTU San Juan, PR (1636 mi, 50 kW) RDS PI 838E, PS "WRTU-FM"**

Youtube video: <https://youtu.be/ooUvtqh695E>

**90.5** was a weaker signal, also with Spanish Christian music, "Se Mueven Las Aguas" by Luis Santiago. No RDS decoded here and the signal was weaker. I assume this was WIDA licensed to Carolina, PR. WIDA shares a tower location with 88.1 WCRP.

It is certainly possible that this was a single hop + tropo situation. But based on some other paths on DX Maps, and the distance, I am presuming 2x. Earlier this week I also logged 88.1 Primera in Dominican Republic, and 96.7 CMBD-16 in Cuba. So I'm on a roll in the Carribean! Looking forward to more... this is definitely the most interesting direction for long haul rare DX here. Cheers

\*\*\*\*\*

Bill Hepburn posting on the mewe.com group...

## Canadian Provinces/Territories That Are Now A Huge Challenge

Best Targets Left

### SK

**A 2** CH2352 Green Lake - 52 watts - programming unkn

**A 5** CH2353 Green Lake - 52 watts - programming unkn

**A 6** CHAT-TV-2 Maple Creek - 52 watts - IND (Medicine Hat, AB)

**DT 8** CKCK-DT Regina - 23 kW

**DT 8** CFQC-DT Saskatoon - 13 kW

### PE

**DT 8** CKCW-DT-1 Charlottetown - 9.6 kW

### NL

**A 3** CHCB-TV-1 Cape Broyle - 57 watts - CBC Newfoundland & Labrador

**DT 8** CBNT-DT St. John's - 17.1 kW

### YT

**A 9** CKWH-TV Whitehorse - 25 watts - local LPTV

### NT

**A 2** CH4434 Hay River - 8 watts - programming unkn

**A 4** CH4546 Hay River - 9 watts - Super Channel

**A 5** CIHC-TV Hay River - 9 watts - local LPTV

**A 6** CH2068 Hay River - 44 watts - Global BC

**DT 8** CFYK-DT Yellowknife - 2.32 kW

### NU

no licensed xmtrs left!! may be some license-free LPTVs

And that's all for July!

# We NEED Your HELP!

***This is a personal request - yes - TO YOU.***

I would like to know about any RECENT ***"DX Success Stories"*** that you would like to share with the WTFDA.

Send them directly to me @

Jim Thomas  
Jim-T@wtfda.org

I'd like your ***"DX Success Story"*** to be something from this year - 2021. Your ***"Story"*** may already be known by many - or - something you haven't told to hardly anyone. Your "Story" can be about that single meteor scatter ID that blew you away; MAYBE it's a long distance tropo reception that you never expected; OR it's last month's E-skip event on the FM radio that wore you out and you were at the point of being sick of listening to that radio! Everyone likes a GOOD SUCCESS story. It's a form of encouragement.

Your ***"DX Success Story"*** might just show up on one of the WTFDA's social media resources -

- The WTFDA group MeWe page
- The WTFDA website homepage
- OR an upcoming issue of the VUD.

One of the reasons people donate or participate in worthy causes and activities is to help create happy endings. Some members are interested in other DXers served by the WTFDA that have a similar DXing background to theirs, and others feel good hearing one DX success story at a time. Social media helps you share both kinds of stories.

That's why you never know where your ***"DX Success Story"*** might show up!

Anecdotal stories are ideal for giving detailed accounts of how the WTFDA is encouraging you in pursuit of your DXing hobby. What the heck are *anecdotal stories*? It might be the story of your DXing life. In this internet crowded and crazy world and complicated by a recent pandemic, it can be a story about a young teenager learning about the hobby of FM DXing and how others have helped him expand his hobby. It could be about one veteran DXer, whose already logged over 3000 FM stations or 500 TV stations, and thinking there's no more to do, then suddenly realizing he can help and encourage all of the younger DXers that haven't been there yet. It might be you, the average DXer, that has realized the level and scope of services that the WTFDA has to offer, and that you would simply like to encourage your fellow TV or FM DXer, for BETTER or WORSE of DXing conditions, to stick with it. Statistics, on the other hand, create a larger view of the hobby and the reach of your DXing club, the WTFDA. Some DXers are all about DXing Statistics and the WTFDA tracks that kind of information.

By showing potential DXing members how many members are served, how much money is spent on club projects and the long-term impact of what the WTFDA is all about, you are assured of the value of your annual contribution of \$10. The more I think about it, I think you get more for your money than the value of your annual \$10 due. And as an added bonus (almost FREE?), all social content is shareable, meaning that if you, as a FM or TV DXer, are particularly moved by another person's ***"DX Success Story"***, you can share that story with your DXer friends.

So - what's your ***"DX Success Story"***?

# Jampro enables Franken FM and ATSC 3.0 operation

Published 6/15/21

FM Sidekick Portfolio of Combiners allows Channel 6 TV Stations to Provide ATSC 3.0 TV and FM Audio Transmission on the Same Antenna Infrastructure. Jampro Antennas Inc. is a global leader in Antennas, Filters, Combiners, RF Systems, Towers, and Service. Using the Jampro FM Sidekick Combiner systems model RCCC-101-FM-4EH will allow broadcasters to combine the Next-Generation ATSC 3.0 TV and FM audio broadcasts within the

assigned channel 6 bandwidth.

Consumers have long been able to tune their FM radios to 87.7 MHz and listen to the audio of a Channel 6 TV station broadcasting in analog. These so-called “Franken FM’s” have developed a niche for the underserved and minority communities in many markets. The transition to digital broadcast for TV stations eliminated the analog audio carrier. However, many stations have been looking for solutions to continue to provide this vital community service.

The FM Sidekick line of combiners provides extensive filtering and isolation. They allow a standard off-the-shelf ATSC 3.0 transmitter to be safely combined with a standard FM transmitter and present a proper loading and isolation to each transmitter. More importantly, the unique system provides adequate filtering to ensure no harmful out-of-band emissions are transmitted. The signal is fully compliant with the assigned bandwidth requirements.

The Broadcast Industry can also use the FM Sidekick line to combine standard FM education frequencies low in the FM band like 88.1 MHz and 88.3 MHz, with a channel 6 television station. It allows the sharing of a common antenna and transmission line. This approach saves costs on both the RF system and ongoing operating expenses related to tower space.

“FM Sidekick is the result of our close collaboration with a key customer who couldn’t find anything on the market to solve his unique problem,” said Alex M. Perchevitch, President & CEO, Jampro Antennas. “Our customer-first approach looks beyond delivering just an antenna but to helping our customers architect complete solutions. These reduce operating costs over many years and create new opportunities to monetize their broadcast operations.”

## 2021 Madison-Milwaukee Get-together for DXers and Radio Enthusiasts

It is my pleasure to be your host for the 2021 Madison-Milwaukee Get-together for DXers and Radio Enthusiasts this year. I and others who are assisting me are looking forward to a great get-together this year. This will be the delayed 27<sup>th</sup> Madison – Milwaukee DX Get-together. We would be very pleased if you can join us. If you have attended in the past, it has been your participation and that of many others that has made this event such a pleasure to host. We appreciate your past attendance. If you have not attended, we would appreciate your consideration in coming. We can think of nothing better for our event than to have a great turnout this year. Won't you join us?

The Madison-Milwaukee DX Get-together has been held on the third Saturday in August every possible year (except the 2020 pandemic year) since 1994. The purpose from the beginning has been to promote camaraderie among all DXers and radio hobbyists-- "making new friends and renewing old friendships." This is an all-band event, which brings together a diverse group of hobbyists who have one thing in common-- a love of radio.

Each year the get-together alternates venue between Madison and Milwaukee. Since we had to cancel last year due to the Covid-19 pandemic, this year it is Madison's delayed turn to host the event.

This is your invitation:

WHEN: Saturday August 21, 2021 1:00 PM - 9:30 PM (come when you can and leave when you must)

WHERE: 1114 Ellen Av., Madison, Wi. 53716 (Mark's house.)

HOST: Mark Taylor

As usual, you can expect an afternoon of good fellowship and lots of DX talk in an informal atmosphere. If you like, bring along radios, antennas, station souvenirs, QSLs, photos, log books or any show-and-tell items to share with the group. There are opportunities to DX during the event, and a few informal demonstrations are anticipated. (Details to be provided in early August). If you would like to present on a topic of interest, please contact Mark. An assortment of snacks and soft drinks will be provided during the event. If you prefer an alternative beverage, please bring your own. We will have both indoor and outdoor areas (weather permitting.) Please bring a chair if planning on sitting in the garden if possible also. Our group photos will take place in late afternoon, so bring along your camera.

A highlight of every Madison-Milwaukee get-together has always been the dinner (participation optional). As of now we have not decided on a location, so keep tuned for details. The opportunity for at least indoor group dinners is evolving, so nothing is planned at this time. Dinner is followed by a night session of DX and camaraderie until 9:30 PM or so if you wish to return to the house.

As of the time the Covid-19 restrictions have been lifted for vaccinated individuals in Wisconsin. Since things have been changing, we will abide by any Dane County Health Department orders or restrictions, although we do not anticipate any at this time. We will make accommodations as possible depending on the pandemic conditions at the time of the M&M gathering.

I would appreciate you RSVP so as to plan an approximate number of participants to [markokpik@gmail.com](mailto:markokpik@gmail.com) or you may call or text me at 608-225-2690. If you have a presentation, display, or would like to offer assistance in running the event, please contact me at my e mail or phone number. Looking forward to your attendance.

Mark Taylor

[markokpik@gmail.com](mailto:markokpik@gmail.com)

608-225-2690

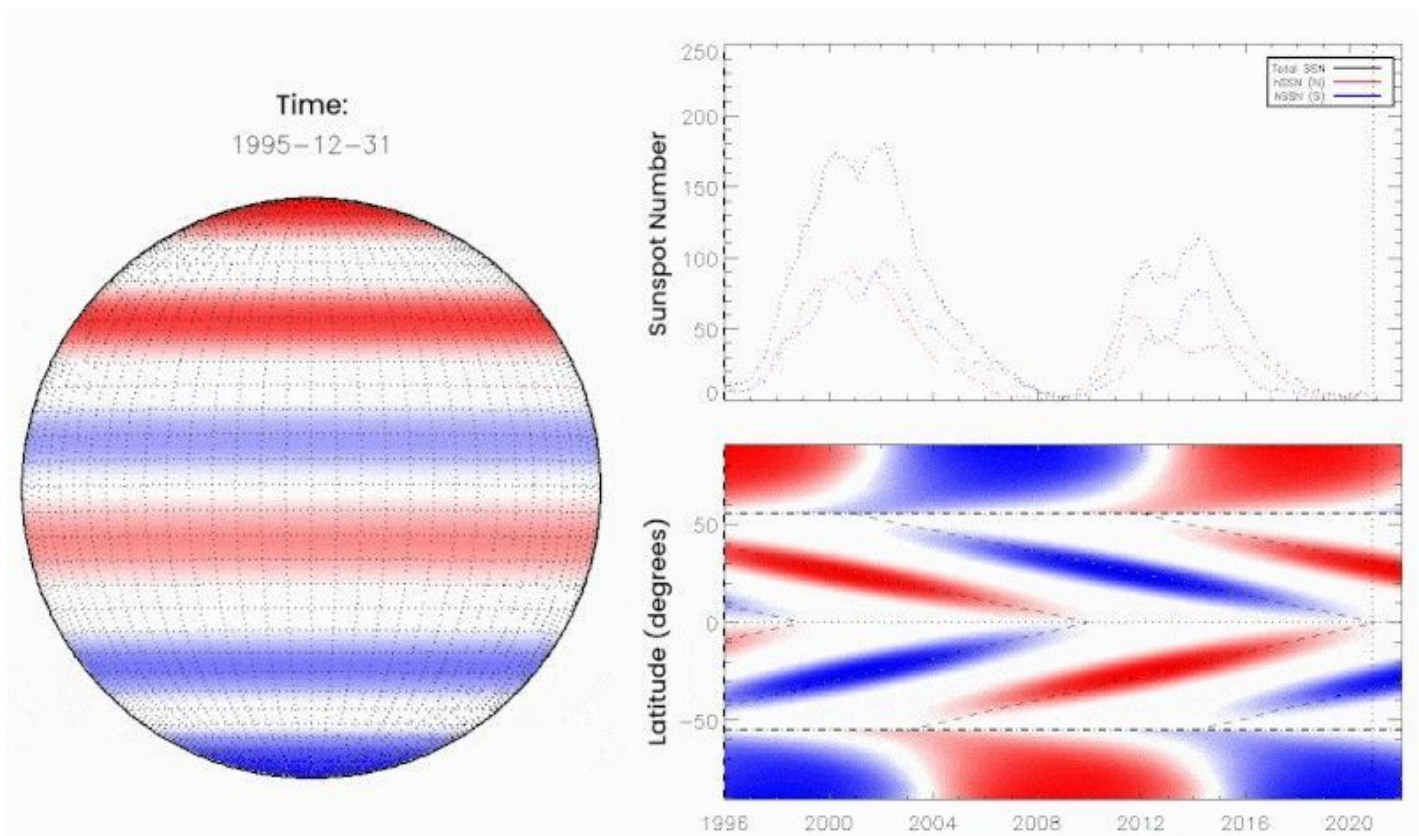

# The Termination Event

/ [Dr. Tony Phillips](#)

**June 10, 2021:** Something big may be about to happen on the sun. “We call it the Termination Event,” says Scott McIntosh, a solar physicist at the National Center for Atmospheric Research (NCAR), “and it’s very, very close to happening.”

If you’ve never heard of the Termination Event, you’re not alone. Many researchers have never heard of it either. It’s a relatively new idea in solar physics championed by McIntosh and colleague Bob Leamon of the University of Maryland – Baltimore County. According to the two scientists, vast bands of magnetism are drifting across the surface of the sun. When oppositely-charged bands collide at the equator, they annihilate (or “terminate”). There’s no explosion; this is magnetism, not anti-matter. Nevertheless, the Termination Event is a big deal. It can kickstart the next solar cycle into a higher gear.

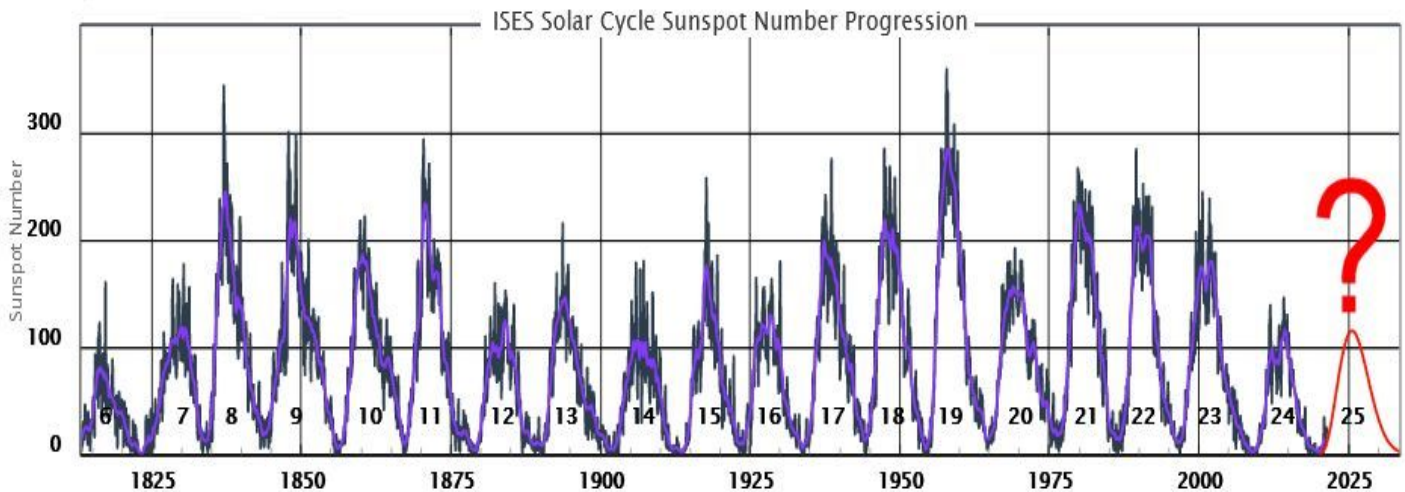

**Above:** *Oppositely charged magnetic bands (red and blue) march toward the sun’s equator where they annihilate one another, kickstarting the next solar cycle. [\[full caption\]](#)*

“If the Terminator Event happens soon, as we expect, new Solar Cycle 25 could have a magnitude that rivals the top few since record-keeping began,” says McIntosh.

This is, to say the least, controversial. Most solar physicists believe that Solar Cycle 25 will be weak, akin to the anemic Solar Cycle 24 which barely peaked back in 2012-2013. Orthodox models of the sun's inner magnetic dynamo favor a weak cycle and do not even include the concept of "terminators."

"What can I say?" laughs McIntosh. "We're heretics!"

The researchers outlined their reasoning in [a December 2020 paper](#) in the research journal *Solar Physics*. Looking back over 270 years of sunspot data, they found that Terminator Events divide one solar cycle from the next, happening approximately every 11 years. Emphasis on *approximately*. The interval between terminators ranges from 10 to 15 years, and this is key to predicting the solar cycle.

**Above:** The official forecast for Solar Cycle 25 (red) is weak; McIntosh and Leamon believe it will be more like the strongest solar cycles of the past.

"We found that the longer the time between terminators, the weaker the next cycle would be," explains Leamon. "Conversely, the shorter the time between terminators, the stronger the next solar cycle would be."

Example: Sunspot Cycle 4 began with a terminator in 1786 and ended with a terminator in 1801, an unprecedented 15 years later. The following cycle, 5, was incredibly weak with a peak amplitude of just 82 sunspots. That cycle would become known as the beginning of the "Dalton" Grand Minimum.

Solar Cycle 25 is shaping up to be the opposite. Instead of a long interval, it appears to be coming on the heels of a very short one, only 10 years since the Terminator Event that began Solar Cycle 24. Previous solar cycles with such short intervals have been among the strongest in recorded history.

These ideas may be controversial, but they have a virtue that all scientists can appreciate: They're testable. If the Termination Event happens soon and Solar Cycle 25 skyrockets, the "heretics" may be on to something. Stay tuned for updates.

As always, thanks to Raymie Humbert for information from Mexico.

SPR is the Mexican public broadcasting authority. (Sistema Público de Radiodifusión del Estado Mexicano) The subchannel lineups vary but I believe the list for these transmitters is:

- 11.1 Canal Once
- 14.1 Canal Catorce
- 14.2 Ingenio TV
- 20.1 TV UNAM (Universidad Nacional Autónoma de México)
- 22.1 Canal 22
- 45.1 Canal del Congreso (“Mexican C-SPAN”)

Technical facilities for these are not yet known. I’m marking them as “full power” but some (or all) may not be.

## OPTIMISM

I think the owners of WDMY-LP in Toledo are being optimistic, when they ask the FCC to waive the off-over-a-year rule. They believe the station has been off for 4-1/2 years. They argue it’s a result of the repack. Some stations have successfully made that argument, but over silent periods exceeding a

year by weeks, not years. But these days, you never know!

(Indeed, the Commission promptly granted their request & a permit to convert to digital on ch. 6.)

## PESSIMISM

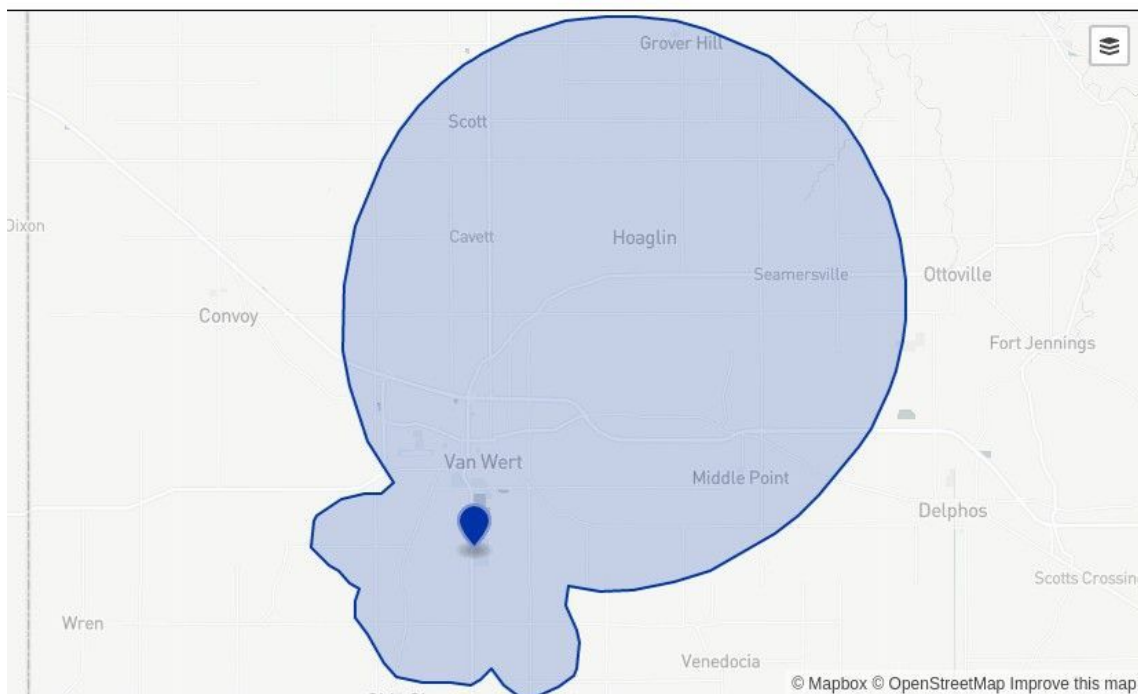

TV licenses in Indiana, Kentucky, and Tennessee expire on August 1<sup>st</sup>. Renewal applications are due four months in advance – in this case on April 1<sup>st</sup>. Five stations failed to file. Filing a renewal application during July will (probably) save their licenses but with at least an admonishment if not a fine.

Three of the five do not have a digital authorization and will be required to shut down on July 13<sup>th</sup>. (but could presumably return to the air at a future date if they file a digital application by the 13<sup>th</sup> and a license renewal by the end of the month) WVVK-LP has a permit to convert to digital on channel 26, and WETV is operating in digital on channel 11.

## TWO STATIONS SAME CHANNEL SAME TOWER

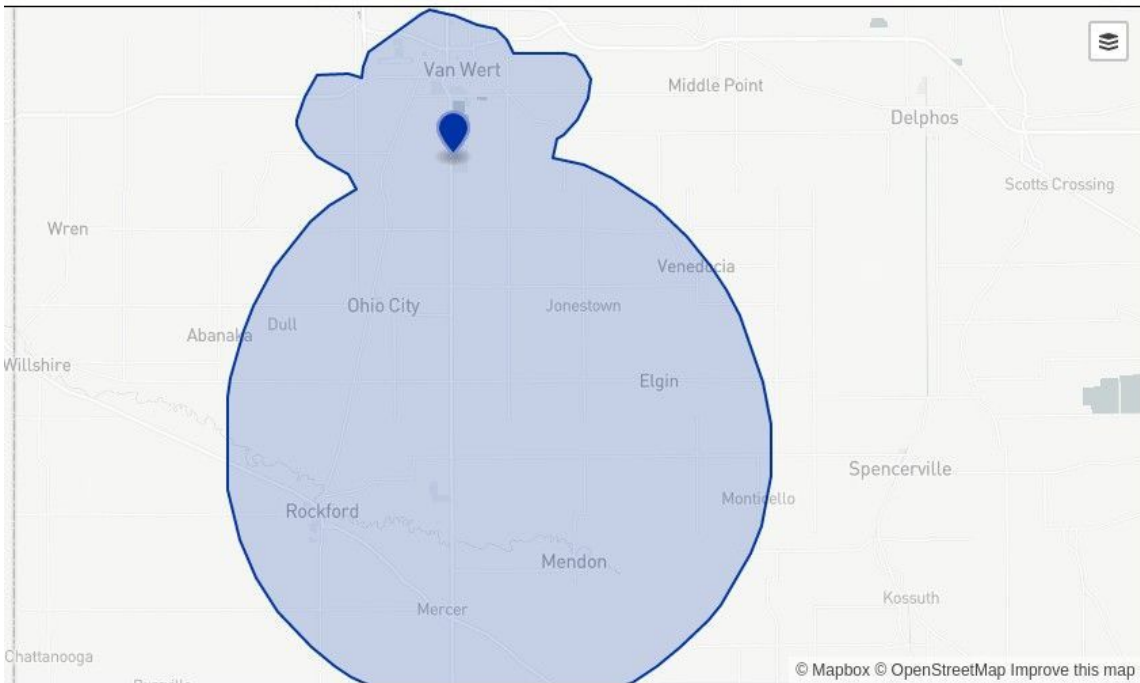

I haven't seen an operation like this in a long time... Note two new stations operating on channel 30 at Lima, Ohio. Both are operating from the same site. Different directional patterns are used. I've seen previous operations like this where the different patterns operated on *different* channels – and indeed, there's a third pattern at this site operating on channel 29.

## W30EX:

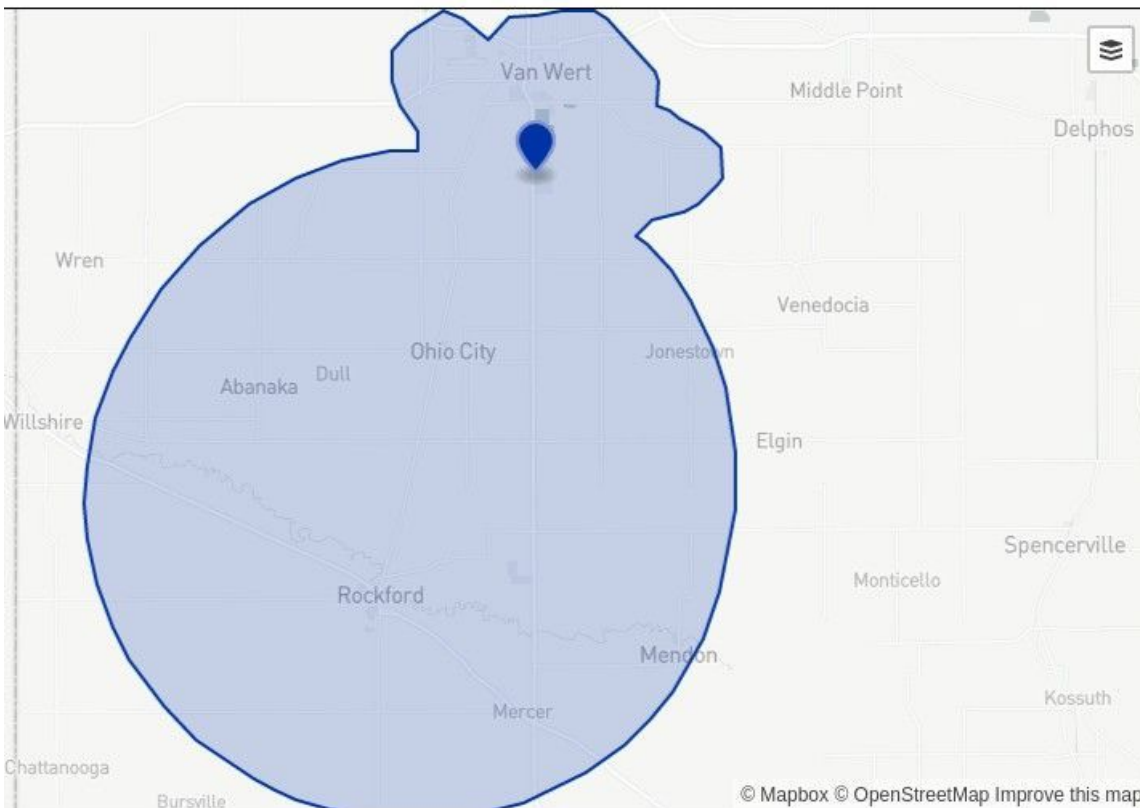

## W30EY:

**W29EL:**

Note that, while all three stations are licensed to Lima, none of them reach Lima! - Lima is roughly ten miles off the right side of the map...

They didn't stay long. All three stations have filed to move to new sites. (three different sites...)

## TO DTV OR NOT TO DTV

A month (and two days) before the final deadline for analog LPTV, the FCC has released a list of LPTV stations that do not yet have a digital permit. These stations have been urged to immediately file for one – or their analog licenses will be automatically canceled on July 13<sup>th</sup>. All digital permits issued to stations currently operating in analog will expire on that date as well. Stations which cannot complete their digital facilities by then must file for an extension – and then go dark on the 13<sup>th</sup>, until digital facilities are complete.

The list of not-ready-for-digital LPTVs appears elsewhere in this *VUD*. It is based on official FCC data as of June 9<sup>th</sup>; notes are based on my own observations past that date.

Fifteen stations in Alaska have been granted permission to remain in analog until Jan. 10<sup>th</sup>, 2022. The State of Alaska cannot complete digital conversion on time. The FCC has traditionally waived certain rules for stations in rural Alaska. These areas are sparsely populated; difficult to reach; have difficult construction conditions and short construction seasons; and are far enough from population centers that failure to strictly comply with lower-48 technical standards won't interfere with anything.

The survivors are:

K04LJ Atka

K04KV Unalaska  
K13TD White Mountain  
K07ST Womens Bay

## FRANKENFM SURVIVAL? PART 2

Last month, we reported KBKF-LD San Jose, like several other stations on channel 6, requested permission to leave their analog aural carrier in operation while converting the video signal to digital. This doesn't work in ATSC 1.0. (and the FCC has not granted anyone's request) The ATSC 1.0 digital signal occupies the entire 6MHz channel. You could potentially notch out enough of the video signal at the top to fit in analog audio – but then, no ATSC 1.0 receiver could decode the video.

ATSC 3.0 is different. KBKF believes they can notch out 491KHz at the top of the channel & fit in an aural signal *without precluding decoding of the ATSC 3.0 digital signal*.

FCC staff seems leery but not entirely unwilling to entertain this experiment. Last month, I reported it was unlikely KBKF's application would be granted – but I was wrong. They will be allowed to try it, with seven conditions:

- 1) **The aural signal must be broadcast on 87.75MHz.** Arguably, the loophole in the analog regulations that allowed "FrankenFM" operation allowed use of any frequency between 82.1 and 87.9MHz for the aural signal. That will not be the case for KBKF.
- 2) **The STA may be modified or terminated if interference is caused;** any of the other six

conditions are violated; or for any other reason.

- 3) **The audio and video signals must reach similar populations.** The same loophole that allowed analog operation anywhere between 82.1 and 87.9MHz arguably also permitted operating the aural transmitter at any power level up to that equal with the video transmitter. (the aural transmitters of analog full-power stations were limited to 22% of video power) Arguably this condition would limit the power of the analog audio signal. Although, if a sufficiently robust Physical Layer Pipe (PLP) were configured for the ATSC 3.0 signal, the digital coverage could possibly compare well to the audio.
- 4) **A report must be submitted in 90 days**, and again in 180 days, detailing any reports of interference to other stations. It must also report any interference that the analog audio causes to KBKF's own digital signal; and it must demonstrate compliance with condition #3 above.
- 5) **KBKF must provide at least one stream of synchronized video/audio programming** on the digital signal on a 24/7 fulltime basis.
- 6) During the STA, **KBKF's technical facilities may not be modified.**
- 7) During the STA, **the license may not be sold.**

It will be interesting to see what happens here. If this works, one might expect most other channel 6 LPTVs to opt to convert to ATSC 3.0 in order to continue operating at FrankenFMs. I would *not* expect to see full-power stations do this. I think condition #1, requiring operation on 87.75MHz, will limit the utility of the analog audio side of this operation. Most FM radios tune to 87.9MHz and some to 87.7. (and even 87.5) However, almost none tune to 87.75. Most will provide intelligible reception of this off-frequency signal but some distortion is likely.

As of deadline, two other (commonly-owned) channel 6 LPTVs have requested similar STAs. Neither application includes the seven conditions, but one might expect the Commission to impose them. Both requests specify 87.7MHz (not 87.75) but again, one might expect the Commission to require 87.75.

### FRANKENFM SURVIVAL PART 3

On a related note, I received an email from Jampro, a manufacturer of broadcast antennas. The email was advertising a product called the "Sidekick". It's a combiner that allows connecting an ATSC 3.0 TV transmitter on channel 6, and an FM radio transmitter on 87.7MHz, to the same antenna without interaction. This device is specifically marketed towards the type of operation KBKF plans.

### DISAPPEARING QUÉBÉCOIS

CKRT-DT and its relays have requested revocation of their licences effective August 31<sup>st</sup>. On that date their Radio-Canada ("French CBC") affiliations will expire. The same company owns stations affiliated with the two private French-language networks TVA (CIMT-TV ch. 9) and Noovo. (CFTF-TV ch. 29) With no other networks to choose from, they have elected to close CKRT.

# Analog LPTVs remaining in June 2021

Douglas E. Smith  
Nashville, TN  
[w9wi@w9wi.com](mailto:w9wi@w9wi.com)

On July 13<sup>th</sup>, all analog LPTV and translator licenses will be canceled. A bit more than a month in advance, the FCC released a list of stations likely to be affected. I reproduce that list below.

Stations **highlighted** in the list may not, in fact, disappear.

Most have Digital Companion Channels. (DCC) A DCC is in fact a separate license. So, for example, if K15BZ's DCC is granted, the K15BZ license will indeed be canceled – but the new channel 34 station will carry the same programming, in digital mode. There are more Digital Companion Channels than listed below. It's relatively easy to locate a DCC application for an all-letters callsign like KNIK-LP. The callsign will be the same as the analog facility. That's not the case for number-letter calls like K13SH. The DCC callsign will be different, making the DCC difficult to locate.

APP DTV or CP DTV means the station has applied for (or received a permit for) conversion to digital on either the same channel (see K10MB) or a different channel. (see K10OB) In these cases there is only one license.

### FIRST EVER RECEPTION OF EUROPEAN FM IN NORTH AMERICA via Es

Word came from Paul Logan via the WTFDA Email list of a reception of RNE5 Zamora, Spain on 88.8, received by one Larry Horlick in Newfoundland on June 21<sup>st</sup>. Audio received included news from the Castilla Y Leon region of Spain and fits the RNE5 schedule for regional news for that time slot. Larry is within single hop distance of the Azores with a much more uncluttered band than we have in the US. Audio can be found of the WTFDA Forums.

# SIGN UP & Renewal Form

**YEARLY DUES \$10.00 USD for Monthly VUD E-ZINE**  
Print this form and send it with your dues.

Name \_\_\_\_\_

Address \_\_\_\_\_ Apt # \_\_\_\_\_

City \_\_\_\_\_ State/Prov \_\_\_\_\_ Zip \_\_\_\_\_

Country \_\_\_\_\_ Interests: TV ( ) FM ( ) 30-50 ( ) Weather ( )

E-Mail Address \_\_\_\_\_

Sign me up/renew me for: 1 year ( ) 2 years ( ) More ( ) \_\_\_\_\_

**Mail your yearly dues to: WTFDA, P.O. Box 501, Somersville, CT USA 06072**  
**Make your checks/money orders payable to: WTFDA**  
**And *thanks* for your support of the WTFDA!**

## IMPORTANT NOTICE ABOUT YOUR VUD DELIVERY

Beginning with your July issue, your VUD delivery will change. It will no longer be by email attachment. Here is how you will get your VUD in the future...

1. Go to the WTFDA Website (<https://www.wtfda.org>)
2. Click on the Login (priv.) link
3. Enter the username. Your username is edison. Enter the password. Your password is veronica.
4. When you see the “index of/members” box, right click on the pdf file and select “save link as” to save it on your computer.
5. You are done. You can also read it there if your computer lets you.

<b>Index of /members</b>			
Name	Last modified	Size	Description
<a href="#">Parent Directory</a>			
<a href="#">06-2021VUD.pdf</a>	2021-06-10 10:57	2.2M	

**It's important to know that your credentials will NOT change from month to month.** You can use the same username/password over and over unless we find that the use of credentials is being abused, at which time we will let you know that we are changing passwords and supply you with a new password.

**Go to [wtfda.org](http://wtfda.org) each month around the first of the month to download your VUD.** We will not be sending out notices in the future. Just mark your calendar and don't forget.
