FEBRUARY 2022

RENEWALS

It has been a rather uneventful month here at PO Box 501. Renewals came in from Jennifer Lewis, Richard Faloney, Lee Freshwater, Chester Jaffee, Adam Rivers, Charles Gauthier, Aaron Mylers and Tim Noonan. Any checks I've received lately have been mailed to Keith McGinnis so as of today the only check I have here is from Charlie Gauthier.

OVER IN OREGON

Here's a note from John Jefferson in Oregon: In early November KSJJ went to its auxiliary (500 watts or so?). Then the aux went intermittent - on and off every second or two, so they must have run on the exciter only for a day or so. Through the end of the year they have had the aux on and off, filling in with exciter only (a couple watts, seemingly). Now they must be off completely. I hear nothing but the Centralia-area station, ranging from almost-usable (to a DX'er) to barely there. And KLRR 101.7 never has returned to full power, also seemingly on about a 500-watt auxiliary. The city of Bend had reached 100,000 population and seems to be surviving the pandemic reasonably well, but I fear the FM band is over-populated relative to the city. No complaints, personally. I logged 3 stations on 103.1 via MS in November & December, a channel normally marginal even in an intense skip event. I'm now working on getting something on 102.9 other than KZTM McKenna; I've heard enough references to "La Zeta" to last me a lifetime, about one per song. NO ID clear enough to make out. They seem to cover it up well with music."

FRED NORDQUIST NEEDS YOUR UPDATES

I Want an Update of Your FM and TV Stats NOW

WTFDA members are requested to email their TV/FM statistics updates to me by the end of March 2022.

Go to www.wtfda.org and click on the Statistics menu to see the latest TV/FM stats files and optional update forms. There should be lots of updates to report from the outstanding Es dx of last year.

Fred Nordquist, WTFDA Statistics editor Moncks Corner SC FM03af email address: nordquis@homesc.co

Get your stats in now to Fred Nordquist!

And that's it for the month of January. We will be back next month with more. -Mike

MERCHANDISE STORE

NOW OPEN

It's here! Now you can show off your club pride by ordering a WTFDA logo shirt from the brand new WTFDA Merchandise Store. We're proud to launch the store with a variety of 125 different shirt styles, notebooks for your logs, and unique wall clocks for your DX shack!

Even more products will be arriving soon, so make sure to check back often to see what's new. You will also be helping support the club as a portion of sales goes to the WTFDA.

The store can be found at <https://www.redbubble.com/people/wtfda/shop?artistUserName=wtfda>

Any questions, comments, or feedback can be directed to store@wtfda.org

Atlanta DTH Announces DGI-NexGen-Solo

•10 January, 2022

USA: Atlanta DTH, a globally active developer of cable, satellite, terrestrial and IP media related applications, announces a compact but versatile addition to its product family. Designed for connection to Android TV, Android set-top-boxes, and Windows and Linux operating systems, the ADTH **DGI-NexGen-Solo** is a USB 2.0 plug-in ultra-compact digital terrestrial television tuner which provides full access to all locally receivable free-to-air channels.

Based on the concept of ADTH's established DGI 1011 SD/HD USB plug-in DTV tuner, the DGI-NexGen-Solo is fully ATSC 1.0 and ATSC 3.0 compatible and has a form factor of only 93 x 27 x 12 mm. Power is sourced directly from the USB port. Antenna connection is via an integral screw-thread coax input. Included software enables the plug-in to turn a computer or Android device into a gateway to platforms such as iOS and Roku. It also offers compatibility with third-party streaming media services including Plex.

"The DGI-NexGen-Solo includes a wide range of features that make NextGen TV viewing easy and enjoyable, at home or while traveling," says **Atlanta DTH Project Manager Susan Zhang**. "It allows viewers to watch live TV, pause and store the program stream for up to 60 minutes or wind back for up to five minutes. Viewers also gain full access to the electronic program guide and program information synopses normally associated with large-screen domestic TVs, plus closed captioning features for people with restricted hearing. We are confident the DGI-NexGen-Solo will help accelerate the transition from HD to 4K UHD TV viewing across the United States over coming months and years."

First deployed in South Korea ahead of the 2019 Winter Olympics and now being introduced across the USA, ATSC 3.0 is being promoted across the USA as 'NextGen TV'. It encompasses a host of capabilities including 2160p 4K resolution, 120 frames per second frame rate, high dynamic range, wide color gamut, surround sound and datacasting.

For over 20 years, Atlanta DTH, Inc. has been a leading supplier of cable and satellite direct-to-home communications equipment and a developer of innovative telecommunication systems for IPTV, OTT, DTT and other media-related applications. ADTH solutions provide the tools for content broadcasters to expand their service offerings to existing and new customers by allowing them to expand and develop their markets. ADTH strives to meet the technological goals of its customers across the broadcast, telecommunications and IPTV sectors.

TV News – February 2022

w9wi@w9wi.com

Stations in **boldface** are full-power; all others are LPTV, translators, or Class A. In Canada & Mexico, stations of more than 3kw (VHF) or 15kw (UHF) are marked in **boldface**. Stations *in italics* are analog. There are no operating analog stations left in the USA or Mexico. USA analog listings are off the air, either temporarily pending conversion to digital or permanently deleted.

As always, thanks to Raymie Humbert for information from Mexico. (Other information, unless otherwise noted, comes from the FCC and Industry Canada.)

ATSC 3.0 SCORECARD

Visalia, California:

KMCF-LD: filed for ATSC 3.0 permission.

Colorado Springs:

K30JM 30: Possibly operating in ATSC 3.0, no 1.0 simulcast.

Twin Falls, Idaho:

KPIF-LD 23: Both stations reported converted to ATSC 3.0, no 1.0 simulcast.
KVUI-LD 26:

St. Cloud, Minnesota:

WCMN-LP 14: reported converting to ATSC 3.0, no 1.0 simulcast.

Memphis, Tennessee:

WPGF-LP 6: Possibly operating in ATSC 3.0, no 1.0 simulcast. This is the first LPTV to volunteer to accept the seven conditions for a "KBKF STA". All other LPTVs operating in this mode had the conditions imposed by the FCC.

In January, I stumbled across my local WJNK-LD 34 airing a screen indicating they would convert to ATSC 3.0 on or shortly after January 15th. A week later, they're still carrying that screen in ATSC 1.0. It alternates with a scrolling list of other LPTVs affiliated with an "IBN" network. IBN is a religious network. The screen doesn't state the other LPTVs are converting to 3.0. To my knowledge, none of them (not even WJNK) has filed the necessary FCC "paper"work.

Also somewhat perplexing, is that in many cases somewhere between two and six LPTVs are listed in the same city. In some cases more than one site is involved, but in most cases at least two are at the same site. (in Greenville, Mississippi, six LPTVs are listed, all at the same site) By my count there are 315 stations on the list.

TOTALS

The FCC has released their quarterly Broadcast Station Totals. At the end of 2021, there were 1,758 full-power TV stations in the USA, unchanged from the end of 2020. There were 382 Class A stations, a loss of six; 3,075 translators, a loss of 331; 1,928 LPTVs, a loss of 83. Most losses were stations operating above channel 36 that didn't find (or didn't look for) new lower channels, or analog stations that didn't convert to digital. Some of these analog stations had Digital Companion Channels, so in many cases no service was lost.

The number of full-power stations peaked at 1,785 in 2014. The incentive auction is responsible for most of the 27 disappearing stations. Low-power operations peaked at 7,536 in 2010 before declining rapidly.

WKLV 93.5 AL Butler, "K-Love" with PI decode

December 30 was an amazing Es opening! Most of this was done with a time consuming review. A few Mississippi stations in the 1520-1609 range were also logged. All of these were either double hop or a really long single hop. (be sure to check out WTFDA's Facebook page for an outstanding video capture of the stations logged – jz)

SIGN UP & Renewal Form

YEARLY DUES \$10.00 USD For Monthly VUD E-ZINE

Print this form and send it with your dues.

Name _____

Address _____ Apt # _____

City _____ State/Prov _____ Zip _____

Country _____ Interests: DTV () FM () 30-50 () Weather ()

Email Address _____

I enclose \$ _____ for _____ years membership.

Mail your dues to: WTFDA, P.O. Box 501, Somersville, CT USA 06072
Make your checks or money orders payable to WTFDA
Note: Memberships cannot be processed without a valid email address.
Thanks for your support of the WTFDA!

Downloading The V.U.D.

Go to <https://www.wtfda.org>

Click on the menu item Login (Priv.)

Enter the word edison for your username.
 Enter the word veronica for your password.
 Make sure both are completely in lower case.

When the "index of /Members" box appears, right click on the VUD filename and download it and save it to your computer.

*Your password will not change unless we tell you and we will give you all advance notice if we need to change it.

The screenshot shows the WTFDA website interface. On the left is a vertical navigation menu with the following items: MENU, HOME, FM Database, WTFDA Forums, Tech Library, Statistics, Links, Mewe-Group (priv.), Prop_Logger (priv.), and Login (Priv.). An arrow points to the 'Login (Priv.)' item, with the text 'CLICK HERE!' below it. Underneath the arrow, the login credentials are displayed: 'Username: edison' and 'Pwd: veronica'. The main content area features a banner for 'The Worldwide TV-FM DX Association' with a satellite dish image. Below the banner is the URL 'https://www.wtfda.org' and the heading 'What is the WTFDA?'. A smaller image of a sign for the association is shown, along with a paragraph of text explaining that DXing is a hobby and that the WTFDA provides support and guidance for its members.
