

IN SEARCH OF DOUBLE HOP ES...YES! THERE WAS SOME!

July 2025 #9

Welcome to the July newsletter. In June we had two new members. Welcome to Noah Bliese (Maple Grove, MN) and Flavio Archangelo (Sao Paulo, Brazil). Welcome to both of you!

JUNE SKIP? Would you say that June was a good month for Es? I wouldn't. I've seen much better seasons in my decades of FM Dxing. I'd just give it a big yawn. But there was some great double hop FM skip around for a few Dxers. Here are some examples.

Larry Horlick in Newfoundland caught the BBC 89.1 from Antigua and Barbuda (2161mi) on June 19th. On June 17th, he also heard KPFT 90.1 Houston TX (2542 mi) and KITA 90.5 in Louisiana (2400mi). On June 22nd he also caught SNRT Al Idaâ Al Amazighia, Morocco on 87.9. Not bad.

Then we have Greg Coniglio in Western NY who said "My TEF recorded XERED 88.1 Mexico City at 12:36PM at 2051 mile distance. There were a bunch of one hop signals in KY/TN/MS/AL at the same time, in the same direction".

And we have Dave Nieman in NW PA who posted "KAFF 92.9 Flagstaff, AZ 1829 miles my first logging from Arizona tuner is a Sangean HDT-1X fed by a Channel Master 4408 @ 22 FT AG" and he supplied this pic of his reception."

Randy Zerr posted on the Wlogger: "Many 2X receptions this morning (6/26). Going to take may hours to review. Was IL,IN,KY,VA,NC,WV,OH from about 1621 to 1643 UTC. Furthest so far found was 92.5 WYFL North Carolina 2141 miles. I made a video of some random SDR screen captures on the Facebook FM DX page." And next, "Mostly finished reviewing the 2X window from yesterday. 1623-1640 GMT. IL,IN,OH,WV,KY,VA and the furthest 92.5 WYFL North Carolina 2141 miles ..Also found a 5 second luckily fade up of 92.5 WESC South Carolina at 1602 GMT."

And last but not least, we have Mat in Palmdale, CA with his double hop "3rd 2X ES: WUOL 90.5 Louisville, KY @ 8:27 AM PST with absolutely beautiful full RDS (: (1799 miles) 2nd 2X ES: WFPL Louisville, KY @ 8:27 AM PST with RDS (1799 miles) 92.1 FM Log #37534 WBVX CARLISLE, KY FIRST 2X FM ES of 2025!!! RDS PI 5985 with PTY @ 8:27 AM PST!!"

And so, for some Dxers, June was very, very good. Most Dxers caught at least a little bit of Es. For a few, though, June was a good time to get any much needed dental work done without wondering if you were missing out on anything big.

The WLOGGER!

Wlogger v 2.0. The newest version of the WLogger will be available soon. There are some major changes to the wLogger.

- **The Map.** When you log a station (TV or FM), the WLogger will plot your reception on a map. Your name is noted at the start location. The station's calls are shown at the station's transmitter site. *Hover your mouse on the line between the two points to see the distance, bearing and power for FM logs, and distance and bearing for TV stations. This is a change from the original version.*
- To use Quick Find, click on [+], otherwise use manual logging.
- To show all loggings made during a specific time interval (one hour, six hours), use the drop down menu "Show logs on Map". Your current choices are 30 minutes, 2 hours, 6 hours, 24 hours and 7 days.
- Clicking on a user's name will show you all of that user's logs.
- Clicking "Show All" outputs all logs.
- There are buttons that when pressed will show you all FM logs or all TV logs or all TV and FM logs together (data logs and map plots).
- Paths on the map are color coded and correspond with the colors of the propagation mode in the data logs themselves. Tropo paths are blue, E skip paths are red, etc.

Your logs are now printable from a .csv file.

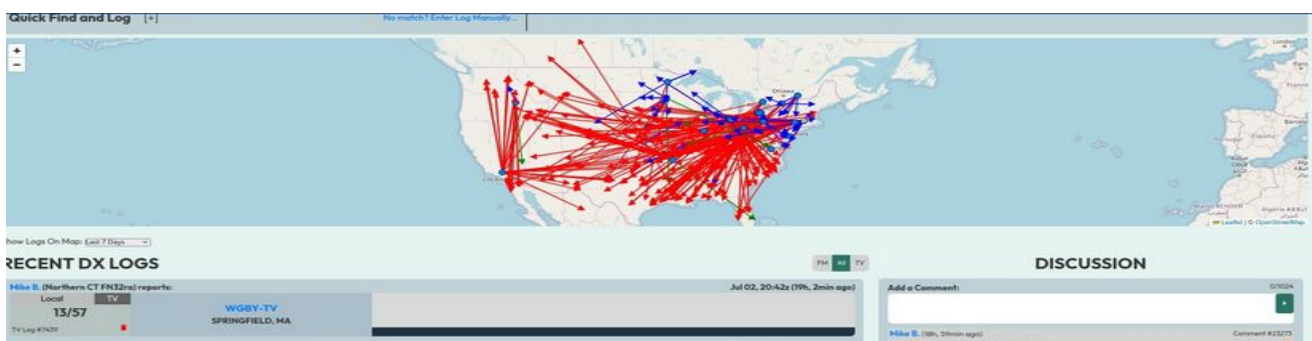

- See “Settings and Export” on the top right menu. You can choose to download a csv file of your loggings for the past 24 hours, the past week or the past month.

You can now edit your posts in the discussion pane of the page.

Unlike the map on FMList, the map page is not a public page. You need to be a WTFDA member and you need to be logged in to see and use it.

We hope that some of you who post on FMList might give our Wlogger a try. It's much easier to post your DX on a map using the Wlogger than it is using My FM on FMList. Writing your logs down on paper isn't necessary anymore. Just log them on Wlogger and see them on the map (OpenStreetMaps) or download them daily or weekly and save them on your own computer quickly and easily. And if you just want to talk, there's the discussion pane of the Wlogger where you can do just that.

We want to thank Nick Langan for creating the Wlogger concept and for a developer by the name of Jason Gauthier for working on the upgrades with us and adding new value to the Wlogger. There truly are good people out there.

WELY radio station moves to downtown Ely, operating under temporary frequency

[Kalli Hawkins](#) | June 9, 2025

WELY is officially back on the air.

As of Friday, the WELY radio station in Ely, Minn., is operating under a temporary 103.9 FM frequency.

“That is hopefully just a stopgap between where we are now and the work that still is yet to be done for 94.5,” said Kory Hartman, VP of Broadcast Operations for Civic Media.

Civic Media, a Wisconsin-based company, purchased WELY in January 2025 from Zoe Communications. Hartman said the acquisition did not include any studio equipment, but rather, the company “bought a dark license.”

Due to financial challenges throughout their ownership of the Ely radio station, Zoe Communications was unable to get WELY on the air due to various issues, including the transmitter.

Hartman said Civic Media is actively working on the tower, and after unsuccessfully attempting to repair the 1991 transmitter, the company had to purchase a brand new one.

“The biggest problem, though, is actually the antenna itself for 94.5 FM that has been damaged by previous work on the tower,” Hartman said.

In the coming months, work will continue to repair the antenna and tower issues. In the meantime, the listeners in the immediate area of Ely, Tower, and Babbitt can listen to WELY on 103.9. WELY’s AM 1450 frequency has been operational and back to full power for nearly a month.

WELY is also located in a new building in downtown Ely.

“We’ve got a great location in downtown where we wanted to be,” Hartman said. This past week, Civic Media has been installing studio equipment and getting the new space operational. With all the ongoing work, Hartman said he has received an outpouring of support from Ely residents and WELY supporters. “The outpouring of support already has been great.

Format Flips

and branding, too

John Zondlo – fmdxweb@cox.net

July 2025

BC

Alternative CKKS 107.5 Chilliwack BC is now airing Millennial Hits. Formerly known as “Sonic Radio,” the pop hits from the 90’s and 00’s branding is “Kiss Throwbacks.” And no, the old format has nothing to do with Sonic Radio heard at Sonic restaurants.

CT

Many stations have moved from over the air to webcasting in recent years. In Waterbury CT streamer “Wow Radio CT” is now on WATR 1320 and it’s translator W249DY. Wow operates from Toyota of Wallingford (CT). Yep, a streamer in a car dealership.

FL

Salem Media has made some changes in Miami. Its Spanish Conservative Talk format, “La Poderosa,” is now heard on WMYM 990 and it’s translator, W276DV 103.1, both Kendall FL. The Preaching “The Word” format is now on WWFE 670/W276DV Miami and WRHC 1550 Coral Gables/W254DV Miami.

GA

The Classic Hits format is out at WPGY 1580 and W229CE 93.7, both Ellijay GA, and W251CZ 98.1 Jasper GA. In its place is Sports as “The Sports Pig.” The positioning statement is “North Georgia’s Sports Voice.” The Sports Pig will carry NASCAR races, sure to be a winner in Georgia.

HI

Hard to believe, but Honolulu hasn’t had a Spanish CHR station til now. “Mega 104.7” K284AL Honolulu had been Filipino til the switch. It’s fed by KCCN HD2 100.3.

IL

Woodward Community Media is making sweeping changes in its Springfield IL cluster. WQLZ Petersburg IL is moving to its original frequency, 92.7, after using 97.7 since 2015 for its Rock format. News/Talk WMAY Springfield is swapping with WQLZ.

LA

Classic Country is out at KBKK 105.5 Ball LA. The former “105.5 K-Buck” has kept the call letters and switched to Classic Rock as “105.5 The Fox.” Stephens Media Group, based in Tulsa OK, recently sold their stations in the Alexandria LA market to Globecom Media.

ME

Up northeast, WBYA 105.5 Islesboro ME has sent the Country format known as “105.5 The Wolf” packing in favor of Soft AC as “105.5 The Wave.”

MT

K292GH 106.3 Hamilton MT is back on the air. The translator is fed by KDXT HD3 97.9 Lolo MT. The format is Classic Hits.

NV

Sometimes you have to be creative to cover a geographically large market. Las Vegas is one of those markets. Summit American has flipped Classic Hits KJUL Moapa Valley NV to a simulcast of co-owned Oldies KQLL 1280 Henderson NV/K272EE 102.3 Las Vegas. KJUL covers the northeast side of Vegas while the AM/translator combo hits the main population center of Golden Knights country.

NY

WSSV 1160 Mechanicville and its translator, W227DW Saratoga Springs NY are no longer known as “93.3 Lake FM.” The new branding is “93.3 Fun FM.” The Classic Hits format for the pair is still alive and well.

News/Talk is the new format for WKXZ 93.9 Norwich NY. It’s simulcasting WNBF 1290 and W221EJ 92.1, both in Binghamton.

NC

A country station in the educational band of FM, and it’s not Canadian? Yep, and WTFDA member Rick Shaftan has it in his backyard (figuratively speaking). WIID 88.1 Rodanthe NC has flipped from Hot AC as “Sunny 88.1” to Country as “88.1 OBX Country.” It features programming from Local Radio Networks.

ON

In Ontario, another two former Bell Media stations have made changes. Whiteoaks Communications is the new owner, and they’ve kept the Variety Hits format alive on CKLH 102.9 Hamilton. Big difference is the branding, with the “Bounce 102.9” moniker bounced for “Legend 102.9.” Down the road in St. Catherines, Adult Contemporary CHRE 105.7 has switched from “Move 105.7” to “Dream 105.7.”

OR

KNCU 92.7 Newport OR is trading Classic Country as “92.7 Hank FM” for Sports as “Fox Sports Newport.” With the west coast bent of Fox Sports Radio, maybe they’ll do better with the format than we do in OKC.

0750 KHQA 22-1 (7-1) MO, Hannibal (CBS)	85/137
0752 WGEM 19-1 (10-1) IL, Quincy (NBC, in KPTN-LD null, ex-RF 10)	110/177

It's a start for the summer after a very disappointing 2024. I finally logged WCIX on post-repack RF 11 (still virtual 49), while I logged WGEM on RF 19 (still virtual 10). I'm sure that WGEM moved from 10 due to being short spaced with WAOE 10 (virtual 59) Peoria, in addition to getting better coverage on 19. One thing that's changed, though...I have to null out a local LP DTV to pull it in. WCIX 11 is my 60th DTV station from the Land of Lincoln (I logged 62 analogs from the state next door). DTV total now at 228.

Now, here's a couple of video captures from that day:

KRCG 29 (13) Jefferson City, MO
100 miles (161 km) tropo
Seen June 9, 2025

KOMU 27 (8) Columbia, MO
105 miles (169 km) tropo
Seen June 9, 2025

I'd love to see more reports, especially from areas OTHER than the Saint Louis Metro Area or Florida. Don't be afraid, contribute your logs and pictures! I'd much rather see them in *Line of Sight* than on the Internet. That will wrap up another column...please report! 73 and good DX from the Florissant Valley Dial Twister.
