From The STAFF

IT'S A CLASSIC SUMMER FOR VHF AND UHF DX!...This month's issue features huge DX report columns that primarily reflect late May's E-skip events. Despite early June's Es disappearance, it did manage to make quite a respectable comeback by the end of that month. By early July, Es had made the transition to its "midsummer" mode, with a number of shorter and more stable openings--and FM DXers have not been cheated out of good skip DX this year. Several seasons in the 1980's were infamous for MUF's (that's maximum usable frequencies for you newcomers) that often seemed to "hover" below the 88 MHz bottom of the FM broadcast range for long periods while producing nothing more than lowband TV DX. This year, things have been very different. The average 1990 summer E-skip opening has definitely featured a much higher MUF than those of the past few seasons. Tropospheric DX, as we indicated last month, has also turned out to be much better this summer. If August's tropo activity continues at July's pace, the 1990 summer DX season may turn out to rate very highly among WTFDA's active DXers.

1991 CONVENTION VOLUNTEER HOST SOUGHT...Just as the 1990 WTFDA Convention is taking place in northern Virginia, it's time to remind you that a club member is needed to host next year's club convention. Only written bids can be accepted; they should be addressed to the WTFDA Board of Directors, PO Box 514, Buffalo NY 14205-0514. Deadline for bids is October 1; if multiple bids are received, members will vote to decide the site.

SPEAKING OF CONVENTIONS...From Steve Sprachman, WTFDA's representative to the Association of North American Radio Clubs: ANARCON '90 will be held September 14, 15, and 16 in Virginia Beach, VA at the Virginia Beach Pavilion Center. Sponsored by the Old Dominion DX Association and WNIS Newsradio 850, this is THE major event for "all-band" DXers. For more info, write ANARCON '90, PO Box 9645, Norfolk VA 23505-0645.

COLUMN NEWS...TELEVISION NEWS was not available at press time, and due to the size of this month's DX columns, a SATELLITE NEWS section intended for this issue will appear in September. It's worth waiting for--George Jensen takes you through his annual survey of "who's where on the birds." DX report columns have expanded to near-record length this month, and receive top priority during the busy season. Look for another large issue next month!

TABLE OF CONTENTS

QSL CORNER/LOGOS RUN: Stations are not replying like they used to....3
FCC FM NEWS: Should DXers fight the new translator rules?.....6
NORTHERN FM DX: A deluge of reports from the late May superskip....10
SOUTHERN FM DX: June's skip lull ends; CO DXer logs 800+ mi. tropo!..28
EASTERN TV DX: KCRA-3 CA logged in IN, plus excellent tropo logged..40
WESTERN TV DX: May 28 E-skip may turn out to be the best of '90....47
PHOTO NEWS: Pictures of the May 28 skip, as well as FL-to-MA tropo..53
TV TIME TUNNEL: How television got started in rural Saskatchewan....55

MD WOEL 89.9 Elkton and

MD W214AD 90.7 Easton, Maranatha Bible Institute, Box 344, Elkton, MD zip 21821. Letter after one follow-up report sent, got back my PPC from John P. Ceylin (I believe!) who says "Sorry for the delay - your QSL was lost and recently re-discovered" WOEL is 3kw & W214AD is ONE WAIT. (Holbrook)

Reporters this time are Robert S. Ross, VE3JFC, London, Ont.; Howard Fountain, Cumming, GA (a new reporter); Michael Reid of North York, Ont (now in Ponte Vedra, FL); Robert C. Walker, K8VQB, Wixom, MI (another new reporter); & Hank Holbrook of Dunkirk, MD. Last month qsl photocopy of W4XFM was for July 3, 1946 from Larry Flegle, N4THW of Woodstock, GA (another new reporter). To George Rogers of Chickamauga, GA I hope you got some tv E-skip by now, I got your letter, but had no time to reply. This column has been having problems. I don't get as many qsl items reported as I used to have. I get more FM qsls than tv qsl reported. This may reflect that FM stations are easier to dx & qsl than tv stations are. Also the tv id logos have been few or none. Even the TV Guide does not have many tv logos like they use to have, so the number of logos has slowed down. If you have any tv qsls, when you report the item, send in a copy of the letter or envelope were the logo is for use if you can. Anyway, so it may be this column will be every other month in the future. This is also the reason I have missed a few months in the past. I seem to have always the same reporters. I know that members who do report to stations for qsl's are having problems too. Some how stations are not replying like they use to. Robert Ross & Hank Holbrook both use the prepared qsl card method. It seems like stations now don't care that we received them like they did years ago when radio & tv was a new

thing. If you have any ideas for qsl'ing, please report to this column for comment. Also, big things are planned for this column. I am planning to get an new computer, an MS-DOS (IBM OS/2 compatible), and will be using an hand-scanner, and video frame grabber or digitizer and will be able to print out my video id's for use. What this will do is increase the amount of tv logos that I will use. If you have an tv dx video id tape (vhs) I could use your id's, and print out a picture for column use. More info on this will come in up coming VUDs. I just got to get enough \$\$\$ (money) to buy the computer, and get using it. Next month will all tv id logos, so 73's till then, and send it your tv & fm qsl & tv id logos.

WHY IS IT SHOWING ON SESAME STREET?

It's not. But it may be showing inside your television set. If your family is having problems receiving its favorite public television shows, broadcast in this area on UHF, then you need our PBS/UHF Guide. It tells what to do when your kids see snow on Sesame Street, or when watching Masterpiece Theater is like seeing double. In fact, the PBS/UHF Guide will show you everything about UHF, so that the best shows on television won't be snowed out at your house.

FCC FM NEWS

Readers' Reports and Selectivity Doings

Now that skip has settled down, I've had the chance to do more selectivity modifications—this time on two General Electric "Superadios." One was an old model 7-2880 with a 150-kHz filter put in, and the other a brand-new 7-2885 with a 180. Results were identical, with both radios pulling in WCTS *100.3 Minneapolis alongside local WSCN, which just moved its transmitter from Cloquet to Duluth and went to 100 kw (besides changing frequency from 100.9). I dislike WSCN's all-talk format, its monophonic signal and useless duplication with co-owned WSCD *92.9 all night long for the jazz and classical shows, but at least there's a new station to use for selectivity improvement checking. As new locals pop up near you, readers, here's a use for those stations which might otherwise impede DXing—let them help you test more selective systems for your tuners, receivers and radios. You should be able to tune in adjacents to locals, even locals within 10-20 kilometers of your DXing locations—anything less than that won't put you in league with others in the DXing fraternity.

More on filters from John Ebeling: "In the June VUD [it is mentioned that] Bill Nienajadly modified Greg Coniglio's Pioneer TX 9100 tuner and states how difficult it was. Both of mine were easy—the main board holding the AM/FM sections is right out in the open. Easy access from both top and bottom with covers removed. The service manual only lists one version—mine. There is no other configuration even mentioned!"

Tom Bryant, at WSM-FM-AM in Nashville, sent a pamphlet about the stations, including the fact that WSM-FM 95.5 started life as W47NV in 1941 "as America's first commercially-operated FM station." Tom writes: "In reading your column in the July issue I couldn't help but snicker a little when I noted the call letter assignment for the new FM in Sarles ND. KYWG, although about 100 km from Winnipeg, is obviously shooting for that market—why else would they use the airport designator YWG as part of their call? Besides, I hardly think Sarles ND (population 111) needs or could support a radio station! A while back you asked for comments regarding the length of your column. Personally, I don't mind the shorter version. There almost seemed to be an overkill of information. I realize that ardent FM DXers probably find everything you print useful, but for sake of space in VUD anyone who needs the extra input ought to subscribe to your FMedia! I used to do some FM DXing, but it's almost impossible here now as within 13 km of my home are eight 100 kw FM transmitters on high towers, four of them are only 5 km and one is within 3 km! . . . Imaging, overloading, adjacent channel problems are overwhelming! Keep up the good work and don't let the critics get your goat. Constructive criticism never hurt anyone; mud-slinging isn't worth acknowledging."

WN-YE *91.5 New York Board of Education station has finally embraced stereo, Karl Zuk very welcome informed. This station started in 1938, so it's about time they went stereo. I think only one other old school board station is still without it—KSLH *91.5 St. Louis.

He also notified on the calls change of 96.7 Stamford CT to WQQQ and format to oldies, and says "I forward many people to you who inquire about your products via Monitoring Times."

All the DX has created some inquiries about what stations heard may be. This is not a column for that, but John Ebeling and Matt Sittel had some questions which I cannot help on, except John heard on 102.7 a "Joy FM and mention of Aiken." This is the new WAJY New Ellenton SC. Moody translators in east Tennessee, 88.3 in Elizabethton and 103.1 in both Johnson City and Greenville, appear to have bitten the dust, as Matt is getting unobstructed DX on those two channels. I have a stereophony question of the data Matt sent in, Is WZJS 100.7 Banner Elk NC stereo or not? He heard it with a "Z-100" nonID, k. One question Matt had is a station on 99.1 starting with KY-- in the KS area.

An even more perplexing situation is Salisbury MD 98.9. Gus Mancuso claims it to be WBOC, which are the call letters of an ancient Salisbury station on 97.5, but the best information I have is that it is WSBY-FM. Listen, too, to see if it has stereo. Perhaps it is hoping to be allowed the use of WBOC in the future, but may be burying a legal ID at or near the top of the hour revealing its true identity as WSBY-FM. Gus reports WJJB (not "WJBB") 100.1 Romney WV using a "Jibb 100" nonID, but again I need to know for sure whether or not this station employs stereophony. "Re: WCKA 97.1 (6/90 VUD) problem NOT multi-path. Signal lousy from nearby mountain [with] multipath eliminated it still sounded scratchy. I think it's transmitter problems; have heard the same thing on AMs also. Want to congratulate newlyweds Michele and Tim McVey. Filter results: Pioneer home set uses only one filter, now a 130. Selectivity is lopsided, good on low side of local (est. 20 dB) but not much improvement on the right (maybe 10). Radio Shack DX 440: Installed a 110 and 150. Incredible improvement from maybe 5 Db to 30. 'Lopsidedness' fairly slight. Has reached that threshold where 50 kHz off-tuning cannot be used due to narrow bandwidth of weaker station. Perhaps someone could determine the approximate DX value at which this occurs. Note: This set not recommended for metro areas due to extreme imaging. . . Please appeal to listeners to send in nonIDs before next FM Atlas!" Gus sent an article on WMZQ-FM 98.7 buying KOFY-FM 98.9 and KLRS 99.1, San Francisco-Santa Cruz CA. There had been interference between the two, but now the stations will be co-owned and co-programmed, except for commercials. Deal is subject to FCC OK. "Can't agree at all about DXing in stereo. Suppose station is stereo, but not strong enough to get stereo. What if they turn off stereo during talk/news?" I'd stay to still DX in stereo, and if a station is too weak to tell, just mention that it was too weak. Try to use a receiver without a combined stereo-mute function, so you will hear weak stations in mono without the muting eliminating the weak stations. It's an honest practice of stations to turn off their stereo, but few do. Try to note stereo on stations when they broadcast music. A few talk formatted stations use a stereo generator, but are not stereo. I called KNTL 104.9 Bethany OK, and they agreed that stereo does

Bruce F. Elving, Ph.D.
Box 336
Esco MN 55733-0336

FCC-FM

them no good, and they may discontinue it.

Tim Hendel sent something for our Toronto area DXers to sleuth out. He's been visiting in Rochester and heard strange signals on 99.1—sometimes carrying CBC AM, CBC FM and CFTR AM. He thinks this may be what's left of the former CKO 99.1, either flexing its muscles or protecting its SCMO contract. Check it out, anyone, and report in. He has my tape catalog, and is "really glad to have it. I am particularly intrigued by some of the used radios." I have a new print catalog for those who send a postcard requesting same.

Here I thought I take extensive notes when on a trip—notes on FM formats, translators, SCAs, etc. John Jefferson easily outdoes me, as he sent a six-page computer print-out of what he heard (or didn't hear) on a trip throughout the Southwest. After a really good May, he's heard only one station via skip in June, and I won't reveal that because this isn't a DX reporting column! One thing from his notes. K244DD 96.7 in Orderville UT "was broadcasting 95% white noise, with barely readable KMXU" Manti on it.

My trip was to Dallas TX, and the results of what I heard will be in next month's VUD and this month's FMedia! newsletter. We went via Lincoln NE and Springfield MO, and noted stereo and SCA on many stations not previously known to have those features. We enjoyed meeting Paul Hake, a Dallas-area DXer, and I talked on the phone to Jim Cumbie, a DXer from the early '60s, who says all the locals have made it hard for him to keep up with the hobby. We were selling SCA-modified radios at the convention of the National Federation of the Blind, held at the airport Hyatt Regency.

John Dresser from CA writes that Jim Korn heard an apparently illegal translator for WQXR-FM 96.3 New York on 107.1 in the area of Safford/Clifton AZ. KARM *89.7 Visalia is on the air, in glorious stereo, while I need to know if either of the following have stereo: WJFX 107.9 New Haven IN and KRAJ 103.9 Johannesburg CA, both of which came on the air recently.

Now to some tidbits from Bill Nienajadly, who has found 1990 a banner year for DXing. He thinks DXers should oppose the new translator rules, such as permitting them to go to 1000 watts, and not be compensated unless they carry local stations which radios can get anyway. "Why are the rest having an 'I don't care attitude?' Apathy is the biggest sin in our club! It's a shame, really!" On a pleasanter subject, Bill mentions WQQQ 96.7 Stamford CT as having the calls once used in Easton PA 99.9. "I guess Stamford needed an oldies station because maybe CBS FM 101.1 gets interference from WKCI 101.3 CT. And Hartford's oldies station, WDRG-FM 102.9, is too far from Stamford to serve them well. Maybe jazz listeners will turn to WBGO *88.3 Newark NJ instead, but still it might be too far for good reception. . . Where can we get a list of stations that carry baseball game's [sic—it should be written "games" without the "s"] on FM for various teams? It would help us out in pinning down E-skip stations! FMedia! early! Thanks, Bruce!" [If the "Sporting News" is still being published, check that. Each spring they used to have a listing of stations carrying baseball games.]

Bill sent an item about the Supreme Court approving FCC practice of giving preference to minorities in the case of station distress sales, and by implication, allowing females a preference for new FM stations. Another item was about Howard Stern, heard on WXRK

WJFX, WSBY-FM, KRAJ With Stereo?

August, 1990

92.3 NY and a couple of other stations, and how even Stern is upset with imitators who try to copy his style, but with more oral fluff than he employs. Ah, for the likes of Don Wildmon to come snarling and getting the smut-mongers on FM to tame their acts! WDHA 105.5 Dover and WMTR AM Morristown NJ to be sold for \$12 million; WDHA's format expected to stay the same. Bill has talked to Jerry in MI about filters, who's awaiting word from a local distributor. "On page 6 June VUD you mentioned about WZEZ going lame. Heh, I seen [sic] my name mentioned. It's really a shame all the 'b' stations are taking a poor format like soft AC. Personally, I think it's better to listen to 'b' with its nice instrumentals than to hear Mrs. Robinson for the one millionth time! I can't understand why people like the same 200 songs! WROR 98.5 Boston—great variety for AC!"

A CA mystery was sent by Pete Taylor of San Francisco. He traveled north and missed hearing KIQS-FM 105.5 Willows. Not known if they're off the air, or if they had signed off earlier than his drive through. He says the new calls for Davis CA 105.5 are KLZQ, which is probably the way he heard them. I show them as KLCQ. Mike Hardester, with an FPO address, says "although I'm not [yet] into DXing the FM band, the enclosed article appeared in a recent issue of a newspaper which was received by one of the other men I'm stationed with here on Okinawa." The article is about the new KZAZ *91.7 Bellingham WA. Looks like it will be a traditional public FM station, to be funded by begathons, but with the added attraction of translators they plan to build on Mount Constitution; also in Anacortes and Port Angeles. You should be able to DX KZAZ starting some time this month between 6 a.m. and midnight.

Larry Fuss has been busy lately, but managed to squeeze in a comment that "whoever reported WPFM in Panama City as changing to 'The Great 108' from '108 FM, The Country K' did not know what they were talking about. WPFM is not, nor has it been, country." Stations off the air: WMYQ-AM-FM (106.3) Newton MS, WJDQ 1240 Marion MS and WDAL 98.5 Linden AL.

Pennsylvania
Dan Cashion from/sent some filter questions, hoping to be able to get more DX, since he's only about 20 km from the Roxboro antenna farm of Philadelphia's major FM stations. "I read about a socket mod that will allow the replacement of the filters if I'm not satisfied. Is this possible? I read about a 'molex' (IC socket) in July's VUD." The socket mod is possible, but I have found the sockets do not hold the filters in too tightly. Bill N. found the same to be true, saying sockets should not be used in car or portable radios—only in home receivers. Vibration could knock them loose. Dan sent a copy of the Feb., 1981, Consumer Reports article on FM roof antennas. The article praises rotatable yagi FM antennae, but not outside "S" types or "turnstiles" sold in stores like Radio Shack. I DXed with a turnstile in the early 1950s and liked it, but now with multiple local stations on the air, directivity away from the locals in favor of other areas for DXing is the best way to have it.

DXer Albert Ellis writes in with his new address, made necessary because of hospital expansion taking his old place. It's now 147 Dundas Street, Brantford ON N3R 1S6 CANADA. Al is now a 60-year member of the amateur fraternity, and still very interested in DXing. I wonder if his massive FM tower has been reassembled at his new QTH? "Typewriter broke down. Letter later" he promises. In other Canada news, the CBC in Thunder

Bay sent a listing of its English-language affiliates in Ontario, sans call letters. Some frequencies are a mystery, and I suspect they are listed for nearby cities having stations. Thus: Hornepayne 89.7, Longlac 69.1, Marathon 89.7, Nakina 89.1, White River 89.7, Espanola 97.5, Fraserdale 91.9, Mindemoya 97.5, Spanish 97.5. For example, 97.5 could be CBCE #97.5 Little Current, serving all those other towns listed on that channel.

Idaho's Frank Aden sent a piece about U. of ID emissions worrying a professor, who lives in Moscow ID. One Robert Hauser received a permit for a tower to be built on a ridge of land where Jim Macdonald lives. County officials have put a hold on construction of the tower to assess any health threat from non-ionizing radiation. I haven't found which station Hauser has the CP for, or even if it's FM.

Nick Lombardi says there was an interesting five-page article on Edwin H. Armstrong in the July "Popular Communications." He kindly sent an article on a Dick Tracy-type wristwatch pager using FM/SCA at 57 kHz to generate a printed message, like "Call Office." It's being marketed by AT&E in the San Francisco area and, via satellite, will be available in other markets.

Chris Dunne in FL has a Superadio modified with a 150 and has gotten skip from the Ocala area. Wendell Ford says WEFM 95.9 IN and WLKM-FM Three Rivers MI will apply for 6 kw, agreeing that each station will accept some interference. Bill Burrows sent a tape saying that he's noticed no loss of sound quality on a Yamaha TX-900U with 150 and 110 filters. On an ICF 2010 with two 180s he noticed some sound quality loss. He says to use common sense in tuners with wide and narrow modes. "Start at end and work back—insert only one or two of four filters for best selectivity." WSJL 102.3 NJ now 6 kw, but is it still mono, Bill? How do you know which end to start with when changing filters?

I'm starting work on a new FM Atlas, so if you soon send any nonIDs, stereo news, etc. it can do double duty. Publication date will probably be some time this fall. A new cover design is ready, printing will be fewer copies and price may be higher. It's too early to send advance orders.

Now here's some hard news, culled from last month's FMEDIA newsletter. Look also for the ex-

WJTY Does Have Stereo

clusive feature, "See Also," where you can check on how well I read other VUD columns.

New FM Station Grants

AR Camden #89.5 250 h, 46 m, Career center
AR Mesa 96.3 100000 h, v; 295 m, The Harlans
IL Bethalto (causing WTPC #95.5 Elmhurst IL to seek #105.3) 95.5 3000 h, v; 100 m
KY Hawesville (Cannelton IN) 105.7 3000 h, v; 100 m, Joe Aldridge (m, Beach Bcstg)
MS Long Beach (Gulfport) 94.5 3000 h, v; 100/NH Somersworth (Dover) 98.7 3000 h, v; 100 m
NJ Atlantic City 107.3 25000 h, v; 79 m
NY Avon 93.3 1700 h, v; 123 m, Karen S. Klehmer; this grant will most likely force WIRQ #93.3 Rochester to change frequencies
SC St. Matthews 93.3 3000 h, v; 100 m
VA Charlottesville 107.5 300 h, v; 299 m
VA Lynchburg 105.9 3000 h, v; 100 m
WA Cashmere 101.1 3000 h, v; 52 m
PD Matane 95.3 12700 h, v; m, soft rock
PD Trois Rivières a new grant to Telemedia with no frequency or other parameters announced, except it is to have 20.6 kw

AM Happenings Most Likely Caused by FM (Selected)

CABakersfield KBAD 1350 silent, had been rock
CA Salinas KOON 1460 was to have gone silent at the end of June
IN South Bend WNDU 1490 changes to oldies from country, "after tough competition from 102.3 WGTC New Carlisle IN"
MO Kansas City KJLA 1190 shuts down; had MOL (m) for the last nine years. "A good station—very sad." A fire destroyed its transmitter, but a new 5 kw transmitter would have cost close to the \$500,000 offer Chip Osborn, Jr., station owner, said he had; with the fire, the potential buyer was "washed downstream." Out of work: 14 employees, all but two fulltime.
NC Rocky Mount WCEC 810 silent, had been k (country) [been business news]
SC Summerville WAZS 980 silent, had/
TN Harrison WKCE 1230 silent
TN Lynchburg WTNX 1290 silent
TX Pampa KPDN 1340 silent
TX Stamford KVRP 1400 silent
TX Fort Erie CJFT hopes to move from 530 AM to 101.1 FM (8700 h, v). Another Niagara-area applicant is CHOW AM on 104.9 at Port Colborne (12000 h, v).
ON Leamington CHYR 710 and "CHIR"

(CHYR-7) 730 have dragged their feet in converting to a single frequency for daytime-nighttime operation. Consequently, the CRTC denied a bid by Blue Water Broadcasting to build on FM on 96.7 with 21000 h, v at Leamington. ON Stratford CJS 1240 wanted to convert from AM to FM (3 k, 104.1), but the CRTC disagreed, noting that CJS's audience rose from 8 to 12% since 1988 and that it continues profitable. The CRTC also frowned on the frequency request, saying that 98.3 or 107.5 would be more efficient at that power in Stratford.

AUGUST 1990

DEADLINE: The 1st

Log Cutoff for September column: June 1, 1990

As you will see this month's column is HUGE. Most of the deluge of reports was caused by the extremely active last week of May, which many (including your editor) feel was one of the best ever. Most of June experienced a dropoff of Es activity but above normal tropo has been heard. as was predicted on the "From the Staff" page. July sees skip returning, so let's hear from you!!....

WELCOME NEW REPORTERS!!

JIM RENFREW - 61 WILCOX ST. - ROCHESTER, NEW YORK 14607

Equipment: Pioneer Auto radio (digital, 2 steps), all times EDT, mileages approximate.

(It was nice to see this completely over WFRW!)

1812 unID 90.9 FL Florisa, PSC rate hike

All I have for FM is my car radio (because my house is right under the FM antenna hill). So I can only DX while driving around on the job. WJIS is the first E-skip in Rochester, proving that it can be done. The only problem is that I have to monitor WFRW to check for the rising MUF (since I have no TV in the car!), which is not the most exciting programming around. The education band is very congested in these parts: 88.1, 88.5, 89.1, 89.3, 89.7, 90.1, 90.5, 91.3 to 91.9 (WXXI), so the only open frequency in the car is 90.9 and even that gets washed out by WXXI at times. (Yep, Rochester is the worst city I've ever seen for educational band congestion. Coming home from Syracuse on May 27, I was going through Rochester and had skip to 104.3 to Miami, and yet nothing on the educational band!-gc) I think I spotted a typo in the May 1990 issue. Bill Nienajadly reports WCTX 92.1 Palmyra, NY. Should be PA. No big deal of course (You are right; was likely my mistake. I must have been thinking of Palmyra, NY! Thanks for pointing out the error, Jim!-gc). (Jim, welcome to the column, hope to see you report again. Thanks for the tip on the new LPTV's. I've seen 15 (weak), 38 (often, sometimes snowfree) but not channel 40 yet-gc)

COLUMN NEWS: Notice that stricter log cutoff rules are now in place. This will help keep the DX more current. Contributing AT LEAST once every two months spreads out the lengths of each column, making them more manageable. I appreciate your co-operation very much!

STATION NEWS: KKNQ 92.5 Oklahoma City has joined the countless number of easy listening stations that have dropped that format for soft adult contemporary. As a result KNTN 97.7 Edmond, Okla. has gone to Jazz, "The New Trend". Also, while DXing I noted that WJIM 97.5 in Lansing, Michigan has also dropped easy for a soft adult contemporary format.....

Comments: ES dies and trop revives, WOW what a season!
I am approaching 450 stations already. Though ES died
the tropes picked up and did what ever! That Boston Tr
opening was so strong that Boston was up to 70 db in
some cases! WJCN 105.9 was so strong that they were
100 db pinning the meter on the Pioneer 9800! In fact
from the 13th to the 18th we had a full week of tropes
I've omitted a lot from this report because some stuff
got so common! But stuff over NYC is very rare and
yet it happened at least 3 times! GOODXing!-Bill

Frequencies underlined means over 12 mile NYC locals!

COLUMN NOTES

DXTip: Thank you Bruce Hall for sending info on the Torontot Blue Jays Baseball network. The following is a list of their FM stations, **ONTARIO:** CFBG 100.9, CFMK 96.3, CKGL 96.7, CKAT 101.9, CHEQ 101.1, CIGM 92.7. Also running the Blue Jays are CKHJ 93.1 **NB** and CHLQ 93.1 **PEI**. Thanks Bruce! Also, I would like to explain my policy on reporting of unID stations. If there is a chance that it can be IDed, I will print it. Ex: unID 100.1 with ad for Baker Auto on Route 59. I will not run unIDs that cannot be solved, such as "96.3 top 40", "89.7 classical". There is no possible way these could be IDed positively anyway. Note that unusual formats such as foreign languages, easy listening, etc. are allowed. Thank you for your co-operation!! **STATION NEWS:** Lots of activity down in South Florida: 97.3 Miami is now WFLC "Coast", and a/c "lame". WJVE 93.9 is now mostly jazz/new age etc. Still Love 94. 98.3 Goulds is back to Spanish after a brief try at new age. Calls are WRTO. Thanks to a WTFDA member for this info.

2053 WJLI 95.1 IN Fort Wayne, "The New Majic 95.1
(Strict), Fort Wayne ads, o (Frank, yes Elving
is now using o for an exclusively oldies format-gc) 310

Total now 1,365 heard. Some real personal highlights because I heard most of the FMs I've been ardently chasing for 5 years! KALA, WJMC, K233AA, WVKs (my most wanted for the past 3 years as this and former WMHE - I used to live there), WJIM, WITL, WIOB, WJLB...wow! I think I'm happier with WCSR 92.1 than WVKs because 92.1 will soon be history here. 7 tea trees

Note #1: Three KBOZ xtrs on the same frequency-which one(s) did I hear?? An educated guess was made based on signal conditions at the time. Could have just as well been K269DT in Big Sky or K269CU in Red Lodge. Who really knows under conditions of an Es opening!

STATION NEWS: WTUZ 99.9 in Ulrichsville, Ohio is on with a satellite country format. WMKB 96.9 in Ridgebury, Pa. was heard on the air by your editor, in MONO, with a syndicated oldies program and IDing as "WEHH 1590 Elmira Heights, your oldies connection". WWTR 95.9 in Bethany Beach, Delaware is ON THE AIR, with a current based AOR/CHR format. However on the last day of my stay in Ocean City, they were knocked off the air by a thunderstorm and still did not surface the next day. 95.7 Olyphant, Pa is not on, nor is 92.9 SmyrnaDel, or 101.3 Milford, Del. WDLE 107.1 Fredericksburg, Md seemed to be silent. WLTY 95.7 VA is now Oldies 95.7

Equipment: Pioneer TX 9800 Tuner, Radio Shack 6 element antenna 10 db amp, U-110 rotor

Note: My May 29th ES Logging of "KHLI" turned out to be definatly KHLs Blythville Ark...on 96.3 OVER WQXR 12 mile's!

Would anyone disagree if I said 1990 is a banner year all around? I have never seen so much E-skip in a single season as this year! Wow Ohio finally made it to Clifton and did it ever! Some of the signals were so good that stations like WKXA were 20 db, WMJI 105.7 was in at 40 db's in full quieting. Probably the best catch on trop was WZIP 88.1 Akron with 3300 watts! Thanx to Joe Fela he called me at Five in the morning saying Ohio was coming in, I still can't get over that opening it probably won't happen again in 5 or 10 years again!

7/6 at 2030 I had Royals BB on 92.1...and BB (likely also Royals BB) was also noted on 95.3, 100.9, 100.1, 97.7. Does anyone have a list of Royals BB on FM?

7/7 The opening was still in progress when I was typing this up so maybe in my next report I'll finish reporting the opening. WEDU-3 had no fading for over a hour!

P.S. Big opening 107.9 MUF on 7/8 35 stations logged! Plus great trop
 to Rochester, Olean, Binghamton+more!!! Details next month!

GOODXING! -Bill

A couple of things to note: There was some very heavy tropo from 6/15 to 6/18. WYFI and WFOG were in for a couple of days straight. The NYC area stations were in like locals up here on the car radio! Never have I heard WRIN-93.5 on my car radio before, until now. (In Ocean City, Md. I noted INCREDIBLE tropo north June 26-28. It was so strong it blocked out that super opening (Es) on the 26th! To think that there might have been a stronger opening 10 day before? Amazing!-gc). The Es of the 26th was a wild opening stretching from the Bahamas to Texas, beginning around 1730 and still trying to stay alive at 2315. This opening was really welcome, especially since there was an Es dry spell from the 3rd to the 26th. My total logged now is 1512.

Many thanks since my first report for letters, printed matter, phone calls, to and from and words of encouragement from the following: Jeff Falconer, T.K. McVey, Richard Shaftan, William Hepburn, NRC Publications, Rich Wertman, and Greg Coniglio. Due to mounting expense of long distance phone calls to stations I have sent out a few QSL's. Waiting patiently to see what kind and how quick a response will be. How can I find out about M Street (Radio Trade Publication)? Interested in obtaining copy(s). Modified JVC has become the main machine. This was found full of dust in the bottom of a closet across town after a two month search for a hotter tuner section. I can see why Richard Shaftan has stuck with his after all these years. Can't centre tune after modification, need help? See you at Manassas, Va. 73, dB

STATION NEWS: KRZZ in Derby, Kansas is now on 96.3. They are classic rock and have been heard by me and Matt Sittel. KZOC in Osage City, Kan. "KZ-93" is now on 92.9, ex 92.7. KKYS "Kiss FM" in Bryan, Texas has moved from 104.9 to 104.7. Also note 95.3 in Fort Myers, Florida is now WOLZ, Oldies 95. This has been heard by MANY reporters this season. While in Ocean City, I noted a 92.3 called WNHV, with "k" and "Carolina 92" ID. Outer Banks?

Now that my Linsday antenna for VHF-tv is up, I can monitor E on both TV and FM at the same time! Once I got the hang of it, I was on a roll! Scads of unIDs, I could have ID'ed more, but saved my top-of-the-hour ID time to record TV IDs instead. I suspect this opening went right through from the morning of the 28th to somewhere into the afternoon of the 29th but won't know until I've compared notes with Dave Sinclair, Dan VE7QM and Dave VE7DBE. I checked 2 meters a few times but heard nothing. I called Doug Allen in Colorado Springs while listening to KEPC 90.5 for 30 minutes (a regular Es station). Doug was hearing Northern Oregon and parts of Washington at S9+. His contest for verified Colorado Springs FM at 600 miles plus was actually intended for TROPO reception, but nonetheless we had a nice chat and Doug kindly has offered me a prize!!! Mike's comments will continue on the next page.....

MIKE CHERRY's comments continue.

....Incidentally, if any WTFDA members phone me, I have NO answering machine and you can call 24 hours. Enjoyed DXing Es in my new Toyota 4 X 4. **Note #1:** While sitting on one of the mountain tops here on Salt Spring Island, I picked up this 103.1 whilst bandscanning. No TrS in at the time. It wasn't one of the numerous KSEA 100.7 translators. It had some kind of syndicated "lame" sounding rm 'love songs' program (yecch!) no local IDs or ads heard in about 30 min. of listening. PTA: Central Washington, translator of some sort. Who????...The last time I've observed Es lasting over 24 hours was back in 1979 and 1980. A nice treat after a "dry" spring for Es. I hope everyone is getting their fair share of E-skip. Until next month, **73's Mike**

BRUCE ELVING - 241 ANDERSON RD. - ESKO, MINNESOTA 55733-9413

The first skip I heard was driving to Minneapolis with south AL stations, such as WKSJ Mobile, being heard giving an ID on the 67 khz of 88.7, which I think was WRWA Dothan, at 11 am CDT, I did not hear the main channel identify, only the SCA, and WKSJ was absent from its normal spot on the dial. The main channel was parallel to 89.9 in Alabama (WTSU Troy-Montgomery), but 89.9 has a talking for the blind SCA, not WKSJ audio. I also had some skip in downtown Minneapolis on 89.5, right next to WCAL-FM 89.3 Northfield, on my selectivity improved (180 khz filters) car radio.....Skip from 6pm May 27 through 1:38am May 28 (when I went to bed) included: WLFJ 89.3 Greenville SC, KTLF 89.7 Colorado Springs, CO with \$, g. KLLI 106.3 Widefield CO, KCFR 90.1 and KSY 95.7 Denver, KRZA *88.7 Alamosa, CO, KANW 89.1 Albuquerque NM, KPCL 95.7 Farmington NM, WWNO *89.9 New Orleans, KTRZ 93.1 Riverton WY, KOPR 94.1 Butte MT, KPKY 94.9 Pocatello ID, KLCM 95.9 Lewiston MT, KLAN 93.5 Glasgow MT, in full stereo-the first indication I had that this station operates in stereo-an extremely valuable feature for DXers to note! Then, KLCE 97.3 Blackfoot ID, K272CP Ralston WY (identified by primary station programming and primary station ID, with K272CP being the only KCTR-FM Billings MT translator on 102.3), KZMQ 100.3 MT Greybull WY, KKEI 95.1 also confiremd stereo, Havre MT, CKUA1 *93.7 Calgary AB (mention of CKUA call letters and Calgary in weather forecast), CJAY (C-Jay 92) 92.1 Calgary and 44.5 watt CJSR 88.5 Edmonton, heard in stereo with an actual commercial (not underwriting). WVOB *91.3 AL Dothan mono, g, heard while KUWS *91.3 Superior was off the air. Reheard were these stations with new calls and/or frequencies: WZYP 104.3 Athens AL, WCGQ 107.3 Columbus GA (which I consider the same station as my 1951 reception of WGBA-FM 95.1; it is still owned by WGBA, Inc.). May 29 from 11:02am to 10pm: KMOC *89.5 Wichita Falls TX (again heard briefly Monday night June 25), KNPR *89.5 Las Vegas and KUNR *88.7 reno, KLTV 99.5 Bountiful UT, KZMG 93.1 New Plymouth ID now "Magic 93". Also, KLD 92.5 Klamath Falls OR, KOLU *90.1 Pasco WA, KFAE *89.1 Richland WA, KWVR-FM 92.1 Enterprise OR and thru KUWS superior, KGTS *91.3 College Place WA. KMKQ Socorro NM, still on 92.7, WTJT *90.1 Crestview, WUSM 89.5 Hattiesburg MS, WWOZ *90.7 New Orleans, KBJS *90.3 Jacksonville TX, KMDL 97.3 Kaplan LA, KUEZ 99.3 Luftkin TX, KHLA 99.5 Lake Charles LA. WMAW-FM *88.1 Meridian MS was heard at 7 p.m. June 3. On June 5, CBQQ *90.5 Fort Frances ON obliged with a partial ID mentioning CBQ Thunder Bay and including the weather for Ft. Frances during an outage at local KDNW *90.5 Duluth. The new KTWB 101.9 Sioux Falls was heard with country, stereo, June 12 all morning. KPKY 94.9 Pocatello was clearly heard with its calls thru local KQDS, while WWNO *89.9, KPCL and KSY 95.7 were heard while locals were off. KDAL 95.7 Duluth is off the air Monday mornings, and that's when I got two skip stations on 95.7. Translators do skip out, and K272CP was in with full stereo. I also heard but did not ID the mono translator on 88.7 in Pocatello of KCIR 90.7 Twin Falls, as well as a mysterious 95.3 of KMGR 107.5 Orem UT. I called KMGR and they knew of no translator picking up their signal. I'm wondering if I heard Mountain View WY K237BA with KMGR instead of KSFI 100.3. This was by far the best May for DXing, and I was able to give maximum time to it, whereas in previous years, I had to ignore the DX for other things. June seems more normal, and with travel taking up much of July, I don't expect much DX to be heard here then. 73ily, Bruce

E-skip started off on a good note then dried up. New FM distance record from Mississauga with Luling, TX at 1375 miles and possible Butte MT at 1605 miles. At 0034 I heard "It's 10:34 here in Butte". A new one? STL (Studio to transmitter Link) receptions are getting interesting. I use an indoor 4-bay for these. WKCC 99.9 Erie STL received. The actual WKCC itself almost impossible here due to CKFM local! Record so far is CJBQ Belleville at 124 miles. Bands logged are 450-451, 455-456, and 940-965 Mhz. Rcvr: PRO-2004. 73s, Bill (Bill, I bet you "Butte" logging was KILI-SD. That very same night I was thrown off by the same Butte mentions, but stuck around and finally heard the KILI calls. "Butte" must be something of local importance in SD-gc)

ES RETURNS IN LATE JUNE

THE EARLY BIRDS CATCH THE TROPIC

The general lull in the Es activity ended around June 25th. The additional upsurge was not as lively and long winded as the previous remarkable spell of late May-early June. For trop, the first half of June was a showcase for it with the catch being that it was a matter of the early bird catching the worm. Openings came about in the wee hours of the morning. Distances heard stayed under 500 miles with the notable exceptions made by the Pikes Peak Country DXer. His ever mounting luck with the trop now ranges out to 830 miles. He cites "DXer's bladder" as the secret to his success. Now on to another extensive look at the actual DXing.

(My 144 MHz contact an hour earlier was to
Kawanee, IL a similar distance.)

A great month for tr. I only wish there were more DXers in eastern OK, KS & NE so that
we could compare notes and alert each other when the band's open which was incredibly often
this June! All of the openings occurred when high pressure dominated the area. If it were
not for a "DXer's bladder", I would have missed most of the openings! When I get up in the
middle of the night for nature's call (anybody else have this problem?) I check the band. So
much for a good night's sleep. For Es I'm able to DX the Denver and Springs frequencies
from my Divide location better than from home where they're much stronger. I lost my
Denon tuner and some other gear in a lightning strike July 6. Antenna was unplugged and
unit was plugged into a good surge protector, but a ham "HF matchbox" sitting on Denon
brought the charge in. May miss the rest of the season from home where all tropo is heard.
Still have my modified Kenwood at the Divide location where I spend most days, and some of
the above Es was heard. 73.

AUGUST 1990

SOUTHERN FM DX

John Jefferson, 4104 Spyglass Ct., Antioch, CA 94509-6051

AUGUST 1990

Guess I'm overdue for a report. At the time of my April
trip, there was little to report so I procrastinated. Likewise
between the trip & 5/28; since then I've been swamped by work.
When three computers decide to go south in as many days, I begin
to wonder why I chose programming! More enjoyable, but also
time-consuming, has been landscaping my yard. The slope in back
remains untouched, but most of the level areas now look civil-
ized. And in a couple of years I may have an abundance of fresh
fruit if all goes well with the 7 fruit trees.

As usual, underlined means new; @ means new to Antioch.

The 5/29 opening wasn't much, but it's not bad for a command performance. I'm trying to get a coworker hooked on FM dx'ing & had him over that evening. Ch 2 was a mess, but nothing higher, so we went to dinner. Still nothing above 2, so I played my 5/28 WPNE ID & some 1987 2-hop highlights. Then noticed lettering under KRON-4 & checked the FM. No sooner predicted that the country heard on 94.7 was KEBC than they obliged with the calls! If anyone's interested, KTLS's xmitter is 10 miles north of Ada per a nicely readable signoff.

The 6/2 evening opening was also a nonesuch made memorable by circumstances. From 2018-2044 there was nothing but light rock on 94.7 (likely KLTD), but then the band opened up rather suddenly, with signals reaching 106.7 at 2056, only to die out by 2115. Ho'um, another washout. About then Jim Korn called from El Paso to tell me about his travels from here to there. As we talked, 94.7 came back to life & he verified that I had KLTD by checking his radio. KOFX was identified the same way. He also was verifying KSNN for me when they gave their calls. Considering all the places I might have had via skip that night, that was quite a coincidence!

Club 94-7 is a program name Saturday nights on KIXY. Be warned! It's not something new & exciting.

Today's opening was welcome, giving me my first new logging of the month, but it was rather strange. From 1936-2011 only 3 stations were heard - KEYE (assumed: it's the only rocker on 95.9 in that area & uses FM-96; the dj was one Holly Simson, so could ID it if I didn't have it already), KEBC, & KMML 98.7 (assumed: it's the only k station on 98.7 near that area). KEYE was considerably stronger & more persistent than the 2 class C's (though nothing wonderful).

Brings total to 228 since we started visiting here in 1986. Wanted to come later in June but house not air cond. As for the 3 skips wasn't sure wheather to list as tr or Es. All e quite short for skip, esp. Athens, AL at 422 miles. Nothing else somewhat closer in same direction coming in either as you would expect with trop, or at double distance to indicate short skip. Way too early in day for skip or long trop. All suggestions welcomed this time. Note: Scenic overlook spot has wall of rock on west side shielding off that direction (Side of mtn. blown away to build hwy) Example: Get WALJ MD there but WFRG WV from mtn. or valley! Used Pioneer set from valley and Radio shack port. DX-440 from other spots.

0637 WJY 102.7 SC New Ellenton	213	2105 WLOD 99.1 TN Loudon, wx	113

A very interesting month for FM DX overall! June 1-3 continued the string of consecutive days of FM E-skip started in May. May 27-June 3 made 8 days in a row, twice my previous best. Then after that very little FM E-skip was noted until the end of the month, and that skip was nowhere near as strong as that which opened the month of June. In between came the most plentiful tropes ever noted here in Kingsport, with record distances. Even a surprise MS logging on the 19th! I'd say that overall E-skip was well below normal, and tropes were well above normal, so both balanced out the month making it a good June.

I added an FM signal amplifier on June 12th to my DX set-up. My 6-element FM antenna is in the 75-ohm input, and a pair of rabbit ears is in the 300-ohm input. As a result with the rabbit ears I can null out stations that I couldn't before! A signal loss is noted when the 6-element is removed, so somehow both are working together to give me some great DX! I'm not sure why it works so well, but it does. Hope to see many of you at the convention! 73's, Matt.

Tropes report is very much abbreviated since I heard so many stations. The area was INCREDIBLE for trop. Ext: one night on 94.3 I could not even hear the local WIGO because of WWOC in Jersey. I even tried to null WWOC to hear the local but could not! On some nights areas such as Norfolk, Balto-Wash., Philadelphia, New Jersey, New York, Long Island, etc. would become absolutely local-like. Although I did not write it down, I heard WNNN 101.7 Canton, NJ right over local WRKE Ocean View, Del. as well. TV fared much better than FM tho (See Eastern). Even though there were few locals, the amount of semi-locals within 200 miles is very great, so it is difficult to hear farther on the FM, although certainly possible. And I have never heard trop block out skip before, it is visa versa back home. 73
Notes on July SFM: Douglas Allen, WVEN 99.3 PA is still those calls. Thunder 96.9 is Statesville, NC, calls are now WTDR. Cool 98.7 is WKDD Jacksonville, NC. Bus Mancuso, 98.9 Salisbury, Md. is "999" and was listed WSBY in the phone book. Jeff K, I'd bet the 92.9 classical is Kingston, Ont. seeing as you were getting Pac 93.

Danny Buntin, 1312 N. Skyline, Stillwater, OK 74075

AUGUST 1990 Cut-off June 1 1990 Deadline Sept 1st 1990

18 Reporters makes a very healthy column this month. More reports of the flurry of E-skip activity in late May. Highlights include a 2 HOP...(atmospheric ducting) via KCRA CA to INDIANA. Tropo was excellent,....John Combs logged WFOA-32-AL from the Outer Banks of NC on a DXpedition! DX-ers from NJ had snow free or near snow free stations from the Boston area on June 17th. June was almost absent from E-skip for some, but it DID return!

Debra Lee Oliver 7935 Dartmoor Drive Pensacola FL 32514

We just had a tremendous week of E-skip from May 26th to June 1st, but will give my tropos first:
May 1990

Comments: Is WFAA-54 another one of those LPTVs using Phony call letters or is it now a
full-fledged station? On the hour, WFAA was the only call seen. KBTX-3 TX had tp at nite with
NOAA Wx Radio College Station for audio. Nice for IDs! Channel America ID indicates a channel
20 in Youngstown OH. Rather unlikely with WFMJ-21 in town! WADL-38 ID @ 0200 ... "You're
watching TV-2 on 38." Confusing? Apparently they were relaying WJBK complete with Promos for
the 6 o'clock WJBK news!
73s til next time. Bill.

(Ed note: How did I screw up
that one! Hi! -BN)

John F. Combs (N4SFS), 1308 Willow Branch #24, Jacksonville FL 32205 (904) 389-2451
(New loggings from Jax underlined; distances shown on new or unusual loggings, and on
selected 300+ mi. relogs; on OUTER BANKS DX only, no loggings are underlined (since all
are "new" for me from that QTH) and only 350+ mi. DX shown due to large amount of DX seen)

JUNE 1990

(From JACKSONVILLE:) (1 Tr 0840-0935) Best signals ever on Atlanta/Athens V's 2,5,8,11;
dish was down in preparation for trip, but Atlanta 36,46,69, WCVB-41, WLTX-38 seen with NO
ANTENNA hooked to AC-4990! (Es 1315-1330+) Noted KGAN-2 IA, KUSD-2 SD, KDLO-3 SD, KMTV-3
NE before quitting to dismantle indoor equipment and pack (Es 1930-2000) WCVB-5 MA, WLNE-6
MA(RI), various UNIDs noted while mobile around Jax! (From DUNN NC:) (2 Es 2025-2100+)
KJRH-2 OK, KYTV-3 MO, other 2-4 UNIDs... 38 stns logged on bunny ears and 4-bay during
15-hour motel stop (From DUCK NC on the beautiful Outer Banks:) (4 Tr 0800) Dish not up
yet, but noted WVIT-30 CT (415) on indoor 4-bay! (5 Es 0859-1300) Outdoor antennas up in
time for nice Maritimes skip: CJCN-4 NF (1363), CJAP-3 NF (1352), CJCB-4 NS, CJCB1-6 NS;
tentatives CHSJ-4, CBIT-5, CBJR-2, CHAU1-3 (Tr 1630-2300) All evening long, we were teased
and tantalized by weak signals representing what I believe was an unusual
trans-Appalachian tropo opening to the West...direction, offsets, and (in some cases)
networks indicated tentatives like WHAS-11, WKPI-22, WKSQ-29, WKHA-35, WKMR-38, all
KY...West, Yingling, Sittel and others noted unusual propagation during same period; our
DX never got strong enough for positive IDs (Tr 2300-0230) WHOA-32 AL (652) surprised us
about 2325 in all by itself in color! Also tentatives WCOV-20, WMCF-45...later logged
WFXL-31 GA (570), WAGT-26 GA(SC) (392), and others (6 Tr 0710-0950) All Atlanta U's super
(511-514), WNGM-34 GA (463), WHNS-21 NC (394), WLTX-38 GA (578), WDCC-29 GA (496)(ex-ch.
15); also good in opposite direction: WVIT-30 CT, WTIC-61 CT (415), WBCT-43 CT (388),
WNAC-64 RI(MA) (462), WCVX-58 MA (480); tentatives included WTZA-62--do they have Donahue
at 0900?? (Es 1127-1230+) WWL-4 LA, KALB-5 LA, KARK-4 AR; tentatives KJAC-4, WLBT-3,
WBRZ-2 (Tr 1700-1800) Connecticut U's, WNAC-64, WCVX-58, and tent. 38,44,56 Boston
(1925-0030) W20AL Wilmington NC (183), WEBB-14 SC (379), WJWJ-16 SC (366), WJCL-22 GA
(425), WTGS-28 SC (395), WBSG-21 GA (497) (7 Tr 0625-0735) Jacksonville U's (524), WNEH-38

EQUIPMENT (Jacksonville): 5' UHF dish @ 35' AG, Winegard AC-4990 UHF preamp, Archer V-110
VHF antenna @ 32' AG, basic bargain coax, Archerator, Teknika TVC-22 component TV tuner,
Sears 9" B&W TV, Sears 5" B&W TV, Commodore color monitor, Mitsubishi and GoldStar VCRs.

EQUIPMENT (Outer Banks): on highest point in area (about 40-50' ASL with a great
view)...5' UHF dish @ 26' AG, Winegard AC-4990 preamp, small VHF/UHF log (used for VHF) @
23' AG, basic bargain coax, CDE rotor, Teknika TVC-22 tuner, Zenith 19" B&W TV, Sears 9"
B&W TV, Commodore color monitor, Brooksonic 2" multi-standard B&W TV (Used for mobile DX),
Mitsubishi VCR.

Did the Outer Banks live up to its reputation as a prime TV-DX spot? I'll say! Here are
the totals for the 6-day stay: 168 stations logged, 124 UHF, 18 xlters/LPTVs, 12 E-skip, 19
states, 2 provinces. The total of 168 handily beats my previous personal record for a
one-week DXpedition (149 stations logged near Port St. Joe FL in 1988). The all-night
opening to FL was outstanding! I have a beautiful color ID of W31AT on tape, but the
logging that takes the cake is W69AY. It was weak, but to see it at all was astounding: I
know from having visited the xmtr site that they beam almost 180 degrees away from my
heading to them at the Outer Banks! The E-skip wasn't bad, either; after all, I'll
probably never see Newfoundland from Jax! The probable Kentucky opening will haunt me the
rest of my life! We had situated the dish on the deck for coastal DX; to aim to the west,
we were pointing right through the building. Had we mounted it on the other end of the
deck, there might have been just enough improvement in signal strength to ID the stuff.
But it had taken 2 hours to get the antennas set-up and tied down; we weren't about to
mess with the set-up in the middle of an opening!

A belated ID from the super Gulf tropo in April: my UNID-29 s/off has been confirmed as
KYHP-29 LA (685), the station I had suspected. This ID came from a non-member in Lake
Charles, via a former member (Larry Van Horn) in New Orleans. The Jacksonville log needs
just 9 more stations to reach the 400 mark! 73, JOHN...

Notes: After the big late-May kickoff, June was really a disappointment. There were brief openings on the 14th, 15th and 25th; but nothing ID'd (one 6/15 reported to CCI). 6/1; KBSD video w/WPSD audio for a Es/Tr mix. 6/3; WMCT thru local WTVF. 6/28; KBSD simulcasting KTVH news with 12 logos on news set. Good copy(on tape) of KOAA thru local 5..2nd time this has happened: it's the only Es station I've ever logged thru WTVF. Maybe July will be better!

 Skip was excellent the last week of May as you saw in last month's report. But it was so good that I mainly concentrated on FM. TV skip has kept up allright in June but there has been next to no FM skip at all. The mid-month trop outbreak was very good, with Cleveland and Detroit up for days at a time, even lasting through the middle of the day! The reason I suspect I had Springfield on Channel 20 is that FM was in from there at the same time. Hope everyone is having a nice summer! 73, Greg

This years ES season and weather remind me of 1979. ES openings are short lived and happen either early or late at night. Also the weather so far this summer is warm and interspersed with weekly cool spells much like 11 years ago. Something to do with the sunspot cycle perhaps? (I doubt it but its a interesting concept-BN) I am still waiting for a bangaroo opening.

Bob Seybold 10567 Bennett Road Dunkirk NY
 It has been quite a spell since I last reported but I have not been asleep at the dials. I did observe some E-skip in December and January but did keep track of it and occasional tropes through off season. More recently I observed some E-skip in early May and a lot in the last half of May and early June. There was a stretch of about 12 days of E-skip in a row. Reached into FM on a few days. E-skip has been less frequent since June 15th. Most openings I observed were in 1800-2300 time period. Some seen include most low band Florida stations and WPBT-2 many times; WBRZ-2 several times; KBTX-3 often Oklahoma, Kansas low banders; New Orleans 4 & 6 and other Louisiana on channels 3 & 5; Alabama 2,4,5; Houston Dallas, Wichita Falls, Nebraska 2-6; North and South Dakota low banders; Denver 2 & 4 Sterling 3; Cheyenne 5 and some Canadians. Most openings peaked 1930-2130 EDT. Recently tropes has bought Indiana U's in strong; Chicago on couple occasions; Columbus, Dayton, Cincinnati, Louisville, Lexington on occasion and of course Michigan U's. East opened a couple times to central & southern N.Y. and eastern PA. No hills DX yet. No time to venture there. Thats it for now. Hope to have more detailed next time. Bob

That dude from Joisey PO Box 2999 Clifton NJ 07015-2999
 A superb Boston opening on June 17th had me stuck on FM, I took down my 4 bay because it was messing up the directional FM pattern so I missed out on those snow free Boston U's everyone else talked about! June 26th at 1800+ WEAR-3-FL and later KYTV-3-MO via ES. Oh ya I forgot to mention that 6/17 Tr opening I did get Providence 6,10 & ch 12 was local-s/f. E-skip seems to have come back again. On the average the season has been great all around. Equipment used: Radio Shack 6 element ant. 10 db amp. Alliance U-110 rotor, Sharp color TV and Scott VCR. Alternate TV used SONY MegaWatchman Portable TV.

Another fouled attempt at evening up my columns!!!

There was not enough E-skip in June! The first 3 days were good, but then it all went downhill, and has not been really intense since then. Hopefully July will pick up and make up for the lack of quality E-skip in June. Hope to see many of you at the WTFDA convention!! 73's Matt.

Station news; WYBE CH 35 is on the air, known as Philadelphia's Public TV. I understand they only broadcast 4 hrs a day or so. See Rich Shaftans report.

Jeff Wolf; Your May 28th ES @ 0055 UNID-3-NWS could likely be KBTX-3-TX. Please see William Hepburn's comments, perhaps this is your UNID.

Late breaking News; DX related....Your editor was spellbound by super tropes to OHIO on July 4th, Heavily DXing FM and not checking TV as I should have! I understand from other DX-er's that OHIO is rare here...and it is! Im looking forward to receiving reports on this super trop. That cci we were seeing here on ch 3 was likely Clearfield PA. Hmm next time!

Regarding my deadline: The 1st...Even though it says the first, I'll accept reports after the deadline if I can fill another page or two or three! And/Or If you submit reports ready to run, actually I like to wait longer but I wanna be sure ETVDX gets to the publisher in time. Again, please report promptly and thanx to those who do!!!! Goodxing! Bill

Deadline: 09-06-90

Cut-off: 06-01-90

This month we have four more reports of the May 28th E skip event. That event will probably turn out to have been the best of the 1990 season. E skip in June was not exceptional, although there were a few good dates.

Long haul tropo was reported by some. A good date here in Fargo was July 2nd when UHF opened up to Arkansas, a first for me.

Equipment:

Sears tabletop color stereo set, big (model unknown) Winegard VHF only, and Radio Shack "panel" UHF, antennas up about 25 feet.

Well, the Memorial Day weekend seems to have had a little something for everyone... Aurora on Saturday (noticed on the 50 MHz ham band only), E skip *and* tropo on Sunday, and more tropo on Monday... (and it's still too early for E skip today!). Some of these may be a little close, but for my antenna installation, they're DX.

More E skip in small chunks in June, plus a big tropo the morning of June 19th. Unfortunately, I had to leave for work and couldn't spend enough time with the unids to get any real information.

Kinda wonder about WNIT's distance. The description of the tower site in my Factbook seems real close to WNDU and WSBT, but the geographic coordinates put it 16 miles closer. I suspect an error in the coordinates in my Factbook.

The E skip must have lasted all week long. WISC-TV received E skip interference complaints all week, and a WMTV engineer reported seeing WBRZ, channel 2, on the afternoon of May 31st despite his location less than a mile from WISC's channel 3 transmitter. A WISC engineer on the same block with the WMTV engineer reported KDTN, channel 2, on the same night.

CFAC-TV is my most distant TV reception ever. It beats WPBT by two miles. The June 19th tropo was the best I've seen in years. One local said he almost identified a DX station on channel 15-. He lives 2 miles from WMTV, channel 15, which was on the air at the time! Chicago stations were local-quality this morning.

Note- 06/22 @ 0859 - Finally, this elusive signal came in with clear enough audio in NBFM mode to identify as a KIRO translator. K54AO was also a surprise. Audio only on both with very faint diagonal bars on screen.

The E skip season has been feast or famine. Dan, VE7QM, verified that the May 28th opening stayed in the whole 27 plus hours with 10 meters open almost the whole time. Lots of activity on the the 30-50 MHz public service band also. Hope everyone got in on this very widespread opening. Until next month...73's, Mike

Ed Frye, 22618 Cardiff Drive, Santa Clarita CA 91350-3017

Following the Memorial Day opening, June started with some interesting late-night skip on the 2nd and 3rd, both of which were hot and dry days. Tropical storm "Boris"

Ed Frye (continued) off the Baja coast sent a blanket of high thin clouds and sporadic rainfall over southern California on June 10th. The sky looked like a sure bet for E skip, given past performances here. However, only less than an hour of CCI on channel 2 resulted. I received a very friendly QSL from KACB, San Angelo, Texas, regarding my May 28th logging. I was told the station welcomes input from the WTFDA! Some of the hottest weather imaginable hit southern California during the final week of June. A widespread high-pressure cell located over the southwestern US pumped extreme desert heat into metropolitan Los Angeles, elevating temperatures in the city to an all-time record 112 degrees on June 26th. Yet, despite these extraordinary weather conditions, not a trace of low-band skip developed, even on vulnerable channel 2.

(Ed, my prediction is that your attempts to correlate E skip and terrestrial weather will remain unsuccessful; particularly if your observations are made at the end of the skip path. Of course, tropo is another story. Just my opinion! fm)

Dismal. Pathetic. The longest Es-streak for me (ten days) was followed by the longest Es drought I've ever seen in the month of June (sixteen days). Hopefully, July will be better.

I could sure use some more tropo like that of July 2. KPOM-24 was only in for twenty minutes or so, but going against tradition, the best signal coincided with the ID. I continue to be frustrated in my attempts to log KTAJ-16. The early morning of the 3rd the presumed signal was overriding KDSD-16 with a religious talk by a woman. At the close of her program, the signal was fading. The program definitely had a St. Joseph mailing address, but no station ID was caught.

SHAMROCK COUNTRY

WHERE? No, this Shamrock Country isn't Ireland...but there may be a few Irish settlers in the vicinity. We're reporting this time on the history of Shamrock Television's operations headquartered in Yorkton, Saskatchewan. Information on this organization was elusive. As is the case with many Canadian listings in U.S. publications, information was either dated, erroneous, or non-existent. Personal friends still engaged in broadcasting in Canada weren't able to offer much help. Finally, I called CKOS-tv, asked for engineering, and talked with Director of Engineering Richard Niebergall. My conversation with him unraveled a lot of mysteries and tied up a lot of loose ends.

IN THE BEGINNING: June 19, 1958 marked the beginning of television service to East Central Saskatchewan with the sign-on of CKOS-tv (3) in Yorkton. In 1960 the company [then Yorkton Television, Ltd.] expanded it's coverage with the addition of satellite transmitter CKOS-tv-8 (8) on Baldy Mountain, Manitoba. At 2730 feet the highest point in Manitoba gave the Yorkton broadcaster an excellent shot at most of West Central Manitoba as well as territory in it's home province not adequately covered by the channel 3 transmitter.

A GROWING FAMILY: The next expansion came in 1961 when CFSS-tv (7) Carlyle Lake was added as a CKOS-tv satellite to serve the Weyburn/Estevan region. In 1962 CHSS-tv (6) began rebroadcasting CKOS-tv programming from a transmitter at Wynyard. Over the next three years, satellite and/or semi-satellites CKOS-tv-1 (13), Norquay and CKOS-tv-2 (9) in Hudson Bay were added.

GOODBYE 'BALDY': In 1974 CKOS-tv sold the Baldy Mountain transmitter to the CBC. The station was already a CBC affiliate, but after the sale it was programmed as a direct repeater of CBWT in Winnipeg and operates with the call CBWST.

THE PLOT THICKENS: So far this has been pretty ordinary stuff; but necessary to set the stage for what's about to come. Before the rest of the story can be told, it's necessary to explain to U.S. readers a facet of Canadian broadcast law quite different from our FCC requirements. U. S. regulations forbid ownership of two tv stations in the same market by the same individual or group. Quite the opposite is the case in many small Canadian markets where a single broadcaster may own two tv stations; and, if desired, also AM and/or FM stations...all in the same city. The reasoning behind this is that many Canadian markets are so small that while one TV station owner could probably eke out a living; the introduction of a competitor might possibly kill off BOTH contenders. That's why in many cities in rural Canada, two stations share the same staff, studio, technical facilities, and even on-air talent.

WELCOME CICC-tv: As CKOS-tv matured and proved financially successful a decision was made in 1974 to add another service. That led to the debut of CTV affiliate CICC-tv (10) in Yorkton; and later satellites CICC-tv-1 (12) in Wynyard; CICC-tv-2 (7) in Norquay; CICC-tv-3 (11) in Hudson Bay; and CICC-tv-4 (32) in Humboldt, SK.; AND...one of the major players in this report...CIEW-tv-7 in Carlyle Lake, SK. In actuality CICC-tv-4 (32) is a satellite of the Wynyard transmitter; and Wynard [12] is soon to become a semi-satellite of CIEW-tv (7). Confused? Grab your Rand McNally's...we're just getting started!

NEXT MONTH: Where the heck is Warmley?
