### **Amateur TV Operator's Workbook!**

## NEW AMATEUR TV BOOK IS HOT SELLER! MANUAL MAY BE OF INTEREST ALSO TO HOBBY TV-DX'ERS

Mike Stone's (WB0QCD) new hefty size FAST SCAN TV manual entitled "AMATEUR TELEVI-SION OPERATOR'S WORKBOOK" which was released this year at the DAYTON, OHIO HAM-VENTION has all but SOLD OUT first edition copies (one box of 30 remain as of this printing). Nearly 1,000 first edition copies of the UNITED STATES ATV SOCIETY sponsored publication have been sold since April 1992. The thick book took nearly two-years to assemble. A.E.A. Coporation in Lynnwood, WA (one of the two sponsors of the book) purchased 500 initial copies to place into their 85 retail dealer stores nationwide. Direct over-the counter and mall order sales have also been very good with several selected dealers having aiready placed several reorders. WYMAN RESEARCH, INC. of Waldron, IN, UNIVERSAL RADIO in Paynoldsburg, OH and SPECTRUM INTERNATIONAL, INC of Concord, MA report steady sales of the new book through July. Assembler/Author and Publisher Mike Stone has published articles in past issues of Vnf/Uhf DIGEST about the subject.

A revised 2nd Edition production run of the book is planned for sometime in August/September with copies available this fall. This planned "updated" manual will have BROWN plastic and cardboard spiral covers instead of the blue bound versions made available on current first edition copies. It will still sell for \$14.95 per copy. New additions to the 170-page manual will include an over 250 operator listing of CATV employed HAM operators, information on Leo Zucker's (K2L2) patented, dual-polarity, 1050 line HDV FCC proposal, updates to Chapter Seven's EQUIPMENT SOURCE DIRECTORY and Chapter Twelve's ATV CLUB and ATV/R and RT pages, more great photos, e-x-p-a-n-d-ed commercial advertising and other additional information. Commercial Advertisers desiring to get ADS into this edition should contact Mike Stone at QCD PUBLICATIONS immediately (319) 452-3628.

The AMATEUR TV OPERATOR'S WORKBOOK presently contains 21 Chapters written by 11 expert authors active in the field covering everything from Early Commercial and Amateur TV History, an easy to understand, well written study of the NTSC Video Signal, a listing World Broadcast Systems, Video Waveform Monitoring theory, the difference in Computer Video Images, Gertling Started on ATV. Cameras, 3-kit Building Projects, Transmitters and Receivers, Preamps, Sound & TV Audio, ATV Repeaters and Remote Transmitters, Special Events on FSTV including Contests and Awards, Antennas, Coaxial Cable, Amplifiers, Futuristic Digital TV Techniques, AM versus FM TV Signals, CATV and Hams, Reporting TV Signals (new Weighted dB P-Chart and TV Test Pattern included) with a 16-page Chart/Reference/Glossary section of TV and Video Industry Terminology. There are at least 182 known operating Amateur TV signal REPEATERS and REMOTE TRANSMITTERS located around the country in many major cities (listing provided in the book) in which hobby TV DX ers might be able to pick up. Many are horizontally polarized systems. Several of these HAM-TV relay systems provide NASA Space Shuttle Video and Audio broadcasts. Regular evening viewing is quite interesting (and entertaining) to watch! Some systems employ L-IV-Le relayed WEATHER RADAR images from the NWS. Special event activities on Amateur TV include high-altitude balloon launches covering several states in viewable range which travel upward to 100,000 feet before BURST while transmitting continuous breath taking pictures on HAM-TV frequencies (usually 439-250 MHz) with attached cameras and computer generators. HF SWL NETS are conducted on 40 and 80 meters LSB for TV HOBBY-ISTS to tune in to and listen to tilight progress. There is also a large listing of known ATV CLUBS around the country (with address information). Many newer TV sets and VCR tuners have the capability of viewing Amateur TV signals that are sent in the 420-440 MHz, band area just below UHF-TV Channel 14 without modification. Some

20 - AFRTS MAC

21 - Cornerstone (WPCB -Ch. 40 Pittsburgh/Greensburg// (WKBS -Ch 47 Altoona/Johnstown, Pennsylvania

22 - SUR - Panamericana Television - Lima, Peru relay of many news and entertainment programs from Peru, Argentina, Brazil, Chile, Venezuela, Colombia, Ecuador, Dominican Republic)

23 - Empire Sports - New York 24 - Hero Teleport - Miami, Florida

On the KuBand side are the following 23 and 25 - 2 separate feeds of KET - The Kentucky, Educational Television Network

on other transponders - Florida News Network Tie-In Educational Network (2 transponders)

BRAZIL SAT - 70 and 65 West A number of services in Brazil use this satellite but where is not known to me since the footprint of this bird is nowhere near my location. Perhaps someone in extreme south Florida can see something from it. While using PAL color - they use a 525 line scan, I believe. DXers take note.

INTELSAT VB 513 53 West \*=service not beamed here 4 - Argentina Cable TV (PAL)\* 11V- Serte Paris, France in PAL, SECAM and NTSC 14V - Ch. 13 - Buenos Aires, Argentina MAC and PAL 14H - BBC and ITN and others to US from London uplink usually in PAL

16H - usually a NTSC feed from London and Europe NO VIDEO NOTED ON THE KU BAND

PANAMSAT 1 45 West generally hard to receive at this location, though some in deep south could probably get pretty clear reception of this bird on the C-Band side 1 - CNN MAC

2 - TV Nacional de Chile

5 - HBO Ole MAC

10 - ESPN MAC 15 - news feeds

21 - something in MAC

22 - primary feed of SUR - Panamericana Television Lima, Peru

24 - news and special events feeds

ON THE KuBAND side things are much clearer with a good

1 - European news feeds to US in PAL and NTSC

4 - Feeds in day - night Belgrade Television in NTSC 14 and 15 - NHK Tokyo, Japan feeds

a few other transponders may also be used for occasional

TDRS EAST 41 West

This is an active bird that I have never anything on NASA uses the Ku side for tracking and data relays and a US operator is discussing the C-Band for some type of transAtlantic services

INTELSAT V F4 (506) 34.5 West

While this is a new replacement satellite - it still seems to be in an inclined orbit 23 and 24 are used for news feeds - some of which have been noted lately with a fairly good signal considering past performance - this time from Rio at the Ecology Summit Nothing has been noted on the KuBand side.

INTELSAT VI F4 (601) 27.5 West

2 - TVE International = Madrid, Spain

3 - feeds

8 - Televen - Caracas, Venezuela \*

9 - VTV - Caracas, Venezuela\*

9 - Brightstar - London, England feed to North America

11 - NBC London feeds

14 - ABC London feeds

15 - WorldNet - USIA

16 - CBS - London feeds

18 - CNN - london feeds

22 - FBS/CIA feeds to US MAC

No KuBand noted here - it is beamed E to Europe

INTELSAT V1 F2 (605) 24.5 West

This satellite is carrying mostly data services though transponders 23 and 24 are beamed W with news feeds. No Ku has been noted

INTELSAT V F2 (502) 21.5 West

Was in inclined orbit., May now be replaced by the new Intelsat K which should carry much of the Olympic Games from Barcelona, Spain to North America

INTELSAT V F6 (515) 18.5 West Again another oldie which carries news feeds on transponders 23 and 24. Nothing noted on Ku-Band

STATSIONAR/GORIZONT 4 14 West

1 and 6 have not been noted recently due to tree obstructions

STATSIONAR/GORIZONT 11 11 West

2 transponders seemed active when I was able to receive them until early Spring. 1 had usual Central TV type programs in SECAM while the second transponder carried feeds to CNN of the coup attempt and other feeds in NTSC.

This completes the listings of the video services received here at this location in Baltimore, Maryland. Satellite users should retain this list and update it as changes occur. In the next few months many changes will occur with the launches of Satcom C3 in September to replace F1 at 131 west. Satcom C4 to replace F4 in August, Galaxy 4 to be located where the current Galaxy 6 is located in December, and Galaxy 1R at 133 West to replace Galaxy 1.

That's all for now - see you in 30 and good DX:

Till next time, DAVE

Matt Sittel 603 Fulton Rd., Apt. B24 Tallahassee, FL 32312 (904) 386-2212 (please don't call after 2200 unless DX!)

Well, this column should have appeared in August's VUD. But yours truly forgot the size specifications for typing this column so it didn't! There was no way I could get it re-typed for September's VUD as I had just moved in and I didn't have time to type with the unpacking that had to get done. Then I plunged right into school and there went the free time! But CCI is here, just a little late. I apologize. Now, on to the unIDs:
Michael Hawk (NØOSY), 10212 P St., Omaha, NE 68127-2130

Fri Aug 2 tr ch 6 0150 CDT -- Religion. PTA: central and south IA, N. MO, E. KS. 1992 TV:

Tue May 5 Es ch 2 1705 CDT -- 2 unIDs. One mentioned a 315 area code (north central New York). Much CCI. PTA: NY. Where is WGRZ located? (Buffalo. It's in AC (716). WKTV in Utica is AC (315), and AC (607) is close enough to perhaps necessitate the specification of AC's.-mcs)

Fri May 8 Es ch 2 1628 CDT -- PBS. "Mr. Rogers" to 1630, then "Sesame Street". PTA: ID,MT,OR. (There aren't any PBS 2's there that I know of. WMAB in State College, MS runs both at the times you saw them, though. Could you have gotten this off the back of your antenna, Mike? -mcs)

Fri May 8 Es ch 2 1814 CDT -- 2 unIDs. One had what looked like "Heritage News" then stock market report with "NASDAQ Movers". One may have been PBS, any others? S/SE beam heading. PTA:LA,MS,TN, AL. (That "NASDAQ movers" sounds like "Nightly Business Report". WPBT Miami and WUND Columbia, NC check at that time. WSJK Sneedville, TN, WDIQ Dozier, AL and WMAB do

??? ??? Es ch 2 1200 CDT -- Probably more than one station. One had "Days of Our Lives". I also saw a commercial for "Little Lotto". This 1300 Lotto commercial had a wizard as a logo. Another station ID'ed as "Global Television Metro" (Probably Canada.) PTA: ON, PQ, any state which borders one of the Great Lakes. ("Little Lotto" is an Illinois lottery game, so I'm thinking that was WBB... "Days of Our Lives" checks

for Global so I think that would be CIII-2 in Bancroft, ON. That would be some short skip if you had WBBM!-mcs) 98.9 1751 CST -- SS ID "RCR". PTA: S TX,NL,TAM,COA. Mon Jan 6 Es

94.7 2022 CDT -- Music (either o or r), and mention of "Desert Island Sun May 24 Es Disks". PTA: NY, NJ, MA, CT, RI.

89.9 1327 CDT -- Several mentions of ECSU, or similar to it. Must be Mon May 25 Es some college. PTA: SC,NC,VA,MD,WV. (It is WRVS, in Elizabeth City, NC. ECSU stands for Elizabeth City State University; I used to get them in NC.-mcs)

Mon May 25 Es 101.7 2007 CDT -- New York Mets baseball. PTA: same as above. Thu Jun 11 tr 91.1 2358 CDT -- Fair with rap and rock music. ID slogan was "Z-91.1". Didn't ID legally on the hour. Could be KANZ-KS, but thought they were jazz. PTA: KS,MO,OK.

Sun Jun 14 Es 107.7 1027 CDT -- ID slogen was "Classic Country 108". PTA: TX,NM,CO,AZ, UT, south CA.

Wed Jun 17 Es 101.5 1620 CDT -- Mention of Stamfordville or something similar. Ad for Tera Motors whose phone number was 462-TERA. PTA: PA,NJ, NY, CT, DE, MD, VA, WV.

Wed Jun 17 Es 92.1 1701 CDT -- Brief with "Soul 92" slogan. PTA: DE, VA, NC, SC, WV. (That is WRSV, Rocky Mount, NC, one of my old locals.-mcs)

Wed Jun 17 Es 102.5 1759 CDT -- ID as "Oldies 102.5" (no legal ID), then ad for "Easy Rider Bikes". PTA: SC,NC,GA. (WXLY, Charleston,SC.-mcs)

Wed Jun 17 Es 99.1 1816 CDT -- "Atlanta Braves Network" baseball. PTA: GA,SC,FL. Christopher W. Hanley, 1321 Beecher Ave., Galesburg, IL 61401-2027

Sat May 23 Es ch 3 1858 CDT -- PTA: NE US. Political ad for Senate or U.S. House racesounded like Joe Chippa or Chipper (non-incumbent); news item at problems at Wolfon (?) prison.

Mon May 25 Es ch 2 2030 CDT -- PTA: NE US. Documentary about African tribe with English narration and subtitles; PBS or CBC? (I happen to have

CCI (unIDentified DX), October 1992 Coniglio, cont. 2400 miles away. My concern is that a different station, perhaps in Mexico, was relaying RCTV off the bird. There was a logo that looked like (Greg drew a screen with a black sector in the upper-left quarter of the screen, which may have had a design in white inside of it, and then the rest of the screen in white.-mcs) Did anyone happen to see anything from the Caribbean that day, or have access to a Venezuelan "TV Guide" to see if in fact they were carrying such a soccer game? Or does anyone know if someone else was carrying their programming? It is not known if RCTV was on satellite. No one has reported seeing that logo before on a Caribbean station? Thanks to Matt Sittel, John Combs, Chris Dunne, and George Jensen for advice. (You're most welcome! As I have told Greg, I had XHY in Yucatan about an hour before Greg's logging, and they were running soccer, apparently the same game as Greg saw, too. But none of the logos, Caracas mentions, etc. were seen or heard. I hope this one turns out to be Venezuela!!-mcs)

Thanks to everybody for helping out! Also, much thanks to Frank Aden, Mike Hawk, Todd Brandenburg, Bill Nollman, Tom Bryant, George Greene, Greg Coniglio, and Fred McCormack for helping with TV Guides and schedules to make ID'ing these umIDs a little easier! With the new fall season upon us, that means new schedules, so if you can send those new schedules, I can help ID those unIDs from this upcoming season! I never got a West Texas TV Guide, so there's a lot of Amarillo and Midland unIDs that I can't ID. Can you help? Let's help out our fellow DX'ers by trying to solve some of their ID's! 73's Matt.

#### TELEVISION NEWS

Doug Smith, Editor 14 Brookside Court Nashville, TN 37209-4503 615-356-8305 CIS 72777-3143

TL= Transmitter Location CP= Construction permit

MP= Modification permit (modification of construction permit.)

\*= Non-commercial CRTC=Canadian Radio-TV Commission

#### APPLICATIONS TO CHANGE **EXISTING STATIONS**

St Ch ERP HAAT Call City NE 19 1683 348 \*KXNE-TV Norfolk (was 767kW, 339m)

2 28.2 1275 KKTO-TV Santa Fe (TL: 35'12'55"N, 106'27'2"W Sandia Crest, the Albuquerque antenna farm.) (was 89kW, 600m)

#### OTHER STUFF

Obviously, a slow month in Washington. Probably everyone is on summer vacation...

The transmitter site change for KKTO above supports my suspicion that they'll take over the Fox affiliation & programming of KGSW-14.

The Pittsburgh convention was certainly unusual! It was also very interesting, a great chance to meet with other DXers. I certainly hope the other attenders enjoyed it as much as I did. Didn't get a chance to DX TV down there, but did note (via a billboard across the street from the Pittsburgh Motel) that LPTV W63AU is using the non-ID "WNEU-TV", and carries local softball games.

In the wake of relaxation of radio's multiple-ownership rules, potential relaxation of the TV rules is now under discussion. Plans proposed include station limits of 18, 24, or none whatsoever, combined with national audience limits of 25, 30, 35, and 50%. Within a given market, many (but not all) propose allowing common ownership of one UHF and one other (either UHF or VHF) station.

No one is proposing allowing common ownership of two VHFs in the same market, though.

The Arizona legislature has decided not to tax pay-per-view cable programming. The proposed 3% tax would pay for the state's boxing commission.

Several TV stations have publicly speculated that the second channel, to be allocated for HDTV, might be used instead to broadcast a second (or more) digitally-compressed, standarddefinition TV signal. In an interview in Broadcasting, FCC chair Alfred Sikes says the Commission probably will not approve this. In another comment, he reaffirms that the Commission expects stations' current channels to be returned to the FCC eventually.

The Commission has unanimously voted to refuse waivers of the 'prime time access rule" to KRON-TV (4) and KPIX (5) San Francisco. This rule prohibits stations in the Pacific (and Eastern) time zone from broadcasting more than 3 hours of network programs between 7 and 11pm.

Waivers have been requested by a number of Western stations wishing to move prime time up by one hour. (6-10pm, like it is in the Central and Mountain time zones) Without the waiver, if a Western station runs 3 hours of network between 7 and 10pm, it cannot run the network's 10:30pm program. (in the case of NBC affiliates like KRON, this is the popular "Tonight Show") Currently, KRON and KPIX have moved up prime time anyway. and are just delaying the 10:30 network programs to after 11:00.

FCC officials said the Commission felt the waiver already issued to KCRA (3) Sacramento was adequate for testing the proposal.

Chase Communications has been granted permission to build a satellite of Denver's KDVR (31) in Fort Collins, Colo., on channel 22. Further details aren't yet available.

Comark Communications is preparing a 55kW UHF transmitter for HDTV tests, to be held in Charlotte, N.C., early next year. Lots of mail this month ...

#### J.E. Lewis, Kansas City, MO:

"How can anyone apply for a TV station on channel 24 at Springdale, Ark. when there is a channel 24 north of Ft. Smith with at least a grade "C" signal there?" Good question; don't know how I missed that one! Either, as J.E. speculates, this is a typo and the station is actually to operate on some other channel, or, the other application is a challenge to the license of existing KPOM-TV.

It would seem rather unlikely that a channel 24 application for Springdale would be accepted for hearing— even if not for KPOM-24—because of the presence of KHOG-29 in adjacent Fayetteville; UHF stations are generally not allocated within 5 channels in adjacent transmitter sites.

#### Dave Sinclair, Vancouver, B.C.:

Dave sends along newspaper clippings and a CRTC news release.

First, from the CRTC: A public hearing on the Commission's policies on religious broadcasting in Canada is to be held on October 19 in Hull, Quebec.

"Under its current policy guidelines, issued in 1983 following an extensive public hearing, the CRTC will not, unless convinced otherwise, grant licenses for radio or television stations whose programming is primarily religious and devoted to the views of a single religion or sect. The Commission also requires each individual station to provide diverse programming and balance in the presentation of differing views on issues of public concern."

According to the news release, Parliament requires that broadcasters licensed by the CRTC offer a variety of predominantly Canadian programming, and a balance in the expression of differing points of view on matters of public concern. (it would seem that the "predominantly Canadian programming" requirement could not possibly be met by TBN programs from the USA, which several unlicensed stations have been airing)

CRTC chair Keith Spicer says that "the Commission invites all interested parties, including those who have been operating illegally, to argue their case within the law

on an equal footing with everyone And, "In the meantime, else. our existing policies remain in force. The law also obliges us to enforce the licensing process established by Parliament in the Broadcasting Act. Therefore, the CRTC is today (May 8) issuing mandatory orders requiring unlicensed operations in Alberta and Saskatchewan to shut down. We have given these illegal operators every opportunity to obey the law. They have repeatedly refused, indeed they are opening new illegal stations.

Stations affected are in Edmonton, Lethbridge, and Grande Prairie, Alberta, and in Lloydminster, Saskatchewan. Prior to a January 14 CRTC hearing in Edmonton, three other Saskatchewan stations voluntarily shut down.

The illegal stations affected by the order had until May 18 to shut down, or face penalties.

Also, from the July 9 Wall Street Journal, "As the manager of a TV station run by and for prisoners, Joe Corpier, a convicted murderer, faces some unusual challenges."

The maximum-security Jefferson City Correctional Center in Missouri operates its own cable channel within the prison walls. Programs include movies, prison news, and broadcasts by warden Michael G. Jose, mainly attempts to dispel rumors.

Corpier says he determines how popular movies are by listening to the noise level in the facility—thriller films may silence the whole prison, while art films have been known to nearly incite riots. Prison officials do attempt to censor programming shown ("Escape movies aren't a good idea."), but "The Silence of the Lambs" was shown twice before officials realized it wasn't a good idea.

In two other prisons, inmate viewers have solved "America's Most Wanted" mysteries, realizing that fellow prisoners were the guilty parties in other crimes...

#### Tom Bryant, Nashville, TN:

Guess I should have seen this one myself, as it involves my employer! From the August 6 Nashville Banner, "Special report to focus on election". This article details WSMV (4)'s decision to broadcast a 1-hour election special (for the Aug. 6 primary) on WXMT (30). Executive

producer Caren Connelly says
"Realistically, we couldn't preempt
the Olympics for an hour. This way
we can give viewers the Olympics
and election coverage." During the
Olympics, NBC affiliates received
time for their late local news one
hour late, at 11pm Central time.

The election coverage was produced at WSMV's studios, and sent by Ku-band satellite to WXMT's facilities in downtown Nashville 6km away. Obstructions prevented the installation of a temporary microwave link. WKRN (2) and WTVF (5) reported on the primary within their regular 10pm newscasts.

A 9pm nightly newscast, also produced at the WSMV studios, will begin airing on WXMT about the time you get this VUD. WSMV anchors & reporters will be used; I don't know whether graphics identifying with WSMV will appear. (seems most TV DXers east of the Mississippi have already logged WXMT anyway!)

#### Ron Wing, Wichita, KS:

"My VCR caught the first transmission of K55FS today. (Sept. 2) There were "plor bars and a caption near the top of the screen that said: REDUCED PWR TEST KFS-TV 55 WICHITA". "Neither channel 55 nor 51 was on the air by 6pm, when I got home."

Two weeks later, Ron sent a clipping indicating that programming on K55FS should have begun on September 14. He says he hasn't seen anything from them except for the tests caught by his VCR.

#### W.R. McIntosh, Granada Hills, CA:

Yikes, a Californian! Don't see much from out there..

From the September 1 L.A. Times, an article about "KSFV", channel 24 in the San Fernando Valley. KSFV broadcasts foreign-language news from more than 45 countries, 24 hours a day. 40 languages are used, with some programs arriving live via satellite, others by videotape.

KSFV's main competition is KSCI (18) San Bernardino, a full-power station which also carries foreign-language programs, but not all news. Owners Venture Technologies hope to start two similar stations in Los Angeles proper and the Inland Empire (San Bernardino/Riverside area) by the end of the year.

"KSFV" is apparently an LPTV; there's a reference in the article to an ERP of only 50kW, and a full-power channel 24 in the LA area would not be allocated with full power KVCR-TV (24) in operation in San Bernardino. (indeed, I'm rather surprised that a LPTV was authorized on 24!)

#### John Combs, Orlando, FL:

From the July 27-August 2 Central Florida Business, an article about W21AU Orlando. The station will cover most of Orlando proper, an area with 130,000 noncable homes. A half-hour program costs between \$100 and \$300, with 30-second spots between \$30 and \$100. When not carrying locallyproduced programs, W21AU will air the All News Channel from Minneapolis. (John comments that as of when he sent the clipping, in early September, he hadn't seen anything on W21AU except All News Channel.)

Also received from John was part of a hurricane special in the Sept. 2 Miami Herald, which was interesting enough in itself! But the main reason John sent it was because of a two-page ad taken out by WCIX (6), headlined "We Temporarily Lost The Power to Broadcast. But We Never Lost The Power to Help."

"Among the wreckage was the Channel 6 transmission tower, which collapsed due to winds in excess of 160mph. Fortunately, within hours, we were able to restore transmission to cable systems in Broward and to low power Channel 27." (translator W27AQ Ft. Lauderdale)

"Now, Channel 6 is back on the air, in most areas of Dade and Broward Counties. We ask all Dade and Broward residents to check both their cabled and non-cabled television sets for Channel 6 reception." My understanding is that a temporary antenna at 20kW ERP has been installed on the WTVJ (4) tower north of Miami. Because of the proximity to WCPX (6) Orlando, WCIX will probably have to rebuild near or at their old site in Homestead, the hardest-hit area.

John says "I noted WFLX-29 simulcasting WPEC-12 coverage of Andrew. WBFS-33 ran a slide all night that they would not show programming until after the hurricane was over, and urging viewers to tune to radio for info. (one of the few times you'll ever see a TV station actually

encouraging people to listen to the radio, hi...) "

It's also been reported that a hastily-arranged telethon to raise money for hurricane relief raised over \$2,000,000, and aired not only on most South Florida TV stations, but on stations elsewhere in the state, and on WABM (68) Birmingham, Ala..

WPLG (10)'s studio-transmitter link was wiped out, taking the station off the air for 3 hours until a news microwave van could take over: and WSVN (7) and WTVJ (4) had to evacuate threatened studios and operate from makeshift facilities for several hours. No other TV stations were seriously affected by the hurricane, though 4 FM stations on WCIX's tower were also knocked off. As for Hurricane Iniki, there are no TV stations on Kauai, though it seems likely that the seven translators there were knocked off.

#### Mary Schutz:

(I think! Someone gave me this one at the convention, I sure hope I remember properly!)

The Sept. 9 Wall Street Journal covers an interesting aspect of HDTV testing; selection of "guinea pigs" to evaluate and compare the various systems.

"While experts often pick out the tiniest flaws in a television picture, the average viewer tends to be more forgiving. The idea is to make a trade-off that the average viewer won't care about, or won't see at all."

The Canadian government's Advanced Television Evaluation Laboratory in Kanata, Ontario (near Ottawa) is selecting people to evaluate the various HDTV systems being tested in the USA. Most are students from nearby Carleton University. Those who pass three eyesight tests are paid \$16 Canadian for each hour of evaluation. Test director Paul Hearty has already brought through 2,200 volunteers, and expects to use another 300. No one is allowed to watch more than one system, out of the fear that they might notice something they missed the first time, skewing the results.

\$4,600,000 has been spent on the lab, with 60% of that Canadian government funds.

Also in this paper, news that ABC plans a one-hour late-night show called "Nitecap". Beginning

October 19, and co-hosted by Robin Leach and a female anchor not yet announced, the program will attempt to directly market merchandise & coupons from major catalog firms such as Sears and J.C. Penney.

And, a note that TV advertising revenues increased 2.5% in the second guarter of 1992.

#### Steve West, metro Philadelphia:

Steve called just before deadline to ask whether I got in on the big tropo during the convention. (kinda. Shattered my FM tropo DX record— but was in my car & 15 miles too far north to count it!)

He also mentions that WNJS-23 has dropped considerably in signal strength. I don't show any record of them applying for a power or antenna decrease, my suspicion is either that a technical failure has forced a power cut or, as Steve speculates, it has something to do with the NJN budget cuts.

Steve is also seeing the All News Channel on WYOU (22) late at night (WTVF (5) here also runs it overnight, instead of the CBS overnight program), and wonders whether the mystery ANC on channel 24 might actually be a full-power station- possibly WTAT Charleston, S.C.? Either that or WJET Erie, though I suppose it's pretty hard to get a UHF signal across the mountains!

#### Bill Nienajadly, Clifton, NJ:

As always, Bill sends a stack of clippings!

From the August 28 NY Daily News, details of NYC stations' coverage of Hurricane Andrew. Ratings of news programs skyrocketed in major markets.

CBS sent a "relief mission" of about 24 employees, including carpenters & electricians, and truckloads of building supplies, to help repair the homes of 40 CBS-owned WCIX (6) employees whose homes were damaged by the storm. Some of these employees have been sleeping at the WCIX studios. Also sent were writers & producers who could relieve WCIX employees. allowing them to take care of their homes. Finally, WCBS (2)'s satellite truck was sent to Miami to beam WCIX's signal to area cable systems until they could return to the air on channel 6.

Sept. 4 Post: "Channel Nine (an Australian network) initially said 'technical faults' caused it to stop 'Australia's Naughtiest Home Video Special' 30 minutes into the hour-long show and replace it with the American sitcom 'Cheers'". "The show was a compilation of amateur videos that viewers said depicted semi-nude scenes, a distant view of a couple making love, and shots of animals mating." The network later admitted a flood of viewer complaints was the real reason for the sudden change of heart...

Finally, from the August 31 Daily News, WMGT (41) Macon, Ga. announced that its only news program, "Live at Five", is being cancelled due to low ratings. Their 11pm news was cancelled 3 years ago for the same reason.

Bill also comments that "WEXP", the experimental HDTV station on channels 27 and 28 in Hoboken, is off. "They might go back on - I hope not." Bill also notes WGTW-48 on the air. He also notices a weak signal-- weaker than WYBE-35 Philadelphia. "I don't give much hope of WGTW succeeding."

#### FCC RULES PRIMER: POLITICAL BROADCASTS

While not strictly related to DX, there's been a fair amount of controversy over political advertising this year.
Congressional candidates in some districts (including one near Nashville) have aired commercials purporting to show aborted fetuses. And stations have been fined for not offering candidates special discounts normally reserved for long-time advertisers. The political advertising rules are part 73.1940.

A "legally qualified candidate" is anyone who has announced to the public their intention to run for nomination or office; who is qualified under local, state, or federal law to hold the office they're running for; and who is either on the ballot, or has committed to a write-in campaign and has made a substantial showing that they're a bona-fide candidate.

73.1940(b): For 45 days prior to a primary election, or 60 days prior to a general or special election, the rates charged for political ads may not exceed the lowest unit rate for the same class & amount of air time. Earlier, the rate charged may be no more than

that charged to a commercial advertiser, and any discounts offered to commercial advertisers must also be available to political candidates. Recently, this has been interpreted to mean that if a station offers a commercial advertiser any discount (for example, a 20% discount for advertisers buying 5 30-second spots a day for 6 months), they must offer the same discount to politicians, even if they don't buy 6 months worth of spots.

73.1940(c): No discrimination is permitted between candidates in practices, regulations, facilities, or services, nor may any preference, prejudice, or disadvantage be given. Stations cannot enter into contracts with one candidate which excludes the advertising of other candidates for the same office.

73.1940(g): No station is required to permit the use of its facilities by political candidates, but if a station does permit such use, it must offer equal opportunities to all candidates for that office. Licensees have no power of censorship over the material broadcast by a candidate. Appearance by candidates in bonafide news programs doesn't count.

This section is backed by the Communications Act of 1934, an act of Congress which the FCC can't amend on its own. It's why, for example, the "aborted fetus" ads air aired -- I know of no station which wanted to air those ads, but this regulation specifically requires them to do so. Indeed, a political candidate could conceivably appear on camera naked, and stations would not be permitted to censor him, though it'd be a sure way to lose the election! Some people have requested that the FCC rule the commercials in question "indecent", prohibiting them from the airwaves except between midnight and 6am, but the Commission has refused to do so -in any case, which conflicting federal law would take precedence?!

Well, I've already missed one big tropo-- but weather patterns seem to bode well for a good tropo season this fall. After the abysmal Es season, we deserve it

Contributions earnestly solicited!

WZWA: Is it for Real? Column's Swan Song Announced

A Nashville FMystery on 99.3 has been solved. "It was indeed W257AR [Donelson TN], set up to relay WAMB-1, WAMB-1 leaves their exciter turned on and modulation fed to it when the power amp is off for the day," says Doug Smith, "There's enough leakage from the exciter that the translator was able to pick it up and relay it," and now that translator has embraced Christianity and is relaying WAYM \*88.7 Columbia TN instead of WQZQ-FM 102.5 Dickson TN. Hurricane Andrew took down the tower of WCIX-6 in Homestead FL and FM stations WXDJ 95.7, WRTO 98.3, WMCU 89.7 and WDNA 88.9; although WDNA was already off the air for unknown reasons. Channel 6 has rejoined the airwaves at a lower height, along with its Spanish SAP at 78.67 kHz, but fate of the FMs unknown. Two people called from SE FL the morning I am typing this and I forget to ask about the FMs. Dougalso mentions WMUF-FM 94.1 Paris TN as having recently embraced stereo. The "WKNO Stations" is a nonID shared by V/KNA \*88.9 Senatobia MS, WKNP \*90.1 Jackson TN, and WKNO-FM \*91.1 Memphis.

Gus Mancuso reports on his experience tuning in a station, which may or may not have been WZWA Clarksburg WV, which the FCC has deleted: "Don't remember [hearing an] ID, but I have down that I got [it] two times-from mountain and from valley. Vaguely recall getting one station with strange IDs, don't remember what, but remember it was unusual." Well, that's not exactly convincing evidence that WZWA exists. Anyone else want to venture to WV and try out 90.1? Gus is not sure if WRRL-FM 95.3 Rainelle or WOTR 96.3 Lost Creek WV has stereo. WRRL-FM has always been a monophonic blight on the FM dial, and no other human being has been known to tune in WOTR.

Chester Royster answers my question in the Aug. VUD about directional couplers. The part # is 9300-8 and it costs \$2.50, an 8 db directional coupler from Microwave Filter, 6743 Kinne St. East Syracuse NY 13057. "Rich, Earl or any of the other technicians [in the WTFDA] can explain the coupler's benefits such as 1) no loss on your main antenna and 2) the prevention of down-phasing. I used one with superb results when my antennaswere spaced around 50' apart, Later I horizontally stacked two FM 13s and eventually made a guad. It appears that the regular 75-ohm splitter/combiner gave the best results in both situations." Microwave Filter Co. has since sent me their eight page brochure. See below for a comparison of one of their products with Andy Bolin's.

New calls for Waterbury CT 104.1 are WYSR, "Star 104.1," says Mike Bugaj. No format change; they're trying to wean DX listeners away from WZMX 93.7. "Also, I think that someone is giving you the wrong info on WLNG-FM 92.1. I have been checking them out for days now and my stereo LED has yet to come on. They are not stereo. I would guess that somebody heard WRNQ-92.1 from the Poughkeepsie area and thought they had Sag Harbor."

You'll have to grope around without benefit of a program guide as you DX \*90.1 WOI-FM Ames. Lack of funds has brought about the demise of that publication, after the Sept., 1992 issue, as Robert Baker reported. It was costing them \$20,000 to keep that publication afloat.

The new G-E Superadio III is in (apologies to Saul Chernos!), and I have four in stock as of this writing, selling unmodified for \$50 plus \$4.50 shipping. Stewart West says it is in the new Best catalog at \$39.98 (list price \$49.95!). "I'm sure other discounters will have this radio." John Ebeling and I as well as George Sherman compared the new model with the old. It seems about the same on FM, but AM sensitivity is poorer on the new model. It lacks the many-ganged tuning condenser the old set had and the dial is more crowded, the right half of it. I think to compensate for poorer AM sensitivity G-E included an AM "wide-narrow" switch. The new radio appears to be extremely difficult to change the IFilter, unlike the old 7-2885 model. I will not put replacement IFilters in the new model, but will offer the SCS modification at the same price as for the older model. I took two of them to the NRConvention in Omaha and they both sold, as well as a bunch of FM Atlases--after my little talk on FM DXing Saturday night. Ken Chattertonwhose name appears on an old WTFDA membership list-was there, as was Frank Merrill and perhaps other WTFDA folk. I have not seen a WTFDA membership list in about two years: it used to appear every January. I hope Bill can oblige this year! As I was driving north from Lincoln, KWPN-FM 107.9 West Point NE had a definite spur on 107.5, not sure if it was a transmitter anomaly or an unlisted translator.

Greg Coniglio came back from eastern NC and found WHOV Hampton on 88.1, having moved from 88.3. WKJA Belhaven-no sign of it on 101.1, and probably not on 92.1, from which it was supposed to move. WKJE 104.9 Hertford NC not yet DX ready, and WTKF 107.3 Atlantic NC, with its news and talk format, suffers from the disease of being monophonic. It looks like W280CR 103.9 Kitty Hawk is a goner, and they wouldn't dare intrude on 102.3 because nearby WERX 102.5 is so strong, W214AL \*91.7 with WJAZ Summerdale PA is a reality [York PA], and CKEY 101.1 Fort Erie now daring to say "Key FM 101.1" at times. It's WNUC, call letters probably inspired from Greenland, that hold forth on 107.7 in the Buffalo area with k, displacing WEZQ. "Keep up the great work!" admonishes Greg, who does a fine column in the VUD.

It's stereo for sure for WCLS 100.7 Oscoda, which gets out fine in MI's "Thumb" region, says Karl Zuk. W. R. McIntosh sent a clipping about recent format changes on 103.9, 103.1 and 98.7 in L.A. They are all trying to attract 25-54 year old DXers, with Newport Beach 103.1 now KAJZ and Santa Monica KBJZ, sans "Mars FM." And KKLA 99.5 does have beautiful stereo music, especially at night, in spite of its religious talk format most other times. Besides having stereo on the main carrier, KKLA has a gospel music format at 67 kHz SCS,

Dave Sinclair sent a CRTC announcement about the need for a Toronto radio market study to determine who should be awarded the 99.1 frequency left vacant after the folding of the CKO pseudo-stereo news network. "I read with interest your comments in the August VUD about height comparisons with FM. Very interesting differences!" There was a good article about FM DX in the May Popular Communications, "Listening for FM DX." by Ransom Stoddard, and it mentions the WTFDA,

"Remember how I got you started with SCA?" asks John Ebeling. "Back in 1961 or so, I gave you my first adapter built on a copper plate hi-voltage cage cover from a Motorola TV set. I had just completed a more complex adapter. Look what that gift lead to! . . Notice Muzak no longer has any appreciable pause between selections. KSTP-FM now keeps the carrier on all the time--no need for a mute circuit. I do not even recognize any Muzak selections any more-nothing is even familiar. Twenty years ago I liked to listen to them. Years ago, you could set your watch by their pauses; music would start at the hour and each 15 minutes thereafter." And he notes KRGR

as well as my "FM Atlas and Station Guide.

FCC-FM

but in a foreign language.

Albert Lea MN still on 95.3, not yet on 94.9. I stopped by and talked with them, and they have yet to move-having problems with

zoning and possibly from competitors who would rather they stay a Class A. They were hopeful, saying maybe the next week they could break out the champagne. John goes on: "I'm confused about your statements in the August VUD re FMedia! You mention a special six month subscription and in another area mention you may guit the publication. What gives?" [First, I thank John for leading me to the SCS well and helping me to draw so much satisfaction and money from it as I have lead over 5000 folks to try that brand of DX listening; I just bought a Heathkit AR15 tuner/amplifier from him that I plan to put SCS into; it had been used for DXing until replaced by a Penncrest receiver. About my plans for this column-well, read on.]

"I am rather shocked that you would even consider giving up your contribution to the VUD, though I can sort of undersand that FMedia! 'competes' with the VUD/visa versa," says Bill Nienajadly, "All of us hardcore, dedicated FM DXers would be pretty much left out, even though many of us have bought, and will buy the many items that you have offered for sale in the past and in the future. We were there all the time for you and you are there for us. FMedial is an excellent, well-read newsletter, but one of the reasons why I have not subscribed is because three other nearby DXers already subscribe to it and inform me of new stations coming on the air. FMedial seems more geared to the commercial market/the 'industry' than just for FM DXing per se, even though the info on stations and station grants appear in both. One section of your VUD 'FCC News' that I really appreciate is the 'See Also' section. Here is where you spotlight DXers' catches for certain changes in format, \$tereo status, slogans, etc, and this was not in FMedial since it is geared toward the 'industry'. If you drop your very valuable FCC News, this section would likely be history. Another part of your FCC News in the VUD is the various comments we DXers contribute. Often, very often we

learn more from reading this part of the VUD than even the DX reports themselves! Through the comment section, we first learned about phasing and guite a few other items that have helped our DXing dramatically! Now if you add a DXing section to FMedia! like you do with FCC News in the VUD, along with member and nonmember comments then I could understand you dropping the VUD, as long as the comments and 'See Also were then added to FMedia! It is scary to think what would of happened if you decided to drop out of the VUD three years ago! None of us would have known about phasing, feedback on selectivity modification and your witty inputs. Face it, Bruce, we owe a lot of our DX catches to you, if you really think about it! All I'm asking is please don't give up your FCC News column in the VUD. We owe a lot to you. Please reconsider!" Regarding phasing, Bill says: "It is possible to DX

without a phasebox to get DX in the same direction as a farther station and last week we had a surprise opening to Boston...93.7 Lawrence MA and 92.5 Haverhill MA both overrode 93.7 Hartford and 92.5 Waterbury, this even without phasing, I know for sure, Lecause I disconnected one antenna from the phase box and, yep, they were still there... Yes it does happen, but at least here it's not very common at all. If you look at my recent DX to NC Lack in May of this year you will see that if it weren't for phasing a lot of stations simply would not have been heard. Here in the very crowded Northeast phasing has become a necessity, not a luxury. . . I doubt you would want to spend \$545 on Microwave Filter's overpriced junk. They use only ONE phasing adjustment, the other adjustment is an attenuator. In contrast, Bolin's Box uses TWO capacitors/aka/two phasing adjustments. If you have Bolin's flyer on the phasebox, you'll see that he offers a two-week money-back guarantee if it doesn't work out. Personally, for what he is selling it for, it is a lot cheaper than a new tuner or practically anything else. Again, here in the Northeast the phase-Lox is a godsend, the way all those new stations are coming on-the phase box is as important as a vagi!" Bill also corrects on WLNG-FM not having stereo, but they are stronger, now with their new 6 kw power, "On page 9, Aug, column 1 'Format Changes (Selected)' you list FL New Port Richey WLPJ \*91.5. How can this be when 89.3 Monroe NY is also WLPJ? A massive FCC mistake?" [Ishow Monroe NY as WLJP-L.e.] Also on p. 9 Aug. VUD column 3 SCServices PA Philadelphia WVDB 96.5, this individual cannot get WIVDB except when WQXR-FM is off? Maybe you could sell her a selective tuner so she can get WWDB even with WQXR-FM on the air. I have no problem at all . . . despite WQXR-FM at only 20 km. As Gus Mancuso once said, 'Bless those filters'! Y'ell, that is it from here, and again, please don't give up your FCC News in the VUD. Believe me, it is FAR more valuable than you might think!" I Blush-I am sure others could handle it: you might see the feature "Station News" expand. I've had the column so many years now (anybody know for sure?) that it's time to give someone else a chance. My time is so limited that something has to go-this column or FMedia! Anyway, I plan to do this column though December--b.e.] Articles Bill sent include WBLS 107.5 attacking the ratings services for poor reportage among Llack DXers of their audiences: WNEW AM being sold to businessman Michael Bloomberg, who hates music but will cram the 1130 airwaves with business news; Infinity Broadcasting poised

to buy WUSN 99.5 Chicago, WZLX 100.7 Boston and WZGC 92.9 Atlanta. Infinity alrady owns a bunch of stations, including WXRK 92.3 and WFAN 660 AM New York, where

Actually for all of what Bill N. says, I have not gotten much response from others to the feature, buried below, "See Also," in which I cull information of interest to this column's readers from the last CA Modesto 103.3 KATN (KBEE), k, "Cat" month's [September] VUD.

All Happenings Most Likely Caused by FM

CA Thousand Palms KPSL 1010, which had a classical music format, silent, "Its FM, KZAL 105.5 Desert Center CA, remains on the air, but the combo is for sale for \$1.9 million." DC area-WMET 1150 Gai thersburg MD has settled with SMNews, which had a \$446,000 judgment against the station, and which had seized "much of the contents of the office," and was threatening to seize the transmitter. Details of settlement not given, but WMET is reported to still be having problems with its landlord, the Montgomery County Parks Board, which wants to evict the station, IL Casey WKZI 800 silent

IN Decatur WADM 1549 silent "due to equipment problems"

MN Minneapolis KUOM \*770 to be taken over by students in fall of 1993, with the University of MN giving up financing of the station. Its audience, estimated at 9000 weekly, was dwarfed by that of WCAL \*89.3 Northfield (65,000) and Minnesota Public Radio's three Twin Cities stations (300,000), By fall, most of KUOM's staff-12 fulltime, eight parttime-will be laid

opportunity! Glad I was on 'FML while it was MN Monticello KMOM 1070 off the air, "I tried everything I could think of," said owner Greg Davis, but the station did not have the necessary advertising support. Davis had pleaded for advertisers at a Chamber of Commerce meeting in mid-July, but the only calls that came in were from listeners. Davis and a dozen employees lost their jobs.

NY New York WNEW 1130 being sold, subject to FCC approval, to Michael Bloomberg for \$13.5 million. He is an investor with "absolutely no experience in broadcasting," and will drop the station's m-o-r music and go to all financial news. A move is under way to try to buy WZRC AM 1480 and transform that into a station with WNEW's present format.

MS Amory WDAT 1170, a silent station, had its license revoked by the FCC TX Huntsville KKNX 1400 silent U'i Provo KFMY 960 goes modern rock, and operated by area college students separately from similarly-formatted sister station KXRK"

96.1. 'Keen up the fine work "

FM Rulemakings Proposed

First date is deadline for filing comments at the FCC; second date is for replies. Stations affected, if any, are listed.

AK Palmer 95.5C1 for 95.7C1, KUZN, Sept. 18, IKOXA Sept. 28. Oct. 13 Oct. 5 MN Glencoe (from Le Sueur) 96.1C3 for96.1A/ MS Belzoni 106.3A for 92.9A, WJSJ, with Claveland [Sept. 18, Oct. 5

MS Cleveland 92.9C2 from 92.7A, WDTL-FM,/ MO Clinton 95,3C3 for A, KDKD-FM, Oct. 1, 26 NY Norwood 96.1A, Sept. 28, Oct. 13

F\*1 Rulemakings Finalized Dates are when FCC filing windows are open AL East Brewton 95.7A, Sept. 14-Oct. 14 LA West Monroe 98.3C1 for C2, KYEA MSNewton 97.9A for 106.3A, off-air WM YQ-FM MS Okolona deleted 105.7A MS Petal 106.3C3 from A. WMFM MO New Landon 105,9C3, Sept. 25-Oct. 26 NC Pinetops (from Scotland Neck) 95.5C3 for

A, WWRT TX Benavides 107.7C2, Sept. 22-Oct. 22 TX 8ig Spring 94.3C2, Sept. 14-Oct. 14 95.9C3 from 95.3A, KBST-FM TX Midland 95.1C3 for A, KQRX TX Sterling City 96.5C2, Sept. 14-Oct. 14

WV Ravenswood denied WRZZ 106.1A bid to change to Williamstown WV There would have been some "Format Changes" this month, but that part got erased from the computer after it was run in FMedial

Buca Taily Elvins FCC Relaxes Radio Rules

The FCC won some and lost some. Retreating from its earlier proposal to allow one owner to have 30 AM and 30 FM stations, it settled on 18 stations in each service, which will increase to 20 in two years. Group owners would be allowed to exceed the national limits if they create a plan to help small businesses or minorities become station owners. The FCC did not define what it means by a small business." In local markets a single owner will be allowed to have a maximum of two AM and two EM stations where there are 15 or more stations-down from three each in the original proposal. The reducements in ownership numbers from the FCC's original proposal come in response to anticipated congressional pressure and possibly even a percention that DX inawill be rendered less interesting. with nonverifying policies of certain station owners becoming more widespread.

HSS)

TBN)

Note # 2 - Family Channel - antenna bearing north of the VJN, probably in the Detroit area. (W48AV? fm).

Note # 3 - No video, just audio all night. Occasionally a scrambled video signal, but usually just black.

Note # 4 - TBN in with the same signal strength and at the same time as K19BG and in the same direction. (No channel 15 TBNs are known in Minnesota. However, the Family Channel affliate at Appleton, K15DC, carries religious programming at that time. fm).

Note # 5 - Translator with KVRR 3/4 color bars. Distorted signal, with video moving horizontally across the screen. Bearing towards southern Minnesota or northern Iowa. (I think you were probably watching KRWF. As any DXer who has seen this one during tropo can attest, it is usually a mess. I have never seen a full service station with more problems and it has been going on since it came on the air. The distorted video is being broadcast by KRWF, and in my experience, usually involves KMEG-14 video. How it happens is still unknown to me. In his report this month, Jeff Kadet surmises that KRWF must get its signal via K14AD. I personally don't think KSTP would go that route to feed a full service station. Also, the signal which I frequently see KRWF broadcasting does not look at all like the co-channel interference which we are all familiar with. The interference varies sharply, like a fast switch, leading me to believe it it is interference to their FM microwave feed. However, I have no personal experience to confirm this. fm)

The opening on August 9th was one of the best I've ever seen. The Minneapolis area was the strongest I've ever seen.

My antenna system suffered some minor storm damage on July 2nd. Winds of nearly 100 miles per hour zipped through the area, bending my mast (which is a water pipe) to about 10 o'clock. The antennas still work fine. They just look a little wierd.

I am currently working with the technical director of the Chicago Amateur Radio Club to create and design an extremely high gain amplified system that will have no overload. It however, won't be as compact as present commercial amplifiers. I will probably have more on this at my next report. 73.

After a promising May, June & July were dismal. August 5 may have been the best day of the season, but alas I was at work during that opening. Somewhat compensating for the lack of skip was a several-day spell of exceptional trops up & down the Central Valley which provided 5 new loggings. Underlined are new.

\* On 8/5 around 1700 Eric Sundius had skip to 107.7, but I was at work until 1930. From early May thru 7/24 I averaged 2 days work a week, but started a new job 7/27 & now am extremely busy again. So the big day of the season happens in August! And on 8/7 Eric had skip to 100.1 while I was again working. Groan!

Note # 1 - Apparently a regular on troposcatter at <u>583 miles</u>. If I put the R7000 on channel 14- in FM narrow and sit on the channel, their audio will occasionally fade in above the noise level for brief moments (usually between 0300-0430 CDT) 90+% of days tried.

Note # 2 - Reverend Larry, the guy who runs KNLJ-25 and KNLC-24, was airing his own political ads. He was running in the Missouri primary for public office. Is this legal? (Sounds OK to me. Of course he has to provide the opposition equivalent spots at the same rates, if they want them. fm)

Note # 3 - Already a legendary northwest opening probably only rivaled by the one on August 18, 1983 when Fort Francis, Ontario, was blasting in on FM until the late AM, but I wasn't set up for UHF TV yet. Every clear channel had layer upon layer of weak translators and LPTVs fading in and out over each other just like the graveyard frequencies on the AM broadcast band. Unfortunately, I had to leave during the heat of it and was preoccupied before that with packing.

Note # 4 - Probably either Alexandria or Redwood Falls, both STV.

Note # 5 - Anybody trying to watch KRWF tonight would have gotten quite a headache. They must get their signal off the air from K14AD which was being demolished by same offset KMEG-14.

Note # 6 - Probably either Redwood Falls or Appleton, both STV.

Note # 7 - Assume that this is W64AK picking up W0AC-67 (usually WVIZ-25 via W67AL)???

Note #8 - WTJR-16 was off the air for about ten days. This was a STV 0 kHz to South Bend. Probably St. James, but could be Granite Falls.

Question: Do LPTV/translators have assigned offsets. (Not that I am aware of. As I understand it, back before LPTV was invented, 1 kW translators operating on allocated channels had to comply with the offset. That may still be a requirement if an allocated channel is used. fm)

Correction from last report: the WCCL-49 New Orleans Video Jukebox logging on June 17th was actually K49CG in Little Rock, also channel 49z. Jeff Kruszka wrote to say WCCL was off the air. I replied that I had logged a local ad with a Metairie, Louisiana phone

Jeff Kadet (continued)

number, plus there were other mentions of Louisiana. Jeff then called the phone number to discover that it was an advertising agency in Metairie selling time on both K49CG and another LPTV in Monroe, Louisiana.

Thanks, Jeff!

A week after the great Minnesota opening of August 8-9 I decided to drive up there on a translator/LPTV transmitter scavenger hunt. I wanted to try to solve some of the unIDs, get a better idea of where all these places were located (and the terrain the signals have to travel over) plus get a feel for what LPTV/translators are still up there that are needed. I had also never seen a LPTV/translator site before.

Managed to track down the sites of St. James, Redwood Falls, Granite Falls, Appleton, Alexandria, Willmar, Olivia, Eagle Bend and Winona. STV is alive and well in Minnesota. Of 85 stations visited, 37 were scrambled. Residents of Willmar get everything for free while residents of Appleton have to pay for everything. It's now easier to understand why Appleton is so hard to log from here. Of their 10 STV stations, 5 of them have no audio

and 4 of them are negative video.

(The Willmar translators, and others that you visited, operate those unscrambled channels on "the honor system". You are supposed to pay if you are watching. For example, in Alexandria, the Weather Channel has a crawl on it advising viewers that their fair share is \$45.00 a year. A very reasonable charge in my opinion. fm)

Minnesota LPTV/translator stations logged here is at 79. Total LPTV/translators

logged is 341, 73,

William Eckberg, 1032 Sterling Road, Dixon IL 61021

I saw Fargo channel 15 snow free in the AM of August 9th. I haven't seen a Fargo station in 30 years! It was the best tropo ever in that direction with five 5 out of a total of 8 loggings over 400 miles. I was gone several days so missed other tropo.

## EASTERN TV-DX

Bill Nienajadly/N2QJJ PO Box 2999 Clifton NJ 07015-2999 201-478-3044 no collect

October 1992

Deadline the 5th

LONG HAUL TROPO WITH SOME RARE PATH TROPO HAVE BEEN REPORTED ON AUGUST 22-24. VERY LONG HAUL TROPO OVER RARE PATHS IN MID SEPTEMBER!!! NEXT MONTH IN ETVDX- A KY TV DXER SEES CT ON UHF! AND SAME KY DXER SEES CANADA VHF's and UHF's! HISTORY MAKING TROPO IN SEPTEMBER!

As this column is being typed up in mid Sept. word has reached ETVDX about some very long haul and rare path tropo. Though some of these reports mentioned in this headline are not yet in the DX columns, by phone-your ETVDX has heard about...Ed Phelps in KY sees Philly Scranton, Binghampton and Hartford CT on UHF! On the FM side, Dxers have heard MI and New Brunswick Canada at the same time, Dxers in CT hear MI, IN and SC in the same day. A dxer in the DC area, sees MI UHF's and a NY UHF near the Canadian border. A Dxer in the Cape Cod area reported Kitchener ON and NS & NB in the same evening! Some guy from Clifton sees finally a Canadian UHF. Plus a lot more to mention & report will be in next months' ETVDX.

-THIS MONTHS ISSUE CONTAINS-

Bob Seybold of NY reports goodies like WPDE 15 SC and stuff out to MN. Dave Nieman reports WUND-2-NC via tropo. A bunch a fine loggings this month also for Eric Voytko who had Buffalo NY & CICO 28 from his DC area location. Tropo seems to be making up for the lack of E-Skip this year, good luck to everyone who got in on the excellent tropo in August and mid September! Please report to your respective columns. On to YOUR DX!

Bob Seybold 10567 Benett Rd Dunkirk NY 14048

After a so-so season as far as DX goes, it finally opened up trops wise in recent days here. Starting August 20th till & including the 24th there was a solid run of trops-300-1000 miles in various directions. There were many super catches including long awaited UHF from Florida on Aug 23rd,: Some of the Dx seen as follows:

Aug 20th-evening-noted Louisville 32: Lexington 36, Cincinatti 48, Columbus 28 & 34, Dayton 16,22 & 45, WJTC 26, WPPO 42, WHIZ 18, WOUC 44, Mansfield 50, Ashland 59, Newark

(Ohio) 51 and other tentative Kentucky U's;

Aug 21 .. morning- really opened up to West: all Chicago U's in quite strong: Rockford super 17,23,39 also LPTV's from Rockford 33,45 -all new. Iowa U's, Cedar Rapids 32, Red Oak 36, Soulx City 14, Dubuque 40, Indiana Ú's 15,16,18,21,22,23,28,33,39,55,34, 46,62,: Milwaukee U's 18,24,36,30,58: Green Bay 26,38: Bloomington Il 43: Champaign, Peoria, Decatar U's: Charleston 51,: La Salle 35, translator on 65 from IL: Also translators or LPTV's on 15,59,69 all michigan. A channel 43 from Ironwood repeating Green Bay 11 (new): Later in the day-in evening-Madison U's 15,21,27,33 & 47: Plus Fox 18-Davenport: Michigan -U's 52,54,64,14,23,25,53,66,28,41, 19 plus 69 LPTV from South Bend and many UNIDs buried

under others-Band loaded-strong signals!

Aug 22-Morning, Madison U's in again, plus Green Bay, Cadillac, Western Wisconsin U's 20,28,55 (new). Milwaukee, Chicago, Fox 15 Ottuma Iowa (new): KVRR 15 North Dakota, unided Minnesota U's, other Wisconsin U's including 14- 2nd day in a row. Rockford 17,23,39 still in strong: South Bend, Lafayette, Ft Wayne U's all in: Michigan-Bad Axe 35: Grand Rapids 17,35 super: Kalamazoo 52 & 64: Muskogeon 54, WUHQ 41: Many LPTV's fron Michigan also. 65 from Milwaukee, Cadillac 27, Manister 21: WMCU 14, WUCM 19: As day wore on- Sudbury 19: Saulte Saint Marie 20 & others. On most of these days-Pakersburg 15: Columbus, Dayton, Newark -51, WOUC 44, Lima 27,35,44 all in: Pittsburg U's, all Elmira, Binghampton, Scranton, Utica Syracuse, Watertown, all in fairly good. Going back to Aug 21 in morning-forgot about these Plattsburgh 57in super, best ever seen. Canadians to the North and Northeast very good, CBC on 26 repeating Kingston 11 ( new) CBC-59, Belleville 15,53,: Ottawa 24 & 40: Montreal 35: Others on 20 & 42: Hull 30, 55: Ottawa 33 (rare) 32 & 38: Watertown 16 & 50 strong: Norwood 18: Burlington 22 & 33: Utica & Syracuse strong.

Aug 23-Super Opening to East coast and to Southeast near coastline, Hickory 14: Roanoke 15, WLYH 15, Hampton 15 super, and then in 2 days continous: WPDE 15, WAAP 16, WBOC 16, Philly 17, Nashville 17, WCDC 19, Washington 20,26,50 & 66 (Manasses), Baltimore 24 & 45 & 67: Annapolis 22: Harrisburgh 21 & 27: York 43: Red Lion 49, Trenton 52, WITF 33, all Scr anton U's super, Norfolk 33 (new) in 2 days: Prtsmouth 27 strong fro hours & hours, Roanoke 27, 38: WJKA 26, WRLH 35, WLFL 22- Raliegh 28: WWPB 31, WUMP 36, WFPT 62, Kingston NY 62: WNRW 45, WKPT 40, WEFC 38, 55,67,68 from NYC area, WLIW 21 super: Conn 30, 26, 61 all good. Waterbury 20: Boston 25: Burlington 22 & 33 strong, Binghampton WSKG translators on 60 & 69: Hagerstown 25 & 68: unided 63 (most likely in Virginia, NJ, or E PA) -running old movies way into the night. Blank video carrier on 69-2 AM & after. Aug 23 continued, 23 & 47 Altoona ,NJ 65 w/HSN, number of translators on 64: unides on 59, Reading PA 51. Ch 48 repeating 24 Morgantown W.VA. This was a super opening-very strong signals-continous hours & hours.

(Bob Seybold's report continues on the next page-BN)

October 1992

Bob Seybold continued from the last page.

Aug 24 - Some stillremaining but fading slowly- Norfolk, hampton, DC, NYC still in, also Harrisburg, York, Philly Baltimore, Scranton & Conn (some  $U^{\dagger}s$ )- Normal reception later in the day.

Aug 25-27- General conditions down, but a few in: Columbus, Dayton, Louisville, Richmond 43: Bloomington 42, Springfield 26 & lots of trops scatter- No real strong signals.

Thats it for now Bob Seybold

I didn't include any of the under-200 mile miles loggings, as I haven't logged a whole lot yet, and after I see more stations, I'll list only the New loggings (after I've gotten most of the near ones) I had my UHF antenna outside, But I bought it indoors as it didnt seem to make any difference where it was. Ican use the "Armstrong Rotor" indoors and watch the signals at the same time. I get scatter from WPMI-15 & WSRE 23 alsmost all the time anyway. I don't get the locals real well, though. And VHF is full of cable leakage. As for where I am in relation to where John Combs was, I'm about 5 miles WNW of his old QTH. I'm only about a 1/2 mile South of I-10, and near some local FM's. After about 2 weeks of rainy, DXless days, I got to enjoy some good stuff! The TX stations came in at the end of a fantastic FM opening (see SFMDX). At times, though, I had nothing on TV (not even WSRE!), and Texas on FM. Go Figure (Its called frequency selective ducting, great DX on FM nothing on TV or visa versa TV is great, FM poor. I've seen it a few times-BN) I got KRIV-26 on tape, thanks to the Teknika. John Combs kindly sold one of his Teknika's, as he found an extra TV tumer at a Hamfest. Thanks John!

(Matt nice going with your TX DX from your new location, if the cable leakage is really that bad, call the cable company to complain. Maybe there is a illegal tap. If that doesn't help, call the FCC, if it really is THAT severe, the FCC could shut the cable down!-BN)

Eastern TV DX

Robert Grant continued

Es in '92 a disappointment, but better than the total absence in 1991. Began good this year but it lost steam at the end of June. 6/29 tr was a very good opening, with a very sharp Southern cutoff (note loggingof the WMTD translator, but not its primary!)-the lucky break was all major Detroit UHTs were off the air. too bad I can't count ghosts on loggings When W41AP was strongest, I had ghosts on CICO32-32 and CBEFT-54 to the south that were about 10 lines Down Vertically, indicating a path on the order of 100 miles longer-I suspect the ghoster was the cooling tower of the Davis-Besse nuclear power plant in Ohio. The distance in this opening was to the north, with rare Sudbury loggings. I doubt the 23.7 kw power listing for CBCE in the data base, the near snowfree logging in this opening and of CBCE's transmitter, is no little current.

October 1992

The big vacation produced no unusual DX, but it was fun to log WMMT by ES in CO, days after seeing it by GW in Detroit (also WCIA seen in IL by GW), then KOTA-3 by Es at my in-laws', 3 days after watching a movie on it in a Rapid City motel room! Also took the TV to the top of pikes peak, denver stations were snowfree, and KGWS was fair, but my loop antenna kept falling apart, meking a serious bandscan impossible.

73 & Gud DX

Comments; Jeez..what a lousy month...No ES, No MS, No Au: just plain P.U.!
(Does PU stand for Probagation Uncooperative -Hi Hi-BN)
Thanks to the ONLY opening of the entire month, did nail two new U's. A few relogs are included to give an indication of the extent of the opening. Also in were all Louisville Chattanooga and huntsville U's: and a couple out of Atlanta. it just has to get better!
Station count now totals 338.

GooDXing!
Tom

A few times on 8/22 and early 8/23 are approximate as are a few milages (didn't have a chance to calculate them exactly). MEXP-27 (testing 3-D television) and MEXP-28 (HDTV testing), both Stevens Institute, Hqboken, N.J. have been off the air for weeks, perhaps for good. W36AS in New Brunswick, N.J. continues an erratic schedule. They will run a day or two on a 24 hour basis carrying something called the American Family Entertainment Network. Then they'll vanish for a number of days or even a week. However, they are still on most Friday, Saturday, and Sunday evenings with Indian programming. 73, Joe.

Look for a new LPTV on channel 19 in Defiance, Ohio.

WINM-63 has been off the air for many months and may not return this year. Their transmitter site was destroyed by teenage vandals. The jerks were caught and now reside in a state prison. WINM's translator, W66BD Fort Wayne, is still on the air.

NOTE-was very weak, zero offset and French, same direction as CKCO and CHCH. The '87 Database lists this and others on 28z as English, but I'm assuming it was CICO-TV-28 for lack of a better explanation.

Strange weekend of tropo on 9/22-24, As it never really burned off during the day. Best part was late on 23rd and 24th, filling in much needed gaps to the north, CKCO-13 is a new VHF trop record for me, and I have not logged WNAC since 10/90. On the down side, no matter how good it gets,I can't seem to break the 400 mile mark. Hopefully that will happen this fall.

On the 23rd I had E-skip in the middle of a trop opening that had me nuts, but I decided to stay on trop hunting. I still managed to ID WBRZ, which seems like a local sometimes.

I am back to using a FA4975 that I just bought from Ford Electronics. They have about four left If anyone still wants one. Speak with Darrell.

Distances shown in my reports are obtained from the Map feature on my MacII, based on the Transmitter coordinates listed in TV Factbook. It rounds everything off in tens, but is more accurate than using the Atlas and cities of license.

Have noticed unknown testing locally on ch.38; on 9/1 had full cb green scale from 1724 to 1752, and multi-color on 9/2 from 1800 to 1830+. On 9/2 called PCC Monitor station in Columbia, MD and they saw it too, but they were unaware of any authorized tests and are looking into it.

Tropo seen on the 22nd and 23nd may have been caused by Hurricane Andrew. All the signals on VHF made IDing all but impossible. It looked like strong E-skip up to channel 13. Dave

Dude from Joisey PO Box 2999 Clifton NJ 07015-2999

Super tropo conditions have excited a lot of Dxers and I have heard some very outstanding loggings of very rare paths. Unfortunately not much has happened at this QIH, in fact I pretty much missed out on the whole thing. In fact I'm much more of a FM DXer than a TV DXer, so when I got tips that Michigan was coming along with New Brunswick Canada and a day earlier or so, a FM DXer logged Chicago and despite being home during most of this period, nothing of significance occured on FM here. TV however I fared a bit better on September 13 (forgot the time) Joe Fela called

and told me WSYT 68 was coming in, sure nuff with 1c1 68 off - there it was, but at ID time they faded out also WICZ ch 40 from Binghampton NY was doing real welltoo, Sept 14 @ 0059 TVO ch 24 from Ottawa was in weak but readable, my first Canadian ever on UHF! What a thrill. And the next nite on Sept 15 at 0150+ I saw Burlington VT ch 33 VETV also ch 28 Vermont ETV, VETV was last seen in the fall of 1990 during that years' Super Trop Goodxing!

Editors' tidbits.... I have two more reports left to do, the reason why they weren't in here, is because they were both long, both came after the deadline and MY deadline is close, and either one would've been split between this issue, and next months issue. Sorry for the delay guys, forgive me for hogging some of this page. Also I had to change daisy wheels on my 'printer', thats why the type is different this month.

## Untimely Ch. 13 interference

PUBLIC station WNET/Ch. 13 was hit with signal interference Sunday and Monday night at the worst possible time, the start of the August pledge drive.

Viewers noticed Ch. 13's picture flickering, and the ghost of another station's signal in the background, which was, ironically, that of Baltimore's WJZ, which Ch. 13 general manager Bill Baker previously ran.

Baker said an investigation showed the interference, called co-channel interference, was due to problems in the atmosphere, possibly caused by Hurricane Andrew, and would eventually go away on its own. In the meantime, though, he said Sunday pledges were off about - Elizabeth Jensen

The above from the NYC Daily News August 26-in reference to 8/23 & 24. Danny Buntin 1312 N. Skyline Stillwater, OK 74075

|  |   |  |  |  |  |  |  |

Quite a nice opening. I knew something was up when driving home, stations from southern NJ, Eastern Shore of Maryland, etc., were staying in on the car radio will into north-east Pennsylvania. When I got back to Williamsville, I Was shocked to discover that what were my locals and semi-locals down there were coming in a home! (Not as shocked as I would have been if I had not seen Syracuse tent., but still surprised). Watch NFM for details on that; I had stuff down to VA & NC out to 570 miles. I have never visited the Outer Banks before, nor have I heard that area on trop ever, and immediately upon returning home from there, my first ever trop opening to there?!? What are the odds?!? I heard WNHW 92.5 here, which was only 2 miles from where we stayed! I am sure that Hurricane Andrew had something to do with this. Reporters in NJ seemed to have had both my locals and NC in at the same time during these days. The opening faded out early AM Aug. 24 and did not return. The Outer Banks is an excellent location for FM DXing. (But can you possibly get a decent paying job if you want to go there to live and DX? DB) It is so far from everything that under dead conditions, the band is very open. Even stuff that you would think would be strong (Norfolk-70 mi., New Bern stuff-100 mi.) seem to be nullable during openings, and even fade occasionally on the car radio. For the week, a total of 201 FM stations were heard, most of which being tropo-scatter during dead conditions, or minor openings inland which seemed to happen when there were thunderstorms in the vicinity. the farthest south heard was WEZL 103.5 Charleston, SC (about 320 miles), which came in one evening for about 15 min. Otherwise, the circle of normal reception was: Conway, Georgetown, SC (104.1, 97.7), Charlotte (104.7, 101.9), Winston-Salem area (most of them were in all the time, very strange for the 250 mile distance and just a combox-maybe cause that window was facing inland this cut down the coastal stuff), Roanoke (89.1 in often, 94.9, 107.9 once in a while), Washington-Baltimore, South Jersey and Philadelphia with slight enhancement to the north. Most of North Carolina east of Winston and Charlotte was in very often, although fading was commonplace. In non DX terms, the Outer Banks were also very nice, there was plenty to do, plus the wilderness areas of the National Wildlife Refuges were very scenic; very beautiful land. I hope some others got in on this (or any other DX of note) and look forward to reading about it Keep up the great work, Danny! 73. (Thanks but I apologize to the language purists when in the Sept. column I wrote season's rather that seasons and its rather than it's. DB)

A NOTE FROM RON WING OF WICHITA...I wanted to report some information which could save DXers from confusion. KTCM-100.3 (Kingman, KS) simulcasts KBUZ 99.1 (El Dorado, KS) 100%, apparently via off the air pickup.

So this is what DXing in Florida is like! So far, I like it! It certainly took awhile for any DX to develop (I arrived 8/10) but when a cold front pushed through at the end of August bringing us an all-time record low for August (58°-brrrrr, hi!) it also cleared the air for some great DX! I noticed KXKZ by accident, just setting DX presets on my car radio. I had 3 stations in at the time, which I thought were just images of very nearby locals (98.9, 96.1). But when I heard the legal ID, I was shocked!! And the DX just got better and better! 8/30 AM was amazing with all the Houston FM's coming in near full quieting at worst and KHMZ in stereo! Then it returned to the same area that night for awhile, then yielding somewhat to closer and more northerly signals. 8/31 AM was great, too, hearing lots of distant inland stuff like TN! I was (and still am) amazed at what a little cool air did for DX! I can't wait for fall DX to start up! So far school hasn't presented too many difficulties, except for having to leave early to find a parking spot (but I can DX when I get there, like I did 8/31 and still got KXKZ). However other students I work with tell horror stories of 70-hour weeks to work on a thesis. I can't wait... 73's Matt.

SOUTHERN FM DX IS FOR REPORTERS FROM: Al, AR, AZ, CA, CO, DE, FL, GA, HI, S, KY, LA, MD, MO, MS, NC, NM, NV, OK, SC, TN, TX, UT, WV, & WV.

WIMN IANESD ND MT, WY ID, WA OR AK, Canada OCTOBER 1992 DEADLINE: The 5th LOG CUTOFF: 2 months from when mailed

Well August and September have been much better for trop. In the midwest, there were many trop openings in August, out to 900 miles. On the 22nd to 23rd, there were good Atlantic coastal openings, with rare inland paths to North Carolina. Trop was also seen in September on the 4th, and the 13th, with some good distances reported. If you get any DX, why not share it with us!.....

dBRUCEHALL - 5 STIRTON AVE. - BRANTFORD, ONTARIO CANADA N3T 1E2 Equipment: JVC JRS201 receiver with three 110 khz filters, sleuth 205 amp. Probe 9 fed with RG6 at 50 feet AGL, crown rotor. (Distances are in kilometres) AUGUST 11 MS JULY 1992 DX

The hourly rate for the visual Perseid Meteor Shower in August VUD did not correspond to the FM enhanced signals. I taped using a VCR for 50 hours on August 11th, 12th, and 13th. Aug 11th would appear to be the peak for FM radio. I still have hours of VCR tape to transfer to AUDIO tape. I listen to this shower on my 1/2 hour drive to my new employer in Simcoe, Ontario. More to report later as I find new loggings. Locally, CKGL 96.7 Kitchener has CRTC approval to switch to the AM dial. No dates announced yet. With country music being such a hot commodity now, I can't figure this switch out? Most dissapointed with response to QSL's this season. I include SASE (40 cents US) and receive between 1 out of 4 to 1 out of 3. Most discouraging and costly considering 48c stamp to mail to USA. (My returns have been poor this year too, Bruce. Some years seem to be good, some aren't. I think it just depends what stations you write, who reads the mail there,etc.-gc). Any suggestions for a better return on my investment? Hope to have another Probe 9 for phasing soon, so lets bring on the tropo!

#### OCTOBER 1992

HARRY HAYES REPORT continues.

Every year on this weekend out family has a get together in the Poconos, and every year I leave my radio at home, and every year it opens up to trops. Well, this year I took my radio, and fortunately Murphy's Law seems to have taken a vacation (except for the incident during this opening when tentative WTEB-NC facled right on the ID after sitting thru a half hour of Cuban musid) This opening will not soon be forgotten. I am looking forward to hearing what others got. (Harry, on Aug. 21 I was in Kill Devil Hills, NC and in the PM had all your UHFs snowfree! Also had WKRZ 98.5 and WMGS 92.9 from there, and tent. WCNY-24! Coming home on Aug 22 in Hazleton I had WQHQ sounding like a local, and WSLT in strong. Then on the 23rd I had NC from herel-gc). Hurricane Andrew, despite being far away, must have had a hand in this. Best regards.

Was not very impressed with the Perseids this year. Perhaps it was more active in the August 8 to 11 time frame before I tried (Aug. 11 was pretty good here, after that I agree-not too good-gc). That's it for this reporting period. Will advise if & when any new stations are received. Regards, John Ebeling.

I want to correct what I previously reported, that the Lafayette 3030 is off 100 to 200 khz. I hooked up my SCS adapter to the 3030, which works on 67 khz and I found out that KEZS Cape Girardeau, Mo. has switched from the talking book to music. KBDZ 93.1 Perryville has music. KSD and WIL have the same music. My adapter is called the Super Soother, which is more sensitive and more rejection than normal adapter. KFUO has dropped their 67khz lightrock unless they're on 92 khz. WMIX Mt. Vernon Illinois is now getting their music from a satellite, instead of their obsolete tape machines, which kept breaking down. All DX reported is new. Heard an WSBC on 102.1. FCC says that there is a WSBC on 1240 khz in Chicago. (This is not a Chicago station, the 102.1 that is. Perhaps someone new is on the air, with similar sounding calls, WSDC, etc. Send this along to CCI unID aids-maybe someone has the answer to this-qc). Equipment the same as in previous VUDs.

STATION NEWS: There has been a frequency swap in Kitchener, Ontario. The CKGL country format goes to 570 khz, while 96.7 becomes CHYM, "96.7 Chime FM", and upbeat a/c. 107.7 Wethersfield-Buffalo is now WNUC, and Unistar Hot Country. CKEY 101.1 Fort Erie seems to be dropping adult standards for a more contemporary a/c sound, although you will still hear some big bands once in awhile. New slogan: "Key FM 101.1". In Coastal North Carolina, WKJE 104.9, WKJA 101.1, and WYND 97.1/5 were not on. WTKF 107.3 Atlantic, NC is on, monophonic, and talk radio // WBTB 1400. WHOV Hampton VA is now on 88.1. WESQ 90.9 Rocky Mount, NC is on with mostly jc, and a limited schedule. WXGM 99.1 Gloucester, Va. is on the air with a/c. "Extra 99". WPTG 107.9 West Point, Va. is on the air, also a/c, "107.9 Sunny FM". WVES 99.3 Accomac, Va is now country "All the Time 99". WBYW 88.9 Grand Rapids is now run as as an on air broadcasting school.... "students" can go on air and play their music for a price. 96.5 Portage, Mi. is now WFAT, satellite oldies. 101.7 Muskegon Hts, Mich. is now being rented out by WSNX. Some WSNX jocks and apparently their relatives and friends do shows on WMRR 101.7 now, playing mostly album cuts and top 40 music, sounding like a high school station. Thanks Mark Strickert for some information.

Equipment: Mc Intosh MR78, Carver TX-11, Stereo Probe 9

#### BRUCE ELVING - P.O. BOX 336 - ESKO, MINNESOTA 55733-0336

Here is my DX in the last two months: WRWA \*88.7 Dothan AL, \$tereo, 6-13 ES: KEOM \*88.5 Mesquite TX, 6-14; KJAK 92.7 Slaton TX, 6-16, plus a bunch reheard, including KUHF Houston now on \*88.7 instead of 91.3 where I first heard it in 1951. WWIS-FM 99.7 Black River Falls WI was the first new station received, 6-30, after installing a new antenna on a tower at 13 meters, and recent tropo brought in WLLT 107.7 Polo IL 8-9-92. That morning I also reheard WTHI-FM 99.9 Terre Haute IN and WJVL 99.9 Janesville WI, coming through nearby WCDK 99.9 Virginia MN, without the benefit of phasing. Also got KEZT (formerly heard as KLFM) 104.1 Ames IA, smashing through nearby KJJO-FM 104.1 St. Louis Park MN, again with no phasing with no phasing in use. I question some of the reports in the August VUD attributing so much of the DX to phasing. If conditions are favorable, much of that DX would have come through anyway! DXers seem to forget that good old tropo has an amazing propensity to smash through strong nearby (even local) stations when conditions are right. We should be cautious about claiming for phasing DX which might have been received without the technique. Try testing nonphased reception of a DX station versus phased reception by disconnecting the main antenna lead from the phase box and plugging it directly into the receiver. This should be possible on a well-designed system, but not always feasible during a frenzied DX session when you have to keep track of several frequencies at once. 73ily, Bruce

STATION NEWS: 93.3 Killeen-Austin has changed calls to KMXX-it has had the "Mix 93.3" slogan for awhile now. Howard Stern's morning show now is also simulcast on KEGL in Dallas, and WNCX in Cleveland. In Los Angeles, KXEZ 98.7 is now upbeat a/c, "Star". 106.9 Conroe-Houston is going to pick up the "Z-Rock" format and ask for the calls KRZR. In Kansas City, KBEQ 104.3 is dropping its modern rock at night programming.

RALPH STROBEL - 106 E. DAVIDSON STREET - MUNCIE, INDIANA 47303 Equipment: McIntosh MR-78 FM Tuner with two CM Stereo Probe 9 antennas and rotors at 38 and 36 feet above ground with Bolin phase box. \*Made possible w/use of box.

Well, so 1992 sucked for E-Skip, but certainly not for tropo. Gee I lost count on how many times we have heard the NC area, Five or Six times I guess. Despite the amount of NC FM stations reported this year, North Carolina is not common on DX here, neither is Norfolk VA. NC might come in only once or twice a year at best, not six times! At Joe Fela's house on August 22, there was a DX get together with Bob Smolarek, Paul Mount, Steve West, Neil Mazaross, Leo Gluc and Dave Schmidt (NRC musings editor) and his son, and me too. The DX was just simply amazing there! With a bunch of Dixers from the NRC and the WTFDA, DX appeared in rare form. Joe had CFMX 103.1, CKOT 94.9 CDXY 95.3 and others from Ontario on tropo, along with WPVR 94.9 Roanoke VA, WCNC ch 36 from Charlotte NC appeared at 6:00 PM in the AFTERNOON!, some of the good stuff was during the day-broad daylight! Joe later had stuff on FM and TV from Western PA, not to mention South Carolina on FM too. Heb, who says DX don't happen during a DX get together?!? Note the widespread areas involved, surely DX like this approaches "Thanksgiving 86" status. I'm starting to hear of some of the incredible loggings during this Super Tropo period, just simply amazing to May the least! Bob Smolarek said he had West Virginia, and the guys in Delaware had stuff like Rochester NY and Ontamio FM's!

On other things, I've edited a lot of my loggings just to better catches only. About the Pereids, well I must have distance for some 20 plus hours over the course of four days or so and all I logged were just the three listed above. It seems that the December Meteor showers are much more productive than the Perseids. Maybe the Perseids were better When I was at work.

Well lets hope for a good fall tropo season for all. I still need Maine on FM, I keep trying for 102.9 from Portland, though i could phase out WDRC (same bearing as Portland), still over heard them yet. I know 90.1 could be a Chance but I have MUSB from Stoney Brook Long Island and Philly off the back to contend with. Goodxing!

## KNIFE EDGE REFRACTION

FRANK ADEN, JR., N7SOK

Over the mountain UHF DX is possible with the right conditions!

Most experienced TV and FM DXers are familiar with most of the common forms of TV DX propagation, Sporatic E-skip (Es), Tropospheric (trops), Meteor Skip (MS), Aurora Skip (AU) and even the rare F-2.

Another form of TV DX exists that many veteran TV DXer have never seen. That elusive propagation is KNIFE EDGE REFRACTION.

KNIFE EDGE REFRACTION (KER) (also know as MOUNTAIN BENDING) can make UHF reception possible on the opposite side of high peaks or mountain ranges even when they exceed altitudes of 14,000 ft!

The theory behind KER is when a mountain peak or range is approximately mid way between a VHF station and a receiver the signal may be bent or refracted by the mountain, making reception possible.

Because few DXers have been (not always easily accessible) where this form of DX happens it has been rarely reported. When DXers have been at these sparse locations some of the most incredible and spectacular DX ever has been seen!

Just because a mountain exists between a receiver and a VHF station can KER be expected to be found. The altitude of both the transmitter and receiver must be taken into consideration. The power of the transmitter must be high enough that the distance to the mountain is not too far so as there is not a strong signal at the base. If not, there will be no signal to be refracted.

Since many UHF signals can be seen at 100 to 150 miles (depending on power and antenna height) it can be possible to see transmissions extended by KER up to and possibly more than 300 miles. The area where the reception occurs could be called a "window". It is limited to a small zone approximately equal in distance from the mountain as the station is from the mountain.

The mountain does not necessary have to be at the halfway point for KER to occur. If the transmitter is at a lower elevation than the receiver then the reception area will probably be closer to the mountain than the transmitter. If the receiver is at a higher elevation then the opposite will happen.

The shape of the area of reception may resemble a half moon or

crescent moon but only in "perfect" situations.

A VMF signal is intersected by a mountain range and the refracted signal appears on the other side. In actual KER situations the size and shape of the "window" will be different since the size of the peak, shape of the peak and elevation of both transmitter and receiver will have a major effect on the formation of the KER signal.

URF DX reception in the 300 mile range is not a major distance when compared to the other forms of UHF DX propagation but considering the signals are being heard over a mountain range it has to be rated definitely unique.

I have found mountain ranges with sharp peaks & less than 200 miles across to be the best for KER. Where parallel mountain ranges exist the effect is usually destroyed except for within valleys

existing between them.

I first started TV-FM DXing 22 years ago in southern Idaho and for the first three years I was only familiar with the more well know forms of VHF DX. When I moved to Bend in central Dregon, (just a few miles from the Cascade Range) I discovered KER for the first time. My first DX location in Bend was on the east side and I could see Mt. Hood, 11239 ft (100 miles distant) and Mt. Jefferson, 10495 ft (75 miles distant) from my roof top. To my surprise I found reception of KOMO ch. 4, Seattle WA (290 miles distant) to be regular yet Mt. Hood was directly in line between Bend and Seattle. I was also surprised to find reception of the other Seattle-Tacoma stations to be rare.

Bend's elevation of 3700 ft compared to KOMO's elevation of approximately 1000 ft. could explain why I was able to receive the station when I was almost 100 miles closer to Mt. Hood.

The most dramatic KER reception I encountered also occurred in

central Oregon. On a return bus trip from British Columbia I had a small battery powered TV. About 20 miles from Madras, Oregon on US MWY 26 I suddenly began receiving local signal strength reception of both KEZI ch.9 and KVAL ch. 13, from Eugene Oregon (about 100 miles distant). Looking on the map I noticed that Mt. Jefferson (25 miles distant) was directly between me and Eugene! For about 15 miles the signals remained constant but once I was out of Mt. Jefferson's shadow, the signals disappeared. It is interesting to note my elevation at the time was around 4000 ft where as the Eugene stations are less than 2000 ft.

DXer & KBOI CE, Bill Frahm and I have both noticed many times while traveling from Boise, Idaho to Eugene, Oregon it is possible to listen to Eugene & other Willamette Valley FM stations (over the Cascades) for several miles between Burns, Oregon and Bend, Oregon but as we became closer to the mountains the signals begin to fade out. Just recently Bill Frahm and I passed through the area (on return from the Seaside ARRL Convention) and found central/Southern Willamette Valley FM stations audible from 60 to 90 miles east of

It would be interesting to see if KER is possible over the Ozarks or Appalachians and if UHF is effected. I suspect if there are any KER UHF reception areas they may be extremely hard to find. They would probably be very small due to the tighter UHF signal angles

As a member of the WORLDWIDE TV-FM DX ASSOCIATION I have discussed some of my KER experiences with other members at several of its conventions. I found very few TV-FM DXers have given KER much thought. I would be interested in hearing from anyone who has seen KER DX.

On a final note, I believe KER could explain the reason for

several unique VHF DX openings that have been reported.

One such reception happened in either 1961 or 1962. One evening while watching KTVB ch. 7 in Boise the station broke into network programing announcing several people had called in to report they were receiving a station on normally vacant ch. 8. I changed the set to ch. 8 & found a unidentified weak station coming in. Since my parents wanted to continue to watch their program I was not able to watch the station but I did do a band check before returning to KTVB and found no other unidentified stations. A short time later KTVB made an announcement they had tentatively identified the station as KULR in Billings MT (500 miles distant). At the time I was too young to know anything about propagation but when 1 started TU-DXing in 1970, I kept thinking back to the time of this strange reception. No normal form of DX could explain how reception of KULR could happen in Boise. Ch. 8 is rarely effected by E-skip and If it had been occurring at the time ch. 3-5 would have been filled with DX. Trops is not known to make it over major mountain ranges at that distance but if it was, again other distant stations should have

I believe the reception (if it really was KULR) to have been the result of a combination of KER and Trops. It is possible KULR has/had a small reception area in the eastern portion of the Snake River Plain (north of Idaho Falls) where KER reception occurs. If a tropo front was passing thru the area, the KER signal could have been picked up and carried down the valley into Boise.

## WHETUHEUTILITY DX WEATHER - AIR - MARINE - PSB

BILL HEPBURN - 35 LOCKWOOD RD - BRAMPTON ON - L6Y 417

It's the same .. but it's different!

The "NWS News" column has been mutated and transformed into "VHF/UHF Utility DX" .. to encompass a wider spectrum of possible DX on the PSB bands between  $30~\rm MHz$  and  $1300~\rm MHz$ .

Matt Sittel, who did a great job as 'founder' and editor of the NWS News column since 1986, passed over the reigns of the column while on a recent visit to Ontario.

Keeping in the general spirit of the VUD and WTFDA , this column will remain essentially a  $\underline{DX}$  column. (i.e.— DX as in 'long-distance reception'). However there will be tidbits, hints & station updates from time to time.

Now opening up the entire PSB spectrum for DX reports could amount to hundreds, even zillions of loggings.. Therefore I would propose the following guidelines as to what to report.

- 1) PSB 'BROADCAST' STATIONS -- i.e. continue to report all loggings of '1-way' broadcast stations in the Weather. Air and Marine bands.
- 2) PSB via SKIP -- Yes, BN (yr ETVDX editor), send your reports here! Base stations only -- no mobiles. Also no amateur stations (although 6-metre propagation beacons or repeaters are DK).
- 3) PSB via TROPO -- Again, base stations only -- no planes, trains or automobiles! (Remember, jets a  $30.000^\circ$  are supposed to be able to get out for 250-300 miles!). Please try to limit your relogs to 75-100 miles or more (otherwise that word 'zillions' may pop up again).
  - 4) Send in YOUR loggings today!

Now these are Just general guidelines .. any & all comments will be appreciated!

#### LOSSINGS

Well .. right now I only have my own. Matt will be forwarding any remaining reports he has soon .. so on to the DX!

This month's feature ....

VHE/UHF UTILITY DX

UNITED STATES COAST GUARD
MARINE INFORMATION BROADCAST STATIONS

157.1 MHz - MARITIME CHANNEL 22

The USCG maintains an extensive network of radio stations broadcasting weather, notices to shipping, and/or hydrographic data to public, commercial & government marine interests. These stations are sub-divided into "Groups"... with each group simutaneously broadcasting from one central location through a network of repeaters. Unfortunately, all of these repeaters operate on the same frequency - 157.1 MHz - so it is difficult to know the exact location of the station you're receiving. NOG Sault Ste Marie MI can easily be received in Duluth MN -- from a repeater in Duluth. NML-7 Memphis TN in Poteau OK, etc.

Rather than list all the individual repeaters. here I've listed the "Groups" and their broadcast times (in the 48 states only). Give them a try! Remember all broadcasts are on 157.1 MHz.

#### CROSLEY/AVCO--TELEVISION OPERATIONS

EXPERIMENTAL - pre-war: Under the guidance of Powel Crosley, Jr. (see last month's VUD) WLW's venture into television began in 1937 with the call letters W8XCT. The first experimental presentation was made via closed circuit in 1939, and another in 1941...the same year that W8XCT was licensed to operate on channel 1. (NOTE: Crosley then suspended all television experimentation for the duration of World War II.)

EXPERIMENTAL - post-war: Over-the-air experimentation began in 1946 with transmission periods increasing from an hour a week to over 20 hours a week by the time it was granted a commercial license.

COMMERCIAL DEBUT: February 2, 1948 marked the first use of the WLWT call letters when the Wiedemann Brewing company sponsored a Golden Gloves boxing match. The next day the W8XCT call re-appeared and the station again became an experimental service until February 9, 1948 when it began full-time commercial operation on channel 4 as WLWT. Apparently there was some question as to whether W8XCT could air commercials; and additional question as to whether WLWT was officially authorized to start up before the 9th. The legality of these call letter gymnastics is questionable, but no one seemed to complain.

THE OFFSPRING: It's clear that Crosley/Avco was fully committed to a regional television operation at a very early date. That fact is evidenced by the March 18, 1949 sign-on of WLWD in Dayton, OH (then channel 5); the April 3, 1949 startup of WLWC in Columbus, OH (then channel 3); and later stations in Atlanta and Indianapolis.

CHANNEL SWAPS: The first three stations (WLWT, WLWD and WLWC) were 'pre-freeze' license grants. Sometime between 1949 and 1952 a massive re-assignment of channels was instituted by the FCC; and all three of the Crosley/Avco operations wound up on different channels. Although the exact dates of the changes are not known, WLWT moved from 4 to 5; WLWD dropped from 5 down to 2; and WLWC eased from 3 up to 4.

SOUTHERN EXPOSURE: In 1953 the Crosley/Avco group purchased WLTV, channel 11, Atlanta from Broadcasting [Magazine] Inc. It's interesting to note that Broadcasting had acquired the facility from WSB-tv in 1950; and even more interesting to note that WSB-tv had originally been licensed to operate on channel 8. Under Crosley/Avco ownership the station became WLWA and remained a part of the group until 1962. Also of interest...channel 11 has operated as WQXI-tv, WAII-tv, and now WXIA-tv. That's a total of six different sets of call letters!

WHY ATLANTA? Good question. Little is known about Crosley/Avco's reason for acquiring the GA station. It didn't fit the profile of their existing group, and it was never interconnected with the Ohio stations (which were tied together from the start). An educated guess points to a major market VHF up for grabs at a decent price...but...one that turned out to be a 'square peg in a round hole' and was kept only until it commanded a handsome sale price (twice the purchase price) in 1962.

[TV TIME TUNNEL - Crosley/Avco - continued...]

BASTARD STEPCHILD?: One would think that the corporate gurus in Cincinnati wanted to hide the Atlanta operation from the public eye. In several promotional pieces issued by Crosley/Avco in the mid 1950s there is no mention of WLWA. The channel 11 call does show up on letterhead, however seems to disappear again after the inauguration of WLWI.

INDY INVASION: October 30, 1957 marked the launch of Crosley/Avco's fifth (and last) television property, channel 13, WLWI in Indianapolis. WLWI, like the Ohio stations, was built from soratch; and was interconnected by terrestrial microwave links with its sister stations in the Buckeye State. Although WLWT was the key station, the other three originated their own programming and programs were routinely swapped between all stations in the group. The channel 13 operation (springboard from then-weatherman David Letterman) was sold in 1975.

FOR SALE!: Although the Indy station was the first to go (excluding Atlanta), Avoc [Crosley had been dropped by this time] decided to get out of the business of tv ownership. The other stations were sold within months...Columbus in December 1975; the 'Mother Ship' - WLWT in January 1976; and Dayton in April 1976. Not even the 'Crown Jewel'... WLW radio survived the corporate broadcast purge. Powel Crosley Jr.'s dream had passed through a reality of fame, power and superpower; and was in the hands of new owners in March of 1976. The Crosley/Avoc chapter in broadcasting (actually it was more like a book than a chapter) was closed.

ABOUT THE CALL LETTERS: Although the FCC assigned what appeared to be standard four-letter calls for the Crosley/Avoo stations, they were never presented as such either on the air or in print. Perhaps in Powel Crosley's tradition of gimmicky names for products, the owners elected to insert a - after WLW...thus WLW-T (Television), WLW-D (Dayton), WLW-C (Columbus), WLW-A (Atlanta), and WLW-I (Indianapolis). The only other station to identify in a similar menner at the time was "W-TWO" (channel 2) in Bangor, ME.

ETCETERA: Two of the three iconoscope cameras built for W8XCT were later used for film and slide pickups at WLWD. --- WLWT became the first NBC affiliate in the U.S. in April 1948. The station aired kinescope films of network programs until it was connected with New York via co-axial cable in late 1949. --- Many now famous personalities made their debuts on the Crosley stations; among them, Phil Donahue. Donahue began his television career at WLWD. At first the show was aired only on the Crosley/Avco stations, but later went into syndication...continuing to originate from Dayton until 1974. --- "Boston Blackie" was produced by WLWT in 1949..the series went nationwide a few months later, continuing to originate in Cincinneti. --- WLWT had an impressive roster of live programming including "The Midwestern Heyride" and "The 50-50 Club", hosted by Ruth Lyons. Both were originally radio shows, both were adapted for television, and both were simulcast on all Crosley stations for many years. - - In August 1950 WLWT began origination of programs for the NBC network. "Cincinnati at Sunset" and "Dude Ranch Holiday" were seen regularly nationwide. The network was so impressed with the talent and production quality that it later added "Midwestern Hayride", "Straw Hat Matinee" and the long-running Ruth Lyons "50-50 Club." - - In 1950. NBC picked up another WLWT origination, "Breakfast Party". - - WLWT was a pioneer in color telecasting. In fact, the Crosley/Avco engineers adapted three RCA TK-41 color cameras with special low-light pickup tubes to air a nighttime baseball game from Crosley Field. It was the first-ever telecast of a nighttime game, and the technology was largely credited to the WLWT engineering staff. - - Other big names and special accomplishments connected with Crosley/Avco are too numerous to detail here...suffice to say, there were many!

EPILOG: This remarkable broadcast conglomerate all began because one man built a wireless receiver for his son in 1921. American ingenuity and free enterprise still produce such success stories, but they are seldom as dramatic as those of broadcast pioneers such as Crosley.

### [TV TIME TUNNEL - Crosley/Avco - continued...]

With special thanks to the large number of people who contributed data for this study, "TV TIME TUNNEL" concludes its visit to WLW-Land with a montage of historically significant material pertaining to and (for the most part) prepared by Crosley/Avco. I've submitted several pages, but given our Editor-In-Chief a free hand to delete whatever might be necessary to satisfy space requirements.

WLW-C, Columbus, Ohio

WLW-D, Dayton, Ohio

WLW-I, Indianapolis, Indiana

## FACTS ABOUT WLW-D DAYTON, OHIO

ESTABLISHED MARCH 15, 1949

CHANNEL ..... 2154-60 megacycles) POWER .... Visual, 100 kilowatts Aural, 50 kilowatts

ANTENNA Height, 508 feet above overage terrain

EQUIPMENT .....

3 Field Cameros
2 Film Projectors (16 millimeter)
1 Automatic Silde Projector (2" x 2" Leico or Esco metal mount.
Message Area: %" x %" centered)
1 Standard Silde Projector, 2" x 2"
1 Bolopticon (Card Size: 14" x 15". Scanning Area: 5" x 7")
1 Mobile Unit with micro-wave relay and associated equipment.
Three-camero pickups possible. Service the 3 WLW-TV stations.

STUDIOS ..... Television Square 4595 South Dixie Highway Dayton 9, Ohio Telephone: WAlnut 2101

Studio A, 60' x 80'

TRANSMITTER ..... Frytown and West Carrollton Roads, Dayton, Ohio

OPERATION . . . . Licensed to operate full time. On the air Monday through Friday from 6:45 a.m. until approximately 1:30 a.m. On the air Saturday from 7:15 a.m. and Sunday from 8:30 a.m. until approximately 1:30 a.m.

Inter-connected with Cincinnati and Columbus.

NETWORK ..... NBC

## Radio and Television Stations / NEW-E CHEMINATE - WILW-D DAYLOW

The Jack Denton Show at WLW-C, Columbus

George Willeford hosts "Exercise in Knowledge'' at WLW-I, Indianapolis

Buth Lyons' 50-50 Club originates at WLW-T

The Jimmy McClain Show at WLW-D, Dayton
