NEW STATIONS ON THE AIR

There's been some dispute over whether this station is indeed on. It was granted an operating license in early February. I list 5000kW / 62m at 24°33′18″N, 81°48′07″W.

OTHER STUFF

Just to show that the "high channels" 70-83 are not yet dead. the FCC has renewed the license of state. On the other hand, a high-channel translator in Washington extreme northeast corner of course, Cedarville is about as iso-K71AF Cedarville, California. State is about to disappear: K78BM lated as towns come; it's in the Of

(Other Stuff, contd.)

Point Pulley has been given permission to move to channel 67 and become K67GJ.

Another station whose operational status is in question is WVBT-43. The construction permit was sold in late January, indicating this station does not yet hold an operating license, though they may have been testing under authority of the CP.

Note that most of the call letter changes above are LPTVs tak-ing advantage of the new rules allowing LPTVs to adopt four-letter calls. My reference doesn't list call changes as such- I only have these because they applied for technical changes- so if you note any of your local LPTVs signing four-letter calls, please let me know.

The "Changes On Air" section is for stations that have requested, or been granted, license modifications to cover previously granted construction permits. The date is that of the VUD in which the original application or grant appeared. A station's appearance in this section means the new technical facilities are on the air.

There are some inconsistencies about the new transmitter site of WTVU-59. Differences in geographical coordinates disagree with the description of the site, and taken one way, it would appear the 100kW ERP wouldn't reach the city of license. However, I suspect the ERP should really read 1000kW.

WINT-20 Crossville, Tennessee has been sold and may return to the air someday. Also, in New York, WNYW-5 has sold their translator W64AA to WPIX-11.

First-week ratings are in for the new WB and UPN networks. UPN's "Star Trek: Voyager" won the first half hour of its Monday 8pm timeslot with a 13.0 rating, beating CBS's The Nanny (12.8) and Fox's Melrose Place (12.7). UPN was in second place for the entire Monday lineup with that 13.0; CBS won with 13.7. On Tuesday, however, UPN ended up dead last with a 3.7 rating; the mext lowest numbers were CBS's 9.4. Second week numbers aren't quite as good, though UPN remains essentially competitive with Fox.

Professionals seem to think WB is in trouble. Their first week numbers—a 1.9 rating on Wednesday—would seem to bear that out. They did a little better in their second week, but not much.

A Broadcasting and Cable article on TV IMAs notes that KTVK-3 Phoenix has signed an agreement with a KASW-TV, beginning in September. There are two open CPs in Phoenix, on channels 51 and 61; I suspect KASW is to be channel 51.

The new Republican Congress has prepared draft legislation that would enact major changes to the structure of broadcast regulation. Sen. Larry Pressler's bill would:

-Repeal rate regulation of cable.

-Repeal ownership limits on TV and radio stations.

-Allow broadcasters to use their "HDTV" channels for things other than TV, provided at least one free advanced TV program service is provided.

-Allow foreigners to own U.S. broadcast stations, provided their countries allow Americans to own stations.

-Allow cable operators to provide local telephone service, and allow telephone companies to offer cable TV.

Superficially, enactment of this bill would appear to lead to major changes in station ownership and, potentially, network affiliations. But TV stations are expensive, and economic realities may provide a limit to multiple ownership almost as effective as FCC regulations. I would expect to see more "duopolies", two stations in the same city owned by the same company.

The FCC has some ideas of its own. It's asked Congress to increase the length of a TV license from 5 to 7 years. The Commission also wants to end the comparative renewal system, under which a station seeking renewal of license can find their renewal challenged by third parties. Under the new plan, stations that obey FCC regulations would be automatically renewed, while those who commit serious violations would face an immediate hearing on their competatency to

(Other Stuff, contd.)
remain licensed.

Lowell Paxson continues to build his all-infomercial network. Starting with stations including WTLK-14 Atlanta and KZKI-30 San Bernardino, he's recently added WTGI-61 Philadelphia, KXLI-41 Minneapolis, and KTFH-49 Houston.

NETWORK AFFILIATION CHANGES

For the first time in recent memory, there aren't any!

MONO

John Lentz, Muskego WI:

Regarding WDJT's proposed new tower, John passes along information from a Milwaukee Sentinel item. WISN-12 tells the paper they aren't pleased with WDJT's choice of sites; it's only 65m (200') from the channel 12 tower. WISN says they fear both safety problems (either from ice falling from the WDJT tower, or from the tower itself collapsing) and technical problems. (the possibility the nearby tower will affect the radiation pattern of the channel 12 transmitting antenna) They plan to challenge WDJT's move. WDJT officials told the paper they think WISN's complaints are based solely on competitive concerns. Chances are, the truth lies somewhere in between!

Dave Sinclair, Vancouver BC:

Competition for cable systems is at issue in Canada, just as it is in the U.S.. A report in the Jan. 25 Vancouver Courier shows Rogers Cablesystems (which also operates a number of U.S. systems) demanding a CRTC hearing on the operation of a second cable system in the Concord Pacific housing development in Vancouver.

The second system, operated over fiber optic cables by a joint venture of the development and BC Telephone, offers rapid connection and lower rates; \$29.50/month for 40 channels, including a number of pay services. Rogers spokespeople told the paper a similar service on their system would cost \$72.50.

A CRTC public hearing was held in mid-February to determine whether Rogers will keep its monopoly over cable service in the development, or if the joint venture will continue to operate.

And from the Winnipeg Free Press, a decision on a new source of U.S. network programming for Manitoba cable systems. For years, the U.S. network signals in much of Canada have come by satellite from the Detroit affiliates. With increasing amounts of violence in the local news in Detroit, Canadian viewers have been asking for different U.S. stations to be

KARE

carried, stations from places culturally closer to Canada. In late January, the CRTC approved an application that will likely lead to Manitoba cable subscribers receiving WCCO-4 and KARE-11 instead of the Detroit stations. Similar approval was reached for access to Seattle affiliates in parts of western Canada. Changes still require negotiation of a contract with satellite carrier Cancom to deliver the signals.

John Combs, Orlando FL:

Unfortunately John didn't get in on our mega-tropo to Florida in mid-January, though he did make up for it with some good Gulf Coast loggings in early February.

His local W40AQ is trying yet another format. "I think this Kissimmee LPTV must now hold the record for most programming formats tried. None have lasted more than a few weeks, some only a few days, and in between these sporadic spurts of actual programming they run color bars 24 hours a day for weeks on end."

After a stint with "SUR" Panamerican TV, they're now relaying WilBM with The Box. John says "WilBM already has one of the better LPTV signals in the areamaybe they hope to cover the resort areas near Disney better this way. (I'm sure all those tourists have nothing better to do than sit in their rooms and order overpriced music videos via a 900 number, hammn?)"

Ernest Wesolowski, Omaha NE: (Forum, contd.)

is expected on the air by May 27. The station will be LMAd by Fox affiliate KPTM-42, and will be part of the WB network. Frank; thanks Victor! - and from the 14 World Herald:) New KXVO-15 (via new WTV editor Victor

Local WB affiliate, KLGT-23, has become easier for DXers to ID. Shortly after the premiere of the WB network, KLGT began overlaying their logo continously on the screen during almost all of their programming (not over any of the infomercials of course). It is quite distracting as it is full color and completely covers whatever is behind it. (They also keep moving it from one corner to another.) They must be getting plenty of complaints about it as they have shrunk its size twice in the last two weeks. While the calls appear in the logo, they are probably too small to read with snow in the picture. The logo is unmistakable though as it looks very much like the WB logo with a large "23" and a smaller "WB"

Until next time... **73, Mike**

and white TV, and it's quite a DX machine! K18BT and K8BDH are now in here as strong as KNILC-24, KDNL-30, and WHSL-46! KZ1OD, K34BR, W57BS and K62EG have also seen improvements in audio and video quality, so it's a welcome addition to the shack! It got its first major use on the opening into northern Illinois, Indiana, northwestern Ohio, southern Michigan, and southwestern Onario. This has to be the best opening I've ever experienced, with WKBD-50 and WGFR-62 in for over ten hours, with a semi-local signal, local K62EG fighting it out on the channel with WGFR (normally, I only get WJR-AM 760 from there!), and noticed a Prime Time Live promo on Channel 42, thinking it was an ABC station. Then there was mention of Thu-sday was an ABC station on UHF. Early the next morning, my for just the promo on the crame of Thu-sday at 10 on CKCO⁻¹. Referring to my DAJJA TV Journal, it at 10 on CKCO⁻¹. Strict canadian on UHF. Early the next morning, my for just canadian on UHF. Early the next morning, my for just strong distance record (572 miles/9) 1 Fort Smith, AR) was shattered as CiCO19 from Sudbury, ON topped the mark by statered as CiCO29 iform Sudbury, ON topped the mark by 143 miles (229 kilometers). By Q400 several TV Ontario stations were in with their TVO⁻¹ logo, continuous EST time clock and easy listening music, with the Detroit stations (even WXYZ-7) in like locals. Also, the South Bend stations were in like locals, with WSBT-22 still in as strong as KNNL-30 when I finally switched off the set at 0545 on 1227. Thanks to the opening I can now confirm that the network switch has taken place in Detroit, with CBS going to WGFR-62 (CBS also owns WWJ-970 and WYST-97. in Motown), and For going to WJBK-2. Yes, an E-skip opening into Idaho and Utah rounded out the year, with several solit Lake City FMs in . On the local front, look for a network while KDNL-30 not only will pick up ASE in September 1995, but also a secondary Paramount affiliation by the time you read this. 16 tr

January 15-16-17 was yet another three days reminiscent of December 26-27, with channels 16, 17, 23 and 27 looking like VHFs! The first big supprise came on the afternoon of January 16, where WLS-7 poked through KHQA/WTVW. Then, an opening into Tennessee, Alabama and Georgia made it more exciting, reminiscent of the Detroit opening during December. I also saw my first exlocal on TV, in the form of WATL-36. No other Atlanta stations (not even WTBS-17) were in, not even WXIA-11 or WGNX-46 could get through under my locals! Did catch an unidentified station on Channel 61 carrying WWTO-35, who could this be? Chicago area DXen: I need a current address for WLS-7, the report sent to the 190 North State Street address are trumed 'undeliverable as addressed, left no forwarding address'. Where have I heard THAT before?

73 and good DX, Eric-N0UIH

Some hot tropo activity this week (lan 16-17) produced some good DX, all the way to the Gulf (relatively rare for this area).

Some of the translator call letters are missing because don't have an up-to-date list of them to refer to. Hopefully the new station guide will contain one.

The warmer-than-normal weather we've been having lately was responsible for the tropo activity. Usually, at this time of year, the Gulf is cut off from this part of the country because the subtropical jet moves south (with the sun), but the weather maps this winter has looked more like the summer's, with the jet stream further north (north of me) and as a result, warmer Pacific air and (in the case of this last tropo opening) subtropical air has made it this far north. The weather maps for the 16th and 17th show a high parked off the SE corner of the U.S., pumping moisture from the Gulf to this area, hence the DX. Usually a cold front is parked E. W across the middle of the country, and the subtropical air doesn't get this far north.

Kalamazoo;

Notes:

1. All weather.
2. Religion here to Dallas; not TBN or 3ABN; no IDs given 2. Religion here to Dallas; not TBN or 3ABN; no IDs given 3. KPOM-24 audio; to SSW
4. Lucked out on this one. A CW ID made it through the mess. TX LPTV #2.
5. Weird kind of buzz-tone here most of am to SSW 5. Weird kind of buzz-tone here most of am to SSW 6. STV with normal audio giving call sign and subscription info.
7. Shepherd's Chapel to SSW 9. TBN to SSW; rideo only 9. HSC to Pensacola: logged a few years ago but never IDed 10. TBN to E. I was talking to Frank Merrill over the telephone when they gave a CW ID that I beard on his end, but missed calls. Almost certainly one of the two needed TBNs from Ohio.
11. Vertical bat TP with letters "BBS" lower right 12. CB TP w/their calls & WUCM-19

This report has to be greatly abbreviated as I'm splitting on a long trip to Thailand and Burma in one day and am stuck for time. The Christmas opening produced awesome signal strengths from most stations. The Pensacola's were in snowfree.

Recently got an icom R7100. Compared to my R7000, sensitivity is virtually equal on channels 7-74, but slightly better on channels 2-6. It handles overload better than the R7000 but it is still FAR from perfect. The Zenith L, M, and N 1310 series 13° color sets (airca 1979-82) are still VASTLY better in that department as welf as being more sensitive on video on channels 60 and above. The video adapter on the R7100 gives a slightly better picture than the R70007s. The biggest advantage of the R71000 for me is all the extra memories (1000 vs. 100 on the R7000) and the fact that each memory can be changed by pushing either an "up" or "down" button rather than having to turn a little detented knob. My Carpal Tunnel Syndrome has improved dramatically since changing sets! Biggest complaint about the R7100 is its timy, black background S-meter. Very difficult to read precise antenna peaks to this aging baby boomer.

Danny Oglethorpe, P.O. 6688 Box 6688, Shreveport, LA 71136-

Equipment: JC Penny (RCA) 19" TV, Radio Shack 15-1718A V/U/F at 32' AGL, RG-6, Archer 15-1113B amp.

(No tropo relogs listed. All new stations underlined.)

On November 12 and 13, I had a narrow duct into the Houston area—900 miles—which lasted 24 hours. Channels 57 and 67 were in at midday.

On November 17, tropo was in all day to over 800 miles. First to Texas and Louisiana, and shifting to Mississippi by 1800. I saw the two Jacksons on channel 16 an hour apart. Very unusual.

Many minor openings to the south and east. On November 13, I saw C/B on channel 40 and 45 with a diamond-shaped symbol to the lower right. I assumed it to be London 40 and Wingham 45. On December 27 at 0500, I had an unidentified educational on channel 67 just south of Canton 67. Could this have been Baltimore? Will ID it next time. I saw Es twice around Christmas, but no IDs.

I am going to screen the remaining 25% of my UHF dish on a nice day. I am still amazed at the overall increase in directivity and increased sensitivity from channel 50 on up

It eventually encompassed an area from Jackson to Atlanta, ending with 750 mile WPMI-15. They ID Mobile, Pensacola, Ft. Walton Beach. I could not determine from coordinates whether their tower was in Florida or Alabama. I called and they stated their tower was 11 miles west of the Florida border on 1-10. They are 5 million, 1717 high, and 1830 above average terrain. I had tropo from 0350 on January 16 to 0430 the next morning. It was strong throughout the day, peaking at 2100

Geraldo was on channel 33 at the time. Possibly WHBR in Pensacola. Not enough info for a positive ID. Received Albany-31 two years ago whose transmitter is only 60 miles north of Tallahassee. Waited again to get a Florida UHF.

Three of my UHFs just went on the air, namely Memphis 50, Nashville (Hendersonville) 50, and Salem, In. 58. Best tropo ever to the south and southeast.

Frank Merrill, P.O. Box 669, Macomb, IL 61455

Deadline: 5th

1995 has started with great tropo on January 17th and 18th! South Florida to Tennessee is amazing. Reports of late December tropo are still coming in. Skip really hasn't been up to par for the season.

through. At 1am local time (12am CDT) the CCI vanished abruptly, do they sign off then? NOTE 2: CCI pattern against CFMT that matched WTVP's offset, and occasional "PBS sounding" audio breaking

in there at 5:30 I even waited till 6pm. when I saw a bigger logo. this time with "Durham-Raleigh-Fayetteville" NOTE 4. This one is relatively new to the air. I think. Seemed to run exclusively "All News Channel" (ANC), and gave exactly matching CHCH, to the south. But I still was quite shocked when I saw the "News Center 11 WTVD" logo floating NOTE 3: I noticed some strange signals when coming home from work that evening, including a "floater" with offset IDs as "WBGN-TV Beaver County". Strong signal at times-watch for this one!

22TE 5: Assume this is the TBN peaking towards Richmond, they are on now, right?

Greg Coniglio (cont.)

"Wow. It has been quite an "off-season" for TV-trops. Judging by the wide area covered, as well as the excellent signal strengths, and distances, I would have to call the Dec. 26-27 opening the best TV tropo opening that I have ever seen. The channels were really loaded, and some awesome signal strengths at times for things that were over 500 miles! This could possibly be due to the "El Niño" weather pattern originating in the South Pacific. Judging by this year, and previous El Niĥo years (1985-87, 1982-83), maybe we could rename it "El Troppo", hi." big opening, the local temperature at 3 in the morning was 67 degrees! Average highlow this time of year is 30/16 the October opening. This has coincided with warm temperatures, and more than the average days of warm, moist on FM. despite seeming to affect all of the VHF?? A nice trio of super openings now this fall wrinter, these two plus 15 as well, but couldn't pull them through Erie and Parkersburg. Sadly, neither of these openings seemed to do much that night "may" have been WAWS-30 FL. In any other circumstance I would think it was crazy, but that night quite opening, it made up for it by being to an extremely rare area. The Carolinas. First ever TV opening to NC for myset high pressures, instead of the usual cold Arctic highs greeting Buffalo this time of year. On January 13, just before the possible! (North Carolina DXers were getting a Florida opening). I had tentatives on WTAT-24 and probably WPDE January 18-19 was no slouch either. While the numbers were not as great, and signals were off compared to the earlier their first ever opening on TV to SOUTH Carolina that evening as well, and one untD signal that made it up here late although the Hurricane Andrew opening did touch Outer Banks on FM for me in 1992). Some other local DXers had wish some of the closer stuff could have signed off though, or not be as strong, hi. Definitely a nice Christmas present

Jeff Wolf, 2217 Drury Road, Silver Spring, MD 20906

Skip noted on January 1st at 0005, January 7th at 2350 and some tropo on January 13th at 2230 which brought in 0 cci to semi-locals WCAU-10 PA and WHYY-12 PA. Also a CH. 21 with PBS programs was seen. (WLIW-21 NY ? sw)

Joel Rosenberg, 19 Glenayr Road, Richmond Hill, Ontario LAB 2W3 Canada

Eastern TV DX

March 1995

Doug Smith (cont.)

Note #1: Note #4: One of my old locals. First Michigan by tropo. Previously, by skip. (WJMN-3) First Canadian ever by tropo. (even counting DXing from Wisconsin) Spent about 40 minutes trying to ID a 16 I thought was CHWI-- nope, WMTU off the side... Membhis, new to air. ID in vertical interval "WFBI TV-50 MEMPHIS TN". Running HSC.

"Whatta week! (Jan. 16-18) This has to be the best week of tropo I've ever seen. 43 new stations were seen, in 15 states. The 759-mile distance to WTVX and WPBF breaks my previous tropo distance record (Houston) by 79 miles. Much of the opening was UHF-specific though, with little or no FM beyond 300 miles noted."

William R. Hepburn 35 Lockwood kd. Brampton ON L6Y 4T7 CANADA

NOTES: Talk about two dynamite months of DX! Christmas are and early Christmas morning saw a messive opening to the MNN with about everything from Quincy, Champsign, Peoris, Springfield (IL & MO), St. Louis and Joplin at or near s/f. 1/8 during 45 minute MKRN ap I logged 9 Ms bursts from KUSO plus 10 bursts of 3/4 ob w/id that I couldn't read. A week later WKRN had a 90 minute sp with similar Ms results. 8 KUSO blips and twice that many unids with various programming and bars. THE YOU-KNOW-MAIT HEALY STATIED HITING THE FAN THE EVENDAS OF JANUARY 15...AND NENT FETTY NUCH ANN-STOP THAU THE MEE HURS OF THE 18th. The chartel 11 Neples logging best by old hit (10 in Rochester, NN by 107 miles and the 25 from Tequesta (Nest Palm Beach) bested by previous U distance record (27 in Cadillac, NI) by 201 miles! Doug Smith and I were on the phone during most of the FL opening and although we got a lot of the same stuff, the 25 miles between us [plus elevation and equipment variations] seemed to make a significant difference. Ed Pheips tipped us off to the FL stuff (we found the rest on our own). Overall it was one heack of an opening...st one time on the 16th the opening extended from Columbus, 6A and Montgomery, AL to Wauseu and Madison, NI. Hope this is a sample of 1955! 73s - Tom

For DXers in: MA,NH,VT,CT,MA,RI,NY,PA,NJ,OH,MI,IN,IL,WI,MNJA,NE,SD,ND,MT,WY,ID, WA,OR,AK,Canada

MARCH 1995

DEADLINE: The 5th LOG CUTOFF: 3 months from postmark

Not much to see a thic size. See a few control of the control of the

Not much to report this time. Some off-season skip openings were reported, especially in December. New Year's Eve was a surprise quality opening for some DXers. While several DXers noted some excellent trops openings during the period, the results on FM just were not the same as what they were on TV. (I noticed that myself-my TV report from Jan. 16 will be much bigger than the FM report that will appear in this column next month, hi). Some meteor scatter reports too, but nothing major. If you have heard any DX lately, feel free to let us know. We are looking forward to hearing from you! ...

BOB SEYBOLD - 76 E. 6TH ST. - DUNKIRK, NEW YORK

Decided to report a little FM DX as I observed some on the Dec. 27th opening-0800-1700 some heard WMEE 97.3 Ft. Wayne, IND; WOSU 89.7 Columbus, OH; WOSP 91.5 Portsmouth, OH; WCCW 107.5 Traverse City, MI, WDFB 88.1 Danville, KY; CBLU 94.3 Huntsville, ON; CICX 105.9 Orillia, ON; CBCO 91.5 Orillia; CJQM 104.3 Sault Ste Marie, ON; WYSS 89.3 Maumee, OH; WHMQ 107.7 N.Baltimore, OH; WWBK 98.3 Fredericktown, OH; WQLX 102.3 Galion, OH; WCMM 94.7 Gulliver, MI; CHAS 100.5 Saulte Ste Marie, ON; WLDE 101.7 Ft. Wayne, ID' WQHK 105.1 Decatur, IN; CIQB 101.1 Barrie, ON and other Barrie FM's in strong; also stations in western Ontario; WHIC 94.3 Hardinsburg, KY, WLHT 95.7 Marquette, MI; WXLN 105.7 Eminence, KY; WWCK 105.5 Flint, MI -several others heard, but not logged, mostly Indiana, Ohio, Michigan, and Ontario- TV trops were better. Peak period was 1000-1300

Winter has been el stinko, although December 31st sort of made up for it. There was double-hop on 50 mHz (6 metres) into Tennessee, Mississippi, Louisiana, and Texas and for one lucky Seattle ham: a quick contact on 144 mHz (2 metres) to Nebraska. The FM footprint on this opening was fairly small, so stations heard were in the clear without multiple signals competing for dominance. Note my new mailing address - my home QTH remains the same. Best of DX to all in '95 73\$, Mike

Bueneman, cont.

Is January turning into a big trop month or what?!? Last month, it was Michigan, Indiana, Ohio and Ontario on VHF-High and UHF TV, then New Year's Eve E-skip into Utah and Idaho, now this opening into Alabama and Further east into Tennessee, where I also received TV stations from Montgomery, Anniston/Gadsden and Phenix City/Columbus, GAI Could FM trop into Atlanta be far behind? This could turn out to be the best trop winter the could find the could I ever had, rivaling the winter of 1988-89, when I DXed from Woodstock, GA! I don't know if I could prove this Height Above Sea Level thing moot in affecting FM DXing; I'm some 600 feet lower ASL than I was in Woodstock! I even had my former state(GA) on UHF TV, but could never get past the Appalachians via trop on FM, not yet!

made it in, but the Columbia/Jefferson City television stations were in well. Less than 24 hours later, it was central IL stations making their presence felt, still without any sign of the TV stations from Springfield, Champaign, Decatur or Pecria(not even "barcmeter stations" WAND 17 or WICS 20!). WEBQ 104.1's unexpected silence on November 12(their transmitter is six miles N of the QTH]allowed me to net four new stations, two on 104.3 and one each on 103.9 and 104.1. In fact, WIKY was a trop regular when 104.1(as WIBM) signed off at midnight. Also confirmed the frequency change for KRNA from 93.9 t 94.1 when they were dominating the channel on November 13. The opening on Dec. 26-27 was colossal on UHF and TV 7-13, with stations from southern MI, northern IN, northern OH and southwestern ON in, but it was rather lacluster on FM and the low TV(2-6), only yielding a new IL station(WZFX 106.7) and a station needed for a call change(WFXI 90.1). I had expected Detroit to come in on FM as well, but that opening was only good above VHF ch 7. Es ended 1994 with an opening into ID UT, KIDK-3 and KFVI-6 came in from the Pocatello/Idaho Falls area, making for summer-like conditions on a cold December night! Total stations heard as of 1/1-95 stands at 191. 73 and good dx from NOUIH. WYDS 93.1 is now on the air and DX ready with Hot Country, in direct competition with MDZQ 95.1. That means that I'll only need WJMU 89.5 to complete Decatur, but with KCTV parked on the frequency, plus KOPN and KOKS dominating after KCTV sign-off, it'll be a hard haul at best! With that memorable E-skip summer behind us, let's hope for another god season in '95! In the opening of October 27, none of the Springfield, MO TV stations

cont. next page....

John Jefferson, 4104 Spyglass Ct., Antioch, CA 94509-6051

Guess it's time I rejoined the active reporting group. I've been on the road so much since 6/93 that I just haven't found time to report what little DXing I've had time to do. However, December gave me a belated Christmas present or early birthday present or early birthday present. If 12/31 isn't the best DX day EVER outside of the summer season, I'd really like to hear wht beat it especially for distance!
As usual, new are underlined. An "@" denotes new to Antioch and a dashed underline The week of Jan. 16-18 was even more productive on UHF, with 700+ mile reception into deep FL. But the late Dec. skip openings was nothing to complain about! The Tennessee DXer should never attend a New Year's party; there seems to be a better than even chance 79 46 47 5 1437 KRRA 9.3.3 MV Alexandria, calls 1436 (SCRA 94.5 ND Bismarck, KQ-94 1439 KQDY 94.5 ND Bismarck, KQ-94 1233 1539@KYCK 97.1 MV Crookston, Valley's 97 1440 KQAA 94.9 SD Aberdeen 1309 kick 1440 KQSA 96.9 MI Minocqua, call 1377 1541 KGAC 90.5 MV St. Peter, c//91.1//91.3 1446 MCQM 98.3 MF Park Falls, calls 1698 1555@KGWN 100.7 MV Gillette 95.4 (moving back to 98.3 from 98.7) 1452 1607 KPSD 97.1 SD Faith, IDD 1484 KSSS 101.5 ND Bismarck 1452 KCCM 191.7 MV Bccanaba, calls 1517 1608 CSM 98.3 ME Winnipeg, CBC Stereo 1477 1453 WXKX 104.7 MV St. Cloud, calls 1517 1608 CSM 98.3 ME Winnipeg, CBC Stereo 1477 1453 WXKX 104.7 MV Bccanaba, calls 1517 1608 CSM 98.3 ME Winnipeg, CBC Stereo 1477 163 WXKX 104.7 MV Bismarck, Kiss 101 Bismk 1652 KSEZ 97.9 IA Sioux City's ROWN 91.5 MV Milmar, Granite F.,ph/ 17/2 SL 1459 WXXX 97.1 ND Minot, Kix Cntry 1255 (J91.7)/91.3 WI Rhinelander, DI 17/2 SL 1459 WXXX 97.1 ND Minot, Kix Cntry 1255 (L95 WXX 97.1 ND Minot, Kix Cntry 12/3 0955 1205 1745 1210 1220 1300 12/4 0015 0020 0024 2005 12/5 0915 0930 0945 2220 John 12/2 0001 2150 1354 Hank Holbrook, 407 Arundel Road, Fair Haven Cliffs, Dunkirk, MD 20754

BILL NIENAJADLY - KF2OK - P.O. BOX 2999 - CLIFTON, NEW JERSEY 07015

up a decent analog tuner. (Strange, I had 3 Pioneer analogs and they worked fantastic..when they digital and less selective tuners to DX with. Maybe this spring I'll visit some hamfests and see if I can pick analog tuner bit the dust (the narrow mode doesn't work, as usual) and I have been using my other two there was some scanner and TV skip on Jan. 7th, and that's about it DX-wise. Once again my TX-9800 station coming in often on 92.9. There was some NC trop in December which I missed. Here in January FM here. Regarding the meteor scatter, I did not have much time to DX that mode but I noticed a classical worked..but they all bit the dust). So this time I'll look for something else. Until then...GOODXing! Bill though Bob S. said he had FM skip on Dec 7. I did check several times that day and noticed nothing on In December, there was e-skip on Dec. 7 and 8 and around the 20th, again most of it barely hitting TV There was e-skip hitting low band scanner skip with some skip reaching channel 2 around Thanksgiving

New Radio Stations in the Caribbean

from Bob Bittner - 2/19/95

During my 4-island trip to the Caribbean last week, I discovered some new stations on the air....

LaPorte who owns a station in France (and mentioned that he was going to sell the France station). The address is Radio Transat, Galerie du Commerce, St. Jean, 97133 St Barthelemy, French West has been around for about 10 years. miles east of Puerto Rico. The other FM station on St. Barth's is called "Radio St. Barth's" and Indies. Phone 011-590-27-60-62. St. Barth's Island is just 15 miles east of St. Maarten and also 140 American music, not necessarily of a relaxing nature though. The owner/manager is Chrisitan for people sitting in a long-chair (relaxing chair).' The format is a mixture of local, French & some site in the near future to a higher location. The translation of "Radio Transat" is 'a radio station are almost at sea-level on this very mountainous island. They will be re-locating their transmitter station which went on the air within the last couple of months. Their studios AND transmitter site RADIO TRANSAT - 100.3 FM - ST. BARTHELEMY ISLAND (French West Indies). I visited this

the services of his Freedom Satellite Network, along with locally-produced programs of blues, jazz and contemporary Gospel music. They also have some ownership of the CP on St. John in the US Virgin Islands, and reportedly some interest in a station on St. Thomas, also US Virgin Islands. Address: PJR-1 FM Radio, Sint Eustatius, Netherlands Antilles. on at least 15 other islands. It is being programmed by a fellow from the states, and it will be using soon-to-be higher-powered FM station could likely survive due to it's signal (future) to be received This island has almost no retail economy, as it is home to only about 1,800 people. However, this the tower fell due to the salt corrosion/rust from the nearby breaking waves of the Atlantic Ocean PJE-3 on 1120 kc was on the air just for a couple years. It failed financially, and to top things off, on 1470 kc on the same island. There WAS a station on this island before... about 10 years ago nice spacious studios with new equipment. They also are planning on setting up an AM station Presently, the station is hardly audible in neighboring Sint Maarten, just 37 miles north. They have antenna, where the different bays will be used to direct the signal in advantageous directions. Eustatius (1,966') with an additional 40-meter tower, using a power of 5,000 watts with a 12-bay to have the new transmitter tower on the top of "The Quill" which is the higest point on Sint they told me they got the station on the air in a limited basis to secure the license grant. They plan antenna is mounted on the side of a house, not too far above sea level. Like the St. Barth's station, (actually using government-assigned call-letters!!!) went on the air in January 95. Presently their PJR-1 FM - 92.3 FM - SINT EUSTATIUS (aka "STATIA") (Netherlands Antilles). This station

TIME TUNNEL GOES COMPUTER.....

Nashville, TN 37221 - 815-646-2000 Tom Bryant - 849 Todd Preis Br. Written for the WIFDA/VUD by:

minimal word processing capabilities. About a year later an
upgrade was made to a full blown Smith Corona word processor. hammered out on a Smith Corona electronic typewriter with When I started writing this column some six years ago it was

omen that I should throw in the towel and make the move to a full-blown computer setup. But...old ways are hard to change, and I decided to buy an identical replacement. Twelve months later, that machine gave up the ghost...perhaps an

complexity of the new technology. DC-3's, I felt that I would be totally overwhelmed by the Like a lot of folks who fondly remember steam locomotives and

expensive hobbies to support...so the only option was to bite hell out of Dodge! Well, I like to eat...and travel...and have storage, I had no choice but to get with the program or get the cranny of WSM and as we made the plunge to digital audio Then, last summer, Gateway 2000's landed in every nook and the bullet and hope for the best.

the 'on-ramp' of the information highway at cyber speed. do... I was getting hooked on computers...and it was luring me to The WSM system captivated me... I was impressed by what it could

As I write this column (which [and I'm breaking my own rule by doing this] has absolutely nothing to do with to history), I have been experimenting with my 486DX2-66 for less than a week.

smear out with crayons. I wrote my mother a letter using
umpteen fonts and styles; I lost a bundle playing blackjack hunting and pecking; I've been able to compose and print a color sometime around the year 2014. paintbox piece that looks like something a first grade kid would tutorials, a lot of patience, and plenty of trial and error know what I'm doing with this whole kaboodle of technology I've concluded that with a little bit of luck I might actually against the invisible dealer (I think he/she/it) cheats); and Thanks to what I learned at work, some excellent software

After all, I wanted to fool with the computer, and I knew that I was facing a deadline for the March VUD. Besides, this peek at my early driving lessons on the information highway might just provide a welcome break from the usual topics. On the other hand, maybe it's not really as bad as I think.

And ... AT LEAST I DIDN'T fool around too much with the typestyles!
