WORLDWIDE TV-FM DX ASSOCIATION

SERVING THE VHF-UHF DX ENTHUSIAST

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION, DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCAST SIGNALS AT VHF AND UHF. W.T.F.D.A. IS GOVERNED BY A BOARD OF DIRECTORS: TOM BRYANT, GREG CONIGLIO, BRUCE HALL, DAVE JANOWIAK, AND BILL THOMPSON.

EDITOR/PUBLISHER: BILL THOMPSON COMPTROLLER: DAVE JANOWIAK
FM NEWS: GREG CONIGLIO CONVENTION CO-ORDINATOR: TOM BRYANT
TV NEWS: DOUG SMITH PSB: BILL HEPBURN SATELLITES: GEORGE JENSEN
CONTRIBUTING EDITORS: TOM BRYANT, DANNY BUNTIN, GREG CONIGLIO, VICTOR FRANK, BILL HEPBURN, GEORGE W. JENSEN, JEFF KRUSZKA, TIM MCVEY, FRED NORDQUIST, MATT SITTEL, DOUG SMITH, STEPHEN WEST, THOMAS J. YINGLING, JR.
LAYOUT: BILL THOMPSON. COVER DESIGN BY: HARRY HAYES.

FROM THE STAFF:

THE END OF AN ERA: Beginning with this issue, the paper used for all VUD cover pages will be white. New postal regulations are the primary reason for the change. Problems with getting colored stock at press time also played a role in the decision. Additionally, there have been complaints that text was difficult to read on the colored stock. To minimize shipping damage, the cover paper for the VUD will continue to be of a heavier weight (thicker) than the inside pages. Our track record for mangled copies seems to be much better than that of our sister radio clubs, both of which use regular paper for their covers.

HEADQUARTERS?... WE DON'T HAVE ONE! No one knows for sure when or how the trend got started, but for a long time many WTFDA members have referred to "Club Headquarters" in Buffalo. Sorry, there's no such place; unless you can stretch the definition of the word to include a mailbox. P.O. Box 514 is well established as our mailing address, but it's *NOT* headquarters. The club is not in the phone book, and you won't find a 34 story office tower in downtown Buffalo called "The WTFDA Headquarters Building". 'Headquarters' may sound impressive but it's a misnomer...in other words, *there ain't no such critter!*

AMAZING: Elsewhere in this issue you will find a report dealing with the club opinion survey published in the September 1995 VUD. Much to the astonishment of everyone, about 40% of our membership completed and returned the form. The extraordinarily high rate of response indicates that there is a great deal of interest in the VUD...and (perhaps more importantly) that apathy does not prevail. Thanks to all who participated.

UPCOMING: Next month...results of the balloting for our 1996 convention site. In April, the convention ball starts rolling again as we announce the opening of bids for the 1997 convention. Also in the works...the annual financial report.

HAPPY NEW YEAR: Your VUD column and feature editors, along with members of the Board of Directors wish you all the best in '96. The new year will bring about some operational changes for the club as we continue to keep pace with the times. As plans are formulated, you'll read all about it right here in "FROM THE STAFF".

WTFDA Mailbox January 1996

*** WTFDA Membership Survey Results ***

Thanks to everyone who took time to fill out the survey! A total of **131** surveys were returned. The results include all surveys received up to December 1, 1995. (Note: I did receive 5 more surveys by December 4, 1995 but I was unable to include them.)

The number in parentheses in front of each question indicates how many responses to that question on the survey were received. The percentages are based on this number.

(131) 1a. How many years have you been a member of WTFDA?

less than 2 years	13 (10%)	11 to 20 years	34 (26%)
2 to 5 years	27 (21%)	more than 20 years	26 (20%)
6 to 10 years	31 (24%)		

** The average response is about 11 years. Nice to see all age groups represented in the survey!

(130) 1b. What is your age?

under 30	9 (7%)	50 to 59	28 (22%)
30 to 39	41 (32%)	60 or over	8 (6%)
40 to 49	44 (34%)		

** The average response is about 43 years of age. One member is 83 years young!! Combined with 1a, this suggests that we haven't had many younger members join WTFDA recently.

(106) 2. How did you first find out about the WTFDA?

ad for the club in a magazine	33 (31%)
(Popular Communications: 10, Monitoring Times: 3)	
another radio club	24 (23%)
(NRC: 9, IRCA: 4)	
another DXer	24 (23%)
World Radio-TV Handbook	11 (10%)
FM Atlas	6 (6%)
TV Guide	3 (3%)
other	5 (5%)

(127) 3a. Compared to when you first joined, how often do you contribute to the VUD?

more often	15 (12%)
about the same	47 (37%)
less often	29 (23%)
I don't report	36 (28%)

** One foreign member wrote to say he didn't know he could report to the VUD. Everyone is welcome to contribute, and we hope you will. Let's make this the V-YOU-D!

(36) 3b. If you don't report, why?

no time / too busy / lazy	16 (44%)
little DX / poor location	6 (17%)
no equipment	4 (11%)
I don't DX	2 (6%)
other / no answer	8 (22%)

(131) 4. Please list which bands you actively DX:

TV	104 (79%)	Ham radio	14 (11%)
FM	89 (68%)	scanner frequencies	11 (8%)
AM	40 (31%)	BCB	5 (4%)
shortwave	16 (12%)	satellite	4 (3%)

(131) 5. Other than WTFDA, are you a member of any AM, FM, TV, ham shortwave, or other DX clubs? If so, please list:

NRC	39 (30%)	ODXA	4 (3%)
ARRL	16 (12%)	LWCA	4 (3%)
IRCA	15 (11%)	Decalcomania	4 (3%)
local Ham club(s)	11 (8%)	CIDXC	2 (2%)
NASWA	7 (5%)	10-10 Net	2 (2%)

** Only clubs mentioned by 2 or more people are listed.

(131) 6. Do you subscribe to any other hobby-related publications? If so, please list:

Popular Communications	26 (20%)
Monitoring Times	25 (19%)
QST	12 (9%)
Communications Quarterly	5 (4%)
M Street Journal	5 (4%)
FMedia!	4 (3%)
Broadcasting and Cable	3 (2%)

** Only publications mentioned by 3 or more people are listed.

(131) 7. How often do you read the following VUD features?

The most read features are:

- | | |
|---------------------------------------|---|
| 1. TV News | 5. Non-technical articles/special reports |
| 2. From The Staff | 6. Eastern TV-DX |
| 3. Photo-News | 7. (tie) FM News |
| 4. Technical articles/special reports | TV Time Tunnel |

** Every VUD feature was ranked as 'always read' by at least 25 members, so while your favorite may not be listed above, trust that there are many others who also enjoy the variety of subjects covered in the VUD!

(76) 8. Please list any subjects not currently covered in a VUD column that you would like to see in a new column.

The top responses were:

1. equipment/antenna reviews, comparisons and information
2. technical topics
3. return of the CCI column
4. "how-to", such as modifying tuners
5. interviews of DXers
6. bandscans

(131) 9a. The WTFDA recently had a dues increase. Do you feel, given current dues, that you get your money's worth?

YES 123 (94%) NO 8 (6%)

(131) 9b. Will this increase affect your membership renewal?

YES 6 (5%) NO 125 (95%)

** Some non-US members expressed concern over exchange rates.

(131) 10. Have you ever attended a WTFDA convention?

YES 52 (40%) NO 79 (60%)

(131) 11. Do you have access to electronic mail?

YES 41 (31%) NO 90 (69%)

(131) 12. Would you like to see a membership list published?

YES 121 (92%) NO 10 (8%)

** This is in the works for later this year.

(131) 13. Have you experienced any problems with receiving your VUD?

YES 48 (37%) NO 83 (63%)

(48) If so, please explain:

Most often mentioned were:

damaged VUD (ex. torn cover)	21
mailing delays/late arrival	14
missed issues	8

14. What is your primary DX antenna for the following bands:

VHF-TV:	Channel Master	23 (1110 (6), 3610B (2), 3617B (2))
	Radio Shack	18 (VU-190 (2), VU-160 (2), VU-110(2))
	Winegard	8 (various models listed)
	Jerrold	3

UHF-TV:	Channel Master	24 (4251/7" dish (9), 4250/6" dish (3))
	Radio Shack	16 (VU-190 (2), VU-110 (2))

Winegard	6 (various models listed)
Antennacraft	5 (P-7 (3), P-5 (2))
Finco	3 (7" dish (2))

WTFDA Mailbox, January 1996

FM:	Channel Master	30 (Stereo Probe 9 (25))
	Radio Shack	15 (6-element (5))
	Winegard	4 (6065 (2))
	Jerrold	3 (QFM (2))

*** Model numbers are in parentheses to the right of each brand name, as are the number of people indicating they use that model. Remember that finances don't allow everyone to have top of the line equipment, so this may or may not be a list of the 'best' equipment for DX. I think a separate equipment survey would shed some light on this. Any takers?*

15. Do you use a TV and/or FM preamp? If yes, please give model:

TV:	Winegard	23 (PA4975 (3), AC4990(2))
	Radio Shack	15 (various models listed)
	Channel Master	11 (Spartan II (2), modified Titan (2))
	RDX Labs	11 (UA-900 (7))

FM: 15 said yes, but no one model was mentioned more than once!

16. Do you use an FM tuner? If yes, please give model:

The top vote receivers:

- 6: Carver TX-11, GE Superadio, Macintosh MR-78, Onkyo T-9090
 3: Carver TX-11A
 2: Akai ATV04, ICOM R-7000, Pioneer TX-9100, Pioneer TX-7500, Realistic DX440

Top brands:

Carver	11	Macintosh	6
Pioneer	8	Realistic	6
Yamaha	7	Sony	6
GE	6		

17. Additional comments or suggestions: (selected responses, listed in no particular order)

"I would like to see a section or column where readers' questions or technical or other problems can be addressed for all to see" / "Can WTFDA reimburse the editor to get submitted photos professionally screened so that they will look better in print?" / "...would like to see the reporter's equipment listed more consistently, i.e. with every report." / "Would like to see VUD arrive between the 1st and 5th of each month. Would like return of column for unIDs"

"The reprint service operated by Tim McVey is not mentioned much in VUD, but the information available is a treasure for the DXer. The new openness at WTFDA is welcome. All WTFDA volunteers deserve a big round of applause!" / "If this club has any (logging) rules, they are seldom published, and are so vague, why have a stats column at all!? Nothing but a waste of time for sure!!" / "I wish I could report (on internet), or alternatively, if I could report to someone who has internet" / "I'd probably enjoy the DX columns more if the endless RELOGS were omitted." / "Didn't I read in an issue quite a while back (kind of a side-note) that there is or was an amateur HF

frequency for TV-FM DXers? I assume this would be an informal meeting place to communicate about openings? Could this frequency and information be listed in future issues if it does in fact still exist."

"On the membership list could you list ham call signs and packet addresses? ... Also needed is how to fight expansion of one station in the public bands to 25% of available frequencies." / "Doug Smith, Tom Bryant, Greg Coniglio, Stephen West and everyone else do an amazing job! Thanks!" / "I'd like to see more on digital TV and what that will mean to us, also a few articles on basic reception techniques." / "\$24 is steep. Do we need all those winter VUD's? If going to 10 issues/year would save money, I'd be for it (replace Feb.+Mar. with a "winter" issue)." / "Would like to know if there is an amateur radio WTFDA net on the air? If not, I would be willing to help start one." / "I feel on lengthy pages of copy, pages should be broken up some, using clip art to keep info readable and make for less eye fatigue." / "At the end of the year I would like to see a balance sheet printed in the VUD for 1995 showing expenditures and receipts in detail (no "cooked" figures please) to justify recent and previous rate increases. With all the free editors contributing to the VUD I find the subscription rates too high and would like to know where all the money goes and justification for it."

"More articles such as Robert Cooper's EXCELLENT article on UHF development. Also, more antenna articles." / "I would like to see cities listed after all loggings." / "Please add more technical articles" / "More emphasis on -and use of- geographical coordinates" / "How about an article on logging procedures. I'd like to start keeping real logs, but want to do it right." / "Try to keep dues under control...rates getting too high to attract new subscriptions." / "No more dues increases for awhile guys" / "VUD would be nicer, more useful, if it came out every two weeks (or better yet, weekly) during the VHF-UHF DX season from May to early September."

"When an article is put in there's no address (one had a good idea...but I) couldn't contact him about it or give info)." / "One 'problem' with this club is that it's hard for members to be in contact with each other; it's also hard to recruit new members since we meet only once a year. The membership list AND list of e-mail addresses MUST be published, to encourage people to get together." / "Devote more of each issue to member forums." / "Would like to see expanded Photo-News section. Would like to see updates in rules on what counts on totals." / "List club officers every issue of VUD." / "Since so many DXers are simply guessing at catches, the Statistics column doesn't mean anything anymore. In my opinion it should be terminated." / "I would like to encourage "group" DXing side meetings.... they give interesting results from more than one head." / "I don't like the current reporting format for the Western TV-DX column. I can't make sense out of it." / "What about advertising?? I would be interested in commercially advertising my firm's services to this select audience." / "In DX reports all sections by channel or frequency instead of date. Also too many footnotes. Put them in the main listings."

"Would like to see receiver reviews and more technical articles on antennas as well as receivers." / "Western TV DX has such small print... DXers should have to provide photos or tapes of real proof that they saw and heard everything they claim!" / "I enjoy the historical articles the most. I've even used them as a reference while answering student questions." / "The digest would be a bargain at \$36 per year!!!" / "I think that the TV DX columns also should include the cities of license for the TV stations, and the city of license should be counted, and not the transmitter site, since the signal actually originates at the studio location." / "Show photo copies of QSLs plus QSL information." / "Would like to see subjects on stations: hours, schedules, special FM tests for low power stations not normally on 24 hours or Monday mornings. With the WTFDA being a fairly large and spread out geographically club, I would like to see the VUD with different issues for 2 or 3 different areas. Have more than one convention or have a main one and one or two mini regional conventions."

Thanks again to all of you who took time to fill out the survey. The information you have provided is of great importance; with this we can make the VUD even better! Until next time.....73s Matt

WTEVA SPECIAL REPORT

coniglio@geog.buffalo.edu

• 1995 FM E-skip summary •

Reports are taken from the Northern and Southern FM DX columns up to the December 95 VUD. "All-time" records refer to the period 1981-1995, as that is as far back as my records go, as I do not have any access to earlier VUDs. Special thanks to Doug Smith for assistance compiling this summary! @ = new all-time record

THE TOP 20 OPENINGS OF 1995:

DATE	TOTAL	#rep	avg	MUF	high	TV-rank
1. July 1	712	23	30.96	ch.7	109	1
2. July 18	241	16	15.06	117.4	51	3

1995 TOTAL: 3746 74 days avg of 50.62 loggings per opening Average MUF = 104.00
1994 stats: 8567@ 84 days avg of 101.99@ loggings per opening Average MUF = 106.26
1993 stats: 2688 55 days avg of 48.87 loggings per opening Average MUF = 101.43

KEY (top 20 list):

TOTAL - total number of FM loggings reported on that day
#rep - number of DXers that reported hearing FM skip that day
avg - average number of FM loggings per DXer that day (TOTAL + #rep)
MUF - maximum useable frequency noted on that day
high - most FM loggings reported by an individual DXer on that day
TV rank - the ranking of this skip day in Doug Smith's 1995 TV E-skip report.

KEY (breakdown by month):

TOT - total number of FM loggings reported during that month
days - number of days that month that FM loggings were reported
avg - the average number of FM loggings per DXer per day during that month
avg MUF - the average maximum useable frequency noted for skip openings during that month
rank - how this month in 1995 compared to the 'all-time records' (1981-1995)

8

SKIP RESULTS BY MONTH:

MONTH	TOT	#days	avg	rank
FEBRUARY	7	4	1.75	94.0
APRIL	2	1	2.0	6th
MAY	406	16	25.38	101.10
JUNE	891	21	42.43	105.18
JULY 2249@	23	97.78	105.90	1st
AUGUST	143	5	28.6	98.74
SEPT.	0	0	0	15th
OCTOBER	14	1	14.0	1077

1995 TOTAL-SEASON RANK: 8th

(rank is for seasons 1981 to 1995. No ranks compiled outside April-Sept. at this time)

1995 SKIP SEASON - LOGGINGS EACH DAY

MAJOR OPENING (200 loggings): 4 openings (July 1st, 18th, 19th & 21st)
OUTSANDING OPENING (400 loggings): 1 opening (July 1st)
CLASSIC OPENING (600 loggings): 1 opening (July 1st)

BREAKDOWN BY MUF (maximum useable frequency)

MUF noted	#openings this high	percent of season	APR	MAY	JUNE	JUL	AUG	SEP
up to 108 Mhz+	4	5.40%	0	0	1	1	0	0
up to 107.9 Mhz	11	14.86%	0	2	2	5	0	0
up to 105.1 Mhz	31	41.89%	0	8	8	13	2	0
up to 100.1 Mhz	42	56.76%	0	9	14	15	3	0
up to 98.5 Mhz	46	62.16%	0	9	15	16	3	0
up to 96.1 Mhz	51	68.92%	0	10	15	19	3	0
up to 92.1 Mhz	58	78.38%	1	15	17	20	4	0
up to 88.1 Mhz	74	100.00%	1	16	21	23	5	0

Totals don't add up because of 2 openings w/unknown MUF, and Jan, Feb, and Oct. openings

A look back on previous E-skip seasons...

YEAR	TOTAL	#days	aver	Apr.	May	Jun.	Jul.	Aug.	Sep.

TOTAL	55324	1059	52.24	369	9150	23381	18245	3065	130

Back to reality, after last year's season! This season may have seemed very bad, in comparison to the amazing totals from 1994, but it was actually better described as a mediocre season, right in the middle of the pack at 8th out of 15. It could have been much worse, as May & June were very sub-par, starting the summer out on the road to disaster. July salvaged the 1995 season, by giving us the best July skip month on record! The highlight of July was clearly the first day of that month. With 712 loggings, July 1st was more than twice as big than any other 1995 opening, and also the third biggest skip opening of all-time, behind 6/11/86, and 6/29/87. That day alone had 75% more loggings as the whole month of May, and nearly as many loggings as all of June, the usual hot skip month. 9

1995 TV E-skip Report

Monthly report:

Month:	Loggings:	Es days:	Avg:
December	40	8	5.00
January	20	7	2.86
February	19	6	3.17
March	none		
April	9	5	1.80
May	348	28	12.43
June	1146	30	38.20
July	1447	30	48.23
August	264	20	13.20
September	14	6	2.33
October	31	8	3.88
November	53	12	4.42
Summary	3391	160	21.19
Improvement vs. 1994	50.51%	35.59%	11.02%

Total loggings are all Idd Es signals reported to ETV or WTV. Es days are all days on which at least one DXer reported skip, Idd or not. Average is the average number of stations Idd (by all DXers) per day.

Best days:

	Date:	Total:	Rptrs:	MUF:	Avg:	FM Rank:

Total: Count of all Idd Es loggings reported this date.
 Rptrs: Count of all DXers reporting at least one Es logging this date.
 Avg: Average number of loggings per DXer on this date.
 MUF: Maximum usable frequency reported.
 FM Rank: Ranking of this date in Greg Coniglio's FM Es report.

1995 TV E-skip Report contd.

1995 TV Skip
Loggings per day

In terms of quantity, 1995 wasn't that good of a year at my location. Obviously, it was better elsewhere! There was a 50% increase in loggings, and there were 42 more skip days than in 1994. And in 1995, there was only one skip-free month. (March) As in 1994, skip was reported every day in June - but in 1995, there were only two skip-free days in May, and only one in July. Skip was reported every day from May 20 to July 26!

High-band skip was reported on two days, June 7 and July 1. This year, two DXers were able to identify high-band skip - both saw CIPA-9 from Alberta. Otherwise, the MUFs look relatively low. My guess is this means people were abandoning their TVs when the MUF reached FM - keeping some of the better days off the TV chart.

July 1 was my best day of skip ever, and the statistics show other DXers shared in the bounty. At my location, the opening lasted nearly 12 hours. All parts of North America were in this opening at some time. Caribbean stations were also heard here in Tennessee, and I contacted a Costa Rican amateur on 50MHz.

The pest list don't show any major surprises. WTVJ-4 might have shown better if not for the call/channel swap with WCIX-6 which took place in 1995. (I think several loggings of this station were credited to WFOR-4 or WTVJ-6)

The worst pests in 1995:

WPBT-2	(126 loggings)	KTWO-2	(36)
WESH-2	(108)	WTVJ-4	(36)
WEDU-3	(86)	KTVK-3	(33)
KNAZ-2	(80)	WUND-2	(33)
KPRC-2	(60)	KIII-3	(31)
WCBD-2	(59)	WMAR-2	(30)
KENW-3	(57)	KOTA-3	(30)
KMID-2	(45)	XEFB-2	(28)
KWGN-2	(40)	XHBC-3	(27)
KGAN-2	(37)	KDKA-2	(27)

Good luck in 1996!

Doug Smith (thanks to Greg Coniglio for FM ranks & MUF)

CALL LETTER CHANGES

Was Now City, state
WEVU-26 WZVN-26 Naples, FL
W25BM WYGN-LP Berrien Spns., MI
WTZA-62 WRNN-62 Kingston, NY

WZVN stands for "Seven", the station's cable dial position. This station only mentions channel 7 on the air.

NETWORK CHANGES

Station	Was	Now
WNAL-44 Gadsden	Fox	ABC/Wb
WAAY-31 Huntsville	ABC	ABC/Upn
WPMI-15 Mobile	Fox	NBC
WCFT-33 Tuscaloosa	CBS	ABC/Upn
K32ED Ft. Smith	new	Upn
K36EA Fayetteville	new	Upn
KSTV-57 Ventura	Gala	Wb
WMBB-13 Panama City	ABC	ABC/Upn
WXTX-54 Columbus, GA	Fox	Fox/Upn
W58BT South Bend	ABC	ABC/Upn
W69BT South Bend	ABC	ABC/Upn
K69HD Church Pt LA	new	Upn/Wb
K46DG Lafayette LA	new	Upn/Wb
K62DW Lafayette LA	new	Upn/Wb
K55HA New Iberia	new	Upn/Wb
KASY-50 Albuquerque	new	Upn/Wb
KRQE-13 Albuquerque	CBS/Upn	CBS
KRXI-11 Reno	new	Fox
KAME-21 Reno	Fox/Upn	Upn
WICZ-40 Binghamton	NBC	Fox
WLYH-15 Lancaster PA	CBS	Upn
KFNB-20 Casper	ABC/Fox	add Upn
KFNR-11 Rawlins	ABC/Fox	add Upn
KFNE-10 Riverton	ABC/Fox	add Upn

The WICZ change is effective April 4. WNAL and WCFT change in early 1996 when WBRC-6 goes Fox. WCFT has already added Upn, and WNAL has already added Wb. In New Mexico, the KRQE change only affects that station. Its satellites KREZ-6 and KBTM-10 continue to carry Upn.

K32ED and K36EA simulcast, and call themselves "KFDF". And all four Louisiana LPTVs also simulcast; their "fake calls" are KLAF.

The Toledo network swap has now happened - WTVG-13 from NBC to ABC, WNW-24 from ABC to NBC. In Reno, KRXI-11 is not yet on the air but is expected to sign on in January, at which time these network changes take place. Greg's friend Chip says KRXI and KAME have some kind of LMA arrangement with KTVU-2 Oakland/San Francisco.

NEW STATIONS ON THE AIR

Albuquerque, NM: KASY-50z:
1420kW/1275m; 35°12'40"/106°26'57"
Sandia Crest, the Albuquerque antenna farm. LMA'd to KRQE-13; Upn and WB affiliate. Reported by a friend of Greg Coniglio's in Texas.

Nashville, TN: WNAB-58z:
3980kW/240m; 35°55'20"/86°42'46"
about midway between Nolensville and Clovercroft in northeast Williamson Co., about 20km S of downtown Nashville. WB affiliate; signed on November 11. Also airs lots of MOR Music Video.

CHANGES ON THE AIR

Ch	Call	Location	VUD issue
7	WBBJ	Jackson, TN	?
9	KIXE	Redding, CA	?
13	WPRV	Fajardo, PR	?
23	KBSI	C. Girardeau MO	2/95
44	WGVP	Valdosta, GA	8/95
55	WBNX	Akron, OH	?

OTHER STUFF

It doesn't say so, but I'm almost certain the power reduction for KELO-11 Sioux Falls is actually for an auxiliary backup transmitter.

The WTZA=>WRNN call change accompanies a programming change. WRNN stands for "Regional News Network"; the station airs an all-news format similar to KNWS-51 in Houston. Speaking of KNWS-51.. I spent a night in Houston on vacation in mid-December and had an opportunity to watch this unique station. As advertised, KNWS is a mix of All News Channel, local news, and the occasional infomercial.

And while we're on the subject of Texas... First, I also spent a night in San Antonio and saw the all-traffic LPTV on channel 54 there. It looks like their cameras don't handle low light very well - at night, the "TransGuide(tm) LPTV Test" ID was over a black screen. Daytime, the camera shots were pretty good - to the point they delayed my departure a half-hour to avoid some problems!

Secondly.. I think I've seen my first pirate TV station. Spent a night on South Padre Island. (which, incidentally, is a beautiful place I'll definitely be visiting again!) While there, noted a pretty good signal with ESPN on channel 12. Normally, I'd consider this a cable leak. But no other VHF signals (not even locals XHRIC-2/KGBT-4/KRGV-5/XHAB-7/XERV-9/XHER-11) could sync-lock the TV, and there weren't even sync bars on channels 3/6/8/10/13. So it appears that for some reason, someone is relaying ESPN there on channel 12. No local ads or IDs were seen. There is no license or CP for channel 12 anywhere near South Padre.

The WLYH network change ends an unusual situation, dating to the early days of UHF and created by the poor coverage of early UHF stations. For many years, the Harrisburg-Lancaster-York market had three CBS

(Other Stuff, contd.)

affiliates - WHP-21, WLYH-15, and WSBA-43. For much of this period, because of low power and "wimpy" UHF tuners, the three stations had no overlaps in coverage. But TVs improved, and all three stations improved their coverage. In the mid-1980's, WSBA "blinked" first and became Fox affiliate WPMT ("Pennsylvania's Movie Time"). Now, WLYH has been LMAD to WHP and switched to UPN, ending the multiple-affiliates situation.

FORUM

Karl Zuk, Croton-on-Hudson NY:

Karl has some LPTV notes from his location north of New York City.. Specifically:

W17BM NYC - now on air with The Box until 10:30am weekdays, then "KTV" Korean Television. Transmitter is on the Empire State Building.

W23BA East Orange, NJ - The Box 24 hours.

WXNY-LP-39 Long Island City - has just moved from 3rd Ave. and 91st St. on Manhattan to the Citicorp Building in Long Island City. This was formerly W38AM. Programming is ethnic and tarot-card readers, and is simulcast on W54AY Brownsville (Brooklyn), W44AI Hicksville (Long Island), and W38CH Amityville.

W64AA NYC - now on as a WPIX-11 translator.

W64AA and W17BM have interesting ancestries. Quoting Karl, "About 20 years ago every VHF and UHF station in Manhattan had a UHF twin. The idea was to beat the ghosting created by the new World Trade Center. All were eventually turned off - but the licenses were still held. Ch. 11's original translator was on channel 71 (maybe) and had to abandon it when the band condensed down to Ch. 69 - they were then assigned Ch. 17 - directional north. They have just given up Ch. 17 so the Korean W17BM could happen, and they have transferred the ownership of Ch. 64 from WNYW to WPIX."

I remember reading about these translators in a 1973 copy of Broadcasting Magazine. My current database lists four LPTV / translators in NYC, all four of which I'm pretty sure date back to the early 1970s. I list W17BM and a W73AP as owned by WPIX-11; W64AA as owned by WNYW-5 (and now transferred to WPIX-

11); and a W53AA which carries Asian programming. If my memory serves me properly, the Asian group bought W53AA from WCBS-2.

Karl also has information about new all-news station WRNN-62 Kingston. The slogan is "Regional News Network", and programming is half-hour blocks of either local news or infomercials. (again, very similar to KNWS-51's fare) There's some half-hour local talk programs during the evenings, and Rush Limbaugh's TV show is carried weeknights at 9:30.

Dennis Park Smith, Santa Barbara CA:

Dennis asks an interesting question. "As for its progression of call letters, I wonder what will happen when the FCC gets to 'K132Z'? What then, after that? Maybe they will fill in expired / deleted calls; there are plenty of those."

Good question; I'm not aware of any FCC policy on that. Dennis is right, there are plenty of expired & deleted LPTV/translator calls.

William Draeb, Kewaunee WI:

Bill notes one of the advantages of the Fox Surprise.. WLWK-11 now has a regular dark period. He hasn't noted what time they sign off, but they return with a test pattern at 04:50, then with CNN Headline News at 05:00. WFRV-5 has followed suit, signing off most nights but airing test patterns other nights. WBRV-2 still operates all night, except on weekends.

Bill also inquires about new CPs for channel 4 at Crandon and 34 at Eagle River. I've nothing beyond what you read in the column. He wonders if the channel 4 site might be on Sugarbush Hill, the second highest point in Wisconsin. (I thought Rib Mountain was the second highest point!) I don't know. Bill also isn't yet seeing the wireless-cable systems from Traverse City, Petoskey, or Sault Ste. Marie, Michigan.

SATELLITE NEWS

George W. Jensen
4604 Anntiana Avenue
Baltimore MD 21206-4220

Things are either feast or famine when it comes to satellite news. I haven't forgotten about getting some info here on sub-carriers, but time has been very limited lately and this effort will take many hours to compile. In the meantime, a few notes on new services and the current menu of services on the newly activated Telstar 402R

- XPDR -
2 - TVN Promo Channel
4 - Shop-At-Home
7 - Cable Video Store
10 - Cupid VC2
11 - Outdoor Channel
12 - XXXotica VC2
15 - Spice VC2
16 - Adam and Eve VC2
18 - RTP - Lisbon, Portugal
19 - Channel America
20 - Occ. Book TV
24 - Pandamerica Shopping Channel

My sincerest appologies to Canadian readers for referring to the Anik birds as the pron birds. It is sad to note that many of the services on the new Telstar 402R seem to be going that route. On the Ku side of Telstar 402 - there is an ID channel IDing as T-402R, 9A Vertical - in black and white - noted using a Uniden receiver at 17 H.

By the time you read this - hopefully, the new Galaxy 3R will be in orbit at 95W and testing.

Orion at 37.5W is lighting up and currently is carrying Asia Net on a horizontal transponder in PAL format.

Look for occasional Russian services on Gorizont 26 at 11W XPDR 6 in SECAM color format with a fairly decent signal.

Last column I mentioned birth (Telstar 402) and death (Galaxy 3) and this month Resurrection with the reactivation of BrazilSat at about 63W in inclined orbit and rebeamed toward the U.S. ID channel in NTSC color format had been noted on XPDRs 4 and 8 with occasional feeds from The Dominican republic noted on XPDR 4.

Lastly and by no means least follows a list of new proposed services. This was reported in a recent issue of Broadcasting and other sources.

- Action America - 1996
Air and Space Network - 1996
American Political Channel - 1996
America's Health Network - 1996
America west Network - 1996
Applause - 1996

* VERIFIED.

COLUMN DEFINITIONS: are as follows: Total = Total number of TV stations logged from DXer's location (All loggings should be received within 25 mile radius of this location to count.)
Freq. changes count as a station, call letter changes DO NOT count. Also count a station only once regardless if logged by different propagation modes. UHF = All stations logged from CHANNELS 14 TO 83. Es=Total number of stations logged by E-skip. MS=Total by meteor scatter. Au=Total via Aurora. USA=Total number of states and the "+" = Washington, DC. CN=Number of Canadian provinces logged. MX=Number of Mexican states logged. PO=Number of foreign countries, but not Canada/Mexico. TPU (Total number of political units)=Sum of USA CN MX and PO. YB = The year you began DXing from this location. Other groundrules for computing log totals are included in VUD Issue 2/95. Note: Some of you need to get current and submit your latest stats to keep on the Scoreboard. Also submit any distance records, states stats and personal best statistics. Send via E-mail or snail mail. 73 - Fred.

WTFDA DX AWARDS PROGRAM

Annual DX Logs: - FM 1st Place & Runner Up - TV 1st Place & Runner Up
(Notes 3 thru 4 Apply. No relogs.)
Annual Records: E-Skip greatest distance - 1st Place FM/TV 1 ea.
Tropo greatest distance - 1st Place FM/TV 1 ea.
Au greatest distance - 1st Place FM/TV 1 ea.
MS greatest distance - 1st Place FM/TV 1 ea.
(Notes 1 thru 4 apply, except relogs are permitted)
Single Day Event, Greatest log 24 hrs: E-Skip: 1st Place Tropo: 1st Place
Au: 1st Place MS: 1st Place
The continuous 24 hr period may cover parts of 2 calendar days.
Hall of Fame - FM 2000+ logs - TV 1000+ logs
(Notes 3 thru 4 apply. No relogs.)
See Notes on next page

WTFDA DX AWARDS PROGRAM

Notes:

- Greatest distance entries will be recalculated by Statistics Editor-using DXers location and stations city of license grid coordinates.
- Records must be log documented: i.e. Date/Prop/Time/Freq(MHz/Ch)/Call/Location/ID criteria.
- Loggings are to be in accordance with groundrules for computing totals cited in the Feb 95 VUD. (1 DX location only, within 25 mi. radius).
- 1995 Entries will be accepted for loggings made 1/1/95 thru 12/31/95. This program is open to current WTFDA members who submit entries via e-mail or snail mail. Cutoff date for submitting entries to Statistics editor (Fred Nordquist) will be 1/31/96. Announcements of recipients of DX Awards will be published in the March 96 VUD Statistics Column. Certificates will be prepared by Jim Thomas (Old West Graphics) who will mail them to recipients in March 96.

Now is the time to review your 1995 logbook and tally up those statistics. You may be in the running for some of these awards! As a bonus to award winners, I'll donate a printout of your personalized DX distances that I offered in the FM Scoreboard! According to the Scoreboards it appears that 1st Hall of Famers may be claimed by Jeff Kadet/Bob Seybold (TV) and Keith Fugh/Ralph Strobel/Danny Buntin/plus maybe a couple of others? (FM). Happy Holidays! Any suggestions for improving future DX Awards programs are welcome
73-Fred.

COLUMN DEFINITIONS: are as follows: Total = Total number of FM stations logged from Dxer's location (All loggings should be received within 25 mile radius of this location to count.) Freq. changes count as a station, call letter changes DO NOT count. Also count a station only once regardless if logged by different propagation modes. 88-92 = All stations logged from 88.0 to 91.99 Mhz. Es=Total number of stations logged by E-skip. MS=Total by meteor scatter. Au=Total via Aurora. USA=Total number of states and the "+" = Washington, DC. CN=Number of Canadian provinces logged. MX=Number of Mexican states logged. PO=Number of foreign countries, but not Canada/Mexico. TPU (Total number of political units)=Sum of USA CN MX and PO. YB = The year you began DXing from this location. Other groundrules for computing log totals are included in VUD issue 02/95. Note: Now is the time to update and submit your latest stats to keep on the Scoreboard. Also submit any distance records, states stats and personal best statistics. Send via E-mail or snail mail. Laserjet printouts of personalized DX distances now covering >6000 FM/TV cities in the Americas north of the equator, with choice of miles or kilometers, are available for only \$2 donation. Include your DX location and grid coordinates with your order. 73...Fred.

EDITED FOR THE 'VHF/UHF DIGEST' BY TOM BRYANT,
849 TODD PREIS DR., NASHVILLE, TENNESSEE, 37221

Here's a reprint that goes back almost 46 years. Mt. Wilson still bristles with towers...but a lot of the call letters have changed. So has the cost of building a station! Get a load of the \$150,000 price tag for the construction of KNBH.

Mountain Top TV CITY

By
CHARLES D. PERLEE
RADIO & TELEVISION NEWS

California's Mt. Wilson, once famed as the home of the 100-inch telescope, is gaining an even wider reputation as a TV and FM transmitter site for Hollywood stations.

SOUTHERN California's Mt. Wilson, long famed as the home of the 100-inch telescope, has lost some of its importance as an astronomical center with the installation of the 200-inch telescope at Palomar Mountain, also in Southern California. However, Mt. Wilson, almost 6000 feet high and close to the Southwest's center of population—Los Angeles, Pasadena, Glendale, etc.—is not playing second fiddle to Palomar even though Palomar is practically perfect for stargazing because of the clearer atmosphere.

With the advent of television, Mt. Wilson has become the world's largest center of video transmissions. Television programs originate in Hollywood but they are beamed to Mt. Wilson 18 miles away. By transmitting from Mt. Wilson it is estimated that the programs can reach 500 per cent more listeners than could be served if the programs were beamed directly from Hollywood. The Mt. Wilson transmitters, located 5000 feet higher than Hollywood, telecast Milton Berle and other TV favorites onto screens in homes up to 100 miles away. This means a potential audience of 6,000,000 in Hollywood's primary service area within the next decade.

As of October 1st the Los Angeles area's seven television stations were programming for an estimated 213,000 video screens in Los Angeles, and its neighboring cities.

Although the major emphasis has been placed on television transmissions from Mt. Wilson, other services are sharing this advantageous location. Both FM and mobile radio-telephone material is handled by these mountain top transmitters. At present there are six TV and several FM transmitters in operation at the "Mountain Top TV City," but 21 other sites have been leased or purchased, the FCC having approved a total of 27 licenses. Six other transmitters are now under construction at Mt. Wilson. In addition to the 27 licenses, 13 other television and/or FM broadcasters are jockeying for positions on this crowded mountain peak.

Earle C. Anthony, pioneer car dealer and long-time owner of station KFI, believes in the future of TV and FM broadcasting so wholeheartedly that he has purchased an entire mountain, Mt. Harvard, sister peak to Mt. Wilson, for his long-range expansion program.

Mt. Wilson, once a quiet astronomical center and the goal of nature-loving hikers and motorists, is now a bustling "city." Buildings and antenna towers have sprung up all over the mountain top. Lumber, cement, and equipment-laden trucks make a steady roaring "parade" along the 30-mile route, of which famous Angeles Crest Highway is a part, from Los Angeles to Mt. Wilson.

The intricate "brains" of Television

City are housed in the huge rock building of the Pacific Telephone and Telegraph Company. Through this headquarters goes the cable from all of the stations in Hollywood. The building also houses the "eye" for the new mobile telephone system. Transmissions from automobiles operating in the vicinity of Los Angeles are picked up by a station located at Griffith Park Hills. From this point the message is beamed to Mt. Wilson and then to Mt. San Jacinto, the peak which overlooks Palm Springs, and from there to the home or office of the called party. Voices of motorists can now be heard exceptionally well on long distance calls and a decided improvement in transmission quality has been effected due to the high mountain beaming.

Mt. Wilson even with a Television City on top hasn't changed much. The score or more of new buildings are appropriate to the surroundings although the antenna towers, parabolic receivers, and radar-like transmitters do provide a startling contrast to the Ponderosa pines and big-cone spruces. The famous old Mt. Wilson Hotel still looks as it did 30 years ago, while nearby the six telescopes and sun towers of the Carnegie Institute's Observatory are still the scene of stellar discoveries and daily computations. The hotel's A. C. Childs gives his nightly astronomical lecture, although he now extends his remarks to include the newer wonders of TV and FM.

The peak's herd of 30 mule deer hasn't been frightened away by this new invasion of their domain and they and seven species of birds and a large congregation of gray squirrels are still getting their free meals of ginger snaps, fruit, and peanuts from visitors. This is one place where wild animals still have complete faith in humans and so far their faith hasn't been misplaced.

Mt. Wilson's human population is growing by leaps and bounds. There is often so much snow in this area that autos cannot traverse the slip-

pery, precipitous roads. To eliminate this necessity, radio engineers and their families are now being housed right at the transmitter sites. It may be hard for Easterners to believe that Southern California can be the scene of devastating snowstorms but Mt. Wilson often receives as much as 30 inches of snow in a single storm. The TV people learned their lesson last winter when they didn't have engineers on duty 24 hours a day. A heavy storm hit the area, the snow piled up to over three feet, lightning struck and blew out the power system, and the

engineers were snowbound at the bottom of the mountain! Video screens and FM sets in hundreds of homes were blank while engineers were scrambling peakward with dogsleds, snowshoes, and skis. That situation won't arise again. Engineers now live right at the transmitters 24 hours a day.

Thus a new and specialized "city" is growing up, 6000 feet above sea level and within easy driving distance of Los Angeles and its tremendous television market potential.

Over-all view of "TV City." This concentration of transmitters means improved reception for set owners. A single antenna oriented in one direction covers all broadcasts.

Mt. Wilson's "younger set," children of resident radio engineers, pose beneath KTLA's giant parabolic TV receiving horn.

A close-up view of Mt. Wilson's "TV City" showing the seven TV and FM towers already installed. This number will eventually reach 27 when all of the stations licensed by the FCC for this area go on the air. Television stations KTTV, KNBH, KECA-TV, EFL-TV, KTLA, and KLAC are now transmitting regularly from Mt. Wilson. KTLB, which is now transmitting from Hollywood, will soon have facilities at Mt. Wilson location.

Part of the telephone company's relay setup for mobile radio-telephone service. Messages are relayed from Griffith Park Hills to Mt. Wilson, thence to Mt. San Jacinto.

KCNH, NBC's Hollywood outlet shown during construction at Mt. Wilson. This \$150,000 station is now on the air daily.

Two of the antennas on Mt. Wilson. TV unit (left) and FM tower (right) are each 199 feet high.

Is it TV or FM?

Your conductor likes to listen to classical music. At one time, in the not too distant past, we in the San Francisco Bay area had two classical music stations to listen to on AM, KKHI and KIBE. Now we have none! No problem, just tune in KKHI or KDFC on FM-if you've got an FM radio in your car or truck. I don't, and at least KKHI leaves a lot to be desired in the FM band. You see, they sold their AM station (and their AM & FM frequencies), and eventually showed up again in Marin county. Their AM signal was hardly detectable in the mid-peninsula and eventually they gave it up. They managed to get two adjacent FM channels, 101.7 and 101.9, one for a low power translator for San Francisco. Both are subject to dropouts when received in a car traveling through our hilly terrain.

During the first week in December, they announced that they had added 500,000 Watts of power for the southern peninsula, that they could now be heard on the second audio program (SAP) of San Francisco's TV channel 38, KCNS. Perhaps 500,000 Watts is stretching it, as the SAP doesn't get all the audio power. Nevertheless, the transmitter is on the TV tower (1443') and offers better coverage than the FM translator.

On my R-7100, the SAP appears 75 kHz above and below the main TV audio (619.75 MHz). (One hears both audio signals when tuned in this way.) Note that the station can and does transmit stereo sound as well as SAP. For the first audio program, FCC rules specify a deviation of ± 25 kHz for 100% modulation, but capability of deviation out to ± 40 kHz. I guess the SAP has ± 25 kHz as well.

The second channel audio is transmitted on a subcarrier, in this case it is 75 kHz. Tuning about, I see some TV stations have a subcarrier of 100 kHz, and some are rebroadcasting their main audio.

I found that we have one TV set that will receive SAP. It's the button labeled STR/L2, and L2 brings it in fine. I guess it's too much to hope for in the near future, but I'd like a receiver for my car (which doesn't even have an FM receiver) that would receive TV SAP. Do any of our readers know of a receiver for SAP for either TV or FM?

Not knowing any better, and being more interested in the propagation than in keeping records, I am reporting almost everything I receive (in the mail), including reception of just the video carrier frequency. Trouble is, it's hard to identify a station with the limited information there. (One can identify the vertical and horizontal repetition frequencies and direction of arrival, but that's about it.)

I would assume that for record, identification of a picture would be necessary. Perhaps I'm wrong, and an audio-only ID is sufficient. How about teletext reception (which is more difficult than either audio or video)? At any rate, the observation I have described is a reception of KCNS-38, a TV transmitter, even though the program material is that of KKHI.

Addendum: I was curious about what the local VHF stations were transmitting on SAP, if anything, and have compiled the following list.

Channel	Call	City	SAP (kHz)	Content
2+	KTVU	Oakland	80	Spanish
3x	KCRA	Sacramento	None	
4-	KRON	San Franc.	100	Duplicate

It is difficult to measure the exact offset with the R7100. The wide-band FM filter is too wide, and the narrow one too narrow. These measurements are probably within 2 kHz, however. Some of the other stations may have SAP (or SCA, second channel audio as it called on FM) at other times than when I listened.

I received a report from Anthony Mann in Perth, Australia with a lot of good DX, but no IDs. I have taken the liberty of aiding him (and the reader) by presenting my best guesses in { ? } as to where the stations could have been.

A. Mann, Perth, Western Australia.

Equipment:

Icom-R7000, Mitsubishi DA-F10 analog FM tuner, Crossfire 3617A rotatable, horiz pol, 7 el FM Yagi fixed, east, vert. pol.

Note: 55.2X is from the north unless otherwise noted, bfo = signal level only audible with bfo on.

There's been some more DX as far as NZ (MUF 55.25) to the east and some one-hop FM on the 28th of November.

Conditions seem to be improving.

Dennis Park Smith, 3703 Dixon Street, Santa Barbara, CA 93105-2419 (805)687-7803

Equipment:

Mobile: 1990 Radio Shack Realistic Pocketvision 23 LCD 2 1/2" color with 2' whip; 1994 Radio Shack 16-124 CRT 5" b&w with 3 1/2" whip. Residence: Early 1970s Sears 564.50010000 9" b&w with rabbit ears & bow-tie; approx. 1975 Sony KV-1214 12" color with rabbit ears & bow-tie; occasional access to 1987 MGA-Mitsubishi CS-1344R 13" color with indoor 2-bay bow-tie-reflector.

This report covers October and November 1995.

One bit of news is the addition of a used Sony TV, noted above, to my equipment collection. The only thing to report is the usual tropo to San Diego/Tijuana (175-200 miles), with the usual stations on channels 6-69. It has not been consistent but still often. An occasional cold front comes through, stirring up the air with the tropo disappearing, but in between fronts, the inversion layer returns along with the coastal tropo. The winter season has not really taken hold here yet. One such good evening, on November 23 at about 7:40 PM brought a new tentative logging of LPTV K35DG, University of California, San Diego (approx. 175 miles). More station information has been sent to the TV News column.

Jeff Kruszka, 5024 S. Braxton, Baton Rouge, LA 70817

- Antenna installed in attic (finally). 20' AGL. RG-11/U coax (new).

John Ebeling, 9209 Vincent Ave. So., Bloomington, MN 55431

Had a little off-season Es up here in MN. On 11/21 had channel 3 from Hartford, CT (WFSB) with a very good pix from about 4:45 to 5:30 PM. Didn't write the call down & my reference material is up north at the cabin. Channel 21 in Duluth (KRBR) must have increased their power somewhat, as last week I was able to get a snowy pix for the first time ever at the cabin, which is only 26 miles away as the crow flies from Duluth. Again, I cannot be sure of the calls -- sorry. Was out in the San Francisco area in early November. Wife & I spent a week enjoying the scenery. Also visited friends in Morgan Hill. Had super weather during our visit.

Keith K. Smith, 7601 N. Hwy VV #95, Columbia, MO 65202 (573)443-1750.

Equipment:

Funai FC1300T TVCR with (cc) decoder.
Co-tenant's antenna.

WBSL 46 MO	102
KCTV 5 MO	116
unID 13 Note #2	

Notes:

1. KMIZ-17 is carried on cable channel 12 here. My co-tenant's set is hooked up to it, but my set receives the spillover from the line. KMIZ was off at this time.
2. KRCG was off. Could this be WIBW? If you see KNLJ-25 airing cartoons on Saturday afternoon, you're not seeing things. Larry Rice is putting on ch. 25 every syndic cartoon/kids show he can legally get his hands on, so the Saturday children's lineup goes from 6AM to 4PM, a full ten hours! (try saying that about any other TV station in the country!) KNLJ has picked up the kids' WB cartoons (but not the WB comedies); this apparently marks the end of full-power independent TV in the state of Missouri. Every channel in the state now has at least one network affiliation! (KNLC-24 is affiliated with the Fox Kids Network, since KTV1-Z was too stubborn to

take it! I recently saw KOZK-Z1 running what appeared to be a Muppet drama with all pigs in it... but during 3-5AM... very unusual.

NOTE: the area code is not a misprint... as of January 8, the 573 area code will replace most of the area covered by 314, which will revert to the metro St. Louis region.

Note #1 IDed by my wife Sandra while I was away from the TV.

November 1994 was a good month for TV-DX. November 1995 was probably better than this report indicates. I was away from the TV more than usual. Another problem was that I did not have a UHF antenna in operation throughout much of the month. The brand-new ArcherotorB broke down after only a few rotations! After taking the new UHF set-up down to replace the rotor, it took a while before I put it back up.

Fernando Garcia has informed me that there is indeed a channel 4 in Puerto Vallarta. Thank you, Fernando.

ERIC BUENEMAN (N0UIH), 631 Coachway Lane, Hazelwood, MO 63042-1347 phone (314) 839-9751 (Internet: EBSDJDX@aol.com)

Equipment:

Alaron 12-inch b&w television, Radio Shack VU-110 VHF/UHF/FM antenna with Archerotor at 33 feet above ground level.

All times CST, all distances in miles/kilometers.

December 14, 1995 (trop)

2322	WTVW	7	IN	Evansville ("Fox 7")	165/264
2323	K64DT	64	MO	St. Louis (back on w/ValueVision) 15/24	
2324	WEVV	44	IN	Evansville (now CBS)	165/264
2324	WDRB	41	KY	Louisville ("Fox 41")	250/400
2325	WBMB	40	IN	Indianapolis	240/384
2326	WLKY	32	KY	Louisville	250/400
2326	W28CI	28	IL	Salem (3ABN //R48DN)	75/120
2328	WCEE	13	IL	Mount Vernon (not yet Christian) 110/176	
2332	WKEF	22	OH	Dayton 340/544	
2335	WCFF	49	IL	Springfield (//WCIA-3)	80/128
2335	WXIN	59	IN	Indianapolis (w/"Danny Bonaduce") 240/384	
2337	WKOI	43	IN	Richmond	300/480
2340	WXIX	19	KY	Newport/Cincinnati, OH (w/"Danny") 325/520	
2345	WEHT	25	IN	Evansville (now ABC)	165/264
2358	WCLJ	42	IN	Bloomington	210/336

The big three-way switch has occurred in Evansville, with WTVW-7, long the ABC affiliate, switching to the Fox network. Longstanding CBS affiliate WEHT-25 switched to the ABC network, and WEVV-44 picks up CBS. I noted WTVW, along with WXIX-19 and WXIN-59 carrying "The Danny Bonaduce Show", but wasn't noted on the local Fox affiliate, KTVI-2. WCEE-13 is scheduled to go to a Christian format soon, having noted them still carrying "Star Trek-The Next Generation". All of the Evansville stations (except WFIE-14) were noted with Grade B signals, along with 40 and 59 from Indianapolis, as well as 19 from metro Cincinnati. K64DT is now back on the air after being dark for several months, still with ValueVision. Signal still weaker than K18BT, K58DH, and, to a lesser extent, K62EG (who have been stronger as of late, since they switched to EWTN). Also noted K48DN now on with 3ABN, as Keith Smith noted before moving to Columbia, MO, but on a different antenna heading than the other St. Louis LPTVs. K48DN is almost as strong as the other St. Louis LPTVs. Barring further trop, thus endeth the logbook for 1995. Total now at 207.

With this super opening I got my longest tropo signals to date surpassing the 1400 miles and getting first time tropo from North Carolina (previous via Es) Many stations were running bars (Monday morning) making it easier to get IDs. It peaked around 6 AM getting WRAZ near snow free. I saw weather report with high pressure area on the Atlantic coast between North Carolina and South Carolina and a cold front reaching the area. 28 Tr 1600 W14?? PA ??
see note #1

0829 WPBO-42 OH 329
see note #2

NOTE:

- 1) Channel 14 seen Saturday the 28th afternoon with 'TBS' logo and programming that was time shifted Sunday morning running 'Nick at Nite'. The station location I would guess to be in Pennsylvania. Antenna heading is 150°. Signal is weak with some fading (at the top & bottom of the hour) but never a total fade out. About three weeks earlier I seen a channel 14 carrying WGRZ-2 Buffalo. Best reception was in the direction of WGRZ's tower (355°). This signal also faded in and out. Are both channel 14s nothing more than someone's wireless rabbit?
- 2) Channel 42 IDing as WOSU channel 34 Columbus. WPBO Portsmouth is listed as the only channel 42 in Ohio.

Some TV E-skip noted on November 16th and 21st. Fair morning and evening tropo enhancement through October and November with reception out to 400+ miles on occasions.

Dave

Equipment: Sears 19" color stereo TV; Archer VU-160 for VHF; RS corner-reflector for UHF, with CM-7475 preamp.

October 1995 DX

10 Tr 0011 New Orleans 20/26/32/38/49 (475) (note #1)
 Jackson MS 16/29/40 (340)
 0034 KNOE-8 LA (406)
 17 Gw 0930 WJFB-66 TN (42) (note #2)

Note #1: WUPL-54 probably not seen. Sync bars were in but Huntsville was also up, it was probably WZDX.
 Note #2: Lebanon local back on the air after about 3 years. Running Weather Channel with frequent supered IDs. In this same area, WNAB-58 is expected on sometime in November, as a WB affiliate. Their antenna is in place, and they've begun hiring staff.

Comments:

Not much to report, it's been FLAT!

Regarding some other reports in the November column..

In William Hepburn's report, about a tentative W17BE-NJ, this station is no longer listed. (nor is any other 17 in NJ) I wonder if it could be W17BM NYC? This LPTV has been sold, and I don't know what it's running these days.

In William Wyllie's report, the ATV-2 is probably CKCW-2 Moncton.

In Saul Chernos' report, the W61 Buffalo with music videos is W61CA.

In Dave Nieman's report, regarding the WNEP-16 translators in State College, I list channels 36 and 39 as having identical technical facilities! My best guess is their directional antennas beam in different directions to cover different parts of the city.

In Russell Miller's report, to my knowledge WFME-66 is not yet on. I wonder if he saw one of the LPTVs in your part of the country? Or WSHS with a religious program? I also find nothing that makes sense as a WJAR-10 translator on 14. (nor can I find any 14 relaying a 10, except in Idaho!)

William R. Hepburn, 35 Lockwood Rd, BRAMPTON, ON, CANADA L6Y 4T7

Equipment: Panasonic PC-29XF40R TV, JVC HR-D630U VCR & IC-R100 Scanner, CM VHF & UHF Yagis @ 47', 10 db RS VHF amp, 28 db Anteco UHF amp.

Comments: My first ES with my new outdoor antenna setup. Signal strengths almost exactly equal to my simple attic dipoles..but of course there was less co-channel QRM & CCI because of the yagi's directional properties. Channels 3 & 6 will especially benefit with the yagi (local ch 5 as well I guess). Also, for some reason, the signals from a 2300 bearing were actually strongest at a 2600 bearing. Perhaps this has to do with how the signals are being reflected off the ES cloud (geometry, angles of incidence, etc).

 0447 WJIK 90.1 NY Binghamton, call, grM, 129
 WPSB Kane PA off for the night
 0500 WVMN 90.1 OH Ashtabula, ID, gM 119
 in WCRF 103.3 family of stations

Winter has come to the hills of south western New York. The White Tail Deer and wild Turkey have moved down to the sheltered valleys and the Black Bear are hibernating. With daily high temperatures hovering around freezing and overnight lows of 10° or lower, we won't see the grass until mid April. Snow cover as of November 25th is at two foot and climbing. Despite all the negative signs, the FM band is still proving to be active. On November 19th I had some very good tropo enhancement to the Pittsburgh area but only one new logging out of it.

I'm not to sure on the calls for 90.1 Ashtabula Ohio; the signal was excellent, I just wasn't paying attention.

"Gentlemen, it's been a busy DX Year, but we're down considerably from 1994."

MODIFYING THE CM 7' DISH- MAKING A GOOD ANTENNA GREAT

by Neil Kazaross

I have spent considerable time during the last year comparing various UHF antennas, including a 3 element array of 8 bays. My results have shown that a 7 ft dish is the best commercially available UHF DX antenna. My personal comparisons have shown that the Channel Master 7 ft dish (CM7) is somewhat superior to the Antennacraft dish P7. I feel that this may be due to my problems getting the P7 into a dishlike shape. The CM7 has greater rigidity and is in a nice parabolic shape. However, I noted that the front to back ratio of the stock CM7 is somewhat less than the f/b of the stock P7 presumably due to the wider spacing of the wider CM7 reflector elements. This leads us to the first modification.

SCREENING YOUR DISH TO IMPROVE FRONT TO BACK RATIO

A few DXers have been screening their dishes over the years and have noticed dramatic improvements in front to back ratio because the screening allows much less signal to pass through the back of the dish. These DXers have usually used 1/2 or even 1/4 inch hardware cloth and one guy used window screen. While these work great electrically, they greatly add to the wind loading of the antenna, and also when heavy wet snow or ice hits the entire surface can ice up and become impervious to the wind and not only can heavy winds in a winter storm bend your mast and destroy your antenna they can bring your tower down! I decided to try to use lighter weight screening material with a wider spacing and much less wind resistance. Ordinary 1 inch hexagonal mesh chicken wire provides the ideal solution! Two years ago I screened my P7 with chicken wire and noted a clear improvement in front to back and less trouble from my Chicago pest of the back end. Then I put 1/2" hardware cloth over the chicken wire and noticed little change except in weight and wind resistance. I also added chicken wire to the CM7 and again f/b improved. On both antennas I think forward gain and beamwidth improved very slightly but the f/b improvements are a big help in today's crowded band during a good trop opening. When I used to work as an antenna design engineer, our rule of thumb for screening was that .05 wavelengths mesh spacing was as good a solid material. Well the wavelength at 600 Mhz is about 20 inches so 1 inch spacing is .05 and I noticed no degradation at channel 69 (806 MHz). So take it from me, chicken wire screen your dish. It is easy, cheap, and won't increase wind resistance that much.

EXTENDING THE PARABOLA TO IMPROVE FRONT TO SIDE RATIO

The last modification to clearly improve the CM7 is to extend the parabola out further. This has the dual benefits of making a somewhat larger reflective surface (i.e. bigger dish) and blocking some of the RF that hits the feed elements from the side. While I was at the Lake Placid convention, broadcast engineer Joe Gragg told me of this mod. First of all I made a few measurements to try to guesstimate what the equation of the parabola to form the CM7 is and came up with:

$$y = (x^2 + 9.5)$$

So to extend the parabola you need to use a sturdy material. I used fence material with a 2 inch vertical by 4 inch horizontal mesh and 4 ft height. On each side of the dish I attached a 4 ft high section of the fence material along the thick vertical rib of the CM7 on that side. Then I did a lot of bending to get it into a shape which extends the parabola per the calculated dimensions. In order to bend it into proper shape you will need to make a deep cut about half between the top and bottom of the dish of both sides to facilitate bending the straight material into a parabolic shape. Once this is done and attached to the dish with heavy duty cable ties you can fit in more pieces of fence mesh to complete the dish. My result was that the 7 ft dish was transformed into a 9 ft deep dish. The sides of the deep dish almost go out as far as the 2 bay feed of the CM7. My results show a clear reduction of signals from the side with this modification and a slight maybe 1 dB to 1.5 dB improvement in gain, and beamwidth is improved slightly. Now I can watch 18 in Davenport with considerably less QRM from Milwaukee of the side. In a recent trop opening I was able to cleanly separate Ontario 53 from Michigan 53 due to the narrow beamwidth, and similar other results are obtained across the band. The 9 ft deep dish is the best UHF antenna I have ever used. Beware the 9 ft antenna does weigh more than the 7 ft dish and I doubt you could keep it up on a roof mount, but with a good tower/rotor it should be no problem. As a final improvement I plan to extend about 3 ft at the center of both sides out slightly past the feed element to try to block more signals from the side. I did not chicken wire screen the 2 by 4 inch added mesh, but that might possibly help a bit more. The 9 ft deep dish follows the antenna engineering practice of reducing the edge taper of a dish to reduce side lobes and this 9 ft dish won't have as much gain as a 9 ft scaled exact model of the 7 ft dish would have, but it has a more DX usable pattern in my opinion. Good luck modifying your dish and if you are mechanically competent, you just might come up with better ways to do it.
